The LESSOR reserves the right to assign and convey or mortgage or otherwise encumber its rights to this lease in favor of any affiliate or subsidiary or to any party. In the event of any assignment, conveyance, mortgage, or encumbrance of the Leased Premises, the LESSOR binds itself to require the assignee or mortgage or beneficiary of the encumbrance to respect and abide by all the terms and conditions of the Contract, as well as these General Terms and Conditions.

Roadways and Access

Roadways

2.32 J. P. Laurel Avenue, a main thoroughfare, is about 20 meters wide, concrete-paved with asphalt overlay, and provided with concrete curbs and gutters, and underground drainage system.

2.33 Our informal enquiries with the City Assessor's Office – Tax Mapping Division confirmed that the Property enjoys frontage along J. P. Laurel Avenue.

Access

2.34 In reporting our opinion of value, we have assumed that there are no third-party interests between the boundary of the Property and the abutting roads and that accordingly the Property has unfettered vehicular and pedestrian access.

Environmental Considerations

Flooding

2.35 From our enquiries with the City Planning Office, the Property is not within an indicative floodplain and that there is therefore a minimal risk of flooding.

Contamination

2.36 As stated in the General Terms of Business, investigations into environmental matters would usually be commissioned from suitably qualified environmental specialists. Santos Knight Frank, Inc. is not qualified to undertake scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination.

2.37 Subject to the above, while carrying out our valuation inspection, we have not been made aware of any uses conducted at the Property that would give cause for concern as to possible environmental contamination. Our valuation is provided on the assumption that the Property is unaffected.

Highest and Best Use

2.38 "*Highest and Best Use*" is defined as the most profitable likely use to which a property can be put. The opinion of such use may be based on the highest and most profitable continuous use to which the Property is adapted and needed, or that use of land which may reasonably be expected to produce the greatest net return to land over a given period of time. Alternatively, it is that use, from among reasonably probable and legal alternative uses, found to be physically possible, appropriately supported, financially feasible, and which results in highest land value.

2.39 Considering the Property's size, shape, topography, current zoning classification and the prevailing land uses and development in the area, we are of the opinion that the **existing commercial development** would represent the highest and best use of the Property.

3 Market Analysis

Philippine Market Commentary

3.1 Shown below and on the next pages is SKF's **2020 Davao City Office Market Update**.

Source of Information

3.2 Our market analysis has been undertaken using market knowledge within Santos Knight Frank, Inc., enquiries of other agents, searches of Property databases, as appropriate and any information provided to us.

Davao City Office Market

From 2019, the office property market in Davao City grew in 2020 as the city continues to receive investments from companies expanding their foothold to Mindanao. The most notable among these new buildings is the Robinsons Cybergate Delta 2, located adjacent to Cybergate Delta in J.P. Laurel Avenue.

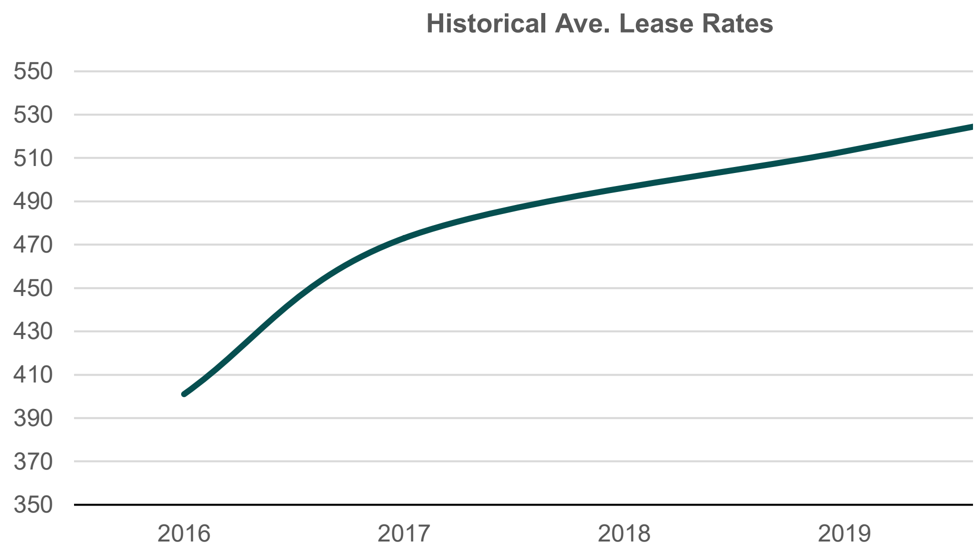
Most of the office buildings in Davao have low GLAs when compared to the office buildings in Metro Manila and Cebu. This is due to the city's smaller share of the total received investments. However, the city has been gaining popularity as evidenced by the recognition of its overall safety record and its competitiveness. In 2019, it was hailed as the 2nd safest city in Southeast Asia by Numbeo. In the same year, the city was also recognized as the most competitive by the country's National Competitiveness Council. These recognitions are expected to boost Davao City's prospects as among the best alternative cities for investment in the country.

The most notable among the office buildings in Davao City is the Davao Finance Center (DFC). Currently, it has the largest GLA and is the tallest office tower in the city. DFC is located near SM Lanang Premiere and is accessible via the J.P. Laurel

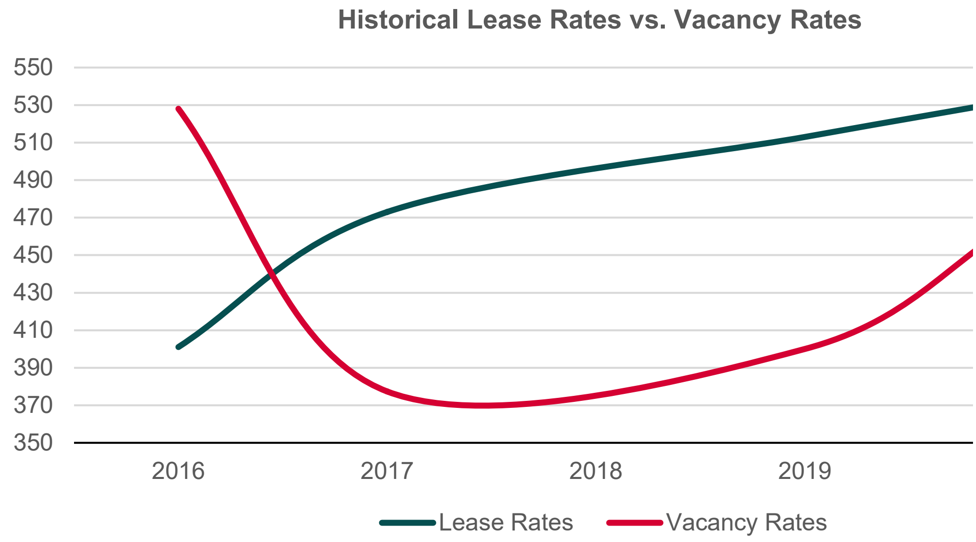
Avenue. Its location is part of Megaworld's Davao Park District which is envisioned to be a Smart Township.

Office lease rates in Davao City are typically lower than those of Metro Manila and Cebu. Currently, the office spaces at Matina IT Park command the highest headline lease rates at PhP700 per sqm due to its location with numerous accessibility routes and specialized building amenities for the BPO sector.

The weighted average lease rates within Davao City grew by 3.87% year-on-year (y-o-y) despite the current pandemic as landlords opted to give friendlier terms and discounts rather than outright lowering their prices. This trend is similar to what is happening in Metro Manila and Metro Cebu, in a bid to not undo the gains in the lease prices earned in the previous years.



Due to the ongoing pandemic and the subsequent community quarantine implementations, the overall vacancy rate in Davao City rose by around 5 percentage points. As companies implement a Work-From-Home (WFH) scheme and the decreasing revenues brought about by fewer transactions, strict movement of goods and personnel, and weaker overall consumer demand has made the rationalization of having extra office spaces difficult. As a result, more companies find themselves either having a pre-termination of their lease contracts or are simply refusing to renew them as they try to adapt to the new normal.



In the anticipation of continued growth in Davao City pre-COVID-19, several local developers in the area have begun constructing commercial buildings all over the city. Some of them were planned to have been turned over for the year but due to the restrictions brought about by the lockdowns, these structures have been delayed. As a result, upcoming office space for 2021 has increased to 29,000 sqm while some of the structures originally planned for the same year have been moved to 2022. The total upcoming office space in Davao City is now estimated to be more than 50,000 sqm and which are slated to be operational within the next two years.

Some notable upcoming developments in Davao include the Damosa Diamond Tower (DDT) and the office spaces at Aeon Towers. DDT will be located within the Damosa IT Park and, upon completion, will be among the biggest office towers in the city. It can be accessed via JP Laurel Avenue and is expected to complement the rising number of residential condominiums and commercial buildings in the area.

Aeon Towers, on the other hand, is a mixed-use development that includes a hotel, residential and commercial spaces all in one building. Located right beside the Abreeza Complex, all of Aeon Towers' segments are expected to gain from its proximity to the numerous developments within as the synergies between these properties could also induce more growth and investment within the area's proximity.

Demand for office space is expected to bounce back post-pandemic as the strict movement of goods and personnel are eased and consumer demand is reignited. However, the threat of WFH will persist as some companies may find it better for their operations and overall employee productivity. Nonetheless, the office property market is always capable of adapting to the needs and wants of its stakeholders in the same way it did when collaboration among workers was at the center of office setup design and thus promoted closer proximity among employees. Furthermore, with the numerous companies being financially affected by the pandemic, cost-saving strategies are seen to be implemented by various firms. Davao City can vie as one of the cheaper options for office space given their relatively lower rents as compared to Metro Manila and Cebu.

4 Valuation

Methodology

Valuation Rationale

4.1 The purpose of this appraisal is to estimate the Market Value of the Property. In any given valuation exercise, fair value can be arrived at using either one or a combination of the three (3) approaches to value, namely: Market (or Direct Sales Comparison) Approach, Income Approach, and the Cost Approach. The determination of the appropriate approach for a given property is based on the quality and quantity of data available, particularly its relevance to the Property under appraisement. If more than one valuation approach is utilized, the resulting values are reconciled to produce a final value conclusion.

4.2 Due to the nature of the Property and the purpose of this appraisal, both the Cost Approach and Income Approach to value are deemed the most appropriate to use and the Market (or Direct Sales Comparison) Approach was not used.

Cost Approach

4.3 The Cost Approach generally involves the following steps:

A. The value of the subject land is normally estimated by the Market or Sales Comparison Approach. In instances where the land is covered by a Lease Agreement, the value of the leased fee or leasehold rights on the subject land, whichever is applicable, is instead estimated.

B. The depreciated cost of the subject improvement is estimated by calculating the direct cost of reproducing or replacing the improvement, deducting accrued depreciation from all sources, and adding the indirect costs attributed to the improvement.

Combining the estimates shown above results in the indicated value of the Property by the Cost Approach.

4.4 **On Land (Leasehold)**

As mentioned, the land subject of this appraisal is covered by a Lease Contract. In estimating the value of the Property covered by a lease, two interests are involved: the interest of the lessee which is the leasehold; and the interest of the lessor which is the leased fee or the lessor's interest. The client being the lessee, the purpose of this appraisal is to establish the leasehold value of the subject land.

Leasehold Value is the present (discounted) worth of the rent savings (or rental gains) when the contract rent at the time of the appraisal is less than the current market rent. It is estimated by computing the present worth of the rental gains over the remaining term of the lease agreement using an appropriate discount rate.

The valuation process, briefly stated, consists of the following:

- Estimation of the current market rent of the leased property;
- Estimation of the rental gains over the remaining term of the lease

agreement, if any. Rental gains projection is pegged at 10 years while the 11th year rental gain is used to estimate the terminal value of the Leasehold Rights on the Land;

- Estimation of an appropriate discount rate and terminal capitalization rate; and
- Discounting process based on an appropriate discount rate to arrive at an indicated leasehold value.

Market Rent of the Land

4.5 As mentioned earlier, another purpose of this report is to express an opinion of the Market Rent of the Property if it were to be leased out in accordance with its highest and best use. The amount of annual or monthly rental, which the subject property should command might be estimated by any, or a combination of the following:

1. By Market (Comparison) Approach, in which rentals of similar properties are used a benchmarks; and
2. By Income Approach, in which the value of the Property is first established, and the proper capitalization rate is applied to obtain its rental value.

On the other hand, Market Rent is defined under IVS 2019 as “the estimated amount for which an interest in real property should be leased on the valuation date between a willing lessor and a willing lessee on appropriate lease terms in an arm’s length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion.”

It is the rental income that the Property would most likely command in an open market. It is also defined as being the amount at which a willing lessee would pay and a willing Lessor would receive for the use of certain property, neither being under compulsion to transact, and both having reasonable knowledge of all relevant facts.

Market Approach

4.6 We have made a survey of existing ground leases of similar lands in the vicinity of the Property and found scarcity of rental data that may be used for direct comparison purposes.

Income Approach

4.7 In the absence of any comparable rental data, we have estimated the **Market Rent** of the Property by a variation of the Income Approach on the basis of what prudent real estate investors or landowners would be warranted in leasing it in order to realize a fair return on their investment or property, for that matter. Under this approach, the market value of the Property is first established, and the proper capitalization rate is applied to obtain its rental value.

Market Value of the Land

4.8 In valuing the land, we made use of the Market Approach which is the most common technique for valuing land, and is the most preferred method when comparable sales are available. With this method, sales of similar property or parcels of land are analyzed, compared, and adjusted to provide a value

indication for the Property being appraised. The comparison process is based on an analysis of the similarity or dissimilarity of the comparables.

4.9 The appraiser gathers data on actual sales as well as listings and identifies the similarities and differences in the data; ranks the data according to their relevance; adjusts the prices of the comparables to account for the dissimilarities with the land being appraised; and forms a conclusion as to the most reasonable and probable market value of the subject property.

4.10 The elements of comparison include property rights, financing terms, conditions of sale (motivation), market conditions (sale date), location, physical characteristics, available utilities, and zoning. The most variable elements of comparison are the site's physical characteristics, which include its size and shape, frontage, topography, location, and view. The units of comparison applied may be hectares or sq.m., or any other unit used in the market.

Evidence of comparable properties

4.11 **Analysis of Comparable Properties Offered for Sale**

In the course of our investigation, we looked at current market listings of comparable properties in the area. The comparable properties selected share the same or similar characteristics as the subject. Whatever information or data we came up with was then analyzed, and comparison made for such factors as size, characteristics of the lot, location, quality, and prospective use. In the Philippines however, property transactions are not officially disclosed, and quite often, actual transaction price is masked by other undisclosed arrangements and different from the figure shown on the sale and purchase agreement. We have therefore made reference to the following data, made our market judgment, and adjusted for the above-mentioned factors:

1. A vacant commercial lot located along J. P. Laurel Avenue, within Barangay Bajada (Paciano Bangoy), Agdao District, Davao City, in front of Heritage Baptist Church, having an area of 4,412 sq.m. is being offered for sale at an asking price of PhP125,000 per sq.m.
   Source: Mr. Ahmad Clay Escolar – (0988-557-7124)

2. A vacant commercial lot located along J. P. Laurel Avenue, within Barangay Bajada (Paciano Bangoy), Agdao District, Davao City, in front of Tebow Cure Hospital, having an area of 12,000 sq.m. is being offered for sale at an asking price of PhP85,000 per sq.m.
   Source: Ms. Janette Banay – (0977-658-5379)

3. A vacant commercial lot located along J. P. Laurel Avenue, within Barangay Bajada (Paciano Bangoy, Agdao), District, Davao City, in front of Abreeza Mall, having an area of 21,000 sq.m. is being offered for sale at an asking price of PhP85,000 per sq.m.
   Source: Ms. Ella Sheng – (0926-535-8250)

Summary of Adjustments

The Data Comparison Grid shown on Appendix **8** shows a summary of the aforementioned adjustments, which provides an indication as to the degree of adjustment made to the different elements in comparison. A numeric indicator indicates the level of adjustments, in terms of percentage when compared with the subject property. The use of (-) indicates a negative adjustment and a + indicates a positive adjustment. A downward adjustment (-) used is made to reflect superior characteristics of the comparable sale/listing, while an upward adjustment + reflects inferior characteristics of the comparable sale/listing. Finally, a 0 is used to confirm similarity between the comparable sales/listings and the subject or is used when market information is unavailable or does not support an adjustment for any particular element of comparison.

Value of the Land 4.12 As reflected in the said Comparison Grid, the value of the land is estimated at **PhP84,000 per sq.m.**, or a total of **PhP278,000,000** for a land area of **3,304 sq.m.**

Rate of Return 4.13 The value of the land having been established, its rental value may now be estimated considering the prevailing rate of return prudent investors or landowners would expect in ground leases, normally in the range of 4% to 7%. We based this range of rate of return from interviews with land owners and brokers, as well as our analysis of the relationship between prevailing capital values and rental rates and it is believed to be the current yield in the commercial land lease market.

Considering the most recent pandemic and the effect it had on the economy and the leasing market, we have not adopted the average rate of return, and have instead adopted a conservative interest rate (return on investment) of 4%.

In light of the foregoing, our estimate of the Market Rent of the Property is as follows:

Land Value	PhP	278,000,000	
Interest on Land Value			
PhP278,000,000 @ 4%	PhP	11,120,000	

Total	**PhP**	**11,120,000**	**per year**
		=========	
Or	**PhP**	**926,670**	**per month**
		=======	

Market Rent of the Land 4.14 On the basis of the foregoing, the Market Rent of the land is estimated at **PhP280.47 per sq. m. per month**, or a total of **PhP926,670 per month**, or say, **PhP11,120,000 per annum** for the subject land area of **3,304 sq. m.**

Rental Gain 4.15 Rental Gain is reckoned as the difference between the Market Rent and the Contract Rent.

Discount Rate 4.16 The discount rate was computed using the build-up method. The discount rate is calculated by adding together different variables. The variables that were used to generate it consist of a risk-free rate and a reasonable risk premium. Based on the foregoing, discount rate is estimated at 7.1665%, or say, 7.20% (10-year T-bond rate at about 3.9165% (from Philippine Dealing & Exchange Corporation (PDEx) as of 30 June 2021) plus 3% equity risk premium from OECD and

additional 0.25% risk premium for unidentifiable risk factors which include the uncertainty brought about by the Covid-19 global pandemic.).

For purposes of this valuation, we have adopted, as risk-free rate, the 10-year T-bond rate from PDEx. The Philippine Dealing & Exchange (PDEx) system appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEx. The PHP BVAL Reference Rate dated 30 June 2021 was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

4.17 We have adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3%. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits
Valid as of: **25 June 2021**

			Classification		
nb	Country Code ISO Alpha 3	Country Name [1]	Previous	Current Prevailing	Notes
138	PLW	Palau	-	-	(5)
139	PAN	Panama	4	4	(8)
140	PNG	Papua New Guinea	6	6	
141	PRY	Paraguay	5	5	
142	PER	Peru	3	3	
143	PHL	Philippines	3	3	
144	POL	Poland	-	-	(6)
145	PRT	Portugal	-	-	(6) (7)

Capitalization Rate 4.18 Capitalization rate adopted to arrive at the terminal value is 4.7% (Discount Rate less Projected Long-term Growth Rate (2.5%). The long-term growth rate is based on a growth forecast of the prevailing commercial market over the forecast

period. This is based on what the Property is perceived to achieve in the long-term considering the present situation of the market.

Remaining Life of the Lease 4.19 Remaining life of the lease as of the date of valuation is 99 years.

Summary of Leasehold Assumptions 4.20 In summary, below are the assumptions/statistics used in determining the leasehold value of the subject land.

CYBERGATE DELTA 1			
Lease Details			
Lot Area	:	3,304.00	sq.m.
Term of Lease	:	99	years
Assumed Commencement Date	:	01-Oct-21	
Lease Rate	:	7%	of net leasing revenue
Market Rent (in PhP)			
Monthly Rent	:	280.47	/sq.m./ month
Annual Rent	:	11,120,000	
Annual Escalation	:	3%	starting Y2
Discount Rate			
Risk Free Rate		3.92	as of June 30, 2021 (BVAL PDEX)
Risk Premium		3.00	as of June 25, 2021 (OECD)
Additional Risk		0.25	risk premium for unidentifiable risk factors
		7.17	
Resulting Discount Rate, say		7.20%	
Terminal Capitalization Rate		4.70%	

Leasehold Value 4.21 On the basis of the foregoing, the leasehold value of the subject land may reasonably be estimated at **PhP144,000,000**.

We attach a copy of our valuation calculations at Appendix **6**.

4.22 **On Leasehold Improvements and Machinery & Equipment**

The estimate of the leasehold improvements can be either replacement or reproduction cost, new. Replacement Cost, New is defined as "The cost of construction, at current prices, of a building having utility equivalent to the building being appraised but built with modern materials and according to current standards, design, and layout." On the other hand, Reproduction Cost, New is defined as "The cost of construction, at current prices, of an exact duplicate, or replica, using the same materials, construction standards, design, layout, and quality of workmanship, and embodying all the deficiencies, super-adequacies, and obsolescence of the subject building."

In estimating the Replacement Cost of the buildings and improvements, we have made reference to the building cost index or other building cost as available in the market or published by a reputable quantity surveyor firm. We have likewise referred to our own database of building construction costs. We do not hold ourselves to be construction cost advisers and a formal estimate can only be given by a specialist construction cost consultant. It is recommended that a professional quantity surveyor or a firm of professional quantity surveyors should be consulted in order to assess an accurate building/improvement replacement cost.

In arriving at our assessment using the Cost Approach for the Equipment, we first developed the Replacement Cost, New (“RCN”) of the asset. In developing our RCN, we have obtained current cost information from equipment dealers in the region. We relied on data furnished by equipment manufacturers, dealers and importers, as well as information contained in price catalogues, other published materials including the Internet and inquiries from local suppliers

RCN is the estimated amount of money needed to acquire a similar new item having the nearest equivalent utility as the Property being valued taking into consideration current prices of materials and manufactured equipment, shipping and handling, labour, contractor's overhead, design and supervision, profit and fees, and other attendant costs associated with its acquisition and installation, but without provision for overtime or bonuses for labour and premium for materials.

Having developed the RCN, we then deducted for the various elements of depreciation to arrive at the Depreciated Replacement Cost (“DRC”). DRC includes depreciation allowance or loss of value arising from condition, utility, age, wear and tear, and obsolescence present (physical, functional or economic), taking into consideration past and present maintenance policy and rebuilding history.

General

Where elements are of foreign origin, the assessment process give full consideration to all expenditures normally incurred in importation such as packing and crating charges, inland and ocean freight, insurance, duties and taxes, bank charges and commissions, wharfage, brokerage and handling

In estimating the depreciation of the assets, we have utilized the age-life method tempered with our observed condition of the assets. The remaining lease period was likewise considered in arriving at the value of the leasehold improvements.

Appendix **9** contains the Schedule of Assets describing in detail these assets.

Income Approach

Definition 4.23 The Income Approach is applicable to the valuation of income producing properties, business enterprise as well as the valuation of intangible assets. This approach measures the current value of an asset by calculating the present value of its future economic benefits by discounting expected cash flows at a rate of return that compensates the risks associated with the particular investment.

For this particular engagement, we have applied both the Discounted Cash Flow Analysis and the Direct Capitalization Method.

Discounted Cash Flow Analysis

4.24 The discounted cash flows, or DCF valuation is the most popular fundamental approach in valuing the future economic benefits of a projected income stream. DCF measures actual yield rather than paper income for the asset/business owner and the analysis of DCF is widespread and mandatory in the various fields of business making DCF-based valuation ideal.

4.25 The valuation process, briefly stated, consists of the following:

- Estimation of the revenues generated;
- Estimation of the costs and expenses related to the operations of the development;
- Estimation of an appropriate discount rate;
- Discounting process using an appropriate discount rate to arrive at an indicative market value; and
- Estimation of the Terminal Value of the Property.

Discount Rate

4.26 The discount rate was computed using the build-up method - calculated by adding together the different variables. The basic formula for the traditional build-up model is:

Discount Rate = Rf + P + MR + LR

Where	Variable	Proxy Statistic
Rf	Risk Free Rate	PDEX Risk Free Rate
P	Equity Risk Premium	Country Risk
MR	Management Risk	
LR	Liquidity Risk	

The variables that were used to generate the Discount Rate are exhibited in the table below, along with the sources and/or dates as at or nearest the 30 June 2021 valuation date.

Risk Free Rate (10Y)	3.92%	As of 30 June 2021, BVAL PDEX
Equity Risk Premium	3.25%	As of 25 June 2021, OECD
Management Risk	0.80%	
Liquidity Risk	0.90%	

4.27 The following assumptions were used to arrive at the Discount Rate using the Build-Up Method.

Risk Free Rate

4.28 For the purposes of this valuation, we adopted the 10-year bond rate sourced from Philippine Dealing & Exchange Corporation (PDEX) as of 30 June 2021 - the valuation date (image shown below). The Philippine Dealing Exchange (PDEx) system has recently appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEX. The PHP BVAL Reference Rate was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

Equity Risk Premium

4.29 We used an equity risk premium of 3.25%. We adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3% plus an additional 0.25% risk premium for unidentifiable risk factors. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors. Shown below is an excerpt of said table.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits
Valid as of: 25 June 2021

			Classification		
nb	Country Code ISO Alpha 3	Country Name (1)	Previous	Current Prevailing	Notes
138	PLW	Palau	-	-	(5)
139	PAN	Panama	4	4	(8)
140	PNG	Papua New Guinea	6	6	
141	PRY	Paraguay	5	5	
142	PER	Peru	3	3	
143	PHL	Philippines	3	3	
144	POL	Poland	-	-	(6)
145	PRT	Portugal	-	-	(6) (7)

Management & Liquidity Risk

The Management Risk refers to the estimated premium to compensate for the burden of management, while the Liquidity Risk refers to the ease (or the difficulty) with which an investment can be sold or made. A review was done and we have arrived at the following: Management Risk was classified into four categories, with the corresponding rates: Poor – 1.2; Average – 1.0; Above Average - 0.90 and Excellent - 0.80 while Liquidity Risk has three (3) categories: Poor –1.2; Average – 1.0; and Good – 0.90. After the said review, we deemed it appropriate to use 0.80% for Management Risk and 0.90% for Liquidity Risk.

Resulting Discount Rate	4.30	Resulting Discount Rate used for this valuation is 8.87%, or say, 9.0%.
Capitalization Rate	4.31	A discount rate is used to calculate the present value of future projections of a benefit stream when growth varies from year to year. However, if growth is estimated to remain level throughout the life of the investment, a capitalization rate is often used. In its most basic form, the relationship between discount rate and a capitalization rate can be summarized as follows:

Capitalization Rate = Discount Rate – Growth

For purposes of this valuation, a long-term growth rate of 4% has been assumed. This is based on what the Property is perceived to achieve in the long-term considering the present situation of the market. Using this assumption, resulting Capitalization Rate would be 5%.

Key Financial Assumptions	4.32	We relied on the historical and projected assumptions brought about by our research and as provided by the Client. These financials were analyzed to ensure reasonableness by comparing projected revenue growth rates and other operating expenses based on historical performance. Based on interviews with the representatives of the company, projections were prepared to reflect the current and expected future market conditions.

a. **Revenues**

i. Cashflow projection starts in 01 July 2021 and runs for a period of 10 years.

ii. The revenues come from the rental of retail units, office units, parking slots and other areas. In estimating the annual rents of the subject units/slots, we have adopted the contract rents as appearing in the copy of the rent roll and lease contracts provided to us by the Client for the occupied units/leased parking slots. After the expiration of lease, lease rates then are aligned with market rates and are assumed to have an average of 4-year lease contracts. Aside from the monthly rentals from leasable areas, revenues likewise include Management and Aircon Dues which are likewise charged to the tenants monthly on a per sq.m. basis. Management dues are for common and/ or shared utilities, facilities and services. These are inclusive of air conditioning equipment rental during office hours (but exclusive of power consumption).

iii. It would be important to note that as the building administrators, they collect the said dues as a cost recovery mechanism for all expenses related to the day to day operations of the building and its common areas.

iv. Occupancy assumptions were based on the actual performance of the Property as well as the prevailing trend in the subject area taking into consideration the forecasted effect of the global pandemic in the office market. Occupancy of the Property as of valuation date is at 100% while the historical average performance of the Property for the last two years is at 100%. Occupancy rates include committed leases. For this valuation exercise, we are assuming an average overall vacancy allowance of 3%. This assumed vacancy allowance for the whole cashflow period is used to account for unanticipated vacancies brought about by early terminations and non-renewals, and rental concession requests from tenants.

v. We used actual escalation rates indicated in the rent roll for all existing leases up until their lease expires. After which, an average escalation of 5% was then be applied year on year until the end of the cash flow.

b. **Cost & Expenses**

i. Operating Expenses which would include administrative and utility expenses are normally charged against the Common Use Service Area (CUSA) Fees or Association Dues being collected monthly to the individual tenants. However, there are instances when CUSA funds are insufficient to pay off all common charges. If and when this happens, the owners/administrators would have to pay off these expenses and this has been taken into consideration in the projections.

ii. Operating Costs and Expenses are assumed to be an average of approximately 25% of the Total Net Revenues. Operating costs and expenses included are basically divided in to two – real estate expense and general administrative expenses. Real Estate expenses are as follows: contracted services, repairs & maintenance, management fee and loss from CUSA and miscellaneous expenses. While under General Administrative Expense are – salaries & wages, taxes and licenses, advertising & promotions, commission, insurance, communication, rent expense, supplies, travel & transportation, and representation & entertainment expenses. These expenses are projected either as a percentage of the rental revenues or the total net revenues. These percentage allocations were from the historical and projected performance of the Property.

iii. Annual Capital Expenditures (CAPEX) for the entire cashflow period, on the other hand, was assumed to be 1.5% of the Net Leasing Revenues. This assumption is based on benchmarking and analysis of current market practice in allocating CAPEX reserve.

This allocation would help ensure that the Property would operate efficiently and maintain its good and sound condition.

Resulting Market Value

a. Earnings Before Income Tax, Depreciation and Amortization (EBITDA) for the whole duration of the cashflow shall be discounted at the derived Discount Rate of 9.00%.

b. The sum of discounted cashflows including the Terminal Value of the Property represents the Market Value of the Property.

The Terminal Value of the Property is the value of the property beyond the explicit forecast period. It is assumed that the property or business will continue to generate cashflows in perpetuity. As mentioned earlier, Terminal Capitalization Rate used is 5%.

The Discounted Cashflow showing the estimated Market Value of the subject property is attached as Appendix **6**.

Direct Capitalization Method 4.33 The Direct Capitalization Method is a real estate valuation method that helps convert a single year's income into value by dividing the Net Operating Income with an appropriate Capitalization Rate. This method assumes that the Property has a stabilized net operating income. All parameters of a typical investor return expectations are represented either explicitly or implicitly in either income forecast or the capitalization rate. The direct capitalization rate, as the ratio of income to value, serves as a proxy for investor return assumptions.

Resulting Market Value 4.34 We made use of the single year's cashflow projection (2022) to derive the Market Value using the Direct Capitalization Method. Capitalization rate adopted to arrive at the Property Market Value is 5%.

Valuation basis

Market Value 4.35 Market Value is defined in the 2019 **International Valuation Standards** as:

"The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

Valuation date

Valuation date 4.36 The valuation date is **30 June 2021**.

General Assumptions

Assumptions 4.37 Our valuation is necessarily based on a number of assumptions which have been drawn to your attention in our General Terms of Business, Letter of Engagement and within this report.

Key Assumptions 4.38 Whilst we have not provided a summary of all these assumptions here, we would in particular draw your attention to a key assumption that we relied on a very considerable extent on the information provided by the Client and have assumed that documents provided to us such as gross floor area tabulation, floor plans, lot area allocation, building tenancies and other relevant matters are factual. We were also advised by the Client that no material facts have been omitted from the information provided.

Special Assumption 4.39 We were instructed to re-value the Property without a re-inspection. We have, thus, considered changes to the physical attributes and/or characteristics of the

Property which have occurred between the valuation date and the date of our previous valuation as confirmed by the Client. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.

4.40 We have adopted the floor area details provided to us by the Client and have assumed these to be accurate.

4.41 We were not provided with a Lot Plan where Cybergate Delta 1 is erected. For purposes of this valuation, the land is assumed to be rectangular in shape.

4.42 Our valuation of Machinery & Equipment has also undertaken the following special assumptions:

We have not carried out a full mechanical survey, or structural test, nor have inspected the machinery and equipment, which are covered, unexposed or inaccessible. Our assessment is based on the premised that the items are in a condition commensurate with age and usage.

Machinery & Equipment associated with the supply of services to the building such as Elevators, Air Conditioning Systems are valued on the assumption that they are permanently installed or attached to the building.

4.43 In applying Income Approach to value, we have considerably relied on the information provided to us by the Client which includes the following: lease contracts, revenue and expense projections, historical and projected occupancies. Upon expiration of contracts, we estimated the lease rates based on the acceptable escalations in the market.

4.44 Given the 99-year leasehold, we assumed that the Property is comparable to a freehold property given the duration of the leasehold interest on the land. Thus, a terminal value of the Property was computed at the end of the cashflow.

Valuation Results

Using Cost Approach

4.45 Using the **Cost Approach,** the Market Value of the Property, may be summarized as under

Land (Leasehold Value)	**PhP144,000,000**
Building	**405,400,000**
Other Land Improvements	**7,761,000**
Building Machinery & Equipment	**93,049,000**

T O T A L	**PhP650,210,000**

R O U N D E D T O	**PhP650,000,000**
	=============

4.46 The Market Value of the Property is estimated at **PhP650,000,000 (SIX HUNDRED FIFTY MILLION PHILIPPINE PESOS).**

Using Income Approach	4.47	Using the **<u>Income Approach</u>** on the other hand, the Market Value of the Property is estimated as follows:

DCF Analysis	**PhP1,284,000,000**
Direct Capitalization Method	**PhP1,409,000,000**

Calculation	4.48	We attach a copy of our valuation calculations for the Income Approach at Appendix **6 & 7**.
Comments	4.49	The values arrived at using the Income Approach are noted to be higher than the value arrived at using the Cost Approach. This is because, unlike the Income Approach, the Cost Approach does not capture the income potential of the Property.
	4.50	For purposes of this valuation, we deemed it appropriate to adopt the results arrived at by the Income Approach – DCF Analysis, since this method is usually used to determine the value of an income-generating property, as it also captures the Property's future economic benefits, giving a better representation of the Property's Market Value at an acceptable rate of return that would compensate for the risks associated with the particular investment. It likewise takes into consideration market cycles that Direct Capitalization Method cannot capture.
Conclusion of Value	4.51	In conclusion, we are of the opinion that the Market Value of the Property, reckoned as of **30 June 2021**, is:

PhP1,284,000,000 (ONE BILLION, TWO HUNDRED EIGHTY-FOUR MILLION PHILIPPINE PESOS).

***Note**: The outbreak of the Novel Coronavirus (COVID-19), declared by the World Health Organization as a "Global Pandemic" on 11th March 2020, has impacted global financial markets. Travel restrictions have been implemented by many countries. In the Philippines, market activity is being impacted in all sectors. As at the valuation date, we consider that we can attach less weight to previous market evidence for comparison purposes, to inform opinions of value. Indeed, the current response to COVID-19 means that we are faced with an unprecedented set of circumstances on which to base a judgement. Our valuation is therefore reported on the basis of "material valuation uncertainty" per IVS 103 of the International Valuation Standards. Consequently, less certainty – and a higher degree of caution – should be attached to our valuation than would normally be the case. Given the unknown future impact that COVID-19 might have on the real estate market, we recommend that you keep the valuation of this property under frequent review.*

Appendix 1 - Assumptions, Limiting Conditions and Disclaimers

Basis of Value	Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion." In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property. It is further assumed that title to the property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable. The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.
Property Rights appraised	The rights appraised in this report are the property rights in fee simple, free and clear. "Fee simple" is defined as absolute ownership, without limitations to any particular class of heirs or restrictions, but subject to the limitations of eminent domain, escheat, police power and taxation. We assume that the fee simple interest is marketable and in compliance with the applicable laws of the Philippines.
Fractional Interests:	When the study contains a valuation relating to an estate in land that is less than the whole fee simple estate, the value reported for such estate relates to a fractional interest only in the real estate involved, and the value of this fractional interest plus the value of all other fractional interests may or may not equal the value of the entire fee simple estate which is considered the whole. When the valuation report contains an allocation of the total valuation between land and building improvements, such allocation applies only under the existing program of utilization. The separate valuations for land and building cannot be used in conjunction with any other valuation/appraisal and will be invalid if so used.
Assumptions:	The valuation is based on the condition of the economy and the purchasing power of the Philippine Peso as of the effective date of valuation. We have assumed that the floor areas provided us have been calculated in accordance with engineering standards, and assumed herein to be true and correct. Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.
Information Supplied By Others	Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser. Information provided by informed local sources, such as government agencies, financial institutions, Realtors, buyers, seller and others, was weighed in the light in which it was supplied and checked by secondary means; however, no responsibility is assumed for possible misinformation.
Legal Issues:	This valuation assumes no responsibility for the validity of legal matters affecting the property. The ownership history reported in this valuation is based on the appraiser's research of public records, which are assumed to be accurate and complete. It is not the intent of the valuation to offer a legal opinion of title. It is further assumed that the property has good title, responsible ownership and competent management. Any liens or encumbrances which may now exist have been disregarded. The appraiser is not required to give testimony or attendance in court by reason of this valuation, with reference to the property in question, unless arrangements have been previously made.
Liability:	The liability of Santos Knight Frank, Inc. and its directors and employees is limited to the addressee of this report only. No accountability, obligation or liability to any third party is accepted. In the event we are subject to any liability in connection with this engagement, regardless of legal theory advanced, such liability will be limited to the amount of fees we received for this engagement.
Environmental Conditions:	It is assumed that there is full compliance with all applicable Philippine environmental regulations and laws unless non-compliance is stated, defined, and considered in this appraisal report.
Town Planning:	It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.
Condition of Improvements:	We have inspected the improvements and structures. However we have not carried out a structural survey nor tested any of the services or facilities, nor have we inspected unexposed or inaccessible portions of the building, and are therefore unable to state that these are free from defect, rot, infestation, asbestos or other hazardous material. We have therefore, viewed the general state of repair of the property and advise that we did not notice any obvious signs of structural defect or dilapidations. Furthermore, the property appears to be in reasonable condition having regard to its age and use and unless otherwise stated. We also assume that the building complies with all relevant statutory requirements in respect of matters such as sanitary, building and fire safety regulations and standards.
Valuation Methodology:	Santos Knight Frank uses any one or a combination of the Market Data Approach, the Cost Approach, and the Income Capitalization Approach. Each methodology begins with a set of assumptions. The result is the best estimate of value Santos Knight Frank can produce, but it is an estimate and not a prediction or guarantee and it is fully dependent upon the accuracy of the assumptions as to income, expense and market conditions. These primary methodologies use market derived assumptions, including rents, yields and discount rates, obtained from analyzed transactions. We do not represent ourselves as experts for data, such as economic, demographic or construction costs, which has been obtained from external sources.
Others:	This report and valuation shall be used only in its entirety and no part shall be used without the whole report. It may not be used for any purpose other than the intended purpose mentioned herein. Possession of this report or any copy thereof does not carry with it the right of copying or publication. All copies will originate from Santos Knight Frank, Inc. and will be signed and dated as such. Neither the whole nor any part of the report or any reference to our name, our valuation and our report may be included in any document, circular or statement nor published without our prior written consent to the form and context in which it may appear. The delivery and acceptance of this report completes this assignment.

Attention: **MR. FREDERICK D. GO**
President and Chief Executive Officer

Subject: **Terms of Engagement for Valuation Services**

Dear Mr. Go:

Thank you for your interest in our Valuation Services. We refer to your invitation of 03 August 2020 requesting Santos Knight Frank, Inc. ("SKF") to submit a proposal for valuation (the "Valuation") in respect of the properties detailed below (the "Properties").

This proposal, together with our General Terms of Business for Valuation Services ("General Terms"), sets out our terms of engagement for carrying out this instruction. Once agreed and signed, this proposal shall constitute our Letter of Engagement ("Letter"). This Letter and the General Terms (together, the "Agreement") exclude any other terms which are not specifically agreed to us in writing. To the extent that there is any inconsistency between the Letter and the General Terms, this Letter shall take precedence.

1. **Client**
   Our Client for this Valuation is Robinsons Land Corporation (the "Client", "you" or "your").

2. **Purpose of Valuation**
   The Valuation is provided solely the purpose of transferring some of the Client's assets to the REIT Company and its application for a Tax-Free Exchange Ruling with the Bureau of Internal Revenue and listing of the REIT Company in the Philippine Stock Exchange (the "Transaction"). Specifically, the Valuation will be used for the Client's Financial Statements to be attached to the Offering Circular as required by the Securities and Exchange Commission (SEC) and will be attached as an appendix to the Client's REIT Plan. In accordance with clause 4.1 of our General Terms, the Valuation may not be used for any other purpose without our express written consent. The Valuation will be made accessible in the public domain as part of the regulatory requirements of the Transaction.

3. **Term & Termination**
   This appointment will commence upon signing of this Agreement and shall continue to be in effect for a period of two (2) years. Any extension of the Term of this Agreement shall be mutually agreed upon by the parties in writing.

23. Electronic Communication

During the engagement, both parties may wish to communicate electronically with each other. However, electronic transmission of information cannot be guaranteed to be secure or virus-or error-free and information could be intercepted, corrupted, lost or destroyed, arrive late or incomplete, or otherwise be adversely affected or unsafe to use. Both parties agree to accept these risks and so each party will be responsible for protecting its own systems and interests in relation to electronic communications. Neither party will have any liability to the other party on any basis for any loss or damage arising from or in connection with the electronic communication of information between both parties or their reliance on such information.

24. Acceptance

Please sign and return a copy of this Letter signifying your acceptance of the terms of the Agreement. We reserve the right to withhold any Valuation and / or refrain from discussing it with you until this Letter has been countersigned and returned.

Your attention is drawn to the "Important Notice" in the General Terms. If you have any questions regarding this Letter and / or the terms of the Agreement, please let us know before signing this Letter.

Thank you for choosing Santos Knight Frank, Inc. and we look forward to working with you on this important engagement.

Sincerely,
SANTOS KNIGHT FRANK, INC.

Subject: **Amendment to Terms of Engagement and General Terms of Business for Valuation Services Dated 03 August 2020 ("Amendment")**

Dear Mr. Go:

We refer to subject Letter of Engagement and General Terms of Business for Valuation Services (together, the "Agreement") between Robinsons Land Corporation (the "Client", "you" or "your") and Santos Knight Frank, Inc. ("SKF") for the valuation of fourteen (14) office buildings (the "Covered Properties").

For this purpose, the Agreement is amended as follows:

The first, second, and third and fourth paragraphs shall now read:

For the Valuation

I. Valuation for Asset Transfer to REIT Company and its application for a Tax-Free Exchange Ruling:

For Valuation Update

II. Valuation of Properties for REIT listing to PSE:
Our Valuation of 14 Properties will be as follows:
1. Valuation for 4 Properties
2. Periodic Update of 14 Properties
Under REIT Company (Quarterly basis – optional)
3. Valuation Update of 14 Properties under REIT Company

Santos Knight Frank

Santos Knight Frank

Except as amended hereby, all the provisions of the Agreement which are not inconsistent herewith are incorporated herein by way of reference and from date hereof, the Agreement and this Amendment shall be read as one integrated document.

Kindly affix your signature on the conforme portion below and return one (1) original signed copy to us.

Sincerely, **SANTOS KNIGHT FRANK, INC.**	Approved and agreed to by: **ROBINSONS LAND CORPORATION**

Appendix 3 - General Terms of Business

General Terms of Business for Valuation Services

These General Terms of Business (the "**General Terms**") and our Letter of Engagement (the "**Letter**"), together form the agreement between you and us (the "**Agreement**"). References to "**you**", "**your**" etc. are to persons or entities who are our client and, without prejudice to clauses 3 and 4 below, to any persons purporting to rely on our Valuation.

Unless **the** context otherwise requires, all other terms and expressions used but not defined herein shall have the meaning ascribed to them in the Letter.

When used herein or in the Letter, the term "**Valuation**" shall mean any valuation report, advance report, supplementary report or subsequent/update report, produced pursuant to our engagement and any other replies or information we produce in respect of any such report and/or any relevant property. Any words following the terms "**including**", "**in particular**" or any similar expression shall be construed as illustrative and shall not limit the sense of the words preceding those terms.

All of the terms set out in these General Terms shall survive termination of the Agreement.

1. Santos Knight Frank, Inc.

1.1. Santos Knight Frank, Inc. ("**Santos Knight Frank**", "**our**", "**us**", "**we**") is a Philippine corporation with Securities and Exchange Commission (SEC) Registration Number A199818549.

1.2. Our registered office is at 10/F Ayala Tower & Exchange Plaza, Ayala Avenue, Makati City where a list of members may be inspected.

1.3. Any representative of Santos Knight Frank, Inc. described as *Director* is either a member or an employee of Santos Knight Frank, Inc. and is not a member of the Board of Directors. The term *Director* has been retained because it is an accepted way of referring to senior professionals. The term "**Santos Knight Frank Person**" shall, when used herein, mean any member, employee, or consultant of Santos Knight Frank, Inc.

1.4. Our Tax Identification Number (TIN) is 201-626-570-000.

1.5. The details of our professional indemnity insurance will be provided to you on request.

1.6. Santos Knight Frank, Inc., being a corporation, is regulated by the Philippine Securities and Exchange Commission (SEC). It is also an SEC-accredited asset valuer. In accordance with reportorial filings with the SEC, it may be necessary to disclose valuation files to them. By instructing us, you give us your permission to do so. Where possible we will give you prior notice before making any such disclosure, although, this may not always be possible. We will use reasonable endeavours to limit the scope of any such disclosure and to ensure any disclosed documents are kept confidential.

1.7. Valuations will be carried out in accordance with the 2019 edition of the International Valuation Standards (IVS) by valuers who conform to its requirements and with regard to relevant statutes or regulations. Our senior valuers are Real Estate Appraisers licensed and regulated by the Philippine Professional Regulation Commission (PRC).

2. Governing law and jurisdiction

2.1. The Agreement and any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with it or its subject matter or formation or any Valuation shall be governed by and construed in accordance with Philippine laws.

2.2. Philippine courts shall have exclusive jurisdiction to settle any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with this Agreement or its subject matter or formation or any Valuation. This will apply wherever the relevant property or the client, or any relevant third party, is located or the service is provided.

3. Limitations on liability

3.1. Subject to clause 3.7, our maximum total liability in connection with or arising out of this Agreement and/or its subject matter and/or the Valuation is limited to our total service fees as set out in the Letter.

3.2. Subject to clause 3.7, we will not be liable for any loss of profits or for indirect or consequential loss or damages.

3.3. Subject to clause 3.7, any limitation on our liability will apply however such liability is or would otherwise have been incurred, whether in contract, tort (including negligence), for breach of statutory duty, or otherwise.

3.4. Except as set out in clauses 3.5 and 4.7 and 4.8 below, no third party shall have any right to enforce any of the terms of this Agreement.

3.5. No claim arising out of or in connection with this Agreement may be brought against any Santos Knight Frank Person. Those individuals will not have a personal duty of care to you or any other person and any such claim for losses must be brought against Santos Knight Frank, Inc. Any Santos Knight Frank Person may enforce this clause but the terms of this Agreement may be varied by agreement between the client and Santos Knight Frank, Inc. at any time without the need for any Santos Knight Frank Person to consent.

3.6. No claim, action or proceedings arising out of or in connection with the Agreement and/or any Valuation shall be commenced against us after the expiry of the earlier of (a) two years from the Valuation Date (as set out in the relevant Valuation) or (b) any limitation period prescribed by law.

3.7. Whether or not specifically qualified by reference to this clause, nothing in the Agreement shall exclude or limit our liability in respect of fraud, or for death or personal injury caused by our negligence or negligence of those for whom we are responsible, or for any other liability to the extent that such liability may not be so excluded or limited as a matter of applicable law.

4. Purpose, reliance and disclosure

4.1. The Valuation is prepared and provided solely for the stated purposes. Unless expressly agreed by us in writing, it cannot be relied upon, and must not be used, for any other purpose and, subject to clause 3.7, we will not be liable for any such use.

4.2. Without prejudice to clause 4.1 above, the Valuation may only be relied on by our Client. Unless expressly agreed by us in writing the Valuation may not be relied on by any third party and we will not be liable for any such purported reliance.

4.3. Subject to clause 4.4 below and for the stated purposes, the Valuation is confidential to our Client and must not be disclosed, in whole or in part, to any third party without our express written consent (to be granted or withheld in our absolute discretion). No liability is accepted to any third party for the whole or any part of any Valuation disclosed in breach of this clause.

4.4. Our appraisers are not required to give testimony or attendance in court by reason of this Valuation with reference to the property in question, unless arrangements have been previously made.

4.5. Except for the stated purposes, neither the whole nor any part of the Valuation and/or any reference thereto may be included in any published document, circular or statement nor published in any way whatsoever whether in hard copy or electronically (including on any website) without our prior written consent and approval of the form and context in which it may appear.

4.6. Where permission is given for the publication of a Valuation, neither the whole nor any part thereof, nor any reference thereto, may be used in any publication or transaction that may have the effect of exposing us to liability for actual or alleged violations of SEC Memorandum Circular No. 2, series of 2014 (Guidelines on Asset Valuations) or Republic Act No. 8799 (Securities Regulation Code), as amended and its Implementing Rules and Regulations.

4.7. You agree that we, and/or any Santos Knight Frank Person, may be irreparably harmed by any breach of the terms of this clause 4 and that damages may not be an adequate remedy. Accordingly, you agree that we and/or any Santos Knight Frank Person may be entitled to the remedies of injunction or specific performance, or any other equitable relief, for any anticipated or actual breach of this clause 4.

4.8. You agree to indemnify and keep fully indemnified us, and each relevant Santos Knight Frank Person, from and against all liabilities, claims, costs (including legal and professional costs), expenses, damages and losses arising from or in connection with any breach of this clause 4 and/or from the actions or omissions of any person to whom you have disclosed (or otherwise caused to be made available) our Valuation otherwise than in accordance with this clause 4.

5. Knight Frank network

5.1. Santos Knight Frank, Inc. is a member of an international network of independent firms which may use the "Knight Frank" name and/or logos as part of their business name and operate in jurisdictions outside the Philippines (each such firm, an "**Associated Knight Frank Entity**").

5.2. Unless specifically agreed otherwise, in writing, between you and us: (i) no Associated Knight Frank Entity is our agent or has authority to enter into any legal relations and/or binding contracts on our behalf; and (ii) we will not supervise, monitor or be liable for any Associated Knight Frank Entity or for the work or actions or omissions of any Associated Knight Frank Entity, irrespective of whether we introduced the Associated Knight Frank Entity to you.

5.3. You are responsible for entering into your own agreement with any relevant Associated Knight Frank Entity.

5.4. This document has been originally prepared in the English language. If this document has been translated and to the extent there is any ambiguity between the English language version of this document and any translation thereof, the English language version as prepared by us shall take precedence.

6. Severance

If any provision of the Agreement is invalid, illegal or unenforceable, the parties shall negotiate in good faith to amend such provision so that, as amended, it is legal, valid and enforceable and, to the greatest extent possible, achieves the intended commercial result of the original provision. If express agreement regarding the modification or meaning or any provision affected by this clause is not reached, the provision shall be deemed modified to the minimum extent necessary to make it valid, legal and enforceable. If such modification is not possible, the relevant provision shall be deemed deleted. Any modification to or deletion of a provision under this clause shall not affect the validity and enforceability of the rest of this Agreement.

7. Entire agreement

7.1. The Agreement, together with any Valuation produced pursuant to it (the Agreement and such documents together, the "**Contractual Documents**") constitute the entire agreement between you and us and supersedes and extinguishes all previous agreements, promises, assurances, warranties, representations and understandings between you and us, whether written or oral, relating to its subject matter.

7.2. Subject to clause 3.7 above, you agree that in entering into the Agreement you do not rely on, and shall have no remedies in respect of, any statement, representation, assurance or warranty (whether made innocently or negligently) that is not expressly set out in the Contractual Documents. You further agree that you shall have no claim for innocent or negligent misrepresentation based on any statement set out in the Contractual Documents.

7.3. The Letter and these General Terms shall apply to and be incorporated in the contract between us and will prevail over any inconsistent terms or conditions contained or referred to in your communications or publications or which would otherwise be implied. Your standard terms and conditions (if any) shall not govern or be incorporated into the contract between us.

7.4. Subject to clause 3.7 and clause 6, no addition to, variation of, exclusion or attempted exclusion of any of the terms of the Contractual Documents will be valid or binding unless recorded in writing and signed by duly authorised representatives on behalf of the parties.

8. Assignment

8.1. You shall not assign, transfer, mortgage, charge, subcontract, declare a trust over or deal in any other manner with any of the rights and obligations under the Agreement without our prior written consent (such consent to be granted or withheld in our absolute discretion).

9. Force majeure

9.1. Neither party shall be in breach of this Agreement nor liable for delay in performing, or failure to perform, any of its obligations under this Agreement if such delay or failure results from events, circumstances or causeswhich could not be foreseen, or which, though foreseen, were inevitable.

10. Our fees

10.1. Without prejudice to clause 10.3 below, you become liable to pay our fees upon issuance of the Valuation. For the avoidance of doubt, unless expressly agreed otherwise in writing, the payment of our fees is not conditional on any other events or conditions precedent.

10.2. If any invoice remains unpaid after 30 days of the date on which it is presented, we reserve the right to charge interest, calculated daily, from the date when payment was due until payment is made at 3%

10.3. If we should find it necessary to use legal representatives or collection agents to recover monies due, you will be required to pay all costs and disbursements so incurred.

10.4. If an appraisal analysis is ordered and the assignment is cancelled before completion, we reserve the right to receive compensation, by way of damages, in an amount equal to 70% of the total fee for the assignment.

10.5. If you delay the instruction by more than 30 days or materially alter the instruction so that additional work is required at any stage or if

we are instructed to carry out additional work that we consider (in our reasonable opinion) to be either beyond the scope of providing the Valuation or to have been requested after we have finalised our Valuation (including, but not limited to, commenting on reports on title), we will charge additional fees for this work. Such additional fees will be calculated on the basis of a proportion of the total fee by reference to reasonable time and expenses incurred.

10.6. Where we agree to accept payment of our fees from a third party, such fees remain due from you until payment is received by us.

11. Anti-bribery and corruption and Anti-Money Laundering
We agree that throughout the term of our appointment we shall:

(a) comply with all applicable laws, statutes, regulations, and codes relating to anti-bribery and corruption and Anti-Money Laundering laws (the "**Relevant Requirements**");

(b) not engage in any activity, practice or conduct which would constitute an offense;

(c) maintain anti-bribery, anti-corruption, and anti-money laundering policies to comply with the Relevant Requirements and any best practice relating thereto; and

(d) promptly report to you any request or demand for any undue financial or other advantage of any kind in connection with the performance of our services to you.

12. Portfolios
Properties comprising a portfolio, unless specifically agreed with you otherwise, will be valued separately and upon the assumption that the properties have been marketed individually and in an orderly manner.

13. Land Register inspection and searches
We are not required to undertake searches, validations or inspections of any kind for title or price paid information in any publicly available land registry.

14. Title and burdens
We will assume, unless specifically informed and stated otherwise, that each property has good and marketable title and that all documentation is satisfactorily drawn and that there are no unusual outgoings, planning proposals, onerous restrictions or local authority intentions which affect the property, nor any material litigation pending.

15. Disposal costs and liabilities
No allowance is made in our Valuation for expenses of realisation or for taxation which may arise in the event of a disposal and our Valuation is expressed as exclusive of any VAT that may become chargeable. Properties are valued disregarding any mortgages or other charges, including commissions.

16. Sources of information
We rely upon the information provided to us by you, as to details of tenure and tenancies, planning consents and other relevant matters, as summarised in our Valuations. Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser.

17. Identity of property to be valued
We will exercise reasonable care and skill (but will not have an absolute obligation to you) to ensure that the property, identified by the property address in your instructions, is the property inspected by us and contained within our valuation report. If there is ambiguity as to the property address, or the extent of the property to be valued, this should be drawn to our attention in your instructions or immediately upon receipt of our report.

18. Boundaries
Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.

19. Planning, highway and other statutory regulations
19.1. Enquiries of the relevant planning and highways authorities in respect to matters affecting properties, where considered appropriate, are normally only obtained from the corresponding government agency. We can only state whatever current conditions may be. We recommend that formal written enquiries should be undertaken by your lawyers who should also confirm the position with regard to any legal matters referred to in our Valuations.

19.2. It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative, regulatory, or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.

19.3. We assume that the premises comply with all relevant statutory requirements including environmental, building, fire, and sanitation regulations.

20. Property insurance
Our Valuation assumes that each property would, in all respects, be insurable against all identifiable risks.

21. Building areas and age
Where so instructed, areas provided from a quoted source will be relied upon. Any dimensions and areas measured on location or from plan/s are calculated and are quoted to a reasonable approximation, with reference to their source. Where the age of the building is estimated, this is for guidance only.

22. Structural condition
Building, structural and ground condition surveys are detailed investigations of the building, the structure, technical services and ground and soil conditions undertaken by specialist building surveyors or engineers and fall outside the normal scope of a valuation. Since we will not have carried out any of these investigations, we are unable to report that any property is free of any structural fault, rot, infestation or defects of any other nature, including inherent weaknesses due to the use in construction of deleterious materials. We do reflect the contents of any building survey report provided to us in advance, or any defects or items of disrepair of which we are advised or which we note during the course of our ocular inspections but otherwise assume properties to be free from defect.

23. Ground conditions
Unless informed otherwise in writing, we assume there to be no adverse ground or soil conditions and that the load bearing qualities of the sites of each property are sufficient to support the building constructed or to be constructed thereon.

24. Environmental issues

24.1. Investigations into environmental matters by suitably qualified environmental specialists would usually be commissioned by most responsible purchasers or chargees of higher value properties or where there was any reason to suspect contamination or a potential future liability. Furthermore, such investigation would be pursued to the point at which any inherent risk was identified and quantified before a purchase proceeded. Where we are provided with the conclusive results of such investigations, on which we are instructed to rely, these will be reflected in our Valuations with reference to the source and nature of the enquiries. We would endeavour to point out any obvious indications or occurrences known to us of harmful contamination encountered during the course of our valuation enquiries.

24.2. However, we are not environmental specialists and therefore we do not carry out any scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination or any other environmental searches. If we are not provided with the results of appropriate investigations as outlined above and where there is no obvious indication of harmful contamination, our Valuation will be provided on the assumption that the relevant property is unaffected. Where we are informed that contamination is suspected or confirmed, but adequate investigation has not been carried out and made available to us, then the Valuation will be qualified only by reference to it.

25. Minerals, timber, airspace etc.

Unless specifically agreed otherwise in writing and so stated within the main body of the relevant Valuation, we do not value or attempt to value or take into account any potential income stream or other beneficial or detrimental effect or other factor relating to undiscovered or unquantified mineral deposits, timber, airspace, sub-ground space or any other matter which would not be openly known in the market and considered to have value.

26. Legal advice

26.1. We are appointed to provide valuation opinion(s) in accordance with our professional duties as Appraisers. The scope of our service is limited accordingly. The valuation assumes no responsibility for the validity of legal matters affecting the property. It is not the intent of the valuation to offer a legal opinion of title. Any liens or encumbrances which may now exist have been disregarded. We are not qualified legal practitioners and we do not provide legal advice and any statements made by us, or advice given, in a legal context should be construed accordingly.

26.2. Where appropriate we will liaise with your legal advisors. However, we accept no responsibility for any work carried out by them and we will not be liable for anything contained in legal documentation prepared by them.

26.3. Where we consider it is necessary for the provision of the Valuation and/or specifically agree to do so, and any additional fees we require for this work are agreed, we will read legal documents (including leases, licences etc.), however, (save for any comment concerning the impact of our interpretation of such documents on value) our interpretation of such documents cannot be relied upon to be legally correct. Where we do interpret legal documents, we will, for the purposes of providing our Valuation, assume our interpretation to be correct.

27. Loan security

Where instructed to comment on the suitability of property as a loan security we are only able to comment on any inherent property risk. Determination of the degree and adequacy of capital and income cover for loans is the responsibility of the lender having regard to the terms of the loan.

28. Build cost information

In the provision of valuation services we do not hold ourselves out to have expertise in assessing build costs. Where our instruction requires us to have regard to build cost information, for example in the valuation of properties with development potential, we strongly recommend that you supply us with build cost and other relevant information prepared by a suitably qualified construction cost professional, such as a quantity surveyor. The Valuation will be stated to have been arrived at in reliance upon the build cost information supplied to us by you. In the absence of any build cost information supplied to us, we may have regard to published build cost information. Build costs produced using this approach must be assumed to be unreliable or inaccurate; any reliance which can be placed upon our Valuation in these circumstances is severely restricted. Specialist professional advice on the build costs should be sought by you. If you subsequently obtain specialist build cost advice, we recommend that we are instructed to review our Valuation.

29. Reinstatement assessments

A reinstatement assessment for insurance purposes is a specialist service and we recommend that separate instructions are issued for this specific purpose. If an indication is required as a check against the adequacy of existing cover this should be requested and will be so stated in the body of the relevant Valuation. Any indication given is provided for guidance only and must not be relied upon as the basis for insurance cover. In any event, our reinstatement assessment should be compared with the owner's and if there is a material difference, then a full reinstatement valuation should be reconsidered.

30. Comparable evidence

Where comparable evidence information is included in our Valuation, this information is often based upon our oral enquiries and its accuracy cannot always be assured, or may be subject to undertakings as to confidentiality. However, such information would only be referred to where we had reason to believe it or where it was in accordance with our expectation. In addition, we have not inspected comparable properties.

31. Valuation bases

Valuations are carried out on a basis appropriate to the purpose for which they are intended and in accordance with the relevant definitions, commentary and assumptions. The basis of valuation will be agreed with you and specified in the Letter and in the relevant Valuation.

<u>Important Notice</u>

If you have any queries relating to this Agreement please let us know as soon as possible, and in any event before signing the Letter and/or giving us instructions to proceed.

Your instructions to proceed, preferably signing on the space provided for under the Letter, will constitute your acceptance to use our services on the terms of the Agreement.

Accordingly, our commencement of work pursuant to your instructions shall constitute acceptance of your offer and as such establish the contract between us on the terms of the Agreement.

Appendix 9 - Schedule of Assets

BUILDING	
Description	Market Value (PhP)
CYBERGATE DELTA 1 -	
As seen during our inspection for the previous valuation done, this is a five (5)-storey, reinforced concrete-framed building with roof deck and one (1) basement parking. The ground floor is being utilized as lobby and for retail purposes occupied by PNB, Riway Inc., Surf & Turf, VXI Global Holdings BV and Sumifru Philippines Corporation. The upper floors are mainly used as offices with the second floor being entirely occupied by VXI Global Holdings BV. Third floor, meanwhile, is occupied by Demand Science, VXI Global Holdings BV and Pioneer. Fourth floor is occupied by Skynora and VXI Global Holdings BV occupies the fifth. Basemen parking also houses the administration office.	
Construction features include plastered cement finish precast concrete exterior walls; concrete slab roofdeck with waterproofing membrane; mainly ceramic tiles on concrete flooring at lobbies and hallways, and epoxy paint finish concrete flooring on parking areas; gypsum board ceiling on aluminum t-runners in common areas; frameless glass main entrance doors and mainly glass panels on aluminum frame windows. Based from the information provided to us, interior finishes within the leased units (offices and retail areas) are reportedly introduced by the tenants and were, therefore, excluded in this report.	
The building is reportedly completed sometime in January 2018. It is painted and provided with electrical lighting and plumbing facilities, two (2) concrete water cistern tanks, each with a capacity of 25,000 gallons, and one (1) cistern tank for fire with a capacity of 45,000 gallons. Based on the floor area tabulation provided to us, the building has a total gross floor area of about 15,184.98 square meter. The building is also provided with building machinery and equipment described and valued in the equipment section of this report.	**405,400,000** ==========

OTHER LAND IMPROVEMENTS

Description	Market Value (PhP)
Concrete pavements / Driveways / Parking Areas / Drop-Off Areas / Sidewalks These are well compacted earth filled pavements with reinforced concrete cement finish and compacted gravel. Estimated surface area is about 3,375 sq. m	6,264,000
Perimeter Fence - These are concrete hollow blocks with plastered cement finish and partly with wire mesh.	760,000
Compound Lighting - This consists of 5 single-arm mercury arc lamps, approximately 20 feet high.	147,000
Signage - This is an acrylic double-faced signage on aluminum frame with LED lights mounted on concrete foundation.	590,000

Total for Other Land and Improvements	**7,761,000**

BUILDING MACHINERY & EQUIPMENT

Description	Market Value (PhP)
<u>Elevators</u>

ACCU Indoor Unit (FCU) -
Ceiling mounted, Model FLQ60KAVEA
Air Conditioning Unit-
Daikin, Model RZR60 MVM, split packaged ceiling cassette type, approximately 5 tons of refrigeration capacity, complete with outdoor condensing unit, indoor air handling unit, and other standard accessories
Note: Located at Admin Office
Air Conditioning Unit-
Daikin, Model RZR60, split packaged ceiling cassette type, approximately 5 tons of refrigeration capacity, complete with outdoor condensing unit, indoor air handling unit, and other standard accessories
Note: Located at Security/CCTV Room
Air Conditioning Unit-
Daikin, split packaged floor mounted, Model RZR140MVM, approximately 7.5 tons of refrigeration capacity, complete with outdoor condensing unit, indoor air handling unit, and other standard accessories
Note: Located at Upper Ground Floor Lobby
System complete with piping connections, electrical and controls system, valve and fittings, and other standard accessories
Note: Installed in various locations 13,684,000

Lot-Air Ventilation and Exhaust System-
Consisting of:
5-Jet Fans-
Jet Vent, jet type, driven by 450 watts motor
3-Smoke Exhaust Fans(SEF)-
Krugger, SISW, 2034 CMH/1200 CFM, driven by 0.37 kw electric motor
Male Toilet Exhaust Fan(TEF)-
Krugger, SISW, 2633 /1500, driven by 0.55 kw electric motor
Male Toilet Exhaust Fan(TEF)-
Krugger, SISW, 2718 /1600, driven by 0.55 kw electric motor
Kitchen Exhaust Fan(KEF)-
Krugger, SISW, 27184 /16,000 driven by 5.5 kw electric motor
2-Kitchen Exhaust Fans(KEF)-
Krugger, SISW, 16,940/10,000 driven by 3.7 kw electric motor
4-HRV Exhaust Fans (HEF#1) -
Krugger, SISW, 3394 /2000 driven by 0.55 kw electric motor
Exhaust Fan (LGF Parking Area)-
Krugger, Tube Axiel 60,315/35,550 driven by 18.5 kw electric motor
Exhaust Fan (LGF Sistern Pump Room)-
Krugger, wall mounted, 1356/798 driven by 0.17 kw electric motor
2-Exhaust Fans (LGF Storage Lacker Room)-
Krugger, wall mounted 610CMH/359CFM, driven by 0.15 kw electric motor
3-Exhaust Fans (LGF-Fuel Pump Room)

Krugger, wall mounted 610CMH/359CFM, driven by 0.08 kw electric motor
3-Exhaust Fans LGF-STP Pump Room
Krugger, wall mounted, 284/167, driven by 0.08 kw electric motor
4-Exhaust Fans LGF-Fuel Pump Room
Krugger, ceiling mounted, 85/50, driven by 0.01 kw electric motor
Exhaust Fan (UGF-LVSG Room)
Krugger, wall mounted, 23558/14042, driven by 1.3 kw electric motor
Exhaust Fan (UGF-HVSG)
Krugger, wall mounted, 1356/798, driven by 0.17 kw electric motor
Exhaust Fan (UGF-Storage Room)
Krugger, wall mounted, 464/273, driven by 0.08 kw electric motor
Exhaust Fan (UGF-Female Toilet)
Krugger In-Line Centrifugel, 255/150, driven by 0.09 kw electric motor
6-Exhaust Fans-UGF Toilet
Krugger ceiling cassette, 85/50, driven by 0.09 kw electric motor
16-Exhaust Fans-UGF Toilet
Krugger ceiling cassette, 85/50, driven by 0.01 kw electric motor
Pressurericed Fan
Krugger SISW, 6116/3600, driven by 1.1 kw electric motor
Pressurericed Fan
Krugger SISW, 6116/3600, driven by 1.1 kw electric motor
Pressurericed Fan
Krugger SISW, 6116/3600, driven by 1.1 kw electric motor
HRV Fresh Air 1
Krugger SISW, 3594/2000, driven by 0.55 kw electric motor
HRV Fresh Air 2

HRV Fresh Air 4
Krugger SISW, 3594/2000, driven by 0.55 kw electric motor
System complete with ductings installations, electrical and controls system and other standard accessories — 2,024,000

Total for Air Conditioning and Ventilating System - **15,708,000**

Lot-Standby Power Supply and Electrical Power Distribution System-
System consisting of:
3-AC Electric Generating Sets-
Baita, Model BF-C825-60, March 2017 Mfg Date, Ser. Nos. 1612057, 1612058 and 1612059, 1000 kva (800 kw) rated capacity, 0.80 power factor, 1800 rpm, 3 phase, 60 hz, powered by:
12 Cylinder Diesel Engine-
Cummis, turbo-charged, direct injection, water cooled, complete with battery, controls and other standard accessories, steel skid base mounted on concrete foundation
Generator Synchronizing Panel-
Metal clad casement, free standing with 6 vertical sections, complete with main breakers, sub-breakers, magnetic contactors, relays, timers, on/off switches, pushbutton switches, pilot lights, automatic transfer switch and other standard accessories
2-Fuel Day Tanks-
Mild steel plate of welded construction, 2,000 liters capacity
Mother Fuel Storage Tank-

Mild steel plate of welded construction, 16,000 liters capacity *Note: Located at Basement* Fuel Pump- Tuthill, rotary gear type, driven by 1.5 kw electric motor *Note: Located at Basement* Power Transformer- Cooper, 1.5 mva rated capacity, 13.2 kv and 380 volts primary and secondary voltages, dry type, pad mounted, 3 phase Incoming Power- Cooper, metal clad casement, with swing-out door panel, 13.2 kv Low Voltage Switchgear- Scheider, 3000 AT, metal clad casement, free standing with 5 vertical sections, complete with main breakers, sub-breakers, magnetic contactors, relays, timers, on/off switches, pushbutton switches, pilot lights automatic transfer switch and standard accessories Bus Duct- Delta, 3200AT, 1600AT,complete with standard accessories Capacitor Bank- Metal clad casement, free standing with 2 swing-out door panels, 400 kvar capacity System complete with fuel pumps, automatic transfer switch, electrical wiring installations, piping connections, contactors, relays and other standard accessories	**43,860,000**
Lot-Water Supply and Sewerage System- Consisting of: 3-CPS Booster Pumps- Grundfos, cenntrifugal vertical in-line type, 80 GPM capacity, driven by 7.45 kw electric motor, equipped with; *Pressure Tank-* Super Flow, GWS, mild steel construction, approx. 380 mm dia x 760 mm high *Note: Unit located at Basement near Fire Pump* 3-Lift Station Pumps- Submersible type, driven by 5.5 kw electric motor *Note: Located at Basement* 3-Detension Pumps- Submersible type, driven by 11 kw electric motor *Note: Located at Basement* System complete with piping connections, valves and fittings, controls and other standard accessories	**2,879,000**
Lot-Automatic Fire Fighting, Fire Protection and Alarm System Consisting of: Fire Pump- Peerles Pump, vertical turbine type, 750 gpm capacity, driven by 75 kw electric motor Fire Pump- Peerles Pump, vertical turbine type, 750 gpm capacity, driven by 4 Cylinder Clarke / John Deere Diesel Engine Jockey Pump- Submersible type, 40 GPM, driven by 5.6 kw electric motor 2-Fire Pump Controllers- Tornatech Jockey Pump Controller- Tornatech 2,173 Sprinkler Heads-	

Pendant and upright type 13-Fire Hose Cabinets- Aluminum frame with glass panel door, wall mounted, complete with fire hose and nozzle 42-Fire Extinguishers- ABC, dry chemical, 10 lbs capacity 28-Fire Extinguishers- Standard, ceiling mounted, 10 lbs capacity Fire Extinguisher- Halogenic, wall surface mounted, 20 lbs capacity System complete with 49-public address amplifiers, 12-addressablefire alarm speakers with strobe lights, 12-addressable fire alarm speakers,330-smoke detectors,14-intercoms, FDAS, fire alarm bells, 4-loop fire alarm panel, piping connections, valves, fittings, and other standard accessories *Note: Installed in various locations.*	**12,563,000**
Lot-Sewage Treatment Plant - Approximately at an average of 160 cubic meters per day effluent working capacity, complete with 2 - 11 kw Roota aeration blowers, 2-15 kw feed pumps, 2-1.5 kw effluent pumps, 2-0.75 kw decanter pumps, carbon filters, air diffusers, valves, fittings, piping installations, collecting chamber tanks, controls and other standard accessories	**4,309,000**
Lot-CCTV Security Monitoring System- Consisting of: 34-CCTV Cameras- Fix dome type 3-LCD Monitors- Samsung, 32" screen size 3-NVR- Ultra HD System complete with power supply, controller, electrical and wiring installations, controls and other standard accessories	**1,171,000**

Total for Building Machinery & Equipment -	**93,049,000**

PROFESSIONAL PROFILE

WENCESLAO D. FUENTES, JR.
Director

T 632.752.2580

F 632.752.2571

Bong.Fuentes@santos.knightfrank.ph

Bong D. Fuentes, Jr. is a Director of Santos Knight Frank, Inc. under the Valuations Group. His major functions include scheduling, monitoring, and overseeing the various engagements of the Group, and also supervises the valuation pertaining to Plant and Machinery. He also has parallel involvement in Real Property appraisal, being a Licensed Real Estate Appraiser. Other responsibilities include business development for corporate and financial institution accounts.

Prior to joining Santos Knight Frank, Inc., Bong was involved with other appraisal companies like Sallmanns Phil., Inc. and Asian Appraisal Company, Inc. where he started his appraisal career. He was also involved with financial institutions like Bank of the Philippine Islands (BPI) and the former Far East Bank & Trust Company. His experience in his field spans a period of almost twenty-one (21) years, and he has handled appraisal/valuation studies for all types of Plant and Machinery and Real Property Valuation in the Philippines. His experience in the valuation of Plant Machinery include assignments in the People's Republic of China (PROC), Hong Kong, United Arab of Emirates, Malaysia and Thailand.

- Member, Philippine Society of Mechanical Engineers-Manila Chapter
- Member, Philippine Association of Realty Appraisers
- Mechanical Engineer, PRC Registration No. 34962
- Real Estate Appraiser, PRC Registration No. 422
- Bachelor of Science in Mechanical Engineering, Polytechnic University of the Philippines

PROFESSIONAL PROFILE

JACQUELINE T. GUERTA
Director

T 632.752.2580

F 632.752.2571

Jacq.Guerta@santos.knightfrank.ph

Jacqueline T. Guerta is a Director of Santos Knight Frank, Inc. under the Valuations Group. She is mainly responsible for handling intangible/business valuation instructions which also include valuing shares of stock, goodwill, and the like, as well as valuing real estate assets, being also a Licensed Real Estate Appraiser.

Prior to joining Santos Knight Frank, Inc., Ms. Guerta was involved with Colliers International Philippines, Inc. as a Valuation Manager. She primarily handled real estate and business valuation instructions for both local and international companies. She started her 20 year career in real estate as a Research Analyst for Cuervo Far East, Inc. While with Cuervo, she handled research and consulting requirements for the company's valued clients.

- Member, Phil. Association of Realty Appraisers, Inc. (PARA)
- PRC Registration No. 949
- Certificate in Real Estate Investment Finance, Asia Pacific Real Estate Association (APREA) Institute
- Masters in Business Administration, Ateneo de Manila Graduate School of Business
- Bachelor of Arts in Social Sciences, Ateneo de Manila University

Appendices

1 Instructions

Engagement of Santos Knight Frank

Instructions	1.1	We refer to our Letter of Engagement dated 21 September 2020 and Amendment dated 01 June 2021, to provide a Valuation Report on the opinion of **Market Value** using Cost and Income Approaches of that certain Property consisting of leasehold of land, building, other land improvements, and building machinery & equipment of a site identified as Cyberscape Beta located along **Ruby and Topaz Roads, within Ortigas Center, Pasig City, Metro Manila, Philippines**, ("the Property"). A copy of that document is attached herein as Appendix **2**.
	1.2	This valuation has been carried out by Santos Knight Frank, Inc. ("Santos Knight Frank" or "SKF"), in accordance with our General Terms of Business for Valuations ("General Terms of Business"), as attached as Appendix **3**.
Client	1.3	Our client for this instruction is **Robinsons Land Corporation** ("the Client").
Valuation standards	1.4	This valuation has been undertaken in accordance with the International Valuation Standards, as well as other local standards.
Purpose of valuation	1.5	You have confirmed that this valuation is for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
Conflict of interest	1.6	We confirm that we do have a material connection or involvement giving rise to a potential conflict of interest, as set out below: We have conducted the valuation of the same Property for you as of 30 September 2020 for purposes of: i) the tax-free exchange of assets to a REIT Company, and (ii) for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
	1.7	You have confirmed this Engagement notwithstanding this matter, you are content for us to proceed with this instruction. We are providing an objective and unbiased valuation.
	1.8	We are acting as external and independent valuers in this engagement.
Responsibility to third parties	1.9	Our valuation report is only for the use of our Client and for the purposes for which are stated herein, and no liability is accepted to any third party for the whole or any part of its contents.
Disclosure & publication	1.10	Except for the purposes which are stated herein, neither the whole nor any part of this valuation nor any reference thereto may be included in any published

document, circular or statement nor published in any way without our prior written approval of the form or context in which it may appear.

Limitations on liability	1.11	No claim arising out of or in connection with this valuation report may be brought against any member, employee, partner, director or consultant of Santos Knight Frank, Inc. Those individuals will not have a personal duty of care to any party and any claim for losses must be brought against Santos Knight Frank, Inc.
	1.12	Santos Knight Frank, Inc.'s total liability for any direct loss or damage caused by negligence or breach of contract in relation to this instruction and valuation report is limited to the amount of the level of our fee, specified in the Letter of Engagement, a copy of which is attached as Appendix **2**. We do not accept liability for any indirect or consequential loss (such as loss of profits).
	1.13	The above provisions shall not exclude or limit our liability in respect of fraud or for death or personal injury caused by our negligence or for any other liability to the extent that such liability may not be excluded or limited as a matter of law.
Expertise	1.14	The valuation process was performed by **Raymond F. Dechavez**, under the supervision of **Jacqueline T. Guerta** and **Jesus Constance M. Castro**, both licensed Real Estate Appraisers. The Principal Signatory on behalf of Santos Knight Frank, Inc. and who also reviewed the Valuation Report, is **Wenceslao D. Fuentes, Jr.,** also a licensed Real Estate Appraiser. We confirm that the above-named Licensed Real Estate Appraisers are registered with the Professional Regulation Commission ("the PRC"), having sufficient current knowledge of the particular market and the skills and understanding to undertake the valuation competently.
Vetting	1.15	This report has been vetted as part of Knight Frank global standards.

Scope of enquiries & investigations

Inspection	1.16	In accordance with your instructions, due to the limited timeframe to complete the Engagement, we have not conducted a current inspection. The Property has been previously inspected. Valuation rendered is a result of a revaluation of a property that has previously been inspected.
	1.17	The Client has provided us with information regarding the changes to the physical attributes and/or characteristics of the Property; current or anticipated changes in rental income from the Property; and material changes to the non-physical attributes of each property, such as other lease terms, planning consents, statutory notices and other relevant information which have occurred between the valuation date and the date of our previous valuation. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.
Investigations	1.18	The extent of enquiries/investigations made is set out in our General Terms of Business. In carrying out this instruction, we have undertaken verbal / internet-

based enquiries referred to in the relevant sections of this report. We have relied upon this information as being accurate and complete.

Information provided

1.19 In this report, we have been provided with information/documents by the Client for the previous valuation done as well as for the current engagement. We have relied upon this information as being materially correct in all aspects. In particular, we detail the following:

- floor plans
- gross floor area tabulation
- site development plan
- lot area allocation
- rent roll
- financial statements
- projections
- historical and current occupancy

1.20 In cases where we were not provided with documents or information, we did our own enquiries as outlined and stated in the report. Any assumptions in lieu of the lack of information is also set out in the relevant sections of this report.

Valuation basis

1.21 In accordance with your instructions, we have provided an opinion of value on the basis of **Market Value**.

Market Value (MV)

1.22 Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property.

It is further assumed that title to the Property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable.

The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.

Valuation date

1.23 The valuation date is **30 June 2021.**

2 The Property

Location

Address 2.1 The Property, identified as Cyberscape Beta, is an office building located along the west side of Ruby Road extending westward to Topaz Road, midway between Garnet and Opal Roads, within Ortigas Center, Barangay San Antonio, Pasig City, Metro Manila.

The site is situated about 250 meters southeast from Robinsons Galleria, some 280 meters southeast from St. Pedro Poveda College, roughly 540 meters west from Metrowalk Complex, about 550 meters southeast from the corner of Epifanio Delos Santos Avenue (EDSA) and Ortigas Avenue, or approximately 780 meters northeast from SM Megamall.

Below is a satellite image courtesy of Google Maps showing the Property and its relation to the immediate vicinity.

Note: Image courtesy of Google Maps.

2.2 The street plan below shows the location of the Property.

Neighborhood 2.3 Ortigas Center is Metro Manila's third most important business district after the Makati and BGC. Like other CBDs in the metropolis, it is also home to many skyscrapers and shopping malls. Located along EDSA are three shopping malls, namely: Robinson's Galleria, SM Megamall and the elite Shangri-la Plaza. Right behind SM Megamall are St. Francis Square, The Podium, San Miguel Corporation Headquarters and the ADB Complex. The district is also the home to University of Asia and the Pacific, and Saint Pedro Poveda College.

Accessibility 2.4 The Property has direct frontage along two roads making it easily accessible. The district where the Property is situated, meanwhile, is surrounded by four (4) major thoroughfares: on the west by EDSA, on the north by Ortigas Avenue, on the east by Meralco Avenue, and on the south by Shaw Boulevard. These thoroughfares provide easy access to/from various sections of the metropolis.

Public transportation such as buses and taxicabs are mainly available throughout the day along the nearby EDSA. MRT Line also runs along EDSA, a mass public transport linking the district to Pasay, Makati, Mandaluyong and Quezon City.

Land Details

Certificates of Title

2.5 Based on documents furnished us, the land where Cyberscape Beta is erected consists of two (2) adjoining lots containing an aggregate area of **3,909.50 sq.m.**, technically identified as follows:

Lot/Survey Plan No.	TCT No.	Area (Sq. m.)
Lot 2-B / Psd-00-071110	011-2011000982	957.50
Lot 2-C / Psd-00-071110	011-2011000981	2,952.00
	Total -	**3,909.50**

2.6 The aforementioned Transfer Certificates of Title were both issued in favor of **the Client** on 18 May 2011 / 4 April 2011 by the Registry of Deeds for the City of Pasig.

Lot Area Allocation

2.7 The site is shared by another building identified as Cyberscape Gamma which is not covered by this valuation. Based on information provided to us by the Client, land area allocated for Cyberscape Beta is approximately **1,955 square meters**.

Draft Contract of Lease

2.8 We were provided by the Client a copy of a Draft Contract of Lease with ROBINSONS LAND CORPORATION, as the Lessor, and RL COMMERCIAL REIT, INC. (formerly Robinsons Realty and Management Corporation)[1], as the Lessee.

Based on the same document, the lease contract stated that it will cover the land being occupied by Robinsons Cyberscape Beta with an area of 1,955 sq.m. Lease term would be for a period of 98 years. It likewise specified that the monthly lease payments would be 7% of the monthly rental income gained from Robinsons Cyberspace Beta which is owned by the Lessee (plus VAT, as appliable).

2.9 The management of RLC disclosed that actual lease commencement shall be the date of the Certificate of Approval of the Increase in Authorized Capital Stock of RCR issued by the SEC. However, for valuation purposes, lease commencement shall be assumed on October 1, 2021.

In the absence of a signed contract, we used the foregoing details to establish the leasehold value of the land.

Tenure

2.10 For purposes of this engagement, ownership rights to the land are treated as **leasehold.**

Terrain

2.11 The terrain of the land is flat. Its finished elevation is slightly higher than the existing grade of the fronting roads.

Description of Improvements and Machinery & Equipment

Improvements and Machinery & Equipment

2.12 The land is presently improved with an office building identified as Cyberscape Beta, a PEZA registered, Grade A office building, construction of which was completed sometime in May 2014. Also included in this valuation are the

[1] As of the date of this Valuation Report, application for the change in name from “Robinsons Realty and Management Corporation” to “RL Commercial REIT, Inc.” is pending the approval of the Philippine SEC.

appurtenant Machinery & Equipment. These are all described in detail in the Schedule of Assets (Appendix **9**).

Tenure 2.13 We were advised that the Client owns the improvements described above. As stated, the land would be covered by a long-term Lease Agreement. We have, however, treated the improvements as freehold.

Accommodation

Measurement 2.14 Based on the gross floor area tabulation provided to us by the Client, the building has a total gross floor area of approximately 60,190.02 sq. m.

2.15 The Gross Floor Area (GFA) is tabulated as follows:

Floor	GFA (sq. m.)
B1	1,655.48
B2	1,655.48
B3	1,655.48
B4	1,655.48

Total	60,190.02

Condition

Scope of Inspection

2.16 As stated earlier, we have previously inspected the Property.

2.17 As stated in the General Terms of Business, during our previous inspection, we have not undertaken a building or site survey of the Property, as it is beyond the normal scope of appraisal.

2.18 We have carried out visual inspection only without any structural investigation or building survey. During our limited inspection, we did not inspect any inaccessible area/s. We are unable to confirm whether the Property is free from urgent or significant defects or items of disrepair.

2.19 Unless otherwise stated, we have not been able to carry detailed on-site measurement to verify the site and gross floor areas of the Property and we have no reason to doubt the truthfulness of the areas shown on the documents provided to us.

2.20 Moreover, due to the nature of the machinery, we have not carried out mechanical inspection, and our assessment was based on the premise that the machinery is in a condition commensurate with age and normal usage.

2.21 In the Schedule of Assets or Asset Inventory, machinery and/or equipment were listed as complete units i.e., machinery and/or equipment are meant to include all parts and accessories normally comprising the unit.

Comments

2.22 Apart from the matters specifically referred to below, we have assumed that the Property is in sound order and free from structural faults, rot, infestation or other defects, and that the services are in a satisfactory condition.

2.23 The buildings and structures, including the machinery & equipment, were assumed to be in a generally good condition commensurate with their age and use. It was also assumed that there are no urgent or significant defects or items of disrepair which would be likely to give rise to substantial expenditure in the foreseeable future or which fall outside the scope of the normal annual maintenance programme.

Ground conditions

2.24 We have not been provided with a copy of a ground condition report for the site. We have assumed that there is no adverse ground or soil conditions and that the load bearing qualities of the site are sufficient to support the building.

Services

2.25 It would appear from our previous inspection that main supplies of electricity and water are provided to the Property. Telephone communication facilities are likewise available. Sewer and drainage are believed to be discharged to the building's sewerage system.

Tenancies

Tenancy Information

2.26 We have been provided with copy of some of the rent roll including some of the lease contracts by the Client and have relied on that information as being correct. No additional verification has been undertaken.

2.27 A summary of the Property tenancies is presented below.

TENANT	LEASED OUT AREA (GROSS)	Contract Lease Start	End

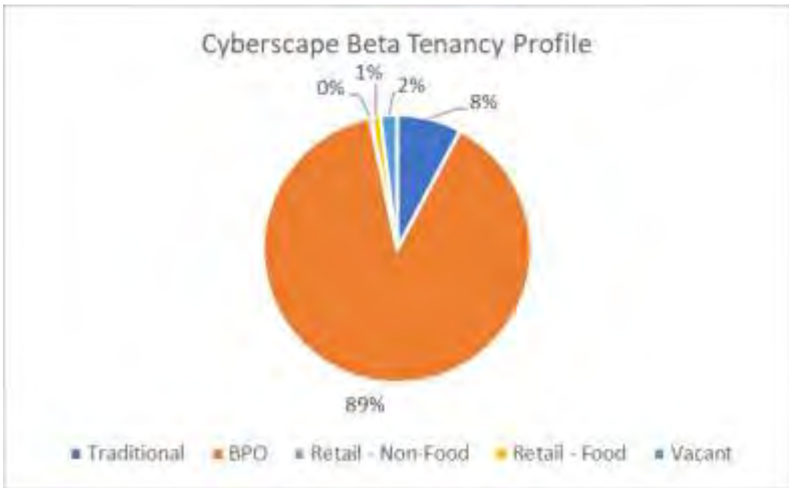
	1,480.66	01-May-14	31-Dec-24
Tenant 22	4,441.98	01-Feb-14	30-Jun-24
	1,480.66	02-Feb-15	30-Jun-24
Tenant 23	1,480.66	06-May-15	31-Oct-25
Tenant 24	717.49	01-Jan-21	31-Dec-23
Tenant 25	1,480.66	01-Mar-21	28-Feb-26
Tenant 26	717.49	01-Jan-21	31-Dec-25

2.28 Based on the information provided by the Client, total leasable area is **42,244.76** sq.m. with **331** parking slots available for lease.

2.29 The Property currently has a mix of traditional offices, Business Process Outsourcing (BPO) companies and some retail tenants. Based on the figure below which summarizes the tenancy profile of the Property, BPOs currently take up 89% of the Property's leasable area followed by traditional offices at 8%.



Source: SKF, RLC

2.30 As of 30 June 2021, the Property is 98% occupied with a Weighted Average Lease Expiry (WALE) of 3.20 years. Earliest period with an expiring lease is 2022 with 8% of total leased area, followed by 2023 with 14% of leased areas. Additionally, in 2024, a sizeable 60% of the leased area will be up for renewal or a new lease.

Source: SKF, RLC

2.31 Below are some of the provisions as stated in the Lease Contract.

a. **Care of the Leased Premises**

The LESSEE shall at its expense, maintain the Leased Premises in a clean and sanitary condition, free from noxious odors, disturbing noises or other nuisances and, upon the expiration of the lease, shall return the premises and fixtures in as good condition as that in which they were actually found at the beginning of the lease, ordinary wear and tear excepted. The LESSEE shall not drive nails, screws, hooks or other abutments on or into the walls frames or other portions of the premises or in any manner deface or damage any part thereof. Any damage caused by the LESSEE may be repaired by the LESSOR for the account of the LESSEE. The LESSOR shall have the right to require the LESSEE to remove any display or promotional matter, or any displayed merchandise which LESSOR reasonably and in good faith considers to be improper or inappropriate for the general appearance or presentation of the premises.

The LESSOR shall be responsible for major repairs which are limited to those which affect the structure of the Leased Premises or the building. The LESSEE shall allow access to the LESSOR on the Leased Premises for purposes of repair or remodeling or such other works as may be necessary for the preservation, conservation, improvement or decoration of the building or any part thereof. No compensation or claims shall be allowed against the LESSOR by reason of any inconvenience or annoyance to the LESSEE that may arise by reason thereof.

The LESSEE shall promptly repair, at its own expense, any damage to the Leased Premises or any other improvements within the building caused by bringing into the Leased Premises of any property for the LESSEE’s use, or by the installation or removal of such property, regardless of who is at fault or who caused such damage. unless such was clearly caused by the LESSOR, or its agents or employees. In default of such repairs by the LESSEE, the LESSOR may effect the repairs and the LESSEE agrees to promptly pay the LESSOR the cost of such repairs. The LESSEE shall be responsible for the maintenance and repair of the Leased Premises including plumbing and electrical fixtures within the premises or those serving the same.

The LESSEE must notify the LESSOR immediately of any damage to the Leased Premises, their appurtenances as well as any occupation, usurpation or untoward act being committed, or threatened to be committed, within the Leased Premises.

No machinery, furniture, effect, equipment and other properties found within the Leased Premises, whether or not owned by the LESSEE, may be brought into or out of the building without the prior written approval of the LESSOR. Furthermore, in case the LESSEE has any outstanding/unsettled rent, dues or other charges, the LESSOR reserves the right to withhold approval of any request for bringing in or out of any machinery, furniture, effects or other properties found within Leased Premises, whether or not owned by the LESSEE, until such outstanding amounts have been duly settled by the LESSEE. This is without prejudice to such other rights and remedies available to the LESSOR under prevailing laws or the Contract. including these General Terms and Conditions.

The immediately preceding paragraph shall also apply in the event of transfer of machinery, furniture, effects or other properties found within the Leased Premises from one unit to another unit in the building being leased by the LESSEE whether or not the latter unit is owned by the LESSOR. In the event that the unit where the properties to be transferred is not owned by the LESSOR, the written consent of the unit owner shall also be required.

The LESSEE shall further maintain the Leased Premises in a clean condition by utilizing plastic bags for the disposal of both dry and wet garbage. Unless garbage is contained in plastic bags, it will not be allowed to be deposited in the authorized depository for collections.

b. **Sublease, Transfer of Rights**

The LESSEE shall not assign or transfer its rights in the Contract nor sublease or sublet all or any part of the Leased Premises, without the prior written consent of the LESSOR and no rights, title or interest thereto or therein shall be conferred on or vested to anyone other than the LESSEE without such prior written consent. Otherwise, subleasing the leased Premises without the prior written consent of the LESSOR shall be deemed a breach of the contract by the LESSEE and shall be subject to the rights and remedies available to the LESSOR under prevailing laws and Contract, including these General Terms and Conditions. In the event of sublease with or without the prior written consent of the LESSOR, the LESSEE shall remain principally liable. However, the LESSOR shall have the right to exercise such remedies embodied in the Contract, the General Terms and Conditions and under prevailing laws, as against the sublessee in order to protect its right and interests.

Only the LESSEE has the right to use the Leased Premises as its official address to be registered with any government entities for the issuance of necessary permits and licenses for its business operations.

Should the LESSOR give the LESSEE its consent to sublease the Leased Premises, the LESSEE cannot sublease the Leased Premises for the period longer that the Contract of Lease between the LESSOR and the LESSEE.

It is expressly understood that the LESSEE has no goodwill or patronage rights over the Leased Premises; that such rights belong exclusively to the LESSOR, being the owner of the Leased Premises which forms part of the building; and that the LESSEE may not sell or dispose of said goodwill or patronage rights to any person.

c. **Assignment of Rights/Mortgage/Encumbrance**

The LESSOR reserves the right to assign and convey or mortgage or otherwise encumber its rights to this lease in favor of any affiliate or subsidiary or to any party. In the event of any assignment, conveyance, mortgage, or encumbrance of the Leased Premises, the LESSOR binds itself to require the assignee or mortgage or beneficiary of the encumbrance to respect and abide by all the terms and conditions of the Contract, as well as these General Terms and Conditions.

Roadways and Access

Roadways

2.32 The road networks within Ortigas Center can accommodate light to moderate pedestrian and vehicular traffic loads and has multiple connections to the surrounding thoroughfares. The roads range from 10 to 15 meters wide, mostly are concrete-paved and some have asphalt overlay, provided with cemented sidewalks, curbs and gutters, and underground drainage system. There are also modern pedestrian overpasses provided at the major road intersections of the district.

2.33 Our informal enquiries with the City Assessor's Office - Tax Mapping Division confirmed that the Property enjoys frontages along Ruby and Topaz Roads.

Access

2.34 In reporting our opinion of value, we have assumed that there are no third-party interests between the boundary of the Property and the abutting roads and that accordingly the Property has unfettered vehicular and pedestrian access.

Environmental Considerations

Flooding

2.35 From our enquiries with the City Planning Office, we have ascertained that the Property is not within an indicative floodplain and that there is therefore a zero risk of flooding.

Contamination

2.36 As stated in the General Terms of Business, investigations into environmental matters would usually be commissioned from suitably qualified environmental specialists. Santos Knight Frank, Inc. is not qualified to undertake scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination.

2.37 Subject to the above, while carrying out our valuation inspection, we have not been made aware of any uses conducted at the Property that would give cause for concern as to possible environmental contamination. Our valuation is provided on the assumption that the Property is unaffected.

Highest and Best Use

2.38 "*Highest and Best Use*" is defined as the most profitable likely use to which a property can be put. The opinion of such use may be based on the highest and most profitable continuous use to which the Property is adapted and needed, or that use of land which may reasonably be expected to produce the greatest net return to land over a given period of time. Alternatively, it is that use, from among reasonably probable and legal alternative uses, found to be physically possible,

appropriately supported, financially feasible, and which results in highest land value.

2.39 Considering the Property's size, shape, topography, current zoning classification and the prevailing land uses and development in the area, we are of the opinion that the **existing commercial development** would represent the highest and best use of the Property.

3 Market Analysis

Philippine Market Commentary

3.1 Shown below is SKF's latest **Metro Manila Office Market Update**.

Source of Information

3.2 Our market analysis has been undertaken using market knowledge within Santos Knight Frank, Inc., enquiries of other agents, searches of Property databases, as appropriate and any information provided to us.

OFFICE RENT ROLLBACKS CUSHION INCREASING VACANCIES

General Overview

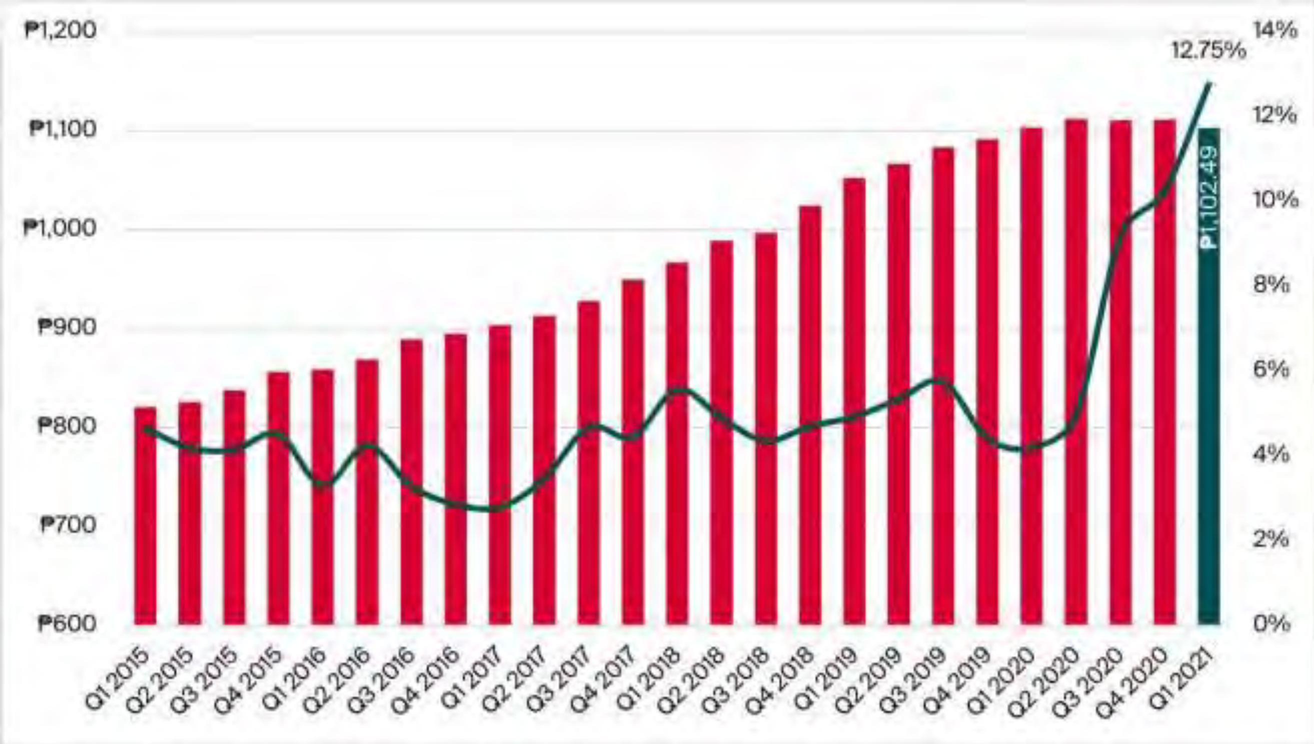
The Metro Manila office market displayed modest market movement at the start of 2021 owing to the sluggish demand driven by the market uncertainties caused by changing lockdown scenarios in Metro Manila. Landlords were challenged to remain relevant as potential occupiers continued to take a cautious approach caused by the growing COVID-19 cases and slow vaccine roll-outs.

Still, new office spaces were introduced during the quarter as developers capitalized on the relaxed quarantine measures to resume their halted construction activities. The local office market supply grew by 163,136 sqm of Grade A office space that mostly catered to IT-BPO companies. Several buildings were completed in Fort Bonifacio, Bay Area, and Quezon City, resulting in an overall office supply in Metro Manila of about 6.9 million sqm.

Consequently, supply growth resulted in an increase in vacancies throughout the metropolis. Office vacancy rates in Metro Manila further spiked to 12.75%, the highest since 2009. Current and potential occupiers remained vigilant towards the health situation of the country. Numerous companies continued to implement Work-From-Home and skeletal workforce arrangements. Office take-up contracted by 28,696 sqm as locators reassessed their need for spaces amid their bid to reduce operational costs.

Monthly average lease rates in Metro Manila further dipped to PHP 1,102.49 per sqm, declining by 0.78% quarter-on-quarter (q-o-q) and 0.07% year-on-year (y-o-y). The downward trend of rents was caused by the landlords' bid to provide more competitive packages to appeal to prospective tenants.

Figure 1. Metro Manila Historical Lease & Vacancy Rates



Source: Santos Knight Frank Research

Makati

The adverse effects of the pandemic and the prolonged lockdowns remained evident in the most prominent business district in the country. Vacancy rates spiked to 11.17%, considered to be the highest in the past ten years. Moreover, the expensive rents in Makati CBD were detrimental to the retention of office occupiers. Locators looking to minimize their expenses opted to discontinue their lease, resulting in about 25,557 sqm of office space vacated during the quarter.

Sluggish leasing activity persisted in the area as existing and upcoming locators in Makati were less willing to take up spaces due to the financial distress brought about by the global pandemic. The average monthly rents recorded in Makati went down to PHP 1,348.19 per sqm, contracting by 0.93% q-o-q and 6.05% y-o-y. Despite this, rates in Makati remained the highest in the metropolis.

Several property players are still looking forward to the materialization of their projects in the pipeline. More than 447,552 sqm of Prime and Grade A office supply are anticipated to come online in the next three years, with approximately 164,000 sqm being operational by the end of 2021. The massive influx of upcoming office developments in Makati comes from the backlogs and spillovers from 2019 up to the latter part of 2020.

Taguig

Slow demand in Taguig was also evident as vacancy levels continuously increased to 8.37% from 7.74% in Q4 2020. Despite having the largest supply share in Metro Manila of more than 2 million sqm, the downsized space requirements were seen as the factor in the rising vacancies as locators looked to lessen their operational cost. Moreover, average monthly rental rates in Fort Bonifacio also went down to PHP 1,289.75, translating to a contraction of 0.89% q-o-q.

The ease in quarantine measures allowed private and public projects to resume construction. Office supply in Fort Bonifacio further grew by 28,000 sqm through the completion of BGC Corporate Center 2. Despite the growing vacancy levels, potential developers still have bright prospects in Taguig as it was seen as the youngest but fastest growing business district in Metro Manila. In line with this, upcoming office supply is seen to be augmented by about 864,100 sqm of office space within the next five years. About 344,000 sqm of this will be coming from Arca South which is poised to become a new business district in the south.

Bay Area

The POGO industry exodus has significantly contributed to the spiking vacancy levels in the Bay Area during Q1 2021, recorded at 12.82%. Slower demand from the sector is seen in the coming periods as more firms have started to postpone their lease contracts. This occurrence implied challenges in the recently fast-moving office market of the Bay Area.

The upsurge in vacancy was also attributed to the completion of Four E-com during the quarter with an additional 89,132 sqm of Grade A office space. Priced above its competitors, this building has helped in pushing the average rents in the area to PHP 1,083.41 per sqm, increasing by 1.66% q-o-q.

The Bay Area is still foreseeing a huge amount of upcoming office supply in the coming years. Developers still recognize the opportunity to invest in the area due to its accessibility and availability of developable land. Approximately, 578,800 sqm of office developments are anticipated to be introduced in the market for the next five years, while 258,000 sqm are expected to become operational by the end of 2021.

Ortigas Center

Vacancy levels in Ortigas Center gradually eased to 12.75% in contrast to 12.88% of the preceding quarter. Despite this, pre-terminated contracts and non-renewals were still observed, as most of the companies are still on a wait-and-see approach towards the office market. Meanwhile, the slow-moving leasing transaction was also felt in the district as the rental rates went down to PHP 806.29 per sqm, contracting by 1.15% q-o-q and still considered the lowest as compared to other major CBDs in the metropolis.

Moreover, the upcoming office supply in Ortigas Center remained high as more than 671,000 sqm of Prime and Grade A office spaces are slated to introduce in the next five years. In addition, the massive influx of 373,000 sqm of space is scheduled to commence their operations within the year such as Cyber Omega, SM Mega Tower, and Jollibee Tower. This includes the spillover from 2019 up to the remaining quarters of 2020 that has been halted due to subsequent lockdowns.

Quezon City

Vacancy rates in Quezon City spiked up to 20.64% as opposed to 16.21% of the preceding quarter, indicating the highest level across all of Metro Manila. Approximately 13,690 sqm of office spaces were freed up in the city during the quarter. Occupiers in the area were more sensitive to the health crisis as compared to locators in other districts The lack of recognized established business districts and limited connectivity of certain townships contributed to the slow demand in the area. Furthermore, the upsurge in vacancy levels was also driven by the opening of SM North Towers 1 and 2 that added more than 45,200 sqm in the massive office supply in Quezon City, and are yet to lease out the majority of their spaces.

Office landlords are trying to alleviate this downtrend and are still vying to mitigate lease terminations. To this end, average headline rates contracted to PHP 925.55 per sqm, translating to a 1.81% decline from the preceding quarter.

Albeit the fast-growing vacancy levels, Quezon City is still expecting a large office supply boost in the coming years. Approximately, 333,700 sqm is anticipated to be introduced in the market in the next five years, in which more than 149,000 sqm will be coming from SM Prime Holdings.

Alabang

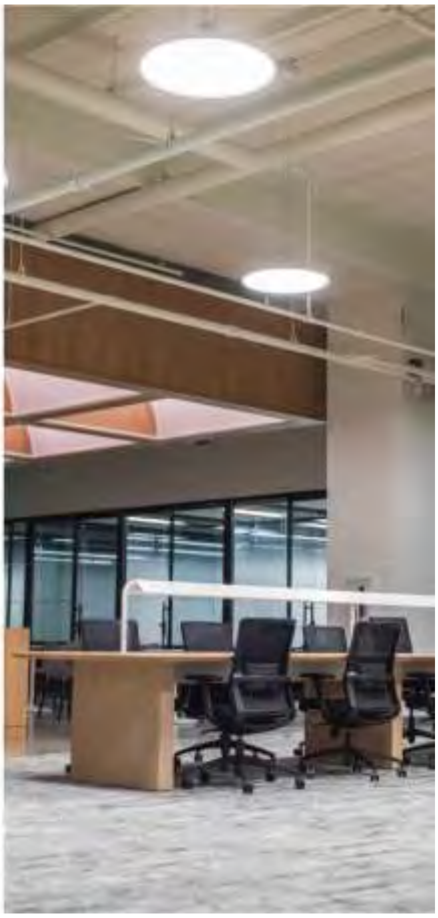
Similarly, Alabang CBD experienced rising vacancy levels in Q1 2021 at 16.07% from 14.53% in the preceding quarter. As a result, increased pressures on office landlords in the district were felt as they remain responsive to the slow movement in the office market. This caused rental rates to gradually contract to PHP 846.76 per sqm.

Alabang still holds on to the possibility of becoming one of the major investment hubs in the metropolis due to its vast developable land. Approximately 209,900 sqm of upcoming Grade A office space is anticipated to be operational in the next five years, while 13,800 sqm is slated to become operational by 2021.

Figure 2. Metro Manila Lease & Vacancy Rates per CBD

Source: Santos Knight Frank Research

Office Outlook



The easing quarantine measures that started in the second half of 2020 allowed the developers to restart their impeded construction activities. Developers remain bullish in expanding their office footprint in Metro Manila with more than 3 million sqm of office space are slated to operate in the next five years. The nation's economic center is also set to have an additional supply of 1.1 million sqm of Prime and Grade A office space by the end of 2021. This massive influx still stems from the construction backlogs from the developers in 2020.

The robust expansion of office supply in Metro Manila is seen to further propel the vacancy rates in the local office market in the coming quarters. Along with the stagnant office demand, downward pressure on office rents still expected. Office landlords will be forced to implement more flexible payment terms to existing and potential tenants to market their spaces and continue cash flow from their buildings.

The recovery of the office market is also dependent on the pace of vaccine roll-outs in the country. The slow pace in inoculations is seen to weigh down on the recovery of the market. Attaining herd immunity as soon as possible can reinvigorate the interest in the office market.

In the medium- to long-term Green Buildings are seen to gain a competitive edge compared to ordinary office buildings. Buildings accredited by the US Green Building Council (LEED) and the Philippine Green Building Council (BERDE) will be more sought-after for potential office locators. The efficient design that provides better air circulation, ventilation and filtration, and increased open space, will be more appealing to the market as it puts a premium on the health and well-being of its tenants.

4 Valuation

Methodology

Valuation Rationale

4.1 The purpose of this appraisal is to estimate the Market Value of the Property. In any given valuation exercise, fair value can be arrived at using either one or a combination of the three (3) approaches to value, namely: Market (or Direct Sales Comparison) Approach, Income Approach, and the Cost Approach. The determination of the appropriate approach for a given property is based on the quality and quantity of data available, particularly its relevance to the Property under appraisement. If more than one valuation approach is utilized, the resulting values are reconciled to produce a final value conclusion.

4.2 Due to the nature of the Property and the purpose of this appraisal, both the Cost Approach and Income Approach to value are deemed the most appropriate to use and the Market (or Direct Sales Comparison) Approach was not used.

Cost Approach

4.3 The Cost Approach generally involves the following steps:

A. The value of the subject land is normally estimated by the Market or Sales Comparison Approach. In instances where the land is covered by a Lease Agreement, the value of the leased fee or leasehold rights on the subject land, whichever is applicable, is instead estimated.

B. The depreciated cost of the subject improvement is estimated by calculating the direct cost of reproducing or replacing the improvement, deducting accrued depreciation from all sources, and adding the indirect costs attributed to the improvement.

Combining the estimates shown above results in the indicated value of the Property by the Cost Approach.

4.4 **On Land (Leasehold)**

As mentioned, the land subject of this appraisal is covered by a Lease Contract. In estimating the value of the Property covered by a lease, two interests are involved: the interest of the lessee which is the leasehold; and the interest of the lessor which is the leased fee or the lessor's interest. The Client being the lessee, the purpose of this appraisal is to establish the leasehold value of the subject land.

Leasehold Value is the present (discounted) worth of the rent savings (or rental gains) when the contract rent at the time of the appraisal is less than the current market rent. It is estimated by computing the present worth of the rental gains over the remaining term of the lease agreement using an appropriate discount rate.

The valuation process, briefly stated, consists of the following:

- Estimation of the current market rent of the leased property;
- Estimation of the rental gains over the remaining term of the lease

agreement, if any. Rental gains projection is pegged at 10 years while the 11th year rental gain is used to estimate the terminal value of the Leasehold Rights on the Land;

- Estimation of an appropriate discount rate and terminal capitalization rate; and
- Discounting process based on an appropriate discount rate to arrive at an indicated leasehold value.

Market Rent of the Land 4.5 As mentioned earlier, another purpose of this report is to express an opinion of the Market Rent of the Property if it were to be leased out in accordance with its highest and best use. The amount of annual or monthly rental, which the subject property should command might be estimated by any, or a combination of the following:

1. By Market (Comparison) Approach, in which rentals of similar properties are used a benchmarks; and
2. By Income Approach, in which the value of the Property is first established, and the proper capitalization rate is applied to obtain its rental value.

On the other hand, Market Rent is defined under IVS 2019 as "the estimated amount for which an interest in real property should be leased on the valuation date between a willing lessor and a willing lessee on appropriate lease terms in an arm's length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

It is the rental income that the Property would most likely command in an open market. It is also defined as being the amount at which a willing lessee would pay and a willing Lessor would receive for the use of certain property, neither being under compulsion to transact, and both having reasonable knowledge of all relevant facts.

Market Approach 4.6 We have made a survey of existing ground leases of similar lands in the vicinity of the Property and found scarcity of rental data that may be used for direct comparison purposes.

Income Approach 4.7 In the absence of any comparable rental data, we have estimated the **Market Rent** of the Property by a variation of the Income Approach on the basis of what prudent real estate investors or landowners would be warranted in leasing it in order to realize a fair return on their investment or property, for that matter. Under this approach, the market value of the Property is first established, and the proper capitalization rate is applied to obtain its rental value.

Market Value of the Land 4.8 In valuing the land, we made use of the Market Approach which is the most common technique for valuing land, and is the most preferred method when comparable sales are available. With this method, sales of similar property or parcels of land are analysed, compared, and adjusted to provide a value

indication for the Property being appraised. The comparison process is based on an analysis of the similarity or dissimilarity of the comparables.

4.9 The appraiser gathers data on actual sales as well as listings and identifies the similarities and differences in the data; ranks the data according to their relevance; adjusts the prices of the comparables to account for the dissimilarities with the land being appraised; and forms a conclusion as to the most reasonable and probable market value of the subject property.

4.10 The elements of comparison include property rights, financing terms, conditions of sale (motivation), market conditions (sale date), location, physical characteristics, available utilities, and zoning. The most variable elements of comparison are the site's physical characteristics, which include its size and shape, frontage, topography, location, and view. The units of comparison applied may be hectares or sq.m., or any other unit used in the market.

Evidence of comparable properties

4.11 **Analysis of Comparable Properties Offered for Sale**

In the course of our investigation, we looked at current market listings of comparable properties in the area. The comparable properties selected share the same or similar characteristics as the subject. Whatever information or data we came up with was then analysed, and comparison made for such factors as size, characteristics of the lot, location, quality, and prospective use. In the Philippines however, property transactions are not officially disclosed, and quite often, actual transaction price is masked by other undisclosed arrangements and different from the figure shown on the sale and purchase agreement. We have therefore made reference to the following data, made our market judgment, and adjusted for the above-mentioned factors:

1. A 3,000-sq.m. commercial lot located along Meralco Avenue corners of Dona Julia Vargas and Sapphire Roads, Ortigas Center, Pasig City, is currently offered for sale at an asking price of PhP500,000 per sq.m.
   Source: Daniel Olvina Ballo-Allo – (0977)831-7678

2. A 1,710-sq.m. commercial lot located along Emerald Avenue corner Sapphire Road, Ortigas Center, Pasig City, is currently offered for sale at an asking price of PhP350,000 per sq.m.
   Source: Daniel Olvina Ballo-Allo – (0977)831-7678

3. A 1,838-sq.m. commercial lot located along Exchange Road corners of Pearl Drive and Amethyst Street, Ortigas Center, Pasig City, is currently offered for sale at an asking price of PhP600,000 per sq.m.
   Source: Daniel Olvina Ballo-Allo – (0977)831-7678

Summary of Adjustments

The Data Comparison Grid shown on Appendix **8** shows a summary of the aforementioned adjustments, which provides an indication as to the degree of adjustment made to the different elements in comparison. A numeric indicator indicates the level of adjustments, in terms of percentage when compared with the subject property. The use of (-) indicates a negative adjustment and a + indicates a positive adjustment. A downward adjustment (-) used is made to reflect superior characteristics of the comparable sale/listing, while an upward adjustment + reflects inferior characteristics of the comparable sale/listing. Finally, a 0 is used to confirm similarity between the comparable sales/listings and the subject or is used when market information is unavailable or does not support an adjustment for any particular element of comparison.

Value of the Land 4.12 As reflected in the said Comparison Grid, the value of the land is estimated at **PhP371,000 per sq.m.**, or a total of **PhP725,000,000** for a land area of **1,955 sq.m.**

Rate of Return 4.13 The value of the land having been established, its rental value may now be estimated considering the prevailing rate of return prudent investors or landowners would expect in ground leases, normally in the range of 4% to 7%. We based this range of rate of return from interviews with land owners and brokers, as well as our analysis of the relationship between prevailing capital values and rental rates and it is believed to be the current yield in the commercial land lease market.

Considering the most recent pandemic and the effect it had on the economy and the leasing market, we have not adopted the average rate of return, and have instead adopted a conservative interest rate (return on investment) of 4%.

In light of the foregoing, our estimate of the Market Rent of the Property is as follows:

Land Value	PhP	725,000,000	
Interest on Land Value			
PhP725,000,000 @ 4%	PhP	29,000,000	

	Total **PhP**	**29,000,000**	**per year**
		=========	
	Or **PhP**	**2,416,670**	**per month**
		=======	

Market Rent of the Land 4.14 On the basis of the foregoing, the Market Rent of the land is estimated at **PhP1,236.15 per sq. m. per month**, or a total of **PhP2,416,670 per month**, or say, **PhP29,000,000 per annum** for the subject land area of **1,955 sq. m.**

Rental Gain 4.15 Rental Gain is reckoned as the difference between the Market Rent and the Contract Rent.

Discount Rate

4.16 The discount rate was computed using the build-up method. The discount rate is calculated by adding together different variables. The variables that were used to generate it consist of a risk-free rate and a reasonable risk premium. Based on the foregoing, discount rate is estimated at 7.1665%, or say, 7.20% (10-year T-bond rate at about 3.9165% (from Philippine Dealing & Exchange Corporation (PDEx) as of 30 June 2021) plus 3% equity risk premium from OECD and additional 0.25% risk premium for unidentifiable risk factors which include the uncertainty brought about by the Covid-19 global pandemic.).

For purposes of this valuation, we have adopted, as risk-free rate, the 10-year T-bond rate from PDEx. The Philippine Dealing & Exchange (PDEx) system appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEx. The PHP BVAL Reference Rate dated 30 June 2021 was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

4.17 We have adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3%. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits
Valid as of: **25 June 2021**

nb	Country Code ISO Alpha 3	Country Name [1]	Classification: Previous	Classification: Current Prevailing	Notes
138	PLW	Palau	-	-	(5)
139	PAN	Panama	4	4	(8)
140	PNG	Papua New Guinea	6	6	
141	PRY	Paraguay	5	5	
142	PER	Peru	3	3	
143	PHL	Philippines	3	3	
144	POL	Poland	-	-	(6)
145	PRT	Portugal	-	-	(6) (7)

Capitalization Rate 4.18 Capitalization rate adopted to arrive at the terminal value is 4.2% (Discount Rate less Projected Long-term Growth Rate (3.0%). The long-term growth rate is based on a growth forecast of the prevailing commercial market over the forecast period. This is based on what the Property is perceived to achieve in the long-term considering the present situation of the market.

Remaining Life of the Lease 4.19 Remaining life of the lease as of the date of valuation is 98 years.

Summary of Leasehold Assumptions 4.20 In summary, below are the assumptions/statistics used in determining the leasehold value of the subject land.

CYBERSCAPE BETA			
Lease Details			
Lot Area	:	1,955	sq.m.
Term of Lease	:	98	years
Assumed Commencement Date	:	01-Oct-21	
Lease Rate	:	7%	of net leasing revenue
Market Rent (in PhP)			
Monthly Rent	:	1,236.15	/sq.m./ month
Annual Rent	:	29,000,000	
Annual Escalation	:	3%	starting Y2
Discount Rate			
Risk Free Rate		3.92	as of June 30, 2021 (BVAL PDEX)
Risk Premium		3.00	as of June 25, 2021 (OECD)
Additional Risk		0.25	risk premium for unidentifiable risk factors
		7.17	
Resulting Discount Rate, say		7.20%	
Terminal Capitalization Rate		4.20%	

Leasehold Value 4.21 On the basis of the foregoing, the leasehold value of the subject land may reasonably be estimated at **PhP14,000,000.**

We attach a copy of our valuation calculations at Appendix **5.**

4.22 **On Leasehold Improvements and Machinery & Equipment**

The estimate of the leasehold improvements can be either replacement or reproduction cost, new. Replacement Cost, New is defined as "The cost of construction, at current prices, of a building having utility equivalent to the building being appraised but built with modern materials and according to current standards, design, and layout." On the other hand, Reproduction Cost, New is defined as "The cost of construction, at current prices, of an exact duplicate, or replica, using the same materials, construction standards, design, layout, and quality of workmanship, and embodying all the deficiencies, super-adequacies, and obsolescence of the subject building."

In estimating the Replacement Cost of the buildings and improvements, we have made reference to the building cost index or other building cost as available in the market or published by a reputable quantity surveyor firm. We have likewise referred to our own database of building construction costs. We do not hold ourselves to be construction cost advisers and a formal estimate can only be given by a specialist construction cost consultant. It is recommended that a professional quantity surveyor or a firm of professional quantity surveyors should be consulted in order to assess an accurate building/improvement replacement cost.

In arriving at our assessment using the Cost Approach for the Equipment, we first developed the Replacement Cost, New (“RCN”) of the asset. In developing our RCN, we have obtained current cost information from equipment dealers in the region. We relied on data furnished by equipment manufacturers, dealers and importers, as well as information contained in price catalogues, other published materials including the Internet and inquiries from local suppliers

RCN is the estimated amount of money needed to acquire a similar new item having the nearest equivalent utility as the Property being valued taking into consideration current prices of materials and manufactured equipment, shipping and handling, labour, contractor's overhead, design and supervision, profit and fees, and other attendant costs associated with its acquisition and installation, but without provision for overtime or bonuses for labour and premium for materials.

Having developed the RCN, we then deducted for the various elements of depreciation to arrive at the Depreciated Replacement Cost (“DRC”). DRC includes depreciation allowance or loss of value arising from condition, utility, age, wear and tear, and obsolescence present (physical, functional or economic), taking into consideration past and present maintenance policy and rebuilding history.

General
Where elements are of foreign origin, the assessment process give full consideration to all expenditures normally incurred in importation such as packing and crating charges, inland and ocean freight, insurance, duties and taxes, bank charges and commissions, wharfage, brokerage and handling

In estimating the depreciation of the assets, we have utilized the age-life method tempered with our observed condition of the assets. The remaining lease period was likewise considered in arriving at the value of the leasehold improvements.

Appendix **9** contains the Schedule of Assets describing in detail these assets.

Income Approach

Definition 4.23 The Income Approach is applicable to the valuation of income producing properties, business enterprise as well as the valuation of intangible assets. This approach measures the current value of an asset by calculating the present value of its future economic benefits by discounting expected cash flows at a rate of return that compensates the risks associated with the particular investment.

For this particular engagement, we have applied both the Discounted Cash Flow Analysis and the Direct Capitalization Method.

Discounted Cash Flow Analysis 4.24 The discounted cash flows, or DCF valuation is the most popular fundamental approach in valuing the future economic benefits of a projected income stream. DCF measures actual yield rather than paper income for the asset/business owner and the analysis of DCF is widespread and mandatory in the various fields of business making DCF-based valuation ideal.

4.25 The valuation process, briefly stated, consists of the following:

- Estimation of the revenues generated;
- Estimation of the costs and expenses related to the operations of the development;
- Estimation of an appropriate discount rate;
- Discounting process using an appropriate discount rate to arrive at an indicative market value; and
- Estimation of the Terminal Value of the Property.

Discount Rate 4.26 The discount rate was computed using the build-up method - calculated by adding together the different variables. The basic formula for the traditional build-up model is:

Discount Rate = Rf + P + MR + LR

Where	Variable	Proxy Statistic
Rf	Risk Free Rate	PDEX Risk Free Rate
P	Equity Risk Premium	Country Risk
MR	Management Risk	
LR	Liquidity Risk	

The variables that were used to generate the Discount Rate are exhibited in the table below, along with the sources and/or dates as at or nearest the 30 June 2021 valuation date.

Risk Free Rate (10Y)	3.92%	As of 30 June 2021, BVAL PDEX
Equity Risk Premium	3.25%	As of 25 June 2021, OECD
Management Risk	0.80%	
Liquidity Risk	0.90%	

4.27 The following assumptions were used to arrive at the Discount Rate using the Build-Up Method.

Risk Free Rate

4.28 For the purposes of this valuation, we adopted the 10-year bond rate sourced from Philippine Dealing & Exchange Corporation (PDEX) as of 30 June 2021 – the valuation date (image shown below). The Philippine Dealing Exchange (PDEx) system has recently appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEX. The PHP BVAL Reference Rate was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

Equity Risk Premium

4.29 We used an equity risk premium of 3.25%. We adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3% plus an additional 0.25% risk premium for unidentifiable risk factors. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors. Shown below is an excerpt of said table.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits
Valid as of: 25 June 2021

			Classification		
nb	Country Code ISO Alpha 3	Country Name [1]	Previous	Current Prevailing	Notes
138	PLW	Palau	-	-	(5)
139	PAN	Panama	4	4	(8)
140	PNG	Papua New Guinea	6	6	
141	PRY	Paraguay	5	5	
142	PER	Peru	3	3	
143	PHL	Philippines	3	3	
144	POL	Poland	-	-	(6)
145	PRT	Portugal	-	-	(6) (7)

Management & Liquidity Risk	4.30	The Management Risk refers to the estimated premium to compensate for the burden of management, while the Liquidity Risk refers to the ease (or the difficulty) with which an investment can be sold or made. A review was done and we have arrived at the following: Management Risk was classified into four categories, with the corresponding rates: Poor – 1.2; Average – 1.0; Above Average - 0.90 and Excellent - 0.80 while Liquidity Risk has three (3) categories: Poor –1.2; Average – 1.0; and Good – 0.90. After the said review, we deemed it appropriate to use 0.80% for Management Risk and 0.90% for Liquidity Risk.
Resulting Discount Rate	4.31	Resulting Discount Rate used for this valuation is 8.87%, or say, 9.0%.

Capitalization Rate 4.32 A discount rate is used to calculate the present value of future projections of a benefit stream when growth varies from year to year. However, if growth is estimated to remain level throughout the life of the investment, a capitalization rate is often used. In its most basic form, the relationship between discount rate and a capitalization rate can be summarized as follows:

Capitalization Rate = Discount Rate – Growth

For purposes of this valuation, a long-term growth rate of 4.5% has been assumed. This is based on what the Property is perceived to achieve in the long-term considering the present situation of the market. Using this assumption, resulting Capitalization Rate would be 4.5%.

Key Financial Assumptions 4.33 We relied on the historical and projected assumptions brought about by our research and as provided by the Client. These financials were analysed to ensure reasonableness by comparing projected revenue growth rates and other operating expenses based on historical performance. Based on interviews with the representatives of the company, projections were prepared to reflect the current and expected future market conditions.

a. **Revenues**

Cashflow projection starts in 01 July 2021 and runs for a period of 10 years.

The revenues come from the rental of retail units, office units, parking slots and other areas. In estimating the annual rents of the subject units/slots, we have adopted the contract rents as appearing in the copy of the rent roll provided to us by the Client for the occupied units/leased parking slots. After the expiration of lease, lease rates then are aligned with market rates and are assumed to have an average of 4-year lease contracts. Aside from the monthly rentals from leasable areas, revenues likewise include Management and Aircon Dues which are likewise charged to the tenants monthly on a per sq.m. basis. Management dues are for common and/ or shared utilities, facilities and services. These are inclusive of air-conditioning equipment rental during office hours (but exclusive of power consumption).

It would be important to note that as the building administrators, they collect the said dues as a cost recovery mechanism for all expenses related to the day-to-day operations of the building and its common areas.

Occupancy assumptions were based on the actual performance of the Property as well as the prevailing trend in the subject area taking into consideration the forecasted effect of the global pandemic in the office market. Occupancy of the Property as of valuation date is at 98% while the historical average performance of the Property for the last two years is at 97%. Occupancy rates include committed leases. For this valuation exercise, we are assuming an overall average vacancy allowance of 4%. This assumed vacancy allowance for the whole cashflow period is used to account for unanticipated vacancies brought about by early terminations and non-renewals, and rental concession requests from tenants.

We used actual escalation rates indicated in the rent roll for all existing leases up until their lease expires. After which, an average escalation of 5% was then be applied year on year until the end of the cash flow.

b. **Cost & Expenses**

Operating Expenses which would include administrative and utility expenses are normally charged against the Common Use Service Area (CUSA) Fees or Association Dues being collected monthly to the individual tenants. However, there are instances when CUSA funds are insufficient to pay off all common charges. If and when this happens, the owners/administrators would have to pay off these expenses and this has been taken into consideration in the projections.

Operating Costs and Expenses are assumed to be an average of approximately 18% of the Total Net Revenues. Operating costs and expenses included are basically divided in to two – real estate expense and general administrative expense. Real Estate expenses are as follows: contracted services, repairs & maintenance, management fee and loss from CUSA and miscellaneous expenses. While under General Administrative Expense are – salaries & wages, taxes and licenses, advertising & promotions, commission, insurance, communication, rent expense, supplies, travel & transportation, and representation & entertainment expenses.

These expenses are projected either as a percentage of the rental revenues or the total net revenues. These percentage allocations were from the historical and projected performance of the Property.

Annual Capital Expenditures (CAPEX) for the entire cashflow period, on the other hand, was assumed to be 1.5% of the Net Leasing Revenues. This assumption is based on benchmarking and analysis of current market practice in allocating CAPEX reserve.

This allocation would help ensure that the Property would operate efficiently and maintain its good and sound condition.

Resulting Market Value 4.34

a. Earnings Before Income Tax, Depreciation and Amortization (EBITDA) for the whole duration of the cashflow shall be discounted at the derived Discount Rate of 9.00%.

b. The sum of discounted cashflows including the Terminal Value of the Property represents the Market Value of the Property.

   The Terminal Value of the Property is the value of the property beyond the explicit forecast period. It is assumed that the property or business will continue to generate cashflows in perpetuity. As mentioned earlier, Terminal Capitalization Rate used is 4.5%.

The Discounted Cashflow showing the estimated Market Value of the subject property is attached as Appendix **6**.

Direct Capitalization Method 4.35 The Direct Capitalization Method is a real estate valuation method that helps convert a single year's income into value by dividing the Net Operating Income with an appropriate Capitalization Rate. This method assumes that the Property has a stabilized net operating income. All parameters of a typical investor return expectations are represented either explicitly or implicitly in either income forecast or the capitalization rate. The direct capitalization rate, as the ratio of income to value, serves as a proxy for investor return assumptions.

Resulting Market Value 4.36 We made use of the single year's cashflow projection (2022) to derive the Market Value using the Direct Capitalization Method. Capitalization rate adopted to arrive at the Property Market Value is 4.5%.

Valuation basis

Market Value 4.37 Market Value is defined in the 2019 **International Valuation Standards** as:
"The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

Valuation date

Valuation date 4.38 The valuation date is **30 June 2021**.

General Assumptions

Assumptions 4.39 Our valuation is necessarily based on a number of assumptions which have been drawn to your attention in our General Terms of Business, Letter of Engagement and within this report.

Key Assumptions 4.40 Whilst we have not provided a summary of all these assumptions here, we would in particular draw your attention to a key assumption that we relied on a very considerable extent on the information provided by the Client and have assumed that documents provided to us such as gross floor area tabulation, floor plans, building tenancies and other relevant matters are factual. We were also advised by the Client that no material facts have been omitted from the information provided.

Special Assumption 4.41 We were instructed to re-value the Property without a re-inspection. We have, thus, considered changes to the physical attributes and/or characteristics of the Property which have occurred between the valuation date and the date of our previous valuation as confirmed by the Client. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.

4.42 We have adopted the gross floor area tabulation provided to us by the Client and have assumed this to be accurate.

4.43 Our valuation of Machinery & Equipment has also undertaken the following special assumptions:

We have not carried out a full mechanical survey, or structural test, nor have inspected the machinery and equipment, which are covered, unexposed or inaccessible. Our assessment is based on the premised that the items are in a condition commensurate with age and usage.

Machinery & Equipment associated with the supply of services to the building such as Elevators, Air Conditioning Systems are valued on the assumption that they are permanently installed or attached to the building.

4.44 In applying Income Approach to value, we have considerably relied on the information provided to us by the Client which includes the following: lease contracts, revenue and expense projections, historical and projected occupancies. Upon expiration of contracts, we estimated the lease rates based on the acceptable escalations in the market.

4.45 Given the 98-year leasehold, we assumed that the Property is comparable to a freehold property given the duration of the leasehold interest on the land. Thus, a terminal value of the Property was computed at the end of the cashflow.

Valuation Results

Using Cost Approach 4.46 Using the **Cost Approach,** the Market Value of the Property, may be summarized as under:

Land (Leasehold Value)		**PhP14,000,000**
Building		**1,631,377,000**
Building Machinery & Equipment		**357,788,000**

	TOTAL	**PhP2,003,165,000**

	ROUNDED TO	**PhP2,003,000,000**

==============

4.47 The Market Value of the Property is estimated at **PhP2,003,000,000 (TWO BILLION, THREE MILLION PHILIPPINE PESOS).**

Using Income Approach 4.48 Using the **Income Approach** on the other hand, the Market Value of the Property is estimated as follows:

DCF Analysis	**PhP7,794,000,000**
Direct Capitalization Method	**PhP8,964,000,000**

Calculation 4.49 We attach a copy of our valuation calculations for the Income Approach at Appendix **6 & 7**.

Comments 4.50 The values arrived at using the Income Approach are noted to be higher than the value arrived at using the Cost Approach. This is because, unlike the Income Approach, the Cost Approach does not capture the income potential of the Property.

4.51 For purposes of this valuation, we deemed it appropriate to adopt the results arrived at by the Income Approach – DCF Analysis, since this method is usually used to determine the value of an income-generating property, as it also captures the Property's future economic benefits, giving a better representation of the Property's Market Value at an acceptable rate of return that would compensate for the risks associated with the particular investment. It likewise takes into consideration market cycles that Direct Capitalization Method cannot capture.

Conclusion of Value 4.52 In conclusion, we are of the opinion that the Market Value of the Property, reckoned as of **30 June 2021**, is:

PhP7,794,000,000 (SEVEN BILLION, SEVEN HUNDRED NINETY-FOUR MILLION PHILIPPINE PESOS).

***Note**: The outbreak of the Novel Coronavirus (COVID-19), declared by the World Health Organization as a "Global Pandemic" on 11th March 2020, has impacted global financial markets. Travel restrictions have been implemented by many countries. In the Philippines, market activity is being impacted in all sectors. As at the valuation date, we consider that we can attach less weight to previous market evidence for comparison purposes, to inform opinions of value. Indeed, the current response to COVID-19 means that we are faced with an unprecedented set of circumstances on which to base a judgement. Our valuation is therefore reported on the basis of "material valuation uncertainty" per IVS 103 of the International Valuation Standards. Consequently, less certainty – and a higher degree of caution – should be attached to our valuation than would normally be the case. Given the unknown future impact that COVID-19 might have on the real estate market, we recommend that you keep the valuation of this property under frequent review.*

Appendix 1 - Assumptions, Limiting Conditions and Disclaimers

Basis of Value	Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion." In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property. It is further assumed that title to the property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable. The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.
Property Rights appraised	The rights appraised in this report are the property rights in fee simple, free and clear. "Fee simple" is defined as absolute ownership, without limitations to any particular class of heirs or restrictions, but subject to the limitations of eminent domain, escheat, police power and taxation. We assume that the fee simple interest is marketable and in compliance with the applicable laws of the Philippines.
Fractional Interests:	When the study contains a valuation relating to an estate in land that is less than the whole fee simple estate, the value reported for such estate relates to a fractional interest only in the real estate involved, and the value of this fractional interest plus the value of all other fractional interests may or may not equal the value of the entire fee simple estate which is considered the whole. When the valuation report contains an allocation of the total valuation between land and building improvements, such allocation applies only under the existing program of utilization. The separate valuations for land and building cannot be used in conjunction with any other valuation/appraisal and will be invalid if so used.
Assumptions:	The valuation is based on the condition of the economy and the purchasing power of the Philippine Peso as of the effective date of valuation. We have assumed that the floor areas provided us have been calculated in accordance with engineering standards, and assumed herein to be true and correct. Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.
Information Supplied By Others	Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser. Information provided by informed local sources, such as government agencies, financial institutions, Realtors, buyers, seller and others, was weighed in the light in which it was supplied and checked by secondary means; however, no responsibility is assumed for possible misinformation.
Legal Issues:	This valuation assumes no responsibility for the validity of legal matters affecting the property. The ownership history reported in this valuation is based on the appraiser's research of public records, which are assumed to be accurate and complete. It is not the intent of the valuation to offer a legal opinion of title. It is further assumed that the property has good title, responsible ownership and competent management. Any liens or encumbrances which may now exist have been disregarded. The appraiser is not required to give testimony or attendance in court by reason of this valuation, with reference to the property in question, unless arrangements have been previously made.
Liability:	The liability of Santos Knight Frank, Inc. and its directors and employees is limited to the addressee of this report only. No accountability, obligation or liability to any third party is accepted. In the event we are subject to any liability in connection with this engagement, regardless of legal theory advanced, such liability will be limited to the amount of fees we received for this engagement.
Environmental Conditions:	It is assumed that there is full compliance with all applicable Philippine environmental regulations and laws unless non-compliance is stated, defined, and considered in this appraisal report.
Town Planning:	It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.
Condition of Improvements:	We have inspected the improvements and structures. However we have not carried out a structural survey nor tested any of the services or facilities, nor have we inspected unexposed or inaccessible portions of the building, and are therefore unable to state that these are free from defect, rot, infestation, asbestos or other hazardous material. We have therefore, viewed the general state of repair of the property and advise that we did not notice any obvious signs of structural defect or dilapidations. Furthermore, the property appears to be in reasonable condition having regard to its age and use and unless otherwise stated. We also assume that the building complies with all relevant statutory requirements in respect of matters such as sanitary, building and fire safety regulations and standards.
Valuation Methodology:	In estimating Fair Value for financial reporting purposes, we still adopted the same Valuation techniques by using any one or the combination of the three (3) Approaches to Value, namely: Market Data (or Direct Sales Comparison) Approach, Cost Approach, and the Income Approach. Briefly described, the Market Data (or Sales Comparison) Approach considers prices recently paid and/or offered for similar items of property with adjustments made to the indicated market prices to reflect the condition and utility of the appraised property relative to market comparatives. The Cost Approach considers the cost to reproduce or replace the property appraised with new assets of like kind, and from this amount an allowance is deducted for depreciation arising from physical deterioration or obsolescence, whether from functional or external causes. In the Income Approach, an estimate is made of the prospective economic benefits of ownership into the future and these benefits are discounted to its present worth or capitalized into an indication of value.
Others:	This report and valuation shall be used only in its entirety and no part shall be used without the whole report. It may not be used for any purpose other than the intended purpose mentioned herein. Possession of this report or any copy thereof does not carry with it the right of copying or publication. All copies will originate from Santos Knight Frank, Inc. and will be signed and dated as such. Neither the whole nor any part of the report or any reference to our name, our valuation and our report may be included in any document, circular or statement nor published without our prior written consent to the form and context in which it may appear. The delivery and acceptance of this report completes this assignment.

Attention: **MR. FREDERICK D. GO**
President and Chief Executive Officer

Subject: **Terms of Engagement for Valuation Services**

Dear Mr. Go:

Thank you for your interest in our Valuation Services. We refer to your invitation of 03 August 2020 requesting Santos Knight Frank, Inc. ("SKF") to submit a proposal for valuation (the "Valuation") in respect of the properties detailed below (the "Properties").

This proposal, together with our General Terms of Business for Valuation Services ("General Terms"), sets out our terms of engagement for carrying out this instruction. Once agreed and signed, this proposal shall constitute our Letter of Engagement ("Letter"). This Letter and the General Terms (together, the "Agreement") exclude any other terms which are not specifically agreed to us in writing. To the extent that there is any inconsistency between the Letter and the General Terms, this Letter shall take precedence.

1. **Client**
   Our Client for this Valuation is Robinsons Land Corporation (the "Client", "you" or "your").

2. **Purpose of Valuation**
   The Valuation is provided solely the purpose of transferring some of the Client's assets to the REIT Company and its application for a Tax-Free Exchange Ruling with the Bureau of Internal Revenue and listing of the REIT Company in the Philippine Stock Exchange (the "Transaction"). Specifically, the Valuation will be used for the Client's Financial Statements to be attached to the Offering Circular as required by the Securities and Exchange Commission (SEC) and will be attached as an appendix to the Client's REIT Plan. In accordance with clause 4.1 of our General Terms, the Valuation may not be used for any other purpose without our express written consent. The Valuation will be made accessible in the public domain as part of the regulatory requirements of the Transaction.

3. **Term & Termination**
   This appointment will commence upon signing of this Agreement and shall continue to be in effect for a period of two (2) years. Any extension of the Term of this Agreement shall be mutually agreed upon by the parties in writing.

23. Electronic Communication

During the engagement, both parties may wish to communicate electronically with each other. However, electronic transmission of information cannot be guaranteed to be secure or virus-or error-free and information could be intercepted, corrupted, lost or destroyed, arrive late or incomplete, or otherwise be adversely affected or unsafe to use. Both parties agree to accept these risks and so each party will be responsible for protecting its own systems and interests in relation to electronic communications. Neither party will have any liability to the other party on any basis for any loss or damage arising from or in connection with the electronic communication of information between both parties or their reliance on such information.

24. Acceptance

Please sign and return a copy of this Letter signifying your acceptance of the terms of the Agreement. We reserve the right to withhold any Valuation and / or refrain from discussing it with you until this Letter has been countersigned and returned.

Your attention is drawn to the "Important Notice" in the General Terms. If you have any questions regarding this Letter and / or the terms of the Agreement, please let us know before signing this Letter.

Thank you for choosing Santos Knight Frank, Inc. and we look forward to working with you on this important engagement.

Sincerely,
SANTOS KNIGHT FRANK, INC.

Subject: **Amendment to Terms of Engagement and General Terms of Business for Valuation Services Dated 03 August 2020 ("Amendment")**

Dear Mr. Go:

We refer to subject Letter of Engagement and General Terms of Business for Valuation Services (together, the "Agreement") between Robinsons Land Corporation (the "Client", "you" or "your") and Santos Knight Frank, Inc. ("SKF") for the valuation of fourteen (14) office buildings (the "Covered Properties").

For this purpose, the Agreement is amended as follows:

The first, second, and third and fourth paragraphs shall now read:

For the Valuation

I. Valuation for Asset Transfer to REIT Company and its application for a Tax-Free Exchange Ruling:

For Valuation Update

II. Valuation of Properties for REIT listing to PSE:
Our Valuation of 14 Properties will be as follows:
1. Valuation for 4 Properties
2. Periodic Update of 14 Properties
Under REIT Company (Quarterly basis – optional)
3. Valuation Update of 14 Properties under REIT Company

ROBINSONS LAND CORPORATION

Santos Knight Frank

Santos Knight Frank

Except as amended hereby, all the provisions of the Agreement which are not inconsistent herewith are incorporated herein by way of reference and from date hereof, the Agreement and this Amendment shall be read as one integrated document.

Kindly affix your signature on the conforme portion below and return one (1) original signed copy to us.

Sincerely,
SANTOS KNIGHT FRANK, INC.

Appendix 3 - General Terms of Business

General Terms of Business for Valuation Services

These General Terms of Business (the "**General Terms**") and our Letter of Engagement (the "**Letter**"), together form the agreement between you and us (the "**Agreement**"). References to "**you**", "**your**" etc. are to persons or entities who are our client and, without prejudice to clauses 3 and 4 below, to any persons purporting to rely on our Valuation.

Unless **the** context otherwise requires, all other terms and expressions used but not defined herein shall have the meaning ascribed to them in the Letter.

When used herein or in the Letter, the term "**Valuation**" shall mean any valuation report, advance report, supplementary report or subsequent/update report, produced pursuant to our engagement and any other replies or information we produce in respect of any such report and/or any relevant property. Any words following the terms "**including**", "**in particular**" or any similar expression shall be construed as illustrative and shall not limit the sense of the words preceding those terms.

All of the terms set out in these General Terms shall survive termination of the Agreement.

1. Santos Knight Frank, Inc.

1.1. Santos Knight Frank, Inc. ("**Santos Knight Frank**", "**our**", "**us**", "**we**") is a Philippine corporation with Securities and Exchange Commission (SEC) Registration Number A199818549.

1.2. Our registered office is at 10/F Ayala Tower & Exchange Plaza, Ayala Avenue, Makati City where a list of members may be inspected.

1.3. Any representative of Santos Knight Frank, Inc. described as *Director* is either a member or an employee of Santos Knight Frank, Inc. and is not a member of the Board of Directors. The term *Director* has been retained because it is an accepted way of referring to senior professionals. The term "**Santos Knight Frank Person**" shall, when used herein, mean any member, employee, or consultant of Santos Knight Frank, Inc.

1.4. Our Tax Identification Number (TIN) is 201-626-570-000.

1.5. The details of our professional indemnity insurance will be provided to you on request.

1.6. Santos Knight Frank, Inc., being a corporation, is regulated by the Philippine Securities and Exchange Commission (SEC). It is also an SEC-accredited asset valuer. In accordance with reportorial filings with the SEC, it may be necessary to disclose valuation files to them. By instructing us, you give us your permission to do so. Where possible we will give you prior notice before making any such disclosure, although, this may not always be possible. We will use reasonable endeavours to limit the scope of any such disclosure and to ensure any disclosed documents are kept confidential.

1.7. Valuations will be carried out in accordance with the 2019 edition of the International Valuation Standards (IVS) by valuers who conform to its requirements and with regard to relevant statutes or regulations. Our senior valuers are Real Estate Appraisers licensed and regulated by the Philippine Professional Regulation Commission (PRC).

2. Governing law and jurisdiction

2.1. The Agreement and any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with it or its subject matter or formation or any Valuation shall be governed by and construed in accordance with Philippine laws.

2.2. Philippine courts shall have exclusive jurisdiction to settle any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with this Agreement or its subject matter or formation or any Valuation. This will apply wherever the relevant property or the client, or any relevant third party, is located or the service is provided.

3. Limitations on liability

3.1. Subject to clause 3.7, our maximum total liability in connection with or arising out of this Agreement and/or its subject matter and/or the Valuation is limited to our total service fees as set out in the Letter.

3.2. Subject to clause 3.7, we will not be liable for any loss of profits or for indirect or consequential loss or damages.

3.3. Subject to clause 3.7, any limitation on our liability will apply however such liability is or would otherwise have been incurred, whether in contract, tort (including negligence), for breach of statutory duty, or otherwise.

3.4. Except as set out in clauses 3.5 and 4.7 and 4.8 below, no third party shall have any right to enforce any of the terms of this Agreement.

3.5. No claim arising out of or in connection with this Agreement may be brought against any Santos Knight Frank Person. Those individuals will not have a personal duty of care to you or any other person and any such claim for losses must be brought against Santos Knight Frank, Inc. Any Santos Knight Frank Person may enforce this clause but the terms of this Agreement may be varied by agreement between the client and Santos Knight Frank, Inc. at any time without the need for any Santos Knight Frank Person to consent.

3.6. No claim, action or proceedings arising out of or in connection with the Agreement and/or any Valuation shall be commenced against us after the expiry of the earlier of (a) two years from the Valuation Date (as set out in the relevant Valuation) or (b) any limitation period prescribed by law.

3.7. Whether or not specifically qualified by reference to this clause, nothing in the Agreement shall exclude or limit our liability in respect of fraud, or for death or personal injury caused by our negligence or negligence of those for whom we are responsible, or for any other liability to the extent that such liability may not be so excluded or limited as a matter of applicable law.

4. Purpose, reliance and disclosure

4.1. The Valuation is prepared and provided solely for the stated purposes. Unless expressly agreed by us in writing, it cannot be relied upon, and must not be used, for any other purpose and, subject to clause 3.7, we will not be liable for any such use.

4.2. Without prejudice to clause 4.1 above, the Valuation may only be relied on by our Client. Unless expressly agreed by us in writing the Valuation may not be relied on by any third party and we will not be liable for any such purported reliance.

4.3. Subject to clause 4.4 below and for the stated purposes, the Valuation is confidential to our Client and must not be disclosed, in whole or in part, to any third party without our express written consent (to be granted or withheld in our absolute discretion). No liability is accepted to any third party for the whole or any part of any Valuation disclosed in breach of this clause.

4.4. Our appraisers are not required to give testimony or attendance in court by reason of this Valuation with reference to the property in question, unless arrangements have been previously made.

4.5. Except for the stated purposes, neither the whole nor any part of the Valuation and/or any reference thereto may be included in any published document, circular or statement nor published in any way whatsoever whether in hard copy or electronically (including on any website) without our prior written consent and approval of the form and context in which it may appear.

4.6. Where permission is given for the publication of a Valuation, neither the whole nor any part thereof, nor any reference thereto, may be used in any publication or transaction that may have the effect of exposing us to liability for actual or alleged violations of SEC Memorandum Circular No. 2, series of 2014 (Guidelines on Asset Valuations) or Republic Act No. 8799 (Securities Regulation Code), as amended and its Implementing Rules and Regulations.

4.7. You agree that we, and/or any Santos Knight Frank Person, may be irreparably harmed by any breach of the terms of this clause 4 and that damages may not be an adequate remedy. Accordingly, you agree that we and/or any Santos Knight Frank Person may be entitled to the remedies of injunction or specific performance, or any other equitable relief, for any anticipated or actual breach of this clause 4.

4.8. You agree to indemnify and keep fully indemnified us, and each relevant Santos Knight Frank Person, from and against all liabilities, claims, costs (including legal and professional costs), expenses, damages and losses arising from or in connection with any breach of this clause 4 and/or from the actions or omissions of any person to whom you have disclosed (or otherwise caused to be made available) our Valuation otherwise than in accordance with this clause 4.

5. Knight Frank network

5.1. Santos Knight Frank, Inc. is a member of an international network of independent firms which may use the "Knight Frank" name and/or logos as part of their business name and operate in jurisdictions outside the Philippines (each such firm, an "**Associated Knight Frank Entity**").

5.2. Unless specifically agreed otherwise, in writing, between you and us: (i) no Associated Knight Frank Entity is our agent or has authority to enter into any legal relations and/or binding contracts on our behalf; and (ii) we will not supervise, monitor or be liable for any Associated Knight Frank Entity or for the work or actions or omissions of any Associated Knight Frank Entity, irrespective of whether we introduced the Associated Knight Frank Entity to you.

5.3. You are responsible for entering into your own agreement with any relevant Associated Knight Frank Entity.

5.4. This document has been originally prepared in the English language. If this document has been translated and to the extent there is any ambiguity between the English language version of this document and any translation thereof, the English language version as prepared by us shall take precedence.

6. Severance

If any provision of the Agreement is invalid, illegal or unenforceable, the parties shall negotiate in good faith to amend such provision so that, as amended, it is legal, valid and enforceable and, to the greatest extent possible, achieves the intended commercial result of the original provision. If express agreement regarding the modification or meaning or any provision affected by this clause is not reached, the provision shall be deemed modified to the minimum extent necessary to make it valid, legal and enforceable. If such modification is not possible, the relevant provision shall be deemed deleted. Any modification to or deletion of a provision under this clause shall not affect the validity and enforceability of the rest of this Agreement.

7. Entire agreement

7.1. The Agreement, together with any Valuation produced pursuant to it (the Agreement and such documents together, the "**Contractual Documents**") constitute the entire agreement between you and us and supersedes and extinguishes all previous agreements, promises, assurances, warranties, representations and understandings between you and us, whether written or oral, relating to its subject matter.

7.2. Subject to clause 3.7 above, you agree that in entering into the Agreement you do not rely on, and shall have no remedies in respect of, any statement, representation, assurance or warranty (whether made innocently or negligently) that is not expressly set out in the Contractual Documents. You further agree that you shall have no claim for innocent or negligent misrepresentation based on any statement set out in the Contractual Documents.

7.3. The Letter and these General Terms shall apply to and be incorporated in the contract between us and will prevail over any inconsistent terms or conditions contained or referred to in your communications or publications or which would otherwise be implied. Your standard terms and conditions (if any) shall not govern or be incorporated into the contract between us.

7.4. Subject to clause 3.7 and clause 6, no addition to, variation of, exclusion or attempted exclusion of any of the terms of the Contractual Documents will be valid or binding unless recorded in writing and signed by duly authorised representatives on behalf of the parties.

8. Assignment

8.1. You shall not assign, transfer, mortgage, charge, subcontract, declare a trust over or deal in any other manner with any of the rights and obligations under the Agreement without our prior written consent (such consent to be granted or withheld in our absolute discretion).

9. Force majeure

9.1. Neither party shall be in breach of this Agreement nor liable for delay in performing, or failure to perform, any of its obligations under this Agreement if such delay or failure results from events, circumstances or causeswhich could not be foreseen, or which, though foreseen, were inevitable.

10. Our fees

10.1. Without prejudice to clause 10.3 below, you become liable to pay our fees upon issuance of the Valuation. For the avoidance of doubt, unless expressly agreed otherwise in writing, the payment of our fees is not conditional on any other events or conditions precedent.

10.2. If any invoice remains unpaid after 30 days of the date on which it is presented, we reserve the right to charge interest, calculated daily, from the date when payment was due until payment is made at 3%

10.3. If we should find it necessary to use legal representatives or collection agents to recover monies due, you will be required to pay all costs and disbursements so incurred.

10.4. If an appraisal analysis is ordered and the assignment is cancelled before completion, we reserve the right to receive compensation, by way of damages, in an amount equal to 70% of the total fee for the assignment.

10.5. If you delay the instruction by more than 30 days or materially alter the instruction so that additional work is required at any stage or if

we are instructed to carry out additional work that we consider (in our reasonable opinion) to be either beyond the scope of providing the Valuation or to have been requested after we have finalised our Valuation (including, but not limited to, commenting on reports on title), we will charge additional fees for this work. Such additional fees will be calculated on the basis of a proportion of the total fee by reference to reasonable time and expenses incurred.

10.6. Where we agree to accept payment of our fees from a third party, such fees remain due from you until payment is received by us.

11. Anti-bribery and corruption and Anti-Money Laundering
We agree that throughout the term of our appointment we shall:

(a) comply with all applicable laws, statutes, regulations, and codes relating to anti-bribery and corruption and Anti-Money Laundering laws (the "**Relevant Requirements**");

(b) not engage in any activity, practice or conduct which would constitute an offense;

(c) maintain anti-bribery, anti-corruption, and anti-money laundering policies to comply with the Relevant Requirements and any best practice relating thereto; and

(d) promptly report to you any request or demand for any undue financial or other advantage of any kind in connection with the performance of our services to you.

12. Portfolios
Properties comprising a portfolio, unless specifically agreed with you otherwise, will be valued separately and upon the assumption that the properties have been marketed individually and in an orderly manner.

13. Land Register inspection and searches
We are not required to undertake searches, validations or inspections of any kind for title or price paid information in any publicly available land registry.

14. Title and burdens
We will assume, unless specifically informed and stated otherwise, that each property has good and marketable title and that all documentation is satisfactorily drawn and that there are no unusual outgoings, planning proposals, onerous restrictions or local authority intentions which affect the property, nor any material litigation pending.

15. Disposal costs and liabilities
No allowance is made in our Valuation for expenses of realisation or for taxation which may arise in the event of a disposal and our Valuation is expressed as exclusive of any VAT that may become chargeable. Properties are valued disregarding any mortgages or other charges, including commissions.

16. Sources of information
We rely upon the information provided to us by you, as to details of tenure and tenancies, planning consents and other relevant matters, as summarised in our Valuations. Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser.

17. Identity of property to be valued
We will exercise reasonable care and skill (but will not have an absolute obligation to you) to ensure that the property, identified by the property address in your instructions, is the property inspected by us and contained within our valuation report. If there is ambiguity as to the property address, or the extent of the property to be valued, this should be drawn to our attention in your instructions or immediately upon receipt of our report.

18. Boundaries
Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.

19. Planning, highway and other statutory regulations

19.1. Enquiries of the relevant planning and highways authorities in respect to matters affecting properties, where considered appropriate, are normally only obtained from the corresponding government agency. We can only state whatever current conditions may be. We recommend that formal written enquiries should be undertaken by your lawyers who should also confirm the position with regard to any legal matters referred to in our Valuations.

19.2. It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative, regulatory, or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.

19.3. We assume that the premises comply with all relevant statutory requirements including environmental, building, fire, and sanitation regulations.

20. Property insurance
Our Valuation assumes that each property would, in all respects, be insurable against all identifiable risks.

21. Building areas and age
Where so instructed, areas provided from a quoted source will be relied upon. Any dimensions and areas measured on location or from plan/s are calculated and are quoted to a reasonable approximation, with reference to their source. Where the age of the building is estimated, this is for guidance only.

22. Structural condition
Building, structural and ground condition surveys are detailed investigations of the building, the structure, technical services and ground and soil conditions undertaken by specialist building surveyors or engineers and fall outside the normal scope of a valuation. Since we will not have carried out any of these investigations, we are unable to report that any property is free of any structural fault, rot, infestation or defects of any other nature, including inherent weaknesses due to the use in construction of deleterious materials. We do reflect the contents of any building survey report provided to us in advance, or any defects or items of disrepair of which we are advised or which we note during the course of our ocular inspections but otherwise assume properties to be free from defect.

23. Ground conditions
Unless informed otherwise in writing, we assume there to be no adverse ground or soil conditions and that the load bearing qualities of the sites of each property are sufficient to support the building constructed or to be constructed thereon.

24. Environmental issues

24.1. Investigations into environmental matters by suitably qualified environmental specialists would usually be commissioned by most responsible purchasers or chargees of higher value properties or where there was any reason to suspect contamination or a potential future liability. Furthermore, such investigation would be pursued to the point at which any inherent risk was identified and quantified before a purchase proceeded. Where we are provided with the conclusive results of such investigations, on which we are instructed to rely, these will be reflected in our Valuations with reference to the source and nature of the enquiries. We would endeavour to point out any obvious indications or occurrences known to us of harmful contamination encountered during the course of our valuation enquiries.

24.2. However, we are not environmental specialists and therefore we do not carry out any scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination or any other environmental searches. If we are not provided with the results of appropriate investigations as outlined above and where there is no obvious indication of harmful contamination, our Valuation will be provided on the assumption that the relevant property is unaffected. Where we are informed that contamination is suspected or confirmed, but adequate investigation has not been carried out and made available to us, then the Valuation will be qualified only by reference to it.

25. Minerals, timber, airspace etc.

Unless specifically agreed otherwise in writing and so stated within the main body of the relevant Valuation, we do not value or attempt to value or take into account any potential income stream or other beneficial or detrimental effect or other factor relating to undiscovered or unquantified mineral deposits, timber, airspace, sub-ground space or any other matter which would not be openly known in the market and considered to have value.

26. Legal advice

26.1. We are appointed to provide valuation opinion(s) in accordance with our professional duties as Appraisers. The scope of our service is limited accordingly. The valuation assumes no responsibility for the validity of legal matters affecting the property. It is not the intent of the valuation to offer a legal opinion of title. Any liens or encumbrances which may now exist have been disregarded. We are not qualified legal practitioners and we do not provide legal advice and any statements made by us, or advice given, in a legal context should be construed accordingly.

26.2. Where appropriate we will liaise with your legal advisors. However, we accept no responsibility for any work carried out by them and we will not be liable for anything contained in legal documentation prepared by them.

26.3. Where we consider it is necessary for the provision of the Valuation and/or specifically agree to do so, and any additional fees we require for this work are agreed, we will read legal documents (including leases, licences etc.), however, (save for any comment concerning the impact of our interpretation of such documents on value) our interpretation of such documents cannot be relied upon to be legally correct. Where we do interpret legal documents, we will, for the purposes of providing our Valuation, assume our interpretation to be correct.

27. Loan security

Where instructed to comment on the suitability of property as a loan security we are only able to comment on any inherent property risk. Determination of the degree and adequacy of capital and income cover for loans is the responsibility of the lender having regard to the terms of the loan.

28. Build cost information

In the provision of valuation services we do not hold ourselves out to have expertise in assessing build costs. Where our instruction requires us to have regard to build cost information, for example in the valuation of properties with development potential, we strongly recommend that you supply us with build cost and other relevant information prepared by a suitably qualified construction cost professional, such as a quantity surveyor. The Valuation will be stated to have been arrived at in reliance upon the build cost information supplied to us by you. In the absence of any build cost information supplied to us, we may have regard to published build cost information. Build costs produced using this approach must be assumed to be unreliable or inaccurate; any reliance which can be placed upon our Valuation in these circumstances is severely restricted. Specialist professional advice on the build costs should be sought by you. If you subsequently obtain specialist build cost advice, we recommend that we are instructed to review our Valuation.

29. Reinstatement assessments

A reinstatement assessment for insurance purposes is a specialist service and we recommend that separate instructions are issued for this specific purpose. If an indication is required as a check against the adequacy of existing cover this should be requested and will be so stated in the body of the relevant Valuation. Any indication given is provided for guidance only and must not be relied upon as the basis for insurance cover. In any event, our reinstatement assessment should be compared with the owner's and if there is a material difference, then a full reinstatement valuation should be reconsidered.

30. Comparable evidence

Where comparable evidence information is included in our Valuation, this information is often based upon our oral enquiries and its accuracy cannot always be assured, or may be subject to undertakings as to confidentiality. However, such information would only be referred to where we had reason to believe it or where it was in accordance with our expectation. In addition, we have not inspected comparable properties.

31. Valuation bases

Valuations are carried out on a basis appropriate to the purpose for which they are intended and in accordance with the relevant definitions, commentary and assumptions. The basis of valuation will be agreed with you and specified in the Letter and in the relevant Valuation.

Important Notice

If you have any queries relating to this Agreement please let us know as soon as possible, and in any event before signing the Letter and/or giving us instructions to proceed.

Your instructions to proceed, preferably signing on the space provided for under the Letter, will constitute your acceptance to use our services on the terms of the Agreement.

Accordingly, our commencement of work pursuant to your instructions shall constitute acceptance of your offer and as such establish the contract between us on the terms of the Agreement.

Appendix 9 - Schedule of Assets

BUILDING	
Description	**Market Value (PhP)**
Cyberscape Beta - As seen during our inspection for the previous valuation done, this is a thirty-seven (37)-storey, reinforced concrete-framed building with four (4) basement levels, a mezzanine and a roof deck, construction of which was completed sometime in May 2014. The ground floor is being utilized as lobby and for retail purposes, while the mezzanine level is partly used as retail areas and partly as offices. The basement levels as well as the 2nd floor up to the 8th floor are mainly used as parking areas with some small offices and equipment rooms. The parking levels connect to the adjacent Gamma Tower. The rest of the upper floors are used as offices with high and low zones, while some equipment rooms can also be found at the roof deck. Construction features include partly granite tiles and mainly plastered cement finish precast concrete exterior walls; concrete slab roofing with waterproofing membrane; mainly ceramic tiles on concrete flooring at lobbies and hallways, and epoxy paint finish concrete flooring on parking areas; granite tiles finish concrete partitions in lobbies; mainly gypsum board ceiling in common areas; frameless glass main entrance doors; and mainly glass on analok frame windows. The office units during handover to the tenants reportedly have plain cement finish concrete flooring, acoustic board on aluminum T-runner ceiling and electrical lighting facilities. The retail units, meanwhile, have plain cement finish concrete flooring, open ceiling and electrical lighting facilities upon turnover to the tenants. All interior works done on the leased areas were reportedly shouldered by the tenants and were, therefore, excluded in this report. The building is painted and provided with electrical lighting and plumbing facilities. It is also equipped with building machinery and equipment such as elevators, back-up power supply generators, CCTV, air conditioning system, fire alarm sprinkler system, among others, described and valued in the succeeding sections of this report. Based on the floor area tabulation provided to us by the client, total gross floor area of the building is approximately 60,190.02 sq. m.	**1,631,377,000** ============

BUILDING MACHINERY & EQUIPMENT

Description	Market Value (PhP)
Elevators	
3-Passenger Elevators (High Zone)- Schindler, 1,600 kgs., 22 persons capacity, 16 landings, complete with electric drive motor, governor, control panel, wires, cables and other standard accessories	26,986,000
4-Passenger Elevators (Low Zone)- Schindler, 1,600 kgs., 22 persons capacity, 14 landings, complete with electric drive motor, governor, control panel, wires, cables and other standard accessories	31,483,000
Service Elevator- Schindler, 1,600 kgs., 22 persons capacity, 42 landings, complete with electric drive motor, governor, control panel, wires, cables and other standard accessories	21,467,000
Parking Elevator- Schindler, 1,150 kgs., 15 persons capacity, 12 landings, machine less room, complete with electric drive motor, control panel, wires, cables and other standard accessories	4,408,000
Parking Elevator- Schindler, 1,150 kgs., 15 persons capacity, 11 landings, machine less room, complete with electric drive motor, control panel, wires, cables and other standard accessories	4,041,000

Total for Elevators -	**88,385,000**

Air Conditioning and Ventilating System	
Lot-Air Conditioning System- Mitsubishi Electric Citi Multi, Variable Refrigerant Flow (VRF) System, modular type, system comprising of: 61 - ACCU Outdoor Units - 50 kw cooling capacity series 61 - ACCU Outdoor Units - 45 kw cooling capacity series 61 - ACCU Outdoor Units - 38 kw cooling capacity series 61 - ACCU Outdoor Units - 33 kw cooling capacity series 112-ERV Units-	

Lot-Additional AC Equipment-
1,252 - ACCU Indoor Units (FCU) -
Ceiling mounted and ceiling concealed type, ranges from 3 to 7.5 TR cooling capacity
2 - ACCU Outdoor Units -
LG, variable refrigerant flow (VRF), 15 TR cooling capacity
Note: Installed last 2018
4 - Fan Coil Units -
LG, ceiling concealed ducted type, 7.5 TR cooling capacity
Note: Installed last 2018
ACCU Outdoor Unit -
LG, 3 TR cooling capacity
Note: Installed last 2018, located at 24th floor
ACCU Outdoor Unit -
LG, 1.5 TR cooling capacity
Note: Installed last 2018, located at 6th floor
2 - ACCU Outdoor Units -
LG, 1.5 TR cooling capacity
Note: Installed last 2018, located at 24th floor
Fan Coil Unit-
LG, ceiling suspended type, 3 TR cooling capacity
Note: Installed last 2018, located at 25th floor
Fan Coil Unit -
LG, wall mounted, 1.5 TR cooling capacity
Note: Installed last 2018, located at 6th floor
2 - Fan Coil Units -
LG, wall mounted, 1.5 TR cooling capacity
Note: Installed last 2018, located at 25th floor
2-Fan Coil Units-
LG, ceiling concealed ducted type, 5 TR cooling capacity
Note: Located at Ground Floor Lobby
Fan Coil Unit-
LG, ceiling concealed ducted type, 7.5 TR cooling capacity
Note: Located at Ground Floor Lobby
Fan Coil Unit-
LG, ceiling mounted, 3 TR cooling capacity
Note: Located at Machine Room (25F)
2-Fan Coil Units-
LG, ceiling mounted, 5 TR cooling capacity
Note: Located at Machine Room
2-Fan Coil Units-
LG, wall mounted, 1.5 TR cooling capacity
Note: Located at Machine Room (25F)
2-Air Conditioning Units-
LG, window type, 1.5 kw capacity
Note: Located at Machine Room
System complete with piping connections, electrical and controls system, valve and fittings, and other standard accessories
Note: Installed in various locations 144,909,000

Lot-Air Ventilation and Exhaust System-
Consisting of:
4-Tubular Exhaust Fans-
Nicotra, driven by 7.5 kw electric motor
Note: Located from B1 to B4
4-Tubular Supply Fans-
Nicotra, driven by 7.5 kw electric motor
Note: Located from B1 to B4

24-Jet Fans-
Robotech, jet type, driven by 300 watts motor
Note: Located from B1 to B4
2-Smoke Evacuation Blowers-
Nicotra, centrifugal type, driven by 15 kw electric motor
Note: Located at Roofdeck
2-Pressurization Blowers-
Nicotra, centrifugal type, driven by 11 kw electric motor
Note: Located at Roofdeck
4-ERV Exhaust Blowers-
Nicotra, tube axial type, driven by 4 kw electric motor
Note: Located at Roofdeck
4-ERV Supply Blowers-
Nicotra, tube axial type, driven by 4 kw electric motor
Note: Located at Roofdeck
Air Supply Blower-
Nicotra, finned tube type, driven by 11 kw electric motor
Note: Located at STP Area
Exhaust Blower-
Nicotra, finned tube type, driven by 11 kw electric motor
Note: Located at STP Area
2-Toilet Exhaust Blowers-
Nicotra, driven by 7.5 kw electric motor
Note: Located at Roofdeck
8-Exhaust Fans-
Niagara, wall mounted, 915 mm fan blade diameter with drive motor
Note: Located at Genset Room
10-Exhaust Fans-
Niagara, wall mounted, 610 mm fan blade diameter with drive motor
Note: Located at Genset Room
16-Air Supply Blowers-
Niagara, wall mounted, 610 mm fan blade diameter with drive motor
Note: Located at Substation Room
Exhaust Fan-
Niagara, wall mounted, 610 mm fan blade diameter with drive motor
Note: Located at Fire Pump Room
2-Exhaust Fans-
Niagara, wall mounted, 380 mm fan blade diameter with drive motor
Note: Located at Fuel Pump Room
System complete with ductings installations, electrical and controls system and other standard accessories — 3,048,000

Total for Air Conditioning and Ventilating System - — **147,957,000**

Lot-Building Management System-
Consisting of:
CPU (Air Conditioning System)-
Powerlogic, Core i7 with keyboard and mouse
LCD Monitor-
View Sonic
CPU (Elevator)-
Transformer type console
LCD Monitor-
Claxan
System complete with electrical wiring installations and other standard accessories — **6,329,000**

Lot-Standby Power Supply and Electrical Power Distribution System -
System consisting of:
3-AC Electric Generating Set-
MGS-Stamford, Model MG-73PF, July 2012 Mfg Date, Ser. Nos. X12G301715, X12G301716 and X12G302704, 2605 kva (2084 kw) design output, 2125 kva (1700 kw) rated capacity, 0.80 power factor, 1800 rpm, 3 phase, 60 hz, powered by:
16 Cylinder Diesel Engine-
Mitsubishi, turbo-charged, direct injection, water cooled, complete with battery, controls and other standard accessories, steel skid base mounted on concrete foundation
AC Electric Generating Set-
MGS-Stamford, Model MG-73PF, May 2012 Mfg Date, Ser No. X12E191729, 2605 kva (2084 kw) design output, 2125 kva (1700 kw) rated capacity, 0.80 power factor, 1800 rpm, 3 phase, 60 hz, powered by:
16 Cylinder Diesel Engine-
Mitsubishi, turbo-charged, direct injection, water cooled, complete with battery, controls and other standard accessories, steel skid base mounted on concrete foundation
Generator Synchronizing Panel-
Metal clad casement, free standing with 7 vertical sections, complete with main breakers, sub-breakers, magnetic contactors, relays, timers, on/off switches, pushbutton switches, pilot lights automatic transfer switch,and standard accessories
Battery Charger-
30 volts, 30 amperes capacity
Fuel Day Tank-
Mild steel plate of welded construction, 12,000 liters capacity
Fuel Storage Tank-
Mild steel plate of welded construction, 54,000 liters capacity
Note: Located at Basement 4
2-Fuel Pumps-
No available brand, rotary gear type, driven by 4.1 kw electric motor
Note: Located at Basement 4
2-Power Transformers-
No available brand, 2.5 mva rated capacity, 34.5 kv and 400 volts primary and secondary voltages, oil immersed, pad mounted, 3 phase
Vacuum Fault Interrupter-
G & W Electric Co., metal clad casement, 2 swing-out door panels
Low Voltage Switchgear No. 1-
Metal clad casement, free standing with 6 vertical sections, complete with main breakers, sub-breakers, magnetic contactors, relays, timers, on/off switches, pushbutton switches, pilot lights automatic transfer switch and standard accessories
Low Voltage Switchgear No. 2-
Metal clad casement, free standing with 4 vertical sections, complete with main breakers, sub-breakers, magnetic contactors, relays, timers, on/off switches, pushbutton switches, pilot lights automatic transfer switch and standard accessories
Main Distribution Panel-
Metal clad casement, free standing with 1 vertical section, 400 volts
2-Capacitor Banks-
Metal clad casement, free standing type, with 2 swing-out door panels, approx. 1,600 kvar capacity

System complete with electrical wiring installations, piping connections, contactors, relays and other standard accessories **93,095,000**

Lot-Water Supply/ Distribution and Dewatering System-
Consisting of:
Water Storage Tank-
Stainless steel construction, 25,000 gallons capacity
Note: Located at Roof Deck
2-Booster Pumps-
Dynaflo, centrifugal type, driven by 3.73 kw electric motor, equipped with;
Pressure Tank-
Super Flow, GWS, mild steel construction, 850 liters capacity
Note: Unit located near Upper Deck Machine Room
2-Transfer Pumps-
Worthington, vertical turbine type, 250 gpm capacity, driven by 56 kw electric motor
Note: Located at Basement 4
2-Sump Pumps-
Submersible type, driven by 8.2 kw electric motor
Note: Located at Basement 4
System complete with piping connections, valves and fittings, controls and other standard accessories **3,339,000**

Lot-Fire Fighting, Fire Alarm and Fire Detection System -
Consisting of:
Fire Pump-
ITT Industries, vertical turbine type, 750 gpm capacity, driven by 149.2 kw electric motor
Fire Pump-
ITT Industries, vertical turbine type, 750 gpm capacity, driven by 4 Cylinder Clarke / John Deere Diesel Engine
Jockey Pump-
Submersible type, driven by 7.5 kw electric motor
Automatic Transfer Switch-
Metal clad casement, wall mounted, 1,600 amperes
2-Fire Pump Controllers-
Eaton
Jockey Pump Controller-
Eaton
82-Fire Hose Cabinets-
Aluminum frame with glass panel door, wall mounted, complete with fire hose, nozzle and 10 lbs dry chemical type fire extinguisher
System complete with automatic sprinkler heads, FDAS, fire extinguishers, smoke and heat detectors, fire alarm bells, burglar alarm, piping connections, valves, fittings, and other standard accessories
Note: Installed in various locations. **10,690,000**

Lot-Sewage Treatment Plant -
Approximately at an average of 100 to 150 m^3 per day effluent working capacity, complete with 2 - 11.12 kw air blowers, 2 - 8.2 kw effluent pumps, 2-1.5 kw influent pumps, 2-1.5 kw decanter pumps, 1-1.11 kw sludge pump and 1-0.37 kw sludge pump, air diffusers, valves, fittings, piping installations, collecting chamber tanks, controls and other standard accessories

Note: Plant repairs/upgrade work 2017 Q4 with replaced aeration air blowers and added influent pump, decanter pumps and sludge pumps	**3,641,000**

Lot-CCTV Security Monitoring System-
Consisting of:
107-CCTV Cameras-
Fix dome type
8-LCD Monitors-
A Vision
8-DVR-
GMG Advanced K.264
6-UPS-
Intex, 1500 VA
RPS Charger-
12 amperes

System complete with electrical and wiring installations, controls and other standard accessories	**2,610,000**

<u>Others</u>

Walkthrough Metal Detector-	171,000
Gondola-	
MHE Demag, 200 kgs capacity, complete with cage, winch, weights, drive motor and other standard accessories	1,520,000
2-Parking Boom Barriers-	
Nice, with 4 meters long tubular barrier	51,000

Total for Others -	**1,742,000**

Total for Building Machinery & Equipment -	**357,788,000**

Appendices

1 Instructions

Engagement of Santos Knight Frank

Instructions	1.1	We refer to our Letter of Engagement dated 21 September 2020 and Amendment dated 01 June 2021, to provide a Valuation Report on the opinion of **Market Value** using Cost and Income Approaches of that certain Property consisting of <u>leasehold of land</u>, <u>building, other land improvements, and building machinery & equipment</u> of a site identified as Exxa-Zeta Tower located along **West Drive, within Bridgetowne, Barangay Ugong Norte, Quezon City, Metropolitan Manila, Philippines**, ("the Property"). A copy of that document is attached herein as Appendix **2**.
	1.2	This valuation has been carried out by Santos Knight Frank, Inc. ("Santos Knight Frank" or "SKF"), in accordance with our General Terms of Business for Valuations ("General Terms of Business"), as attached as Appendix **3**.
Client	1.3	Our client for this instruction is **Robinsons Land Corporation** ("the Client").
Valuation standards	1.4	This valuation has been undertaken in accordance with the International Valuation Standards, as well as other local standards.
Purpose of valuation	1.5	You have confirmed that this valuation is for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
Conflict of interest	1.6	We confirm that we do have a material connection or involvement giving rise to a potential conflict of interest, as set out below: We have conducted the valuation of the same Property for you as of 30 September 2020 for purposes of: i) the tax-free exchange of assets to a REIT Company, and (ii) for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
	1.7	You have confirmed this Engagement notwithstanding this matter, you are content for us to proceed with this instruction. We are providing an objective and unbiased valuation.
	1.8	We are acting as external and independent valuers in this engagement.
Responsibility to third parties	1.9	Our valuation report is only for the use of our Client and for the purposes for which are stated herein, and no liability is accepted to any third party for the whole or any part of its contents.
Disclosure & publication	1.10	Except for the purposes which are stated herein, neither the whole nor any part of this valuation nor any reference thereto may be included in any published

document, circular or statement nor published in any way without our prior written approval of the form or context in which it may appear.

Limitations on liability 1.11 No claim arising out of or in connection with this valuation report may be brought against any member, employee, partner, director or consultant of Santos Knight Frank, Inc. Those individuals will not have a personal duty of care to any party and any claim for losses must be brought against Santos Knight Frank, Inc.

1.12 Santos Knight Frank, Inc.'s total liability for any direct loss or damage caused by negligence or breach of contract in relation to this instruction and valuation report is limited to the amount of the level of our fee, specified in the Letter of Engagement, a copy of which is attached as Appendix 2. We do not accept liability for any indirect or consequential loss (such as loss of profits).

1.13 The above provisions shall not exclude or limit our liability in respect of fraud or for death or personal injury caused by our negligence or for any other liability to the extent that such liability may not be excluded or limited as a matter of law.

Expertise 1.14 The valuation process was performed by **Raymond F. Dechavez**, under the supervision of **Jacqueline T. Guerta** and **Jesus Constance M. Castro**, both licensed Real Estate Appraisers. The Principal Signatory on behalf of Santos Knight Frank, Inc. and who also reviewed the Valuation Report, is **Wenceslao D. Fuentes, Jr.,** also a licensed Real Estate Appraiser. We confirm that the above-named Licensed Real Estate Appraisers are registered with the Professional Regulation Commission ("the PRC"), having sufficient current knowledge of the particular market and the skills and understanding to undertake the valuation competently.

Vetting 1.15 This report has been vetted as part of Knight Frank global standards.

Scope of enquiries & investigations

Inspection 1.16 In accordance with your instructions, due to the limited timeframe to complete the Engagement, we have not conducted a current inspection. The Property has been previously inspected. Valuation rendered is a result of a revaluation of a property that has previously been inspected.

1.17 The Client has provided us with information regarding the changes to the physical attributes and/or characteristics of the Property; current or anticipated changes in rental income from the Property; and material changes to the non-physical attributes of each property, such as other lease terms, planning consents, statutory notices and other relevant information which have occurred between the valuation date and the date of our previous valuation. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.

Investigations 1.18 The extent of enquiries/investigations made is set out in our General Terms of Business. In carrying out this instruction we have undertaken verbal / internet-

based enquiries referred to in the relevant sections of this report. We have relied upon this information as being accurate and complete.

Information provided

1.19 In this report, we have been provided with information/documents by the Client for the previous valuation done as well as for the current engagement. We have relied upon this information as being materially correct in all aspects. In particular, we detail the following:

- Typical Floor Plan
- Site Development Plan
- Lot Plan
- Floor Area Tabulation
- Rent Roll
- Financial Statements
- Projections
- Historical and Current Occupancy

1.20 In cases where we were not provided with documents or information, we did our own enquiries as outlined and stated in the report. Any assumptions in lieu of the lack of information is also set out in the relevant sections of this report.

Valuation basis

1.21 In accordance with your instructions, we have provided an opinion of value on the basis of **Market Value**.

Market Value (MV)

1.22 Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property.

It is further assumed that title to the Property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable.

The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.

Valuation date

1.23 The valuation date is **30 June 2021.**

2 The Property

Location

Address

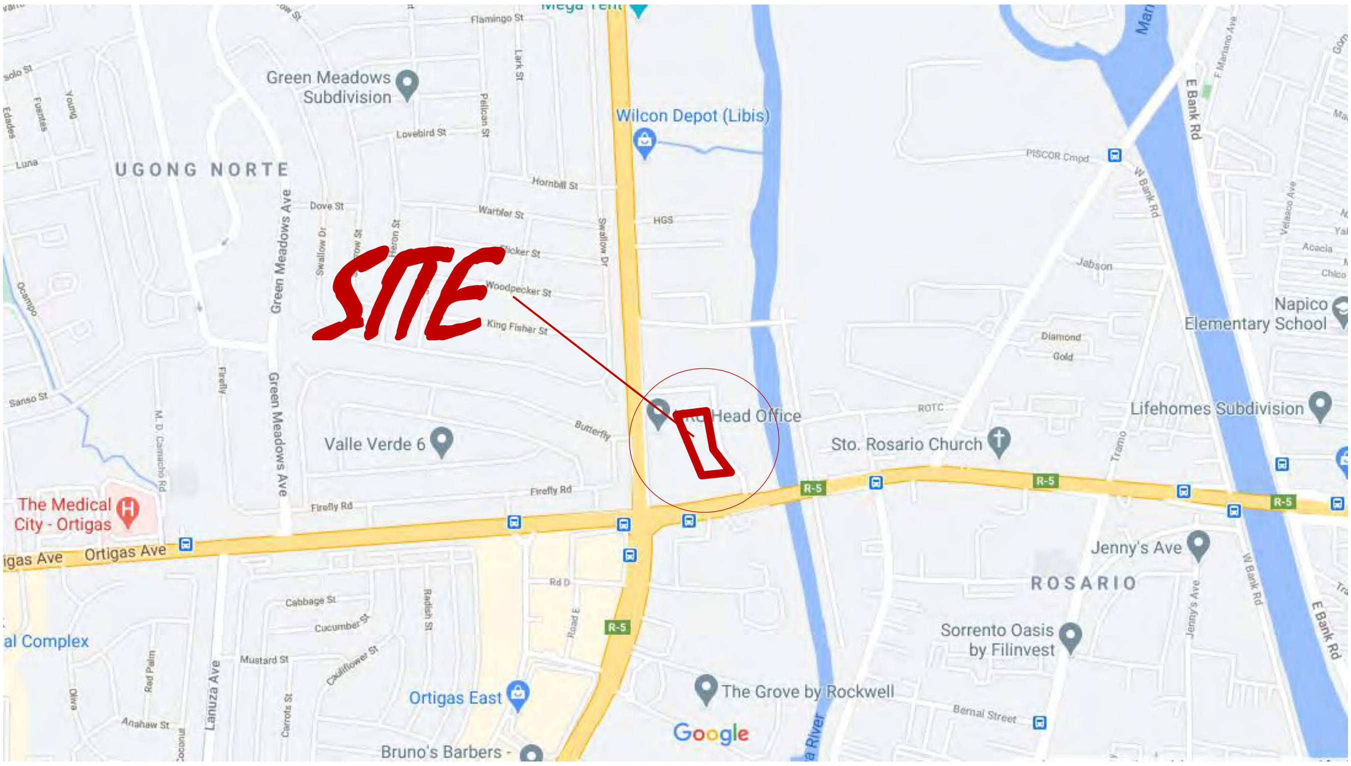
2.1 The Property, identified as Exxa-Zeta Tower, is located along the southwest side of West Drive, within Bridgetowne, Barangay Ugong Norte, Quezon City, Metropolitan Manila, Philippines.

The site is approximately 80 meters northwest from Ortigas Avenue Extension, some 220 meters southeast from Eulogio Rodriguez, Jr. Avenue passing along Tera Drive, 2.70 kilometers southeast from Epifanio delos Santos Avenue (EDSA) within the vicinity of Robinsons Galleria and approximately 7.40 kilometers southeast from Quezon City Hall.

Below is a satellite image courtesy of Google Maps showing the Property and its relation to the immediate vicinity.

Note: Image courtesy of Google Maps.

2.2 The street plan below shows the location of the Property.



Neighborhood

2.3 Bridgetowne is a mixed township and business park situated in a former industrial area on both banks of the Marikina River near the junction of Eulogio Rodriguez, Jr. Avenue (C-5 Road) and Ortigas Avenue. The 30.61-hectare (75.6-acre) master-planned community is the first integrated township project by Robinsons Land Corporation, the real estate arm of JG Summit. It is currently anchored by four office towers in its information technology park dedicated to the business process outsourcing sector, its second in Metro Manila after Robinsons Cybergate in Mandaluyong. Once completed, the township will be a community consisting of seven office towers, a shopping mall, five-star hotel and residential condominiums, with a landmark bridge and a light art installation called The Victor as its centerpiece. Upon completion, the Victor will be one of the country's tallest art installation.

Outside Bridgetowne, land utilization is for an intermix of residential, industrial and commercial purposes. Across E. Rodriguez, Jr. Avenue are exclusive, low-density villages such as Valle Verde 2, 5 and 6 and Greenmeadows Subdivision. Still noted near the Property are some industrial sites but recent developments point toward a gradual change in land use.

Some of the significant mixed-use developments nearby that are gradually changing the trend in the area include "Eastwood City", "The Grove" "Metropoli Residenza", "Ayala Land Eton Property" and "Frontera Verde".

Accessibility

2.4 The Property is easily accessible from the rest of Metropolitan Manila thru the nearby E. Rodriguez, Jr. Avenue (C-5 Road) and Ortigas Avenue Extension.

Public Transportation such as buses, jeepneys, GT/UV Express Vans, and taxi cabs are readily available along the aforesaid roads.

Other community centers like post office, churches, hospitals, and public and private schools are likewise accessible from the Property.

Land Details

Lot Area Allocation

2.5 Based on document furnished us, the land where the Exxa-Zeta Tower is erected consists of a lot technically identified as Lot 2, Pcs-00-014792 containing an area of **14,116 sq. m.**, more or less, covered by Transfer Certificate of Title No. 004-2016014341 issued in favor of **ROBINSONS LAND CORPORATION** on September 20, 2016 by the Registry of Deeds for Quezon City.

2.6 Based on Lot Plan provided to us by the Client, the allocated land area for Exxa-Zeta Tower is about **6,808 sq. m.**

2.7 Image of the Lot Plan is attached at Appendix **5**.

Draft Contract of Lease

2.8 We were provided by the Client a copy of a Draft Contract of Lease with ROBINSONS LAND CORPORATION, as the Lessor, and RL COMMERCIAL REIT, INC. (formerly Robinsons Realty and Management Corporation)[1], as the Lessee.

Based on the same document, the lease contract stated that it will cover the land being occupied by Robinsons Exxa-Zeta Tower with an area of 6,808 sq.m. Lease term would be for a period of 99 years. It likewise specified that the monthly lease payments would be 7% of the monthly rental income gained from Robinsons Exxa-Zeta Tower which is owned by the Lessee (plus VAT, as appliable).

2.9 The management of RLC disclosed that actual lease commencement shall be the date of the Certificate of Approval of the Increase in Authorized Capital Stock of RCR issued by the SEC. However, for valuation purposes, lease commencement shall be assumed on October 1, 2021.

In the absence of a signed contract, we used the foregoing details to establish the leasehold value of the land.

Tenure

2.10 For purposes of this engagement, ownership rights to the land is treated as **leasehold.**

Terrain

2.11 The terrain of the land is flat. Its finished elevation is slightly higher than the existing grade of the fronting roads.

Description of Improvements and Machinery & Equipment

Improvements and Machinery & Equipment

2.12 The land is presently improved with a commercial/office building identified as Exxa-Zeta Tower, a PEZA registered, LEED Silver certified, Prime Grade office building. Construction of Exxa Tower was completed sometime in March 2018, while Zeta Tower was completed sometime in November 2018. Also included in

---

[1] As of the date of this Valuation Report, application for the change in name from “Robinsons Realty and Management Corporation” to “RL Commercial REIT, Inc.” is pending the approval of the Philippine SEC.

this appraisal are the appurtenant Building Machinery & Equipment. These are all described in detail in the Schedule of Assets (Appendix **11**).

Tenure 2.13 We were advised that the Client owns the improvements described above. As stated, the land would be covered by a long-term Lease Agreement. We have, however, treated the improvements as freehold.

Accommodation

Measurement 2.14 Based on the gross floor area tabulation provided to us by the Client, Exxa-Zeta Tower has a total gross floor area of about 108,887.87 sq.m., excluding decks.

2.15 The floor area of Exxa-Zeta Tower, is tabulated as follows:

Exxa-Zeta Tower	GFA (sq.m.)
Basement	6,325.00
GF	4,366.80
2F	3,982.53
3F	6,210.36
4F	6,210.36
5F	6,210.36
6F	6,210.36
7F	4,955.15
8F	4,955.15
9F	4,955.15
10F	4,955.15
11F	4,955.15
12F	4,955.15
14F	4,955.15
15F	4,955.15
16F	4,955.15
17F	4,955.15
18F	4,955.15
19F	4,955.15
20F	4,955.15
21F	4,955.15

TOTAL AREA	**108,887.87**

Condition

Scope of Inspection 2.16 As stated earlier, we have previously inspected the Property.

2.17 As stated in the General Terms of Business, during our previous inspection, we have not undertaken a building or site survey of the Property, as it is beyond the normal scope of appraisal.

2.18 We have carried out visual inspection only without any structural investigation or building survey. During our limited inspection, we did not inspect any inaccessible area/s. We are unable to confirm whether the Property is free from urgent or significant defects or items of disrepair.

2.19 Unless otherwise stated, we have not been able to carry detailed on-site measurement to verify the site and gross floor areas of the Property and we have no reason to doubt the truthfulness of the areas shown on the documents provided us.

2.20 Moreover, due to the nature of the machinery, we have not carried out mechanical inspection, and our assessment was based on the premise that the machinery is in a condition commensurate with age and normal usage.

2.21 In the Schedule of Assets or Asset Inventory, machinery and/or equipment were listed as complete units i.e., machinery and/or equipment are meant to include all parts and accessories normally comprising the unit.

Comments

2.22 Apart from the matters specifically referred to below, we have assumed that the Property is in sound order and free from structural faults, rot, infestation or other defects, and that the services are in a satisfactory condition.

2.23 The buildings and structures, including the machinery & equipment, were assumed to be in a generally good condition commensurate with their age and use. It was also assumed that there are no urgent or significant defects or items of disrepair which would be likely to give rise to substantial expenditure in the foreseeable future or which fall outside the scope of the normal annual maintenance programme.

Ground conditions

2.24 We have not been provided with a copy of a ground condition report for the site. We have assumed that there is no adverse ground or soil conditions and that the load bearing qualities of the site are sufficient to support the building.

2.25 We have further assumed for the valuation that the ground condition will not have significant adverse impact to the development cost as well as the development period which may result in difference in site value.

Services

2.26 It would appear from our previous inspection that main supplies of electricity and water are provided to the Property. Telephone communication facilities are likewise available. Sewer and drainage are believed to be discharged to the building's sewerage system.

Tenancies

Tenancy Information

2.27 We have been provided with copy of some of the rent roll including some of the lease contracts by the Client and have relied on that information as being correct. No additional verification has been undertaken.

2.28 A summary of the Property tenancies is presented below.

Exxa Tower

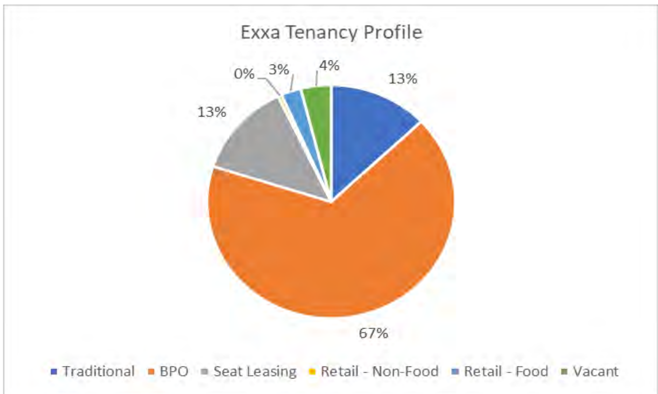
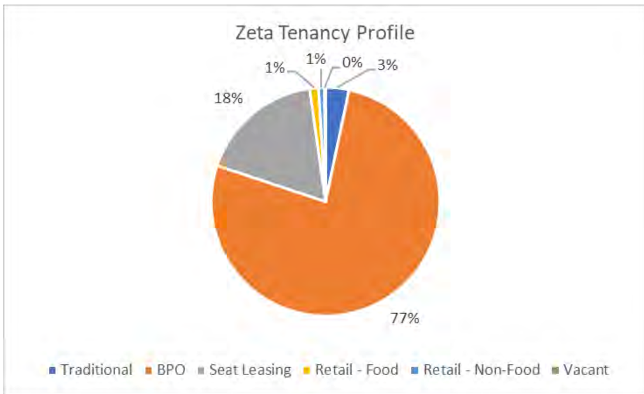
2.29 Based on the rent roll provided, Exxa Tower total leasable area is **39,280.42 sq.m.** while Zeta Tower has a total leasable area of **35,303.32** sq.m. Combined leasable area of both towers is at **74,583.74** sq.m. with **794** parking slots available for lease.

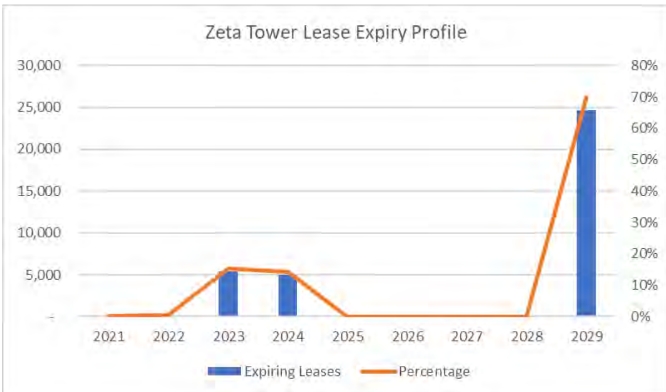
The Property currently has a mix of traditional offices, Business Process Outsourcing (BPO) companies, seat leasing and some retail tenants. Based on the figure found on the next page, which summarizes the tenancy profile of the Property, BPOs currently take up 67% and 77% of Exxa and Zeta's leasable area followed by seat leasing with 18% at Zeta Tower and 13% of both traditional and seat leasing offices at Exxa Tower.





Source:SKF/ RLC

2.30 As of 30 June 2021, the Property is 98% occupied with a Weighted Average Lease Expiry (WALE) of 4.43 years. Based on the lease expiry profile of Exxa Tower, 87% of its leased area will expire in 2023. One the other hand, for Zeta Tower, less than 1% of the its leased area will expire in 2021 & 2022. A huge chunk of leased area (70%) however, is expiring in 2029.



Source:SKF/ RLC

2.31 Below are some of the provisions as stated in the Lease Contract.

a. **Care of the Leased Premises**

The LESSEE shall at its expense, maintain the Leased Premises in a clean and sanitary condition, free from noxious odors, disturbing noises or other nuisances and, upon the expiration of the lease, shall return the premises and fixtures in as good condition as that in which they were actually found at the beginning of the lease, ordinary wear and tear excepted. The LESSEE shall not drive nails, screws, hooks or other abutments on or into the walls frames or other portions of the premises or in any manner deface or damage any part thereof. Any damage caused by the LESSEE may be repaired by the LESSOR for the account of the LESSEE. The LESSOR shall have the right to require the LESSEE to remove any display or promotional matter, or any displayed merchandise which LESSOR reasonably and in good faith considers to be improper or inappropriate for the general appearance or presentation of the premises.

The LESSOR shall be responsible for major repairs which are limited to those which affect the structure of the Leased Premises or the building. The LESSEE shall allow access to the LESSOR on the Leased Premises for purposes of repair or remodeling or such other works as may be necessary for the preservation, conservation, improvement or decoration of the building or any part thereof. No compensation or claims shall be allowed against the LESSOR by reason of any inconvenience or annoyance to the LESSEE that may arise by reason thereof.

The LESSEE shall promptly repair, at its own expense, any damage to the Leased Premises or any other improvements within the building caused by bringing into the Leased Premises of any property for the LESSEE's use, or by the installation or removal of such property, regardless of who is at fault or who caused such damage. unless such was clearly caused by the LESSOR, or its agents or employees. In default of such repairs by the LESSEE, the LESSOR may effect the repairs and the LESSEE agrees to promptly pay the LESSOR the cost of such repairs. The LESSEE shall be responsible for the maintenance and repair of the Leased Premises including plumbing and electrical fixtures within the premises or those serving the same.

The LESSEE must notify the LESSOR immediately of any damage to the Leased Premises, their appurtenances as well as any occupation, usurpation or untoward act being committed, or threatened to be committed, within the Leased Premises.

No machinery, furniture, effect, equipment and other properties found within the Leased Premises, whether or not owned by the LESSEE, may be brought into or out of the building without the prior written approval of the LESSOR. Furthermore, in case the LESSEE has any outstanding/unsettled rent, dues or other charges, the LESSOR reserves the right to withhold approval of any request for bringing in or out of any machinery, furniture, effects or other properties found within Leased Premises, whether or not owned by the LESSEE, until such outstanding amounts have been duly settled by the LESSEE. This is without prejudice to such other rights and remedies available to the LESSOR under prevailing laws or the Contract. including these General Terms and Conditions.

The immediately preceding paragraph shall also apply in the event of transfer of machinery, furniture, effects or other properties found within the Leased Premises from one unit to another unit in the building being leased by the LESSEE whether or not the latter unit is owned by the LESSOR. In the event that the unit where the properties to be transferred is not owned by the LESSOR, the written consent of the unit owner shall also be required.

The LESSEE shall further maintain the Leased Premises in a clean condition by utilizing plastic bags for the disposal of both dry and wet garbage. Unless garbage is contained in plastic bags, it will not be allowed to be deposited in the authorized depository for collections.

b. **SUBLEASE, TRANSFER OF RIGHTS**

The LESSEE shall not assign or transfer its rights in the Contract nor sublease or sublet all or any part of the Leased Premises, without the prior written consent of the LESSOR and no rights, title or interest thereto or therein shall be conferred on or vested to anyone other than the LESSEE without such prior written consent. Otherwise, subleasing the leased Premises without the prior written consent of the LESSOR shall be deemed a breach of the contract by the LESSEE and shall be subject to the rights and remedies available to the LESSOR under prevailing laws and Contract, including these General Terms and Conditions. In the event of sublease with or without the prior written consent of the LESSOR, the LESSEE shall remain principally liable. However, the LESSOR shall have the right to exercise such remedies embodied in the Contract, the General Terms and Conditions and under prevailing laws, as against the sublessee in order to protect its right and interests.

Only the LESSEE has the right to use the Leased Premises as its official address to be registered with any government entities for the issuance of necessary permits and licenses for its business operations.

Should the LESSOR give the LESSEE its consent to sublease the Leased Premises, the LESSEE cannot sublease the Leased Premises for the period longer that the Contract of Lease between the LESSOR and the LESSEE.

It is expressly understood that the LESSEE has no goodwill or patronage rights over the Leased Premises; that such rights belong exclusively to the LESSOR, being the owner of the Leased Premises, which forms part of the building; and that the LESSEE may not sell or dispose of said goodwill or patronage rights to any person.

c. **ASSIGNMENT OF RIGHTS/MORTGAGE/ENCUMBRANCE**

The LESSOR reserves the right to assign and convey or mortgage or otherwise encumber its rights to this lease in favor of any affiliate or subsidiary or to any party. In the event of any assignment, conveyance, mortgage, or encumbrance of the Leased Premises, the LESSOR binds itself to require the assignee or mortgage or beneficiary of the encumbrance to respect and abide by all the terms and conditions of the Contract, as well as these General Terms and Conditions.

Roadways and Access

Roadways

2.32 West Drive is about 20 meters wide, concrete/asphalt-paved and provided with concrete curbs and gutters, and underground drainage system.

2.33 Our informal enquiries with the City Planning Office confirmed that the Property enjoys frontage along the bounding road.

Access

2.34 In reporting our opinion of value, we have assumed that there are no third-party interests between the boundary of the Property and the adopted highways and that accordingly the Property has unfettered vehicular and pedestrian access.

Environmental Considerations

Flooding

2.35 From our enquiries with the City Planning Office, and also due to its terrain, we have ascertained that the Property is not within an indicative floodplain and that there is therefore a minimal risk of flooding.

Contamination

2.36 As stated in the General Terms of Business, investigations into environmental matters would usually be commissioned from suitably qualified environmental specialists. Santos Knight Frank, Inc. is not qualified to undertake scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination.

2.37 Subject to the above, while carrying out our valuation inspection, we have not been made aware of any uses conducted at the Property that would give cause for concern as to possible environmental contamination. Our valuation is provided on the assumption that the Property is unaffected.

Highest and Best Use

2.38 "*Highest and Best Use*" is defined as the most profitable likely use to which a property can be put. The opinion of such use may be based on the highest and most profitable continuous use to which the Property is adapted and needed, or that use of land which may reasonably be expected to produce the greatest net return to land over a given period of time. Alternatively, it is that use, from among reasonably probable and legal alternative uses, found to be physically possible, appropriately supported, financially feasible, and which results in highest land value.

2.39 Considering the Property's size, shape, topography, current zoning classification and the prevailing land uses and development in the area, we are of the opinion that the **existing commercial development** would represent the highest and best use of the Property.

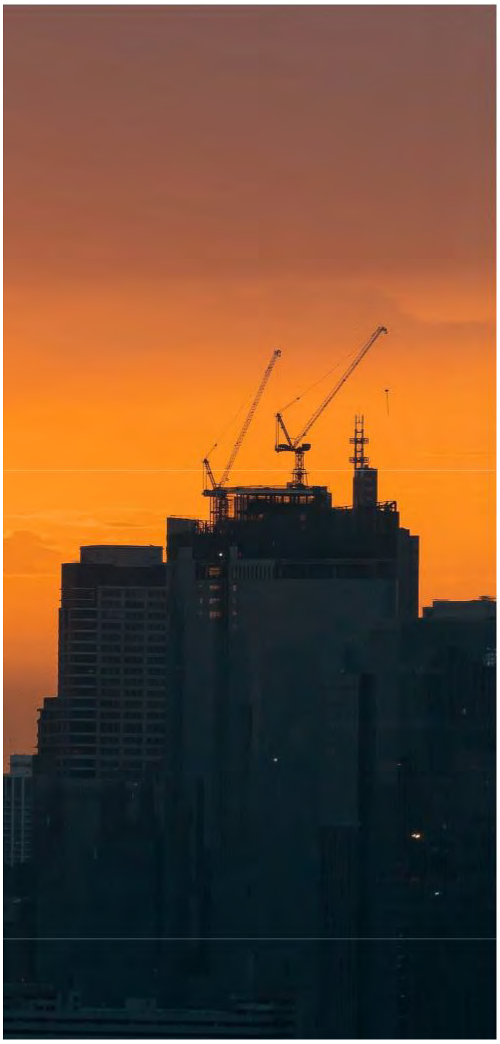
Source of Information

3.2 Our market analysis has been undertaken using market knowledge within Santos Knight Frank, Inc., enquiries of other agents, searches of Property databases, as appropriate and any information provided to us.

OFFICE RENT ROLLBACKS CUSHION INCREASING VACANCIES

General Overview



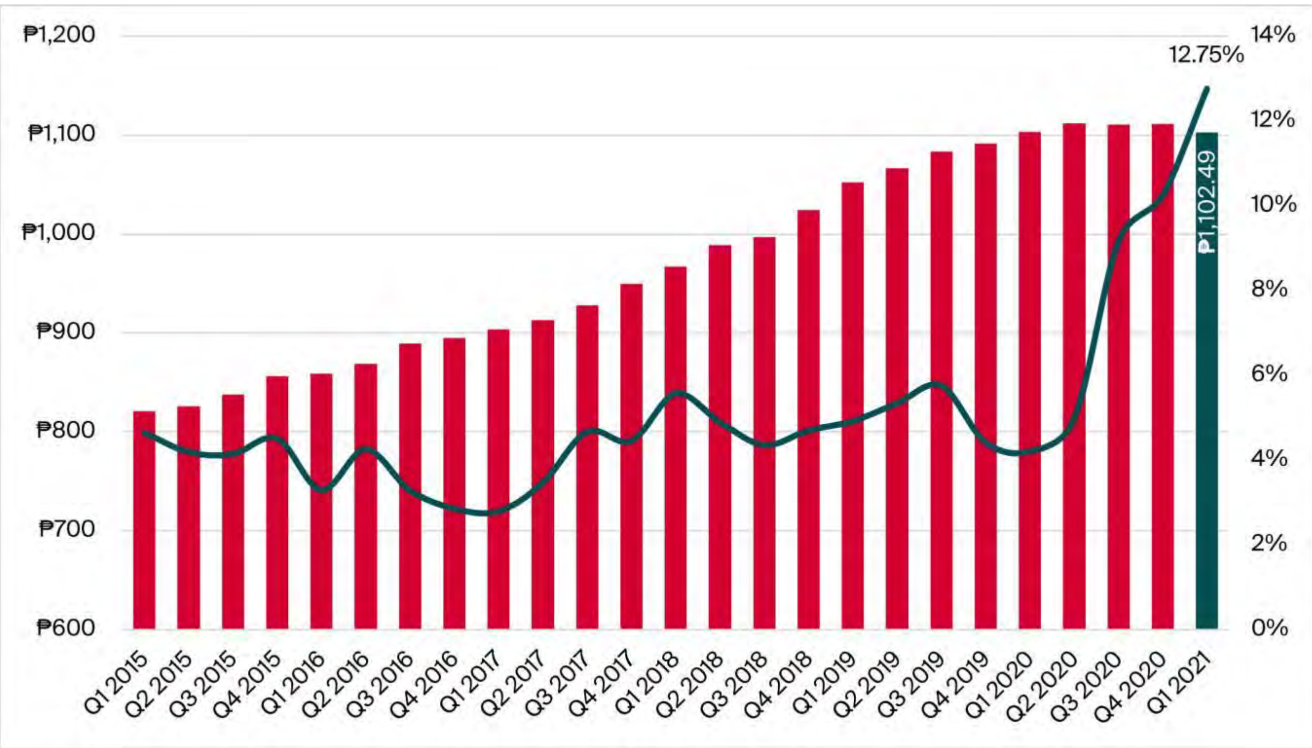
The Metro Manila office market displayed modest market movement at the start of 2021 owing to the sluggish demand driven by the market uncertainties caused by changing lockdown scenarios in Metro Manila. Landlords were challenged to remain relevant as potential occupiers continued to take a cautious approach caused by the growing COVID-19 cases and slow vaccine roll-outs.

Still, new office spaces were introduced during the quarter as developers capitalized on the relaxed quarantine measures to resume their halted construction activities. The local office market supply grew by 163,136 sqm of Grade A office space that mostly catered to IT-BPO companies. Several buildings were completed in Fort Bonifacio, Bay Area, and Quezon City, resulting in an overall office supply in Metro Manila of about 6.9 million sqm.

Consequently, supply growth resulted in an increase in vacancies throughout the metropolis. Office vacancy rates in Metro Manila further spiked to 12.75%, the highest since 2009. Current and potential occupiers remained vigilant towards the health situation of the country. Numerous companies continued to implement Work-From-Home and skeletal workforce arrangements. Office take-up contracted by 28,696 sqm as locators reassessed their need for spaces amid their bid to reduce operational costs.

Monthly average lease rates in Metro Manila further dipped to PHP 1,102.49 per sqm, declining by 0.78% quarter-on-quarter (q-o-q) and 0.07% year-on-year (y-o-y). The downward trend of rents was caused by the landlords' bid to provide more competitive packages to appeal to prospective tenants.

Figure 1. Metro Manila Historical Lease & Vacancy Rates



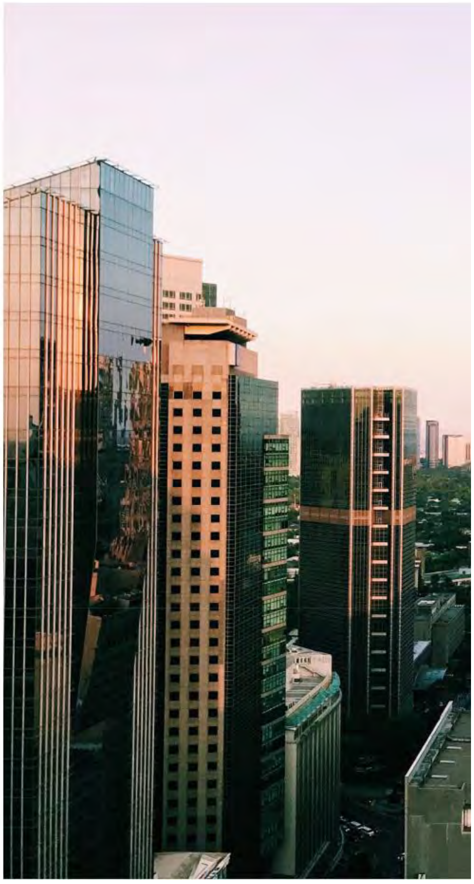
Source: Santos Knight Frank Research

Makati

The adverse effects of the pandemic and the prolonged lockdowns remained evident in the most prominent business district in the country. Vacancy rates spiked to 11.17%, considered to be the highest in the past ten years. Moreover, the expensive rents in Makati CBD were detrimental to the retention of office occupiers. Locators looking to minimize their expenses opted to discontinue their lease, resulting in about 25,557 sqm of office space vacated during the quarter.

Sluggish leasing activity persisted in the area as existing and upcoming locators in Makati were less willing to take up spaces due to the financial distress brought about by the global pandemic. The average monthly rents recorded in Makati went down to PHP 1,348.19 per sqm, contracting by 0.93% q-o-q and 6.05% y-o-y. Despite this, rates in Makati remained the highest in the metropolis.

Several property players are still looking forward to the materialization of their projects in the pipeline. More than 447,552 sqm of Prime and Grade A office supply are anticipated to come online in the next three years, with approximately 164,000 sqm being operational by the end of 2021. The massive influx of upcoming office developments in Makati comes from the backlogs and spillovers from 2019 up to the latter part of 2020.



Taguig

Slow demand in Taguig was also evident as vacancy levels continuously increased to 8.37% from 7.74% in Q4 2020. Despite having the largest supply share in Metro Manila of more than 2 million sqm, the downsized space requirements were seen as the factor in the rising vacancies as locators looked to lessen their operational cost. Moreover, average monthly rental rates in Fort Bonifacio also went down to PHP 1,289.75, translating to a contraction of 0.89% q-o-q.

The ease in quarantine measures allowed private and public projects to resume construction. Office supply in Fort Bonifacio further grew by 28,000 sqm through the completion of BGC Corporate Center 2. Despite the growing vacancy levels, potential developers still have bright prospects in Taguig as it was seen as the youngest but fastest growing business district in Metro Manila. In line with this, upcoming office supply is seen to be augmented by about 864,100 sqm of office space within the next five years. About 344,000 sqm of this will be coming from Arca South which is poised to become a new business district in the south.

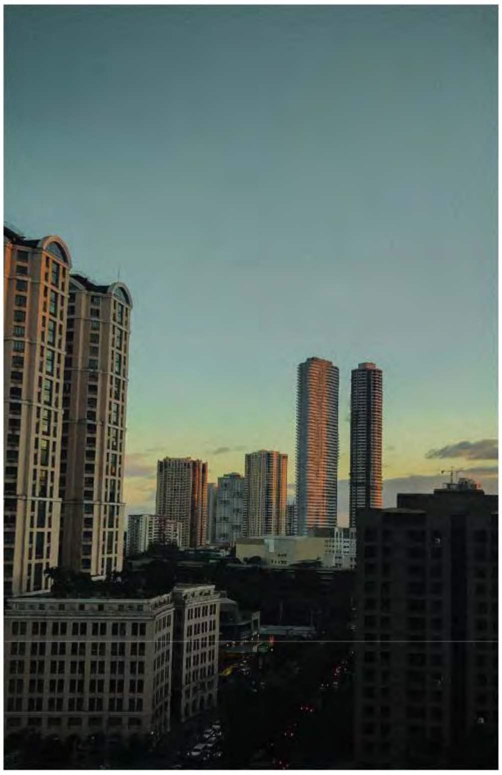
Bay Area

The POGO industry exodus has significantly contributed to the spiking vacancy levels in the Bay Area during Q1 2021, recorded at 12.82%. Slower demand from the sector is seen in the coming periods as more firms have started to postpone their lease contracts. This occurrence implied challenges in the recently fast-moving office market of the Bay Area.

The upsurge in vacancy was also attributed to the completion of Four E-com during the quarter with an additional 89,132 sqm of Grade A office space. Priced above its competitors, this building has helped in pushing the average rents in the area to PHP 1,083.41 per sqm, increasing by 1.66% q-o-q.

The Bay Area is still foreseeing a huge amount of upcoming office supply in the coming years. Developers still recognize the opportunity to invest in the area due to its accessibility and availability of developable land. Approximately, 578,800 sqm of office developments are anticipated to be introduced in the market for the next five years, while 258,000 sqm are expected to become operational by the end of 2021.

Ortigas Center



Vacancy levels in Ortigas Center gradually eased to 12.75% in contrast to 12.88% of the preceding quarter. Despite this, pre-terminated contracts and non-renewals were still observed, as most of the companies are still on a wait-and-see approach towards the office market. Meanwhile, the slow-moving leasing transaction was also felt in the district as the rental rates went down to PHP 806.29 per sqm, contracting by 1.15% q-o-q and still considered the lowest as compared to other major CBDs in the metropolis.

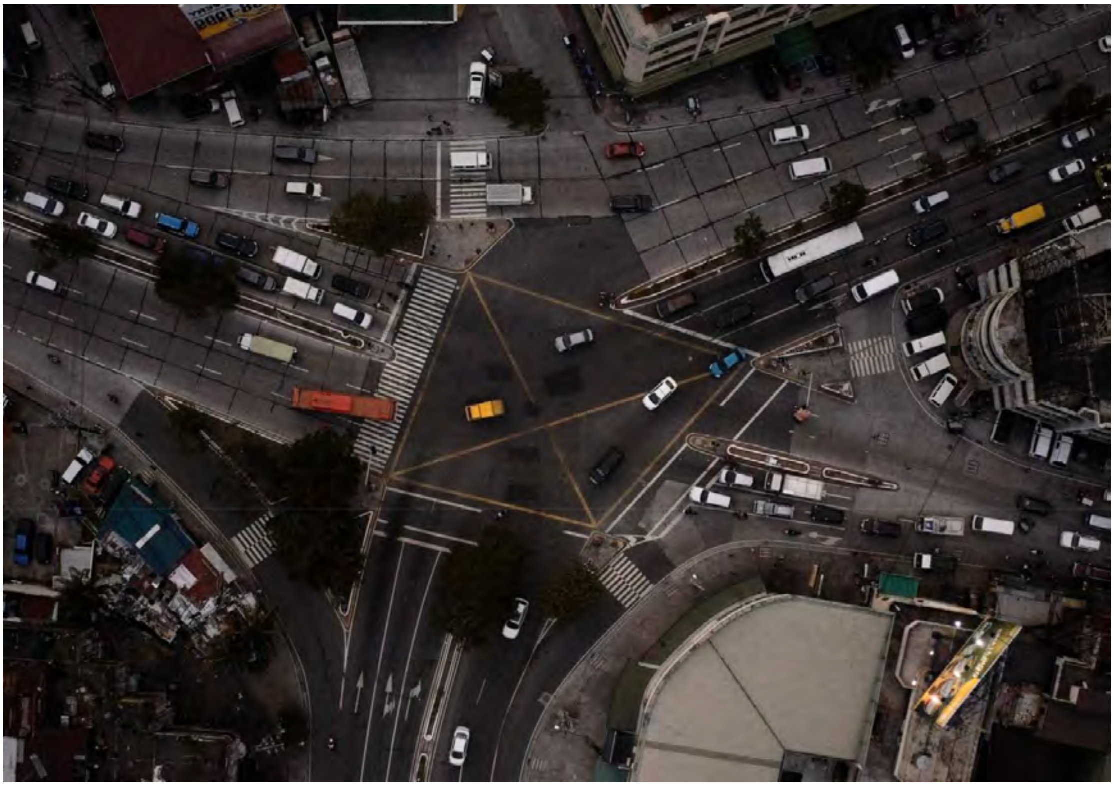
Moreover, the upcoming office supply in Ortigas Center remained high as more than 671,000 sqm of Prime and Grade A office spaces are slated to introduce in the next five years. In addition, the massive influx of 373,000 sqm of space is scheduled to commence their operations within the year such as Cyber Omega, SM Mega Tower, and Jollibee Tower. This includes the spillover from 2019 up to the remaining quarters of 2020 that has been halted due to subsequent lockdowns.

Quezon City

Vacancy rates in Quezon City spiked up to 20.64% as opposed to 16.21% of the preceding quarter, indicating the highest level across all of Metro Manila. Approximately 13,690 sqm of office spaces were freed up in the city during the quarter. Occupiers in the area were more sensitive to the health crisis as compared to locators in other districts The lack of recognized established business districts and limited connectivity of certain townships contributed to the slow demand in the area. Furthermore, the upsurge in vacancy levels was also driven by the opening of SM North Towers 1 and 2 that added more than 45,200 sqm in the massive office supply in Quezon City, and are yet to lease out the majority of their spaces.

Office landlords are trying to alleviate this downtrend and are still vying to mitigate lease terminations. To this end, average headline rates contracted to PHP 925.55 per sqm, translating to a 1.81% decline from the preceding quarter.

Albeit the fast-growing vacancy levels, Quezon City is still expecting a large office supply boost in the coming years. Approximately, 333,700 sqm is anticipated to be introduced in the market in the next five years, in which more than 149,000 sqm will be coming from SM Prime Holdings.



Alabang

Similarly, Alabang CBD experienced rising vacancy levels in Q1 2021 at 16.07% from 14.53% in the preceding quarter. As a result, increased pressures on office landlords in the district were felt as they remain responsive to the slow movement in the office market. This caused rental rates to gradually contract to PHP 846.76 per sqm.

Alabang still holds on to the possibility of becoming one of the major investment hubs in the metropolis due to its vast developable land. Approximately 209,900 sqm of upcoming Grade A office space is anticipated to be operational in the next five years, while 13,800 sqm is slated to become operational by 2021.

Figure 2. Metro Manila Lease & Vacancy Rates per CBD

Source: Santos Knight Frank Research

Office Outlook

The easing quarantine measures that started in the second half of 2020 allowed the developers to restart their impeded construction activities. Developers remain bullish in expanding their office footprint in Metro Manila with more than 3 million sqm of office space are slated to operate in the next five years. The nation's economic center is also set to have an additional supply of 1.1 million sqm of Prime and Grade A office space by the end of 2021. This massive influx still stems from the construction backlogs from the developers in 2020.

The robust expansion of office supply in Metro Manila is seen to further propel the vacancy rates in the local office market in the coming quarters. Along with the stagnant office demand, downward pressure on office rents still expected. Office landlords will be forced to implement more flexible payment terms to existing and potential tenants to market their spaces and continue cash flow from their buildings.

The recovery of the office market is also dependent on the pace of vaccine roll-outs in the country. The slow pace in inoculations is seen to weigh down on the recovery of the market. Attaining herd immunity as soon as possible can reinvigorate the interest in the office market.

In the medium- to long-term Green Buildings are seen to gain a competitive edge compared to ordinary office buildings. Buildings accredited by the US Green Building Council (LEED) and the Philippine Green Building Council (BERDE) will be more sought-after for potential office locators. The efficient design that provides better air circulation, ventilation and filtration, and increased open space, will be more appealing to the market as it puts a premium on the health and well-being of its tenants.

4 Valuation

Methodology

Valuation Rationale

4.1 The purpose of this appraisal is to estimate the Fair Value of the Property. In any given valuation exercise, fair value can be arrived at using either one or a combination of the three (3) approaches to value, namely: Market (or Direct Sales Comparison) Approach, Income Approach, and the Cost Approach. The determination of the appropriate approach for a given property is based on the quality and quantity of data available, particularly its relevance to the Property under appraisement. If more than one valuation approach is utilized, the resulting values are reconciled to produce a final value conclusion.

4.2 Due to the nature of the Property and the purpose of this appraisal, both the Cost Approach and Income Approach to value are deemed the most appropriate to use and the Market (or Direct Sales Comparison) Approach was not used.

Cost Approach

4.3 The Cost Approach generally involves the following steps:

A. The value of the subject land is normally estimated by the Market or Sales Comparison Approach. In instances where the land is covered by a Lease Agreement, the value of the leased fee or leasehold rights on the subject land, whichever is applicable, is instead estimated.

B. The depreciated cost of the subject improvement is estimated by calculating the direct cost of reproducing or replacing the improvement, deducting accrued depreciation from all sources, and adding the indirect costs attributed to the improvement.

Combining the estimates shown above results in the indicated value of the Property by the Cost Approach.

4.4 **On Land (Leasehold)**

As mentioned, the land subject of this appraisal is covered by a Lease Contract. In estimating the value of the Property covered by a lease, two interests are involved: the interest of the lessee which is the leasehold; and the interest of the lessor which is the leased fee or the lessor's interest. The Client being the lessee, the purpose of this appraisal is to establish the leasehold value of the subject land.

Leasehold Value is the present (discounted) worth of the rent savings (or rental gains) when the contract rent at the time of the appraisal is less than the current market rent. It is estimated by computing the present worth of the rental gains over the remaining term of the lease agreement using an appropriate discount rate.

The valuation process, briefly stated, consists of the following:

- Estimation of the current market rent of the leased property;
- Estimation of the rental gains over the remaining term of the lease agreement, if any. Rental gains projection is pegged at 10 years while the 11th year rental gain is used to estimate the terminal value of the Leasehold Rights on the Land;

- Estimation of an appropriate discount rate and terminal capitalization rate; and
- Discounting process based on an appropriate discount rate to arrive at an indicated leasehold value.

Market Rent of the Land

4.5 As mentioned earlier, another purpose of this report is to express an opinion of the Market Rent of the Property if it were to be leased out in accordance with its highest and best use. The amount of annual or monthly rental, which the subject property should command might be estimated by any, or a combination of the following:

1. By Market (Comparison) Approach, in which rentals of similar properties are used a benchmarks; and
2. By Income Approach, in which the value of the Property is first established, and the proper capitalization rate is applied to obtain its rental value.

On the other hand, Market Rent is defined under IVS 2019 as "the estimated amount for which an interest in real property should be leased on the valuation date between a willing lessor and a willing lessee on appropriate lease terms in an arm's length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

It is the rental income that the Property would most likely command in an open market. It is also defined as being the amount at which a willing lessee would pay and a willing Lessor would receive for the use of certain property, neither being under compulsion to transact, and both having reasonable knowledge of all relevant facts.

Market Approach

4.6 We have made a survey of existing ground leases of similar lands in the vicinity of the Property and found scarcity of rental data that may be used for direct comparison purposes.

Income Approach

4.7 In the absence of any comparable rental data, we have estimated the **Market Rent** of the Property by a variation of the Income Approach on the basis of what prudent real estate investors or landowners would be warranted in leasing it in order to realize a fair return on their investment or property, for that matter. Under this approach, the market value of the Property is first established, and the proper capitalization rate is applied to obtain its rental value.

Market Value of the Land

4.8 In valuing the land, we made use of the Market Approach which is the most common technique for valuing land, and is the most preferred method when comparable sales are available. With this method, sales of similar property or parcels of land are analyzed, compared, and adjusted to provide a value indication for the Property being appraised. The comparison process is based on an analysis of the similarity or dissimilarity of the comparables.

4.9 The appraiser gathers data on actual sales as well as listings and identifies the similarities and differences in the data; ranks the data according to their relevance; adjusts the prices of the comparables to account for the dissimilarities with the land being appraised; and forms a conclusion as to the most reasonable and probable market value of the subject property.

4.10 The elements of comparison include property rights, financing terms, conditions of sale (motivation), market conditions (sale date), location, physical characteristics, available utilities, and zoning. The most variable elements of comparison are the site's physical characteristics, which include its size and shape, frontage, topography, location, and view. The units of comparison applied may be hectares or sq.m., or any other unit used in the market.

Evidence of comparable properties

4.11 **Analysis of Comparable Properties Offered for Sale**

In the course of our investigation, we looked at current market listings of comparable properties in the area. The comparable properties selected share the same or similar characteristics as the subject. Whatever information or data we came up with was then analyzed, and comparison made for such factors as size, characteristics of the lot, location, quality, and prospective use. In the Philippines however, property transactions are not officially disclosed, and quite often, actual transaction price is masked by other undisclosed arrangements and different from the figure shown on the sale and purchase agreement. We have therefore made reference to the following data, made our market judgment, and adjusted for the above-mentioned factors:

1. A commercial lot having a total area of 17,690 sq.m. located along A. Rodriguez Avenue, within Barangay Rosario, Pasig City, is currently offered for sale at an asking price of PhP2,653,500,000 or an average of PhP150,000 per sq.m.
   Source: Ms. Flora Bernanro – (0961-177-6868)

2. A commercial lot having a total area of 3,699 sq.m. located along Pasig Boulevard corner Shaw Boulevard, within Barangay Bagong Ilog, Pasig City, is currently offered for sale at an asking price of PhP665,820,000 or an average of PhP180,000 per sq.m.
   Source: Bahaypinas Realty Company (Cel. No. 0917-848-1224)

3. A commercial lot having a total area of 1,150 sq.m. with an old building, located along Bonny Serrano Avenue (Santolan Road), within Barangay Socorro, Quezon City, is currently offered for sale at an asking price of PhP250,000,000 or an average of PhP217,391 per sq.m.
   Source: Richard Aguiluz (Cel. No. 09298419074)

Summary of Adjustments

The Data Comparison Grid shown on Appendix **10** shows a summary of the aforementioned adjustments, which provides an indication as to the degree of adjustment made to the different elements in comparison. A numeric indicator indicates the level of adjustments, in terms of percentage when compared with the subject property. The use of (-) indicates a negative adjustment and a + indicates a positive adjustment. A downward adjustment (-) used is made to reflect superior characteristics of the comparable sale/listing, while an upward adjustment + reflects inferior characteristics of the comparable sale/listing. Finally, a 0 is used to confirm similarity between the comparable sales/listings and the subject or is used when market information is unavailable or does not support an adjustment for any particular element of comparison.

Value of the Land 4.12 As reflected in the said Comparison Grid, the value of the land is estimated at **PhP187,000 per sq.m.**, or a total of **PhP1,273,000,000** for a land area of **6,808 sq.m.**

Rate of Return 4.13 The value of the land having been established, its rental value may now be estimated considering the prevailing rate of return prudent investors or landowners would expect in ground leases, normally in the range of 4% to 7%. We based this range of rate of return from interviews with land owners and brokers, as well as our analysis of the relationship between prevailing capital values and rental rates and it is believed to be the current yield in the commercial land lease market.

Considering the most recent pandemic and the effect it had on the economy and the leasing market, we have not adopted the average rate of return, and have instead adopted a conservative interest rate (return on investment) of 4%.

In light of the foregoing, our estimate of the Market Rent of the Property is as follows:

Land Value	PhP	1,273,000,000
Interest on Land Value		
PhP1,273,000,000 @ 4%	PhP	50,920,000
	Total PhP	**50,920,000 per year**
	Or PhP	**4,243,330 per month**

Market Rent of the Land 4.14 On the basis of the foregoing, the Market Rent of the land is estimated at **PhP623.29 per sq. m. per month**, or a total of **PhP4,243,330 per month**, or say, **PhP50,920,000 per annum** for the subject land area of **6,808 sq. m.**

Rental Gain 4.15 Rental Gain is reckoned as the difference between the Market Rent and the Contract Rent.

Discount Rate 4.16 The discount rate was computed using the build-up method. The discount rate is calculated by adding together different variables. The variables that were used to generate it consist of a risk-free rate and a reasonable risk premium. Based on the foregoing, discount rate is estimated at 7.1665%, or say, 7.20% (10-year T-bond rate at about 3.9165% (from Philippine Dealing & Exchange Corporation (PDEx) as of 30 June 2021) plus 3% equity risk premium from OECD and

additional 0.25% risk premium for unidentifiable risk factors which include the uncertainty brought about by the Covid-19 global pandemic.).

4.17 For purposes of this valuation, we have adopted, as risk-free rate, the 10-year T-bond rate from PDEx. The Philippine Dealing & Exchange (PDEx) system appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEx. The PHP BVAL Reference Rate dated 30 June 2021 was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

4.18 We have adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3%. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits
Valid as of: **25 June 2021**

Capitalization Rate 4.19 Capitalization rate adopted to arrive at the terminal value is 4.2% (Discount Rate less Projected Long-term Growth Rate (3.0%). The long-term growth rate is based on a growth forecast of the prevailing commercial market over the forecast period.

This is based on what the Property is perceived to achieve in the long-term considering the present situation of the market.

Remaining Life of the Lease 4.20 Remaining life of the lease as of the date of valuation is 99 years.

Summary of Leasehold Assumptions 4.21 In summary, below are the assumptions/statistics used in determining the leasehold value of the subject land.

EXXA - ZETA TOWER			
Lease Details			
Lot Area	:	6,808.00	sq.m.
Term of Lease	:	99	years
Assumed Commencement Date	:	01-Oct-21	
Lease Rate	:	7%	of net leasing revenue
Market Rent (in PhP)			
Monthly Rent	:	623.29	/sq.m./ month
Annual Rent	:	50,920,000	
Annual Escalation	:	3%	starting Y2
Discount Rate			
Risk Free Rate		3.92	as of June 30, 2021 (BVAL PDEX)
Risk Premium		3.00	as of June 25, 2021 (OECD)
Additional Risk		0.25	risk premium for unidentifiable risk factors
		7.17	
Resulting Discount Rate, say		7.20%	
Terminal Capitalization Rate		4.20%	

Leasehold Value 4.22 On the basis of the foregoing, the leasehold value of the subject land may reasonably be estimated at **PhP236,000,000**.

We attach a copy of our valuation calculations at Appendix **7**.

4.23 **On Leasehold Improvements and Machinery & Equipment**

The estimate of the leasehold improvements can be either replacement or reproduction cost, new. Replacement Cost, New is defined as "The cost of construction, at current prices, of a building having utility equivalent to the building being appraised but built with modern materials and according to current standards, design, and layout." On the other hand, Reproduction Cost, New is defined as "The cost of construction, at current prices, of an exact duplicate, or replica, using the same materials, construction standards, design, layout, and quality of workmanship, and embodying all the deficiencies, super-adequacies, and obsolescence of the subject building."

In estimating the Replacement Cost of the buildings and improvements, we have made reference to the building cost index or other building cost as available in the market or published by a reputable quantity surveyor firm. We have likewise referred to our own database of building construction costs. We do not hold ourselves to be construction cost advisers and a formal estimate can only be given by a specialist construction cost consultant. It is recommended that a professional quantity surveyor or a firm of professional quantity surveyors should be consulted in order to assess an accurate building/improvement replacement cost.

In arriving at our assessment using the Cost Approach for the Equipment, we first developed the Replacement Cost, New (“RCN”) of the asset. In developing our RCN, we have obtained current cost information from equipment dealers in the region. We relied on data furnished by equipment manufacturers, dealers and importers, as well as information contained in price catalogues, other published materials including the Internet and inquiries from local suppliers

RCN is the estimated amount of money needed to acquire a similar new item having the nearest equivalent utility as the Property being valued taking into consideration current prices of materials and manufactured equipment, shipping and handling, labour, contractor's overhead, design and supervision, profit and fees, and other attendant costs associated with its acquisition and installation, but without provision for overtime or bonuses for labour and premium for materials.

Having developed the RCN, we then deducted for the various elements of depreciation to arrive at the Depreciated Replacement Cost (“DRC”). DRC includes depreciation allowance or loss of value arising from condition, utility, age, wear and tear, and obsolescence present (physical, functional or economic), taking into consideration past and present maintenance policy and rebuilding history.

General
Where elements are of foreign origin, the assessment process give full consideration to all expenditures normally incurred in importation such as packing and crating charges, inland and ocean freight, insurance, duties and taxes, bank charges and commissions, wharfage, brokerage and handling

In estimating the depreciation of the assets, we have utilized the age-life method tempered with our observed condition of the assets. The remaining lease period was likewise considered in arriving at the value of the leasehold improvements.

Appendix **12** contains the Schedule of Assets describing in detail these assets.

Income Approach

Definition 4.24 The Income Approach is applicable to the valuation of income producing properties, business enterprise as well as the valuation of intangible assets. This approach measures the current value of an asset by calculating the present value of its future economic benefits by discounting expected cash

flows at a rate of return that compensates the risks associated with the particular investment.

For this particular engagement, we have applied both the Discounted Cash Flow Analysis and the Direct Capitalization Method.

Discounted Cash Flow Analysis

4.25 The discounted cash flows, or DCF valuation is the most popular fundamental approach in valuing the future economic benefits of a projected income stream. DCF measures actual yield rather than paper income for the asset/business owner and the analysis of DCF is widespread and mandatory in the various fields of business making DCF-based valuation ideal.

4.26 The valuation process, briefly stated, consists of the following:

- Estimation of the revenues generated;
- Estimation of the costs and expenses related to the operations of the development;
- Estimation of an appropriate discount rate;
- Discounting process using an appropriate discount rate to arrive at an indicative market value; and
- Estimation of the Terminal Value of the Property.

Discount Rate

4.27 The discount rate was computed using the build-up method - calculated by adding together the different variables. The basic formula for the traditional build-up model is:

Discount Rate = Rf + P + MR + LR

Where	Variable	Proxy Statistic
Rf	Risk Free Rate	PDEX Risk Free Rate
P	Equity Risk Premium	Country Risk
MR	Management Risk	
LR	Liquidity Risk	

The variables that were used to generate the Discount Rate are exhibited in the table below, along with the sources and/or dates as at or nearest the 30 June 2021 valuation date.

Risk Free Rate (10Y)	3.92%	As of 30 June 2021, BVAL PDEX
Equity Risk Premium	3.25%	As of 25 June 2021, OECD
Management Risk	0.80%	
Liquidity Risk	0.90%	

4.28 The following assumptions were used to arrive at the Discount Rate using the Build-Up Method.

Risk Free Rate

4.29 For the purposes of this valuation, we adopted the 10-year bond rate sourced from Philippine Dealing & Exchange Corporation (PDEX)as of 30 June 2021 - the valuation date (image shown below). The Philippine Dealing Exchange (PDEx) system has recently appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEX. The PHP BVAL Reference Rate was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

Equity Risk Premium

4.30 We used an equity risk premium of 3.25%. We adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3% plus an additional 0.25% risk premium for unidentifiable risk factors. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors. Shown below is an excerpt of said table.

Management & Liquidity Risk

4.31 The Management Risk refers to the estimated premium to compensate for the burden of management, while the Liquidity Risk refers to the ease (or the difficulty) with which an investment can be sold or made. A review was done and we have arrived at the following: Management Risk was classified into four categories, with the corresponding rates: Poor – 1.2; Average – 1.0; Above Average - 0.90 and Excellent - 0.80 while Liquidity Risk has three (3) categories: Poor –1.2; Average – 1.0; and Good – 0.90. After the said review, we deemed it appropriate to use 0.80% for Management Risk and 0.90% for Liquidity Risk.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits
Valid as of: **25 June 2021**

			Classification

Resulting Discount Rate 4.32 Resulting Discount Rate used for this valuation is 8.87%, or say, 9.0%.

Capitalization Rate 4.33 A discount rate is used to calculate the present value of future projections of a benefit stream when growth varies from year to year. However, if growth is estimated to remain level throughout the life of the investment, a capitalization rate is often used. In its most basic form, the relationship between discount rate and a capitalization rate can be summarized as follows:

Capitalization Rate = Discount Rate – Growth

For purposes of this valuation, a long-term growth rate of 4.5% has been assumed. This is based on what the Property is perceived to achieve in the long-term considering the present situation of the market. Using this assumption, resulting Capitalization Rate would be 4.5%.

Key Financial Assumptions 4.34 We relied on the historical and projected assumptions brought about by our research and as provided by the Client. These financials were analysed to ensure reasonableness by comparing projected revenue growth rates and other operating expenses based on historical performance. Based on interviews with the representatives of the company, projections were prepared to reflect the current and expected future market conditions.

a. **Revenues**

i. Cashflow projection starts in 01 July 2021 and runs for a period of 10 years.

ii. The revenues come from the rental of retail units, office units and parking slots. In estimating the annual rents of the subject units/slots, we have adopted the contract rents as appearing in the copy of the rent roll provided to us by the Client for the occupied units/leased parking slots. After the expiration of lease, lease rates then are aligned with market rates and are assumed to have an average of 4-year lease contracts. Aside from the monthly rentals from leasable areas, revenues likewise include Management and Aircon Dues which are likewise charged to the tenants monthly on a per sq.m. basis. Management dues are for common and/ or shared utilities, facilities and services. These are inclusive of air-conditioning equipment rental during office hours (but exclusive of power consumption).

iii. It would be important to note that as the building administrators, they collect the said dues as a cost recovery mechanism for all expenses related to the day to day operations of the building and its common areas.

iv. Occupancy assumptions were based on the actual performance of the Property as well as the prevailing trend in the subject area taking into consideration the forecasted effect of the global pandemic in the office market. Occupancy of the Property as of valuation date is at 98% while the historical average performance of the Property for the last two years is at 95%. Occupancy rate includes committed leases. For this valuation exercise, we are assuming an average overall vacancy allowance of 5%. We have further assumed a vacancy allowance for the whole cashflow period to account for unanticipated vacancies brought about by early terminations and non-renewals, and rental concession requests from tenants.

v. We used actual escalation rates indicated in the rent roll for all existing leases up until their lease expires. After which, an average escalation of 5% was then be applied year on year until the end of the cash flow.

b. **Cost & Expenses**

i. Operating Expenses which would include administrative and utility expenses are normally charged against the Common Use Service Area (CUSA) Fees or Association Dues being collected monthly to the individual tenants. However, there are instances when CUSA funds are insufficient to pay off all common charges. If and when this happens, the owners/administrators would have to pay off these expenses and this has been taken into consideration in the projections.

ii. Operating Costs and Expenses are assumed to be an average of approximately 17% of the Total Net Revenues. Operating costs and expenses included are basically divided in to two – real estate expense and general administrative expenses. Real Estate expenses are as follows: contracted services, repairs & maintenance, management fee and loss from CUSA and miscellaneous expenses. While under General Administrative Expense are – salaries & wages, taxes and licenses, advertising & promotions, commission, insurance, communication, rent expense, supplies, travel & transportation, and representation & entertainment expenses.

These expenses are projected either as a percentage of the rental revenues or the total net revenues. These percentage allocations were from the historical and projected performance of the Property.

iii. Annual Capital Expenditures (CAPEX) for the entire cashflow period, on the other hand, was assumed to be 1.5% of the Net Leasing Revenues. This assumption is based on benchmarking and analysis of current market practice in allocating CAPEX reserve.

This allocation would help ensure that the Property would operate efficiently and maintain its good and sound condition.

Resulting Market Value

a. Earnings Before Income Tax, Depreciation and Amortization (EBITDA) for the whole duration of the cashflow shall be discounted at the derived Discount Rate of 9.00%.

b. The sum of discounted cashflows including the Terminal Value of the Property represents the Market Value of the Property.

The Terminal Value of the Property is the value of the property beyond the explicit forecast period. It is assumed that the property or business will continue to generate cashflows in perpetuity. As mentioned earlier, Terminal Capitalization Rate used is 4.5%.

The Discounted Cashflow showing the estimated Market Value of the subject property is attached as Appendix **8**.

Direct Capitalization Method 4.33 The Direct Capitalization Method is a real estate valuation method that helps convert a single year's income into value by dividing the Net Operating Income with an appropriate Capitalization Rate. This method assumes that the Property has a stabilized net operating income. All parameters of a typical investor return expectations are represented either explicitly or implicitly in either income forecast or the capitalization rate. The direct capitalization rate, as the ratio of income to value, serves as a proxy for investor return assumptions.

Resulting Market Value 4.34 We made use of the single year's cashflow projection (2022) to derive the Market Value using the Direct Capitalization Method. Capitalization rate adopted to arrive at the Property Market Value is 4.5%.

Valuation basis

Market Value 4.35 Market Value is defined in the 2019 **International Valuation Standards** as: "The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

Valuation date

Valuation date 4.36 The valuation date is **30 June 2021**.

General Assumptions

Assumptions 4.37 Our valuation is necessarily based on a number of assumptions which have been drawn to your attention in our General Terms of Business, Letter of Engagement and within this report.

Key Assumptions 4.38 Whilst we have not provided a summary of all these assumptions here, we would in particular draw your attention to a key assumption that we relied on a very considerable extent on the information provided by the Client and have assumed that documents provided to us such as gross floor area tabulation, floor plans, building tenancies and other relevant matters are factual. We were also advised by the Client that no material facts have been omitted from the information provided.

Special Assumption 4.39 We were instructed to re-value the Property without a re-inspection. We have, thus, considered changes to the physical attributes and/or characteristics of the

Property which have occurred between the valuation date and the date of our previous valuation as confirmed by the Client. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.

4.40 We have adopted the floor area details provided to us by the Client and have assumed these to be accurate.

4.41 Our valuation of Machinery & Equipment has also undertaken the following special assumptions:

We have not carried out a full mechanical survey, or structural test, nor have inspected the machinery and equipment, which are covered, unexposed or inaccessible. Our assessment is based on the premised that the items are in a condition commensurate with age and usage.

Machinery & Equipment associated with the supply of services to the building such as Elevators, Air Conditioning Systems are valued on the assumption that they are permanently installed or attached to the building.

4.42 In applying Income Approach to value, we have considerably relied on the information provided to us by the Client which includes the following: lease contracts, revenue and expense projections, historical and projected occupancies. Upon expiration of contracts, we estimated the lease rates based on the acceptable escalations in the market.

4.43 Given the 99-year leasehold, we assumed that the Property is comparable to a freehold property given the duration of the leasehold interest on the land. Thus, a terminal value of the Property was computed at the end of the cashflow.

Valuation Results

Using Cost Approach

4.44 Using the **<u>Cost Approach</u>,** the Market Value of the Property, may be summarized as under

Land (Leasehold Value)	**PhP236,000,000**
Building	**3,293,000,000**
Building Machinery & Equipment	**832,430,000**

	PhP4,361,430,000
	=============
	PhP4,361,000,000
	=============

4.45 The Market Value of the Property is estimated at **PhP4,361,000,000 (FOUR BILLION, THREE HUNDRED SIXTY-ONE MILLION PHILIPPINE PESOS)**.

Using Income Approach	4.46	Using the **<u>Income Approach</u>** on the other hand, the Market Value of the Property is estimated as follows:

DCF Analysis	**PhP11,867,000,000**
Direct Capitalization Method	**PhP13,786,000,000**

Calculation	4.47	We attach a copy of our valuation calculations for the Income Approach at Appendix **8 & 9**.
Comments	4.48	The values arrived at using the Income Approach are noted to be higher than the value arrived at using the Cost Approach. This is because, unlike the Income Approach, the Cost Approach does not capture the income potential of the Property.
	4.49	For purposes of this valuation, we deemed it appropriate to adopt the results arrived at by the Income Approach – DCF Analysis, since this method is usually used to determine the value of an income-generating property, as it also captures the Property's future economic benefits, giving a better representation of the Property's Market Value at an acceptable rate of return that would compensate for the risks associated with the particular investment. It likewise takes into consideration market cycles that Direct Capitalization Method cannot capture.
Conclusion of Value	4.50	In conclusion, we are of the opinion that the Market Value of the Property, reckoned as of **30 June 2021**, is:

PhP11,867,000,000 (ELEVEN BILLION, EIGHT HUNDRED SIXTY-SEVEN MILLION PHILIPPINE PESOS)

***Note**: The outbreak of the Novel Coronavirus (COVID-19), declared by the World Health Organization as a "Global Pandemic" on 11th March 2020, has impacted global financial markets. Travel restrictions have been implemented by many countries. In the Philippines, market activity is being impacted in all sectors. As at the valuation date, we consider that we can attach less weight to previous market evidence for comparison purposes, to inform opinions of value. Indeed, the current response to COVID-19 means that we are faced with an unprecedented set of circumstances on which to base a judgement. Our valuation is therefore reported on the basis of "material valuation uncertainty" per IVS 103 of the International Valuation Standards. Consequently, less certainty – and a higher degree of caution – should be attached to our valuation than would normally be the case. Given the unknown future impact that COVID-19 might have on the real estate market, we recommend that you keep the valuation of this property under frequent review.*

Value forwarded ………………………………..PhP11,867,000,000

Appendix 1 - Assumptions, Limiting Conditions and Disclaimers

Basis of Value	Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion." In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property. It is further assumed that title to the property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable. The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.
Property Rights appraised	The rights appraised in this report are the property rights in fee simple, free and clear. "Fee simple" is defined as absolute ownership, without limitations to any particular class of heirs or restrictions, but subject to the limitations of eminent domain, escheat, police power and taxation. We assume that the fee simple interest is marketable and in compliance with the applicable laws of the Philippines.
Fractional Interests:	When the study contains a valuation relating to an estate in land that is less than the whole fee simple estate, the value reported for such estate relates to a fractional interest only in the real estate involved, and the value of this fractional interest plus the value of all other fractional interests may or may not equal the value of the entire fee simple estate which is considered the whole. When the valuation report contains an allocation of the total valuation between land and building improvements, such allocation applies only under the existing program of utilization. The separate valuations for land and building cannot be used in conjunction with any other valuation/appraisal and will be invalid if so used.
Assumptions:	The valuation is based on the condition of the economy and the purchasing power of the Philippine Peso as of the effective date of valuation. We have assumed that the floor areas provided us have been calculated in accordance with engineering standards, and assumed herein to be true and correct. Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.
Information Supplied By Others	Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser. Information provided by informed local sources, such as government agencies, financial institutions, Realtors, buyers, seller and others, was weighed in the light in which it was supplied and checked by secondary means; however, no responsibility is assumed for possible misinformation.
Legal Issues:	This valuation assumes no responsibility for the validity of legal matters affecting the property. The ownership history reported in this valuation is based on the appraiser's research of public records, which are assumed to be accurate and complete. It is not the intent of the valuation to offer a legal opinion of title. It is further assumed that the property has good title, responsible ownership and competent management. Any liens or encumbrances which may now exist have been disregarded. The appraiser is not required to give testimony or attendance in court by reason of this valuation, with reference to the property in question, unless arrangements have been previously made.
Liability:	The liability of Santos Knight Frank, Inc. and its directors and employees is limited to the addressee of this report only. No accountability, obligation or liability to any third party is accepted. In the event we are subject to any liability in connection with this engagement, regardless of legal theory advanced, such liability will be limited to the amount of fees we received for this engagement.
Environmental Conditions:	It is assumed that there is full compliance with all applicable Philippine environmental regulations and laws unless non-compliance is stated, defined, and considered in this appraisal report.
Town Planning:	It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.
Condition of Improvements:	We have inspected the improvements and structures. However we have not carried out a structural survey nor tested any of the services or facilities, nor have we inspected unexposed or inaccessible portions of the building, and are therefore unable to state that these are free from defect, rot, infestation, asbestos or other hazardous material. We have therefore, viewed the general state of repair of the property and advise that we did not notice any obvious signs of structural defect or dilapidations. Furthermore, the property appears to be in reasonable condition having regard to its age and use and unless otherwise stated. We also assume that the building complies with all relevant statutory requirements in respect of matters such as sanitary, building and fire safety regulations and standards.
Valuation Methodology:	Santos Knight Frank uses any one or a combination of the Market Data Approach, the Cost Approach, and the Income Capitalization Approach. Each methodology begins with a set of assumptions. The result is the best estimate of value Santos Knight Frank can produce, but it is an estimate and not a prediction or guarantee and it is fully dependent upon the accuracy of the assumptions as to income, expense and market conditions. These primary methodologies use market derived assumptions, including rents, yields and discount rates, obtained from analyzed transactions. We do not represent ourselves as experts for data, such as economic, demographic or construction costs, which has been obtained from external sources.
Others:	This report and valuation shall be used only in its entirety and no part shall be used without the whole report. It may not be used for any purpose other than the intended purpose mentioned herein. Possession of this report or any copy thereof does not carry with it the right of copying or publication. All copies will originate from Santos Knight Frank, Inc. and will be signed and dated as such. Neither the whole nor any part of the report or any reference to our name, our valuation and our report may be included in any document, circular or statement nor published without our prior written consent to the form and context in which it may appear. The delivery and acceptance of this report completes this assignment.

ROBINSONS LAND CORPORATION
43rd Floor, Robinsons Equitable Tower
ADB Avenue corner Poveda Street
Ortigas Center, Pasig City

Attention: **MR. FREDERICK D. GO**
President and Chief Executive Officer

Subject: **Terms of Engagement for Valuation Services**

Dear Mr. Go:

Thank you for your interest in our Valuation Services. We refer to your invitation of 03 August 2020 requesting Santos Knight Frank, Inc. ("SKF") to submit a proposal for valuation (the "Valuation") in respect of the properties detailed below (the "Properties").

This proposal, together with our General Terms of Business for Valuation Services ("General Terms"), sets out our terms of engagement for carrying out this instruction. Once agreed and signed, this proposal shall constitute our Letter of Engagement ("Letter"). This Letter and the General Terms (together, the "Agreement") exclude any other terms which are not specifically agreed to us in writing. To the extent that there is any inconsistency between the Letter and the General Terms, this Letter shall take precedence.

1. Client

Our Client for this Valuation is Robinsons Land Corporation (the "Client", "you" or "your").

2. Purpose of Valuation

The Valuation is provided solely the purpose of transferring some of the Client's assets to the REIT Company and its application for a Tax-Free Exchange Ruling with the Bureau of Internal Revenue and listing of the REIT Company in the Philippine Stock Exchange (the "Transaction"). Specifically, the Valuation will be used for the Client's Financial Statements to be attached to the Offering Circular as required by the Securities and Exchange Commission (SEC) and will be attached as an appendix to the Client's REIT Plan. In accordance with clause 4.1 of our General Terms, the Valuation may not be used for any other purpose without our express written consent. The Valuation will be made accessible in the public domain as part of the regulatory requirements of the Transaction.

3. Term & Termination

This appointment will commence upon signing of this Agreement and shall continue to be in effect for a period of two (2) years. Any extension of the Term of this Agreement shall be mutually agreed upon by the parties in writing.

23. Electronic Communication

During the engagement, both parties may wish to communicate electronically with each other. However, electronic transmission of information cannot be guaranteed to be secure or virus-or error-free and information could be intercepted, corrupted, lost or destroyed, arrive late or incomplete, or otherwise be adversely affected or unsafe to use. Both parties agree to accept these risks and so each party will be responsible for protecting its own systems and interests in relation to electronic communications. Neither party will have any liability to the other party on any basis for any loss or damage arising from or in connection with the electronic communication of information between both parties or their reliance on such information.

24. Acceptance

Please sign and return a copy of this Letter signifying your acceptance of the terms of the Agreement. We reserve the right to withhold any Valuation and / or refrain from discussing it with you until this Letter has been countersigned and returned.

Your attention is drawn to the "Important Notice" in the General Terms. If you have any questions regarding this Letter and / or the terms of the Agreement, please let us know before signing this Letter.

Thank you for choosing Santos Knight Frank, Inc. and we look forward to working with you on this important engagement.

Sincerely,
SANTOS KNIGHT FRANK, INC.

ROBINSONS LAND CORPORATION
43rd Floor, Robinsons Equitable Tower
ADB Avenue corner Poveda Street
Ortigas Center, Pasig City

Attention: **MR. FREDERICK D. GO**
President and Chief Executive Officer

Subject: **Amendment to Terms of Engagement and General Terms of Business for Valuation Services Dated 03 August 2020 ("Amendment")**

Dear Mr. Go:

We refer to subject Letter of Engagement and General Terms of Business for Valuation Services (together, the "Agreement") between Robinsons Land Corporation (the "Client", "you" or "your") and Santos Knight Frank, Inc. ("SKF") for the valuation of fourteen (14) office buildings (the "Covered Properties").

For this purpose, the Agreement is amended as follows:

The first, second, and third and fourth paragraphs shall now read:

For the Valuation

I. Valuation for Asset Transfer to REIT Company and its application for a Tax-Free Exchange Ruling:

For Valuation Update

II. Valuation of Properties for REIT listing to PSE:

Our Valuation of 14 Properties will be as follows:

1. Valuation for 4 Properties
2. Periodic Update of 14 Properties
   Under REIT Company (Quarterly basis – optional)
3. Valuation Update of 14 Properties under REIT Company

Except as amended hereby, all the provisions of the Agreement which are not inconsistent herewith are incorporated herein by way of reference and from date hereof, the Agreement and this Amendment shall be read as one integrated document.

Kindly affix your signature on the conforme portion below and return one (1) original signed copy to us.

Sincerely,
SANTOS KNIGHT FRANK, INC.

Appendix 3 - General Terms of Business

General Terms of Business for Valuation Services

These General Terms of Business (the "**General Terms**") and our Letter of Engagement (the "**Letter**"), together form the agreement between you and us (the "**Agreement**"). References to "**you**", "**your**" etc. are to persons or entities who are our client and, without prejudice to clauses 3 and 4 below, to any persons purporting to rely on our Valuation.

Unless **the** context otherwise requires, all other terms and expressions used but not defined herein shall have the meaning ascribed to them in the Letter.

When used herein or in the Letter, the term "**Valuation**" shall mean any valuation report, advance report, supplementary report or subsequent/update report, produced pursuant to our engagement and any other replies or information we produce in respect of any such report and/or any relevant property. Any words following the terms "**including**", "**in particular**" or any similar expression shall be construed as illustrative and shall not limit the sense of the words preceding those terms.

All of the terms set out in these General Terms shall survive termination of the Agreement.

1. Santos Knight Frank, Inc.

1.1. Santos Knight Frank, Inc. ("**Santos Knight Frank**", "**our**", "**us**", "**we**") is a Philippine corporation with Securities and Exchange Commission (SEC) Registration Number A199818549.

1.2. Our registered office is at 10/F Ayala Tower & Exchange Plaza, Ayala Avenue, Makati City where a list of members may be inspected.

1.3. Any representative of Santos Knight Frank, Inc. described as *Director* is either a member or an employee of Santos Knight Frank, Inc. and is not a member of the Board of Directors. The term *Director* has been retained because it is an accepted way of referring to senior professionals. The term "**Santos Knight Frank Person**" shall, when used herein, mean any member, employee, or consultant of Santos Knight Frank, Inc.

1.4. Our Tax Identification Number (TIN) is 201-626-570-000.

1.5. The details of our professional indemnity insurance will be provided to you on request.

1.6. Santos Knight Frank, Inc., being a corporation, is regulated by the Philippine Securities and Exchange Commission (SEC). It is also an SEC-accredited asset valuer. In accordance with reportorial filings with the SEC, it may be necessary to disclose valuation files to them. By instructing us, you give us your permission to do so. Where possible we will give you prior notice before making any such disclosure, although, this may not always be possible. We will use reasonable endeavours to limit the scope of any such disclosure and to ensure any disclosed documents are kept confidential.

1.7. Valuations will be carried out in accordance with the 2019 edition of the International Valuation Standards (IVS) by valuers who conform to its requirements and with regard to relevant statutes or regulations. Our senior valuers are Real Estate Appraisers licensed and regulated by the Philippine Professional Regulation Commission (PRC).

2. Governing law and jurisdiction

2.1. The Agreement and any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with it or its subject matter or formation or any Valuation shall be governed by and construed in accordance with Philippine laws.

2.2. Philippine courts shall have exclusive jurisdiction to settle any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with this Agreement or its subject matter or formation or any Valuation. This will apply wherever the relevant property or the client, or any relevant third party, is located or the service is provided.

3. Limitations on liability

3.1. Subject to clause 3.7, our maximum total liability in connection with or arising out of this Agreement and/or its subject matter and/or the Valuation is limited to our total service fees as set out in the Letter.

3.2. Subject to clause 3.7, we will not be liable for any loss of profits or for indirect or consequential loss or damages.

3.3. Subject to clause 3.7, any limitation on our liability will apply however such liability is or would otherwise have been incurred, whether in contract, tort (including negligence), for breach of statutory duty, or otherwise.

3.4. Except as set out in clauses 3.5 and 4.7 and 4.8 below, no third party shall have any right to enforce any of the terms of this Agreement.

3.5. No claim arising out of or in connection with this Agreement may be brought against any Santos Knight Frank Person. Those individuals will not have a personal duty of care to you or any other person and any such claim for losses must be brought against Santos Knight Frank, Inc. Any Santos Knight Frank Person may enforce this clause but the terms of this Agreement may be varied by agreement between the client and Santos Knight Frank, Inc. at any time without the need for any Santos Knight Frank Person to consent.

3.6. No claim, action or proceedings arising out of or in connection with the Agreement and/or any Valuation shall be commenced against us after the expiry of the earlier of (a) two years from the Valuation Date (as set out in the relevant Valuation) or (b) any limitation period prescribed by law.

3.7. Whether or not specifically qualified by reference to this clause, nothing in the Agreement shall exclude or limit our liability in respect of fraud, or for death or personal injury caused by our negligence or negligence of those for whom we are responsible, or for any other liability to the extent that such liability may not be so excluded or limited as a matter of applicable law.

4. Purpose, reliance and disclosure

4.1. The Valuation is prepared and provided solely for the stated purposes. Unless expressly agreed by us in writing, it cannot be relied upon, and must not be used, for any other purpose and, subject to clause 3.7, we will not be liable for any such use.

4.2. Without prejudice to clause 4.1 above, the Valuation may only be relied on by our Client. Unless expressly agreed by us in writing the Valuation may not be relied on by any third party and we will not be liable for any such purported reliance.

4.3. Subject to clause 4.4 below and for the stated purposes, the Valuation is confidential to our Client and must not be disclosed, in whole or in part, to any third party without our express written consent (to be granted or withheld in our absolute discretion). No liability is accepted to any third party for the whole or any part of any Valuation disclosed in breach of this clause.

4.4. Our appraisers are not required to give testimony or attendance in court by reason of this Valuation with reference to the property in question, unless arrangements have been previously made.

4.5. Except for the stated purposes, neither the whole nor any part of the Valuation and/or any reference thereto may be included in any published document, circular or statement nor published in any way whatsoever whether in hard copy or electronically (including on any website) without our prior written consent and approval of the form and context in which it may appear.

4.6. Where permission is given for the publication of a Valuation, neither the whole nor any part thereof, nor any reference thereto, may be used in any publication or transaction that may have the effect of exposing us to liability for actual or alleged violations of SEC Memorandum Circular No. 2, series of 2014 (Guidelines on Asset Valuations) or Republic Act No. 8799 (Securities Regulation Code), as amended and its Implementing Rules and Regulations.

4.7. You agree that we, and/or any Santos Knight Frank Person, may be irreparably harmed by any breach of the terms of this clause 4 and that damages may not be an adequate remedy. Accordingly, you agree that we and/or any Santos Knight Frank Person may be entitled to the remedies of injunction or specific performance, or any other equitable relief, for any anticipated or actual breach of this clause 4.

4.8. You agree to indemnify and keep fully indemnified us, and each relevant Santos Knight Frank Person, from and against all liabilities, claims, costs (including legal and professional costs), expenses, damages and losses arising from or in connection with any breach of this clause 4 and/or from the actions or omissions of any person to whom you have disclosed (or otherwise caused to be made available) our Valuation otherwise than in accordance with this clause 4.

5. Knight Frank network

5.1. Santos Knight Frank, Inc. is a member of an international network of independent firms which may use the "Knight Frank" name and/or logos as part of their business name and operate in jurisdictions outside the Philippines (each such firm, an "**Associated Knight Frank Entity**").

5.2. Unless specifically agreed otherwise, in writing, between you and us: (i) no Associated Knight Frank Entity is our agent or has authority to enter into any legal relations and/or binding contracts on our behalf; and (ii) we will not supervise, monitor or be liable for any Associated Knight Frank Entity or for the work or actions or omissions of any Associated Knight Frank Entity, irrespective of whether we introduced the Associated Knight Frank Entity to you.

5.3. You are responsible for entering into your own agreement with any relevant Associated Knight Frank Entity.

5.4. This document has been originally prepared in the English language. If this document has been translated and to the extent there is any ambiguity between the English language version of this document and any translation thereof, the English language version as prepared by us shall take precedence.

6. Severance

If any provision of the Agreement is invalid, illegal or unenforceable, the parties shall negotiate in good faith to amend such provision so that, as amended, it is legal, valid and enforceable and, to the greatest extent possible, achieves the intended commercial result of the original provision. If express agreement regarding the modification or meaning or any provision affected by this clause is not reached, the provision shall be deemed modified to the minimum extent necessary to make it valid, legal and enforceable. If such modification is not possible, the relevant provision shall be deemed deleted. Any modification to or deletion of a provision under this clause shall not affect the validity and enforceability of the rest of this Agreement.

7. Entire agreement

7.1. The Agreement, together with any Valuation produced pursuant to it (the Agreement and such documents together, the "**Contractual Documents**") constitute the entire agreement between you and us and supersedes and extinguishes all previous agreements, promises, assurances, warranties, representations and understandings between you and us, whether written or oral, relating to its subject matter.

7.2. Subject to clause 3.7 above, you agree that in entering into the Agreement you do not rely on, and shall have no remedies in respect of, any statement, representation, assurance or warranty (whether made innocently or negligently) that is not expressly set out in the Contractual Documents. You further agree that you shall have no claim for innocent or negligent misrepresentation based on any statement set out in the Contractual Documents.

7.3. The Letter and these General Terms shall apply to and be incorporated in the contract between us and will prevail over any inconsistent terms or conditions contained or referred to in your communications or publications or which would otherwise be implied. Your standard terms and conditions (if any) shall not govern or be incorporated into the contract between us.

7.4. Subject to clause 3.7 and clause 6, no addition to, variation of, exclusion or attempted exclusion of any of the terms of the Contractual Documents will be valid or binding unless recorded in writing and signed by duly authorised representatives on behalf of the parties.

8. Assignment

8.1. You shall not assign, transfer, mortgage, charge, subcontract, declare a trust over or deal in any other manner with any of the rights and obligations under the Agreement without our prior written consent (such consent to be granted or withheld in our absolute discretion).

9. Force majeure

9.1. Neither party shall be in breach of this Agreement nor liable for delay in performing, or failure to perform, any of its obligations under this Agreement if such delay or failure results from events, circumstances or causeswhich could not be foreseen, or which, though foreseen, were inevitable.

10. Our fees

10.1. Without prejudice to clause 10.3 below, you become liable to pay our fees upon issuance of the Valuation. For the avoidance of doubt, unless expressly agreed otherwise in writing, the payment of our fees is not conditional on any other events or conditions precedent.

10.2. If any invoice remains unpaid after 30 days of the date on which it is presented, we reserve the right to charge interest, calculated daily, from the date when payment was due until payment is made at 3%

10.3. If we should find it necessary to use legal representatives or collection agents to recover monies due, you will be required to pay all costs and disbursements so incurred.

10.4. If an appraisal analysis is ordered and the assignment is cancelled before completion, we reserve the right to receive compensation, by way of damages, in an amount equal to 70% of the total fee for the assignment.

10.5. If you delay the instruction by more than 30 days or materially alter the instruction so that additional work is required at any stage or if

we are instructed to carry out additional work that we consider (in our reasonable opinion) to be either beyond the scope of providing the Valuation or to have been requested after we have finalised our Valuation (including, but not limited to, commenting on reports on title), we will charge additional fees for this work. Such additional fees will be calculated on the basis of a proportion of the total fee by reference to reasonable time and expenses incurred.

10.6. Where we agree to accept payment of our fees from a third party, such fees remain due from you until payment is received by us.

11. Anti-bribery and corruption and Anti-Money Laundering
We agree that throughout the term of our appointment we shall:

(a) comply with all applicable laws, statutes, regulations, and codes relating to anti-bribery and corruption and Anti-Money Laundering laws (the "**Relevant Requirements**");

(b) not engage in any activity, practice or conduct which would constitute an offense;

(c) maintain anti-bribery, anti-corruption, and anti-money laundering policies to comply with the Relevant Requirements and any best practice relating thereto; and

(d) promptly report to you any request or demand for any undue financial or other advantage of any kind in connection with the performance of our services to you.

12. Portfolios
Properties comprising a portfolio, unless specifically agreed with you otherwise, will be valued separately and upon the assumption that the properties have been marketed individually and in an orderly manner.

13. Land Register inspection and searches
We are not required to undertake searches, validations or inspections of any kind for title or price paid information in any publicly available land registry.

14. Title and burdens
We will assume, unless specifically informed and stated otherwise, that each property has good and marketable title and that all documentation is satisfactorily drawn and that there are no unusual outgoings, planning proposals, onerous restrictions or local authority intentions which affect the property, nor any material litigation pending.

15. Disposal costs and liabilities
No allowance is made in our Valuation for expenses of realisation or for taxation which may arise in the event of a disposal and our Valuation is expressed as exclusive of any VAT that may become chargeable. Properties are valued disregarding any mortgages or other charges, including commissions.

16. Sources of information
We rely upon the information provided to us by you, as to details of tenure and tenancies, planning consents and other relevant matters, as summarised in our Valuations. Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser.

17. Identity of property to be valued
We will exercise reasonable care and skill (but will not have an absolute obligation to you) to ensure that the property, identified by the property address in your instructions, is the property inspected by us and contained within our valuation report. If there is ambiguity as to the property address, or the extent of the property to be valued, this should be drawn to our attention in your instructions or immediately upon receipt of our report.

18. Boundaries
Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.

19. Planning, highway and other statutory regulations
19.1. Enquiries of the relevant planning and highways authorities in respect to matters affecting properties, where considered appropriate, are normally only obtained from the corresponding government agency. We can only state whatever current conditions may be. We recommend that formal written enquiries should be undertaken by your lawyers who should also confirm the position with regard to any legal matters referred to in our Valuations.

19.2. It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative, regulatory, or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.

19.3. We assume that the premises comply with all relevant statutory requirements including environmental, building, fire, and sanitation regulations.

20. Property insurance
Our Valuation assumes that each property would, in all respects, be insurable against all identifiable risks.

21. Building areas and age
Where so instructed, areas provided from a quoted source will be relied upon. Any dimensions and areas measured on location or from plan/s are calculated and are quoted to a reasonable approximation, with reference to their source. Where the age of the building is estimated, this is for guidance only.

22. Structural condition
Building, structural and ground condition surveys are detailed investigations of the building, the structure, technical services and ground and soil conditions undertaken by specialist building surveyors or engineers and fall outside the normal scope of a valuation. Since we will not have carried out any of these investigations, we are unable to report that any property is free of any structural fault, rot, infestation or defects of any other nature, including inherent weaknesses due to the use in construction of deleterious materials. We do reflect the contents of any building survey report provided to us in advance, or any defects or items of disrepair of which we are advised or which we note during the course of our ocular inspections but otherwise assume properties to be free from defect.

23. Ground conditions
Unless informed otherwise in writing, we assume there to be no adverse ground or soil conditions and that the load bearing qualities of the sites of each property are sufficient to support the building constructed or to be constructed thereon.

24. Environmental issues

24.1. Investigations into environmental matters by suitably qualified environmental specialists would usually be commissioned by most responsible purchasers or chargees of higher value properties or where there was any reason to suspect contamination or a potential future liability. Furthermore, such investigation would be pursued to the point at which any inherent risk was identified and quantified before a purchase proceeded. Where we are provided with the conclusive results of such investigations, on which we are instructed to rely, these will be reflected in our Valuations with reference to the source and nature of the enquiries. We would endeavour to point out any obvious indications or occurrences known to us of harmful contamination encountered during the course of our valuation enquiries.

24.2. However, we are not environmental specialists and therefore we do not carry out any scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination or any other environmental searches. If we are not provided with the results of appropriate investigations as outlined above and where there is no obvious indication of harmful contamination, our Valuation will be provided on the assumption that the relevant property is unaffected. Where we are informed that contamination is suspected or confirmed, but adequate investigation has not been carried out and made available to us, then the Valuation will be qualified only by reference to it.

25. Minerals, timber, airspace etc.

Unless specifically agreed otherwise in writing and so stated within the main body of the relevant Valuation, we do not value or attempt to value or take into account any potential income stream or other beneficial or detrimental effect or other factor relating to undiscovered or unquantified mineral deposits, timber, airspace, sub-ground space or any other matter which would not be openly known in the market and considered to have value.

26. Legal advice

26.1. We are appointed to provide valuation opinion(s) in accordance with our professional duties as Appraisers. The scope of our service is limited accordingly. The valuation assumes no responsibility for the validity of legal matters affecting the property. It is not the intent of the valuation to offer a legal opinion of title. Any liens or encumbrances which may now exist have been disregarded. We are not qualified legal practitioners and we do not provide legal advice and any statements made by us, or advice given, in a legal context should be construed accordingly.

26.2. Where appropriate we will liaise with your legal advisors. However, we accept no responsibility for any work carried out by them and we will not be liable for anything contained in legal documentation prepared by them.

26.3. Where we consider it is necessary for the provision of the Valuation and/or specifically agree to do so, and any additional fees we require for this work are agreed, we will read legal documents (including leases, licences etc.), however, (save for any comment concerning the impact of our interpretation of such documents on value) our interpretation of such documents cannot be relied upon to be legally correct. Where we do interpret legal documents, we will, for the purposes of providing our Valuation, assume our interpretation to be correct.

27. Loan security

Where instructed to comment on the suitability of property as a loan security we are only able to comment on any inherent property risk. Determination of the degree and adequacy of capital and income cover for loans is the responsibility of the lender having regard to the terms of the loan.

28. Build cost information

In the provision of valuation services we do not hold ourselves out to have expertise in assessing build costs. Where our instruction requires us to have regard to build cost information, for example in the valuation of properties with development potential, we strongly recommend that you supply us with build cost and other relevant information prepared by a suitably qualified construction cost professional, such as a quantity surveyor. The Valuation will be stated to have been arrived at in reliance upon the build cost information supplied to us by you. In the absence of any build cost information supplied to us, we may have regard to published build cost information. Build costs produced using this approach must be assumed to be unreliable or inaccurate; any reliance which can be placed upon our Valuation in these circumstances is severely restricted. Specialist professional advice on the build costs should be sought by you. If you subsequently obtain specialist build cost advice, we recommend that we are instructed to review our Valuation.

29. Reinstatement assessments

A reinstatement assessment for insurance purposes is a specialist service and we recommend that separate instructions are issued for this specific purpose. If an indication is required as a check against the adequacy of existing cover this should be requested and will be so stated in the body of the relevant Valuation. Any indication given is provided for guidance only and must not be relied upon as the basis for insurance cover. In any event, our reinstatement assessment should be compared with the owner's and if there is a material difference, then a full reinstatement valuation should be reconsidered.

30. Comparable evidence

Where comparable evidence information is included in our Valuation, this information is often based upon our oral enquiries and its accuracy cannot always be assured, or may be subject to undertakings as to confidentiality. However, such information would only be referred to where we had reason to believe it or where it was in accordance with our expectation. In addition, we have not inspected comparable properties.

31. Valuation bases

Valuations are carried out on a basis appropriate to the purpose for which they are intended and in accordance with the relevant definitions, commentary and assumptions. The basis of valuation will be agreed with you and specified in the Letter and in the relevant Valuation.

<u>**Important Notice**</u>

If you have any queries relating to this Agreement please let us know as soon as possible, and in any event before signing the Letter and/or giving us instructions to proceed.

Your instructions to proceed, preferably signing on the space provided for under the Letter, will constitute your acceptance to use our services on the terms of the Agreement.

Accordingly, our commencement of work pursuant to your instructions shall constitute acceptance of your offer and as such establish the contract between us on the terms of the Agreement.

Appendix 11 - Schedule of Assets

BUILDING	
Description	Market Value (PhP)

Exxa - Zeta Tower -

As seen during our inspection for the previous valuation done, this is a twin tower connected by podium levels. Each tower is twenty (20) storeys high, reinforced concrete-framed and with one (1) basement level, mezzanine and a roof deck. The ground floor is being utilized as lobby and for retail purposes. The second up to the fifth floor, as well as the basement level, are used as parking areas with some offices and equipment rooms while the rest of the upper floors are used as offices. Some equipment rooms, meanwhile, can also be found at the roof deck.

Exxa-Zeta Tower is a Silver LEED (Leadership in Energy and Environment Design) certified building.

Some of the energy efficient and environment-friendly features of the building include double glazed glass windows that allow natural light into the building while blocking out noise and heat; LED lighting for common areas; water recycling for plant irrigation; column-free office spaces; disabled-friendly ramps; and garden. Other construction features include partly granite tiles and plastered cement finish precast concrete exterior walls and mainly double glazed glass curtain walls; concrete slab roofing with waterproofing membrane; mainly granite tiles on concrete flooring at lobbies and hallways, and epoxy paint finish concrete flooring on parking areas; mainly granite tiles finish concrete partitions in lobbies; mainly gypsum board and fiber cement board ceiling in common areas; and frameless glass main entrance doors.

The office units during handover to the tenants reportedly have plain cement finish concrete flooring, acoustic board on aluminum T-runner ceiling (uninstalled) and electrical lighting facilities. The retail units, meanwhile, have plain cement finish concrete flooring, open ceiling and electrical lighting facilities upon turnover to the tenants. All interior works done on the leased areas were reportedly shouldered by the tenants and were, therefore, excluded in this report.

The towers are painted and provided with electrical lighting and plumbing facilities, and 2 concrete cisterns for each tower at the basement with a capacity of about 60,000 gallons each for Exxa Tower and 45,000 gallons each for Zeta Tower. It is also provided with building machinery and equipment such as elevators and air conditioning system, among others, described and valued in the succeeding sections of this report.

Based on information provided to us by the client, total gross floor area of the building is approximately 108,887.87 sq. m.

Reportedly, construction of Exxa Tower was completed in March 2018 while Zeta Tower was in November 2018.

3,293,000,000

Service Elevator-

Mitsubishi Electric, 1,600 kgs., 24 persons capacity, 2 landings, complete with electric drive motor, governor, control panel, wires, cables and other standard accessories	1,499,000

Total for Elevators & Escalators -	**226,567,000**

<u>Air Conditioning and Ventilating System</u>

Lot-Air Conditioning System-
Mitsubishi Electric Citi Multi, Variable Refrigerant Flow (VRF) System, modular type, system comprsing of:
<u>Exxa Tower</u>
5-ACCU Outdoor Units(7F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
3-ACCU Outdoor Units(8F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
4-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
3-ACCU Outdoor Units(9F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
4-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
5-ACCU Outdoor Units(10F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
3-ACCU Outdoor Units(11F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
2-ACCU Outdoor Units -

Model PUCY-P400YKA, 12.5 TR cooling capacity
4-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
3-ACCU Outdoor Units(12F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
4-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
3-ACCU Outdoor Units(14F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
4-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
3-ACCU Outdoor Units(15F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
4-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
3-ACCU Outdoor Units(16F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
4-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
3-ACCU Outdoor Units(17F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
4-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
3-ACCU Outdoor Units(18F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
4-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
3-ACCU Outdoor Units(19F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
2-ACCU Outdoor Units -

Model PUCY-P400YKA, 12.5 TR cooling capacity
4-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
3-ACCU Outdoor Units(20F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
4-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
3-ACCU Outdoor Units(21F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
4-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
28-Fan Coil Units(7th Floor) -
Cassette type, 2.5 TR cooling capacity
22-Fan Coil Units -
Ceiling concealed type, 2.5 TR cooling capacity
4-Fan Coil Units -
PCU type, 6.4 TR cooling capacity
364-Fan Coil Units(8th to 21st Floor) -
Cassette type, 2.5 TR cooling capacity
286-Fan Coil Units -
Ceiling concealed type, 2.5 TR cooling capacity
52-Fan Coil Units -
PCU type, 6.4 TR cooling capacity
<u>Zeta Tower</u>
2-ACCU Outdoor Units(7F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
4-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
1-ACCU Outdoor Unit(8F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
6-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
1-ACCU Outdoor Unit(9F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
6-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity

2-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
1-ACCU Outdoor Unit(10F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
6-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
1-ACCU Outdoor Unit(11F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
6-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
1-ACCU Outdoor Unit(12F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
6-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
1-ACCU Outdoor Unit(14F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
6-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
1-ACCU Outdoor Unit(15F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
6-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
1-ACCU Outdoor Unit(16F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
6-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
1-ACCU Outdoor Unit(17F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
6-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity

2-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
1-ACCU Outdoor Unit(18F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
6-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
1-ACCU Outdoor Unit(19F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
6-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
1-ACCU Outdoor Unit(20F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
6-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
1-ACCU Outdoor Unit(21F Q1 to Q4) -
Model PUCY-P450YKA, 13.65 TR cooling capacity
6-ACCU Outdoor Units -
Model PUCY-P400YKA, 12.5 TR cooling capacity
3-ACCU Outdoor Units -
Model PUCY-P350YKA, 11.375 TR cooling capacity
2-ACCU Outdoor Units -
Model PUCY-P300YKA, 9.5 TR cooling capacity
28-Fan Coil Units(7th Floor) -
Cassette type, 2.5 TR cooling capacity
22-Fan Coil Units -
Ceiling concealed type, 2.5 TR cooling capacity
4-Fan Coil Units -
PCU type, 6.4 TR cooling capacity
364-Fan Coil Units(8th to 21st Floor) -
Cassette type, 2.5 TR cooling capacity
286-Fan Coil Units -
Ceiling concealed type, 2.5 TR cooling capacity
52-Fan Coil Units -
PCU type, 6.4 TR cooling capacity
System complete with piping connections, electrical and controls system, valve and fittings, and other standard accessories 287,989,000

Lot-Centralized Air Conditioning and Ventilating System-
Smardt, 450 tons total refrigeration capacity, consisting of:
4-Air Cooled Chillers -
Smardt Chillers Pty Ltd., Australia,, Model AD040.1ED08.F4AKDA.A006AA.E10, Serial Nos.QJB447, QJB448 QJB449 and QJB450 113 tons of refrigeration capacity, complete with refrigerant compressors, drive motors, controls and other accessories

4-Primary Water Pumps -
Centrifugal type, driven by 5.5 kw electric motor, mounted on concrete foundation
5-Primary Water Pumps -
Centrifugal type, driven by 11 kw electric motor, mounted on concrete foundation
Note: 1 unit spare
Air Handling Unit (AHU 3) -
Trane, horizontal cabinet vertical discharge draw type, 50 tons of refrigeration capacity, complete with fan blower and belt driven electric motor
Air Handling Unit (AHU 1.1) -
Trane, horizontal cabinet vertical discharge draw type, 15 tons of refrigeration capacity, complete with fan blower and belt driven electric motor
Air Handling Unit (AHU 1.2) -
Trane, horizontal cabinet vertical discharge draw type, 15 tons of refrigeration capacity, complete with fan blower and belt driven electric motor
Air Handling Unit (AHU 1A.1) -
Trane, horizontal cabinet vertical discharge draw type, 15 tons of refrigeration capacity, complete with fan blower and belt driven electric motor
Air Handling Unit (AHU 1A.2) -
Trane, horizontal cabinet vertical discharge draw type, 15 tons of refrigeration capacity, complete with fan blower and belt driven electric motor
Air Handling Unit (AHU 2.1) -
Trane, horizontal cabinet vertical discharge draw type, 40 tons of refrigeration capacity, complete with fan blower and belt driven electric motor
Air Handling Unit (AHU 2.2) -
Trane, horizontal cabinet vertical discharge draw type, 15 tons of refrigeration capacity, complete with fan blower and belt driven electric motor
Lot-Fan Coil Units -
Asorted type of ceiling and wall mounted, ducted type, range from 2 TR to 7.5 TR capacity, complete with standard accessories
Lot-Air Ventilation and Exhaust System-
Consisting of:
12-Jet Fans-
Trigger, jet type, 50 ppm capacity driven by 320 watts motor
Note: Located at Basement Parking
11-Jet Fans-
Trigger, jet type, 50 ppm capacity driven by 320 watts motor
Note: Located at Level 3 Parking
11-Jet Fans-
Trigger, jet type, 50 ppm capacity driven by 320 watts motor
Note: Located at Level 4 Parking
11-Jet Fans-
Trigger, jet type, 50 ppm capacity driven by 320 watts motor
Note: Located at Level 5 Parking
11-Jet Fans-
Trigger, jet type, 50 ppm capacity driven by 320 watts motor
Note: Located at Level 6 Parking
Exxa Tower

4-Fresh Air Fans-
Niagara, 1681 cmh capacity complete with electric drive motor
2-Exhaust Fans-
Niagara, 1700 cmh capacity complete with electric drive motor
2-Exhaust Fans-
Niagara, 85 cmh capacity complete with electric drive motor
Smoke Evacuation Fan-
Niagara, 1870 cmh capacity complete with electric drive motor
3-Pressurization Evacuation Fans-
Niagara, 1214 cmh capacity complete with electric drive motor
Zeta Tower
4-Fresh Air Fans-
Niagara, 1681 cmh capacity complete with electric drive motor
2-Exhaust Fans-
Niagara, 1700 cmh capacity complete with electric drive motor
2-Exhaust Fans-
Niagara, 85 cmh capacity complete with electric drive motor
Smoke Evacuation Fan-
Niagara, 1870 cmh capacity complete with electric drive motor
3-Pressurization Evacuation Fans-
Niagara, 1214 cmh capacity complete with electric drive motor
Commercial
6-Fresh Air Fans(FAF 2.1 to 2.4, FAF 3 & 4)-
Niagara, 1681 cmh capacity complete with electric drive motor
2-Exhaust Fans-
Centrifugal DWDI backward curve type, driven by 11.2 kw electric motor
5-Exhaust Fans-
Compact axial type, driven by .04/.57 kw electric motor
28-Exhaust Fans-
Wall mounted type, driven by .75 kw electric motor
Note: Installed at various locations
System complete with ductings installations, electrical and controls system and other standard accessories 29,358,000

Total for Air Conditioning and Ventilating System - 317,347,000

Lot-Building Management System-
Consisting of:
2-CPU (Air Conditioning System / Elevators)-
HP, Core i7, 16 GB ram with keyboard and mouse
2-LCD Monitors-
LG
2-UPS-
Vertiv Iton, PSA-600BX
System complete with electrical wiring installations and other standard accessories **16,012,000**

Lot-Standby Power Supply and Electrical Power Distribution System-
System consisting of:
Exxa Tower
2-Stand-by AC Electric Generating Set-

Leroy Somer / Mitsubishi Heavy Industries, 11/2016 Date Mfd., 1775 kva (1420 kw) rated capacity, 0.80 power factor, 1800 rpm, 3 phase, 60 hz, powered by:
16 Cylinder Diesel Engine-
Mitsubishi, turbo-charged, direct injection, water cooled, complete with fuel day tank, battery, controls and other standard accessories, steel skid base mounted on concrete foundation
2-Stand-by AC Electric Generating Set-
Leroy Somer / Mitsubishi Heavy Industries, 11/2016 Date Mfd., 1581 kva (1265 kw) rated capacity, 0.80 power factor, 1800 rpm, 3 phase, 60 hz, powered by:
16 Cylinder Diesel Engine-
Mitsubishi, turbo-charged, direct injection, water cooled, complete with fuel day tank, battery, controls and other standard accessories, steel skid base mounted on concrete foundation
Generator Synchronizing Panel-
Metal clad casement, free standing vertical sections, complete with main breakers, sub-breakers, magnetic contactors, relays, timers, on/off switches, pushbutton switches, pilot lights, automatic transfer switch and other standard accessories
2-Power Transformers-
ABB, 2 mva rated capacity, 34.5 kv and 400 volts primary and secondary voltages, oil immersed, pad mounted, 3 phase
Vacuum Fault Interrupter-
Metal clad casement, 2 swing-out door panels
Low Voltage Switchgear-
Metal clad casement, free standing with 11 vertical sections, complete with main breakers, sub-breakers, magnetic contactors, relays, timers, on/off switches, pushbutton switches, pilot lights automatic transfer switch, capacitor banks and standard accessories
Zeta Tower
2-Stand-by Generating Set-
Leroy Somer / Mitsubishi Heavy Industries, 11/2016 Date Mfd., 1775 kva (1420 kw) rated capacity, 0.80 power factor, 1800 rpm, 3 phase, 60 hz, powered by:
16 Cylinder Diesel Engine-
Mitsubishi, turbo-charged, direct injection, water cooled, complete with fuel day tank, battery, controls and other standard accessories, steel skid base mounted on concrete foundation
2-Stand-byAC Electric Generating Set-
Leroy Somer / Mitsubishi Heavy Industries, 11/2016 Date Mfd., 1581 kva (1265 kw) rated capacity, 0.80 power factor, 1800 rpm, 3 phase, 60 hz, powered by:
16 Cylinder Diesel Engine-
Mitsubishi, turbo-charged, direct injection, water cooled, complete with fuel day tank, battery, controls and other standard accessories, steel skid base mounted on concrete foundation
Generator Synchronizing Panel-
Metal clad casement, free standing vertical sections, complete with main breakers, sub-breakers, magnetic contactors, relays, timers, on/off switches, pushbutton switches, pilot lights, automatic transfer switch and other standard accessories
2-Power Transformers-
ABB, 2 mva rated capacity, 34.5 kv and 400 volts primary and secondary voltages, oil immersed, pad mounted, 3 phase
Vacuum Fault Interrupter-

Metal clad casement, 2 swing-out door panels
Low Voltage Switchgear-
Metal clad casement, free standing with 11 vertical sections, complete with main breakers, sub-breakers, magnetic contactors, relays, timers, on/off switches, pushbutton switches, pilot lights automatic transfer switch, capacitor banks and standard accessories
Commercial
2-Stand-by Generating Set-
Leroy Somer / Mitsubishi Heavy Industries, 11/2016 Date Mfd., 1581 kva (1265 kw) rated capacity, 0.80 power factor, 1800 rpm, 3 phase, 60 hz, powered by:
16 Cylinder Diesel Engine-
Mitsubishi, turbo-charged, direct injection, water cooled, complete with fuel day tank, battery, controls and other standard accessories, steel skid base mounted on concrete foundation
Generator Synchronizing Panel-
Metal clad casement, free standing vertical sections, complete with main breakers, sub-breakers, magnetic contactors, relays, timers, on/off switches, pushbutton switches, pilot lights, automatic transfer switch and other standard accessories
2-Power Transformers-
Cooper, 2.5 mva rated capacity, 34.5 kv and 400 volts primary and secondary voltages, oil immersed, pad mounted, 3 phase
Vacuum Fault Interrupter-
Cooper, metal clad casement, 2 swing-out door panels
Low Voltage Switchgear-
Metal clad casement, free standing with 5 vertical sections, complete with main breakers, sub-breakers, magnetic contactors, relays, timers, on/off switches, pushbutton switches, pilot lights automatic transfer switch, capacitor banks and standard accessories
2-Underground Fuel Storage Tanks-
Mild steel plate of welded construction, 25,000 liters capacity
Note: Located at Basement
4-Fuel Pumps-
Rotary gear type, driven by 4.1 kw electric motor
Note: Located at Basement
System complete with main distribution panels, auxiliary dry type transformers, electrical wiring installations, piping connections, contactors, relays and other standard accessories **217,805,000**

Lot-Water Supply and Sewerage System-
Consisting of:
Exxa Tower
2-Water Storage Tanks-
FRP material, 10,000 gallons capacity, 5 m x 3 m x 3 m overall dimension
Note: Located at Roof Deck
2-Booster Pumps-
Centrifugal type, driven by 5.6 kw electric motor
Note: Located at Roof Deck
Zeta Tower
2-Water Storage Tanks-
FRP material, 10,000 gallons capacity, 5 m x 3 m x 3 m overall dimension
Note: Located at Roof Deck
2-Booster Pumps-

Centrifugal type, driven by 5.6 kw electric motor
Note: Located at Roof Deck
Pump Room
4-Transfer Pumps(Exxa & Zeta)-
Centrifugal type, driven by 37.3 kw electric motor
2-Constant Pressure Pumps(Potable)-
Centrifugal type, driven by 11.2 kw electric motor. equipped with;
Pressure Tank-
Mild steel construction, 220 gallons capacity
2-Constant Pressure Pumps(Non-Potable)-
Centrifugal type, driven by 11.2 kw electric motor. equipped with;
Pressure Tank-
Mild steel construction, 220 gallons capacity
2-Constant Pressure Pumps(Commercial)-
Centrifugal type, driven by 11.2 kw electric motor. equipped with;
Pressure Tank-
Mild steel construction, 220 gallons capacity
2-Booster Pumps(Rain Water)-
Centrifugal type, driven by 5.6 kw electric motor
4-Elevator Pit Pumps-
Submersible type, driven by .75 kw electric motor
4-Drainage Sump Pumps-
Submersible type, driven by 11.2 kw electric motor
System complete with piping connections, valves and fittings, controls and other standard accessories **10,253,000**

Lot-Automatic Fire Fighting, Fire Protection and Alarm System-
Consisting of:
Fire Pump-
Pentair Fairbanks Nuhuis, vertical turbine type, 750 gpm capacity, driven by 111.9 kw electric motor
Fire Pump-
Pentair Fairbanks Nuhuis, vertical turbine type, 750 gpm capacity, driven by 4 Cylinder Clarke Diesel Engine, 175 hp
Jockey Pump-
Submersible type, driven by 7.5 kw electric motor
2-Fire Pump Controllers-
Eaton
Jockey Pump Controller-
Eaton
56-Fire Hose Cabinets-
Aluminum frame with glass panel door, wall mounted, complete with fire hose, nozzle and 10 lbs dry chemical type fire extinguisher
System complete with automatic sprinkler heads, 2 FDAS, fire extinguishers, smoke and heat detectors, fire alarm bells, burglar alarm, piping connections, valves, fittings, and other standard accessories
Note: Installed in various locations. **18,221,000**

Lot-Sewage Treatment Plant -
Design at 400 cubic meters per day capacity and approximately at an average of 200 cubic meters per day effluent working capacity, complete with 2-18.65 kw air blowers, 2-3.73 kw transfer pumps, 2-3.73 kw discharge pumps, exhaust/intake fans, carbon filters, air diffusers, valves, fittings, piping installations, equalization tank, sbr **11,040,000**

basin, chlorine contact chamber, surge digester, final tank, controls and other standard accessories

Lot-CCTV Security Monitoring System-
Consisting of:
64-CCTV Cameras (Exxa)-
Fix dome type
64-CCTV Cameras (Zeta)-
Fix dome type
48-CCTV Cameras (Commercial)-
Fix dome type
12-LCD Monitors-
Samsung, 32" screen size
12-NVR-
Dimax, Ultra HD NVR
3-Switches-
Gigabit
7-UPS-
AWD
2-AVR-
Volt Plus, 1000A
2-AVR-
Volt Plus, 500A
System complete with controller, electrical and wiring installations, controls and other standard accessories **6,763,000**

<u>**Others**</u>

2 - Walk-thru Thermal Scanners -	390,000
Escalator Handrail Sterilizer (Exxa)-	90,000
Walkthrough Metal Detector (Exxa & Zeta)-	382,000
2-Seismic Accelorographs- IMV Corp., wall mounted, digital display	2,945,000
2-Gondolas (Exxa & Zeta)- MHE Demag, 2015 year model, 200 kgs capacity, complete with cage, winch, weights, drive motor and other standard accessories	4,431,000
4-Parking Boom Barriers- 2 folds, approx 6 meters long tubular barrier	184,000

Total for Others -	**8,422,000**

Total for Building Machinery & Equipment -	**832,430,000**

Appendices

1 Instructions

Engagement of Santos Knight Frank

Instructions	1.1	We refer to our Letter of Engagement dated 21 September 2020 and Amendment dated 01 June 2021, to provide a Valuation Report on the opinion of **Market Value** using Market and Income Approaches of that certain Property consisting of thirty (30) office condominium units, one (1) retail unit, and three hundred one (301) appurtenant parking slots, situated at various levels of **Robinsons Summit Center, Ayala Avenue, Salcedo Village, Barangay Bel-air, Makati City, Metropolitan Manila,**, ("the Property"). A copy of that document is attached herein as Appendix **2**.
	1.2	This valuation has been carried out by Santos Knight Frank, Inc. ("Santos Knight Frank" or "SKF"), in accordance with our General Terms of Business for Valuations ("General Terms of Business"), attached as Appendix **3**.
Client	1.3	Our client for this instruction is **Robinsons Land Corporation** ("the Client").
Valuation standards	1.4	This valuation has been undertaken in accordance with the International Valuation Standards, as well as other local standards.
Purpose of valuation	1.5	You have confirmed that this valuation is for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
Conflict of interest	1.6	We confirm that we do have a material connection or involvement giving rise to a potential conflict of interest, as set out below: We have conducted the valuation of the same Property for you as of 30 September 2020 for purposes of: i) the tax-free exchange of assets to a REIT Company, and (ii) for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
	1.7	You have confirmed this Engagement notwithstanding this matter, you are content for us to proceed with this instruction. We are providing an objective and unbiased valuation.
	1.8	We are acting as external and independent valuers in this engagement.
Responsibility to third parties	1.9	Our valuation report is only for the use of our Client and for the purposes for which are stated herein, and no liability is accepted to any third party for the whole or any part of its contents.

Disclosure & publication	1.10	Except for the purposes which are stated herein, neither the whole nor any part of this valuation nor any reference thereto may be included in any published document, circular or statement nor published in any way without our prior written approval of the form or context in which it may appear.
Limitations on liability	1.11	No claim arising out of or in connection with this valuation report may be brought against any member, employee, partner, director or consultant of Santos Knight Frank, Inc. Those individuals will not have a personal duty of care to any party and any claim for losses must be brought against Santos Knight Frank, Inc.
	1.12	Santos Knight Frank, Inc.'s total liability for any direct loss or damage caused by negligence or breach of contract in relation to this instruction and valuation report is limited to the amount of the level of our fee, specified in the Letter of Engagement. We do not accept liability for any indirect or consequential loss (such as loss of profits).
	1.13	The above provisions shall not exclude or limit our liability in respect of fraud or for death or personal injury caused by our negligence or for any other liability to the extent that such liability may not be excluded or limited as a matter of law.
Expertise	1.14	The valuation process was performed by **Ronald S. Lachica**, under the supervision of **Jacqueline T. Guerta** and **Jesus Constance M. Castro**, both licensed Real Estate Appraisers. The Principal Signatory on behalf of Santos Knight Frank, Inc. and who also reviewed the Valuation Report, is **Wenceslao D. Fuentes, Jr.,** also a licensed Real Estate Appraiser. We confirm that the above-named Licensed Real Estate Appraisers are registered with the Professional Regulation Commission ("the PRC"), having sufficient current knowledge of the particular market and the skills and understanding to undertake the valuation competently.
Vetting	1.15	This report has been vetted as part of Knight Frank global standards.

Scope of enquiries & investigations

Inspection	1.16	In accordance with your instructions, due to the limited timeframe to complete the Engagement, we have not conducted a current inspection. The Property has been previously inspected. Valuation rendered is a result of a revaluation of a property that has previously been inspected.
	1.17	The Client has provided us with information regarding the changes to the physical attributes and/or characteristics of the Property; current or anticipated changes in rental income from the Property; and material changes to the non-physical attributes of each property, such as other lease terms, planning consents, statutory notices and other relevant information which have occurred between the valuation date and the date of our previous valuation. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.

Investigations 1.18 The extent of enquiries/investigations made is set out in our General Terms of Business. In carrying out this instruction we have undertaken verbal / internet-based enquiries referred to in the relevant sections of this report. We have relied upon this information as being accurate and complete.

Information provided 1.19 In this report, we have been provided with information/documents by the Client for the previous valuation done as well as for the current engagement. We have relied upon this information as being materially correct in all aspects. In particular, we detail the following:

- floor plans
- details of subject units and parking slots
- rent roll
- financial statements
- projections
- historical and current occupancy

1.20 In cases where we were not provided with documents or information, we did our own enquiries as outlined and stated in the report. Any assumptions in lieu of the lack of information is also set out in the relevant sections of this report.

Valuation basis

1.21 In accordance with your instructions, we have provided an opinion of value on the basis of **Market Value.**

Market Value (MV) 1.22 Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property.

It is further assumed that title to the Property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable.

The rights appraised in this report are the property rights in fee simple, free and clear. "Fee simple" is defined as absolute ownership, without limitations to any particular class of heirs or restrictions, but subject to the limitations of eminent domain, escheat, police power and taxation.

The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.

Definition of Condominium

1.23 Under Section 2 of Republic Act No. 4726 or the Condominium Act, Condominium is defined as:

> "A Condominium is an interest in real property consisting of a separate interest in a unit in a residential, industrial or commercial building or in an industrial estate and an undivided interest in common, directly and indirectly, in the land, or the appurtenant interest of their respective units in the common areas."

Briefly stated, it is a form of ownership less than the whole. Each co-owner enjoys absolute ownership in his separate unit and owns jointly, in direct proportion to his holdings, the common areas designated in the Property.

Valuation date

1.24 The valuation date is **30 June 2021.**

2 The Property

Location

Address 2.1 The Property consists of thirty (30) office condominium units, one (1) retail unit, and three hundred one (301) parking slots, located at various levels of Robinsons Summit Center, a thirty-seven (37)-storey office building with helipad and four (4)-level basement located along the northeast side of Ayala Avenue extending northeastward to the service road of Valero Street, near corner of Paseo de Roxas, within Makati Central Business District (CBD), Salcedo Village, Makati City, Metropolitan Manila, Philippines.

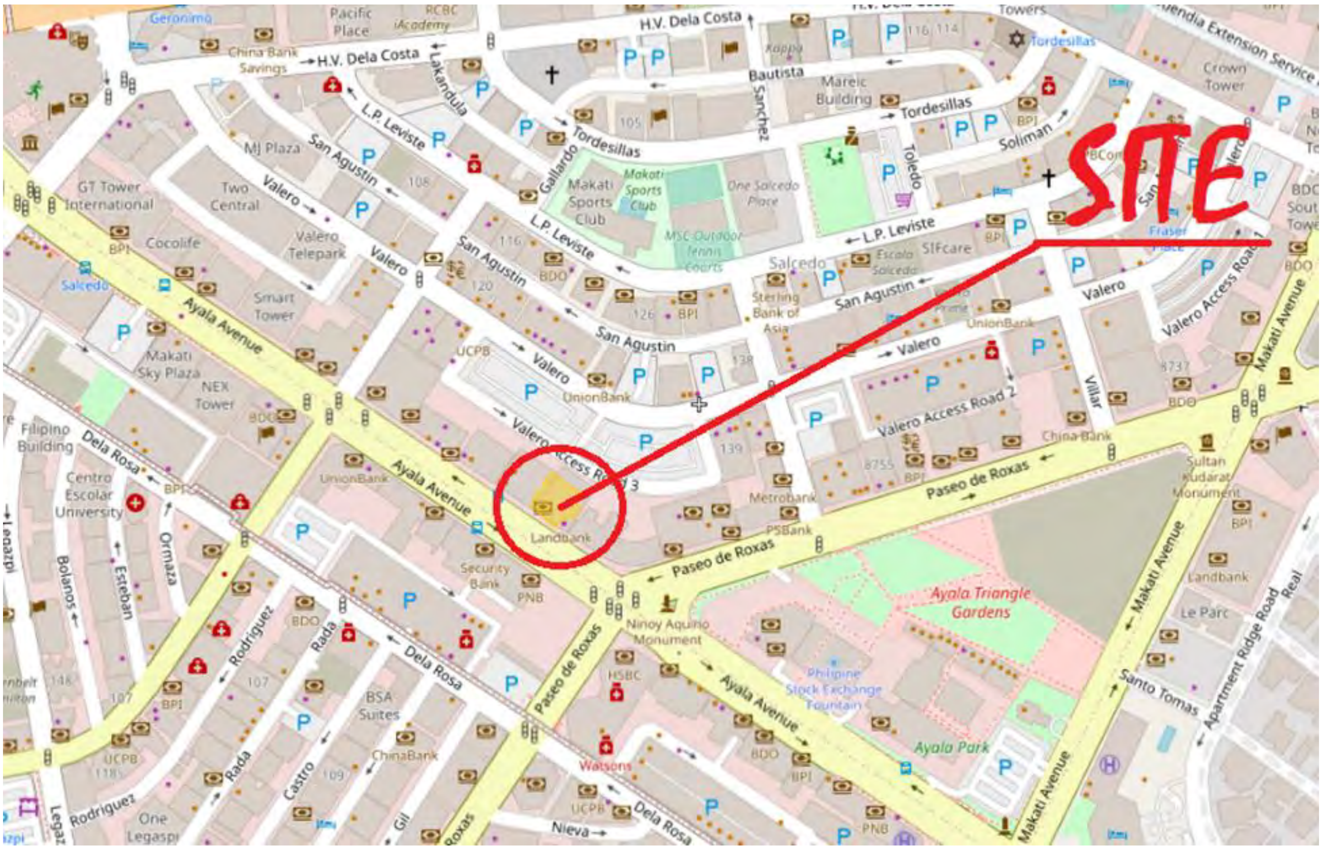
The site is between Insular Life Building and KPMG Center and just across Security Bank Building, VGP Center and BPI Head Office Building, about 70 meters northwest from the corner of Ayala Avenue and Paseo De Roxas, some 550 meters southeast from RCBC Plaza, and about 1.2 kilometers northwest from Epifanio Delos Santos Avenue (EDSA).

Ayala Avenue is the main thoroughfare in the central business district. It is about 50 meters wide, concrete/asphalt-paved and provided with concrete curbs and gutters, underground drainage system, cemented sidewalks and a center island.

Below is a satellite image of the district courtesy of Google Maps showing the Property and its relation to the immediate vicinity.

Note: Image courtesy of Google Maps.

2.2 The street plan below shows the location of the building.



Neighborhood 2.3 The Property is situated within the Makati Central Business District (CBD), characterized by predominantly medium and high-rise office buildings and some residential condominium developments. It is likewise relatively near the Ayala Center which is home to retail destinations such as Glorietta, Greenbelt, Landmark and SM Makati. The Ayala Center also boasts of having the most number of deluxe hotels in the country – Shangri-la Makati, Dusit Thani Manila, Ascot Hotel, Holiday Inn, New World Hotel, and Fairmont Makati Hotel.

Generally, the streets in the neighbourhood are designed to accommodate light to heavy vehicular and pedestrian traffic loads. Major thoroughfares are asphalted, with widths ranging from 15 to 40 meters and lighted with mercury arc lamps.

Some of the notable high-rise developments in the area include "Philamlife Tower", "Antel Platinum Tower", "Citibank Tower", "Equitable Bank Tower", "GT Tower", "PBCom Tower" and several others. Not far from the Property is the Zuellig Building - the first LEED Gold Pre-certified Office Building in the country located at the corner of Makati Avenue and Paseo de Roxas.

Accessibility 2.4 The Property fronts Ayala Avenue, a main thoroughfare providing excellent access to other major sections of the metropolis. It connects to EDSA on the southeast and to Sen. Gil Puyat Avenue on the northwest, both main thoroughfares.

Public transport like buses, jeepneys, and taxicabs are available throughout the day along Ayala Avenue.

Other community centers like post office, churches, hospitals, and public and private schools are likewise accessible from the Property.

Legal Title

Unit Details 2.5 Based on documents provided to us by the Client, the Property consists of thirty (30) office condominium units, with a total floor area of **36,007.44 sq. m.**, one (1) retail condominium unit with an area of **634.74 sq.m.** and three hundred one (301) appurtenant parking slots, tabulated as under:

The aforementioned Condominium Certificates of Title covering the office and retail units were issued in the name of **ROBINSONS LAND CORPORATION** by the Registry of Deeds for Makati City. Reportedly, the parking slots are not covered by titles but are reportedly appurtenant to the units.

There is only one (1) unit of Robinsons Summit Center that is not owned by RLC and is not covered by this valuation.

2.6 The office floor levels of Robinsons Summit Center are clustered into three (3) zones, the Low Zone (7th to 18th floor), the Mid Zone (19th to 28th floor), and the High Zone (29th to 37th floor). For purposes of this valuation, the subject units were also clustered based on the above zones, summarized as under:

DESCRIPTION	Ave. Unit Area (sq. m.)	Total Area/Zone (sq. m.)
Retail (Ground Floor)	634.74	634.74
Low Zone (7th to 18th Floor)	1,201.14	13,212.58
Mid Zone (19th to 28th Floor)	1,204.42	12,044.20
High Zone (29th to 37th Floor)	1,194.52	10,750.66

2.7 In our valuation, we have assumed a good and marketable title and that all documentation is satisfactorily drawn.

Tenure

2.8 As evidenced by the available Condominium Certificates of Title, ownership rights to all of the units are freehold.

Remarks on Highest and Best Use

2.9 The Highest and Best Use of the land where Robinsons Summit Center is erected is the existing high-rise office condominium development.

Description of Condominium Units

Condominium Units

2.10 The Property comprises thirty (30) office condominium units, one (1) retail condominium unit, and three hundred one (301) parking slots of the Robinsons

Summit Center. Description of Robinsons Summit Center is shown as Appendix **8**.

Condition

Scope of Inspection

2.11 As stated earlier, we have previously inspected the Property.

Our inspection of the Property was limited only to the common areas and exterior of the building, as we were not able to gain entry to the subject units.

We have carried out visual inspection only without any structural investigation or building survey. During our limited inspection, we did not inspect any inaccessible area/s. We are unable to confirm whether the Property is free from urgent or significant defects or items of disrepair.

Unless otherwise stated, we have not been able to carry detailed on-site measurement to verify areas and actual configuration of the subject units and we have no reason to doubt the truthfulness of the areas shown on the documents provided us.

Comments

2.12 Apart from the matters specifically referred to below, we have assumed that the Property is in sound order and free from structural faults, rot, infestation or other defects, and that the services are in a satisfactory condition.

2.13 Information provided to us shows that the units are in good condition consumerate with age and normal usage. No urgent or defects or items of disrepair were reported to us, which would be likely to give rise to substantial expenditure in the foreseeable future or which fall outside the scope of the normal annual maintenance of the units.

Services

2.14 It would appear from our previous inspection that main supplies of electricity and water are provided to the building. Telephone communication facilities are likewise available. Sewer and drainage are believed to be discharged to the building's sewerage system.

Tenancies

Tenancy Information

2.15 We have been provided with copy of some of the rent roll including some of the lease contracts by the Client and have relied on that information as being correct. No additional verification has been undertaken.

2.16 A summary of the Property tenancies is presented on the next page.

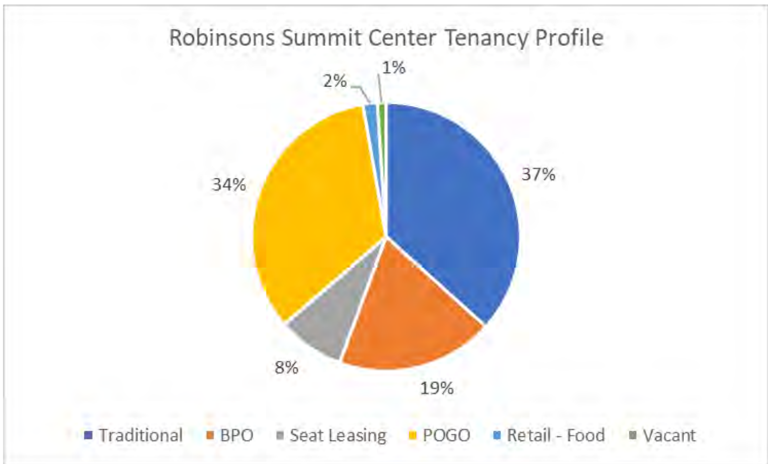
2.17 Based on the rent roll provided, total leasable area is **31,394.16** sq.m. with **301** parking slots available for lease.

2.18 The Property currently has a mix of traditional offices, Business Process Outsourcing (BPO) companies, seat leasing, Philippine Offshore Gaming Operators (POGOs) and some retail tenants. Based on the figure below which summarizes the tenancy profile of the Property, traditional offices currently take up 37% of the Property's leasable area followed by POGOs at 34% and the BPOs take up around 19% of leasable area.



Source: SKF, RLC

2.19 As of 30 June 2021, the Property is 99% occupied with a Weighted Average Lease Expiry (WALE) of 2.77 years. Earliest period with an expiring lease is 2021 with 9% of total leased area. In 2022, 13% of the leased area will be up for renewal or a new lease. The years 2023 and 2024 would have the largest leased area to expire at 27% and 23% respectively.

Source: SKF, RLC

2.20 Below are some of the provisions as stated in the Lease Contract.

a. **Care of the Leased Premises**

The LESSEE shall at its expense, maintain the Leased Premises in a clean and sanitary condition, free from noxious odors, disturbing noises or other nuisances and, upon the expiration of the lease, shall return the premises and fixtures in as good condition as that in which they were actually found at the beginning of the lease, ordinary wear and tear excepted. The LESSEE shall not drive nails, screws, hooks or other abutments on or into the walls frames or other portions of the premises or in any manner deface or damage any part thereof. Any damage caused by the LESSEE may be repaired by the LESSOR for the account of the LESSEE. The LESSOR shall have the right to require the LESSEE to remove any display or promotional matter, or any displayed merchandise which LESSOR reasonably and in good faith considers to be improper or inappropriate for the general appearance or presentation of the premises.

The LESSOR shall be responsible for major repairs which are limited to those which affect the structure of the Leased Premises or the building. The LESSEE shall allow access to the LESSOR on the Leased Premises for purposes of repair or remodelling or such other works as may be necessary for the preservation, conservation, improvement or decoration of the building or any part thereof. No compensation or claims shall be allowed against the LESSOR by reason of any inconvenience or annoyance to the LESSEE that may arise by reason thereof.

The LESSEE shall promptly repair, at its own expense, any damage to the Leased Premises or any other improvements within the building caused by bringing into the Leased Premises of any property for the LESSEE's use, or by the installation or removal of such property, regardless of who is at fault or who caused such damage. unless such was clearly caused by the LESSOR, or its agents or employees. In default of such repairs by the LESSEE, the LESSOR may effect the repairs and the LESSEE agrees to promptly pay the LESSOR the cost of such repairs. The LESSEE shall be responsible for the maintenance and repair of the Leased Premises including plumbing and electrical fixtures within the premises or those serving the same.

The LESSEE must notify the LESSOR immediately of any damage to the Leased Premises, their appurtenances as well as any occupation, usurpation or untoward act being committed, or threatened to be committed, within the Leased Premises.

No machinery, furniture, effect, equipment and other properties found within the Leased Premises, whether or not owned by the LESSEE, may be brought into or out of the building without the prior written approval of the LESSOR. Furthermore, in case the LESSEE has any outstanding/unsettled rent, dues or other charges, the LESSOR reserves the right to withhold approval of any request for bringing in or out of any machinery, furniture, effects or other properties found within Leased Premises, whether or not owned by the LESSEE, until such outstanding amounts have been duly settled by the LESSEE. This is without prejudice to such other rights and remedies available to the LESSOR under

prevailing laws or the Contract. including these General Terms and Conditions.

The immediately preceding paragraph shall also apply in the event of transfer of machinery, furniture, effects or other properties found within the Leased Premises from one unit to another unit in the building being leased by the LESSEE whether or not the latter unit is owned by the LESSOR. In the event that the unit where the properties to be transferred is not owned by the LESSOR, the written consent of the unit owner shall also be required.

The LESSEE shall further maintain the Leased Premises in a clean condition by utilizing plastic bags for the disposal of both dry and wet garbage. Unless garbage is contained in plastic bags, it will not be allowed to be deposited in the authorized depository for collections.

b. **SUBLEASE, TRANSFER OF RIGHTS**

The LESSEE shall not assign or transfer its rights in the Contract nor sublease or sublet all or any part of the Leased Premises, without the prior written consent of the LESSOR and no rights, title or interest thereto or therein shall be conferred on or vested to anyone other than the LESSEE without such prior written consent. Otherwise, subleasing the leased Premises without the prior written consent of the LESSOR shall be deemed a breach of the contract by the LESSEE and shall be subject to the rights and remedies available to the LESSOR under prevailing laws and Contract, including these General Terms and Conditions. In the event of sublease with or without the prior written consent of the LESSOR, the LESSEE shall remain principally liable. However, the LESSOR shall have the right to exercise such remedies embodied in the Contract, the General Terms and Conditions and under prevailing laws, as against the sublessee in order to protect its right and interests.

Only the LESSEE has the right to use the Leased Premises as its official address to be registered with any government entities for the issuance of necessary permits and licenses for its business operations.

Should the LESSOR give the LESSEE its consent to sublease the Leased Premises, the LESSEE cannot sublease the Leased Premises for the period longer that the Contract of Lease between the LESSOR and the LESSEE.

It is expressly understood that the LESSEE has no goodwill or patronage rights over the Leased Premises; that such rights belong exclusively to the LESSOR, being the owner of the Leased Premises, which forms part of the building; and that the LESSEE may not sell or dispose of said goodwill or patronage rights to any person.

c. **ASSIGNMENT OF RIGHTS/MORTGAGE/ENCUMBRANCE**

The LESSOR reserves the right to assign and convey or mortgage or otherwise encumber its rights to this lease in favor of any affiliate or subsidiary or to any party. In the event of any assignment, conveyance, mortgage, or encumbrance of the Leased Premises, the LESSOR binds itself to require the assignee or mortgage or beneficiary of the encumbrance to respect and abide by all the terms and conditions of the Contract, as well as these General Terms and Conditions.

Roadways and Access

Roadways

2.21 Ayala Avenue is about 40 meters wide, concrete/asphalt-paved and provided with concrete curbs and gutters, and underground drainage system.

2.22 Our informal enquiries with the City Planning Office confirmed that the Property enjoys frontage along the bounding roads.

Access

2.23 In reporting our opinion of value, we have assumed that there are no third-party interests between the boundary of the Property and the adopted highways and that accordingly the Property has unfettered vehicular and pedestrian access.

Zonal Value

Source of Information

2.24 Based on the Zonal Table of the Bureau of Internal Revenue, the zonal value of commercial condominium units within Robinsons Summit Center is pegged at PhP230,000 per sq. m.

2.25 An excerpt of the said zonal table is attached herewith as Appendix **9**.

Environmental Considerations

Flooding

2.26 From our enquiries with the City Planning Office, and also due to its terrain, we have ascertained that the Property is not within an indicative floodplain and that there is therefore a minimal risk of flooding.

Contamination

2.27 As stated in the General Terms of Business, investigations into environmental matters would usually be commissioned from suitably qualified environmental specialists. SKF is not qualified to undertake scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination.

Subject to the above, while carrying out our valuation inspection, we have not been made aware of any uses conducted at the subject property that would give cause for concern as to possible environmental contamination. Our valuation is provided on the assumption that the Property is unaffected.

3 Market Analysis

Philippine Market Commentary

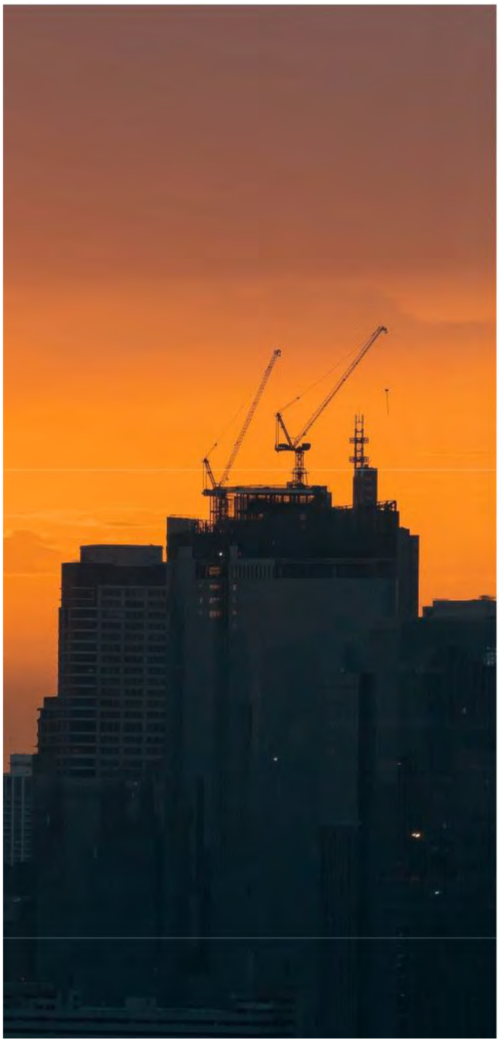
3.1 Shown below is SKF's latest **Metro Manila Office Market Update**.

Source of Information

3.2 Our market analysis has been undertaken using market knowledge within Santos Knight Frank, Inc., enquiries of other agents, searches of Property databases, as appropriate and any information provided to us.

OFFICE RENT ROLLBACKS CUSHION INCREASING VACANCIES

General Overview



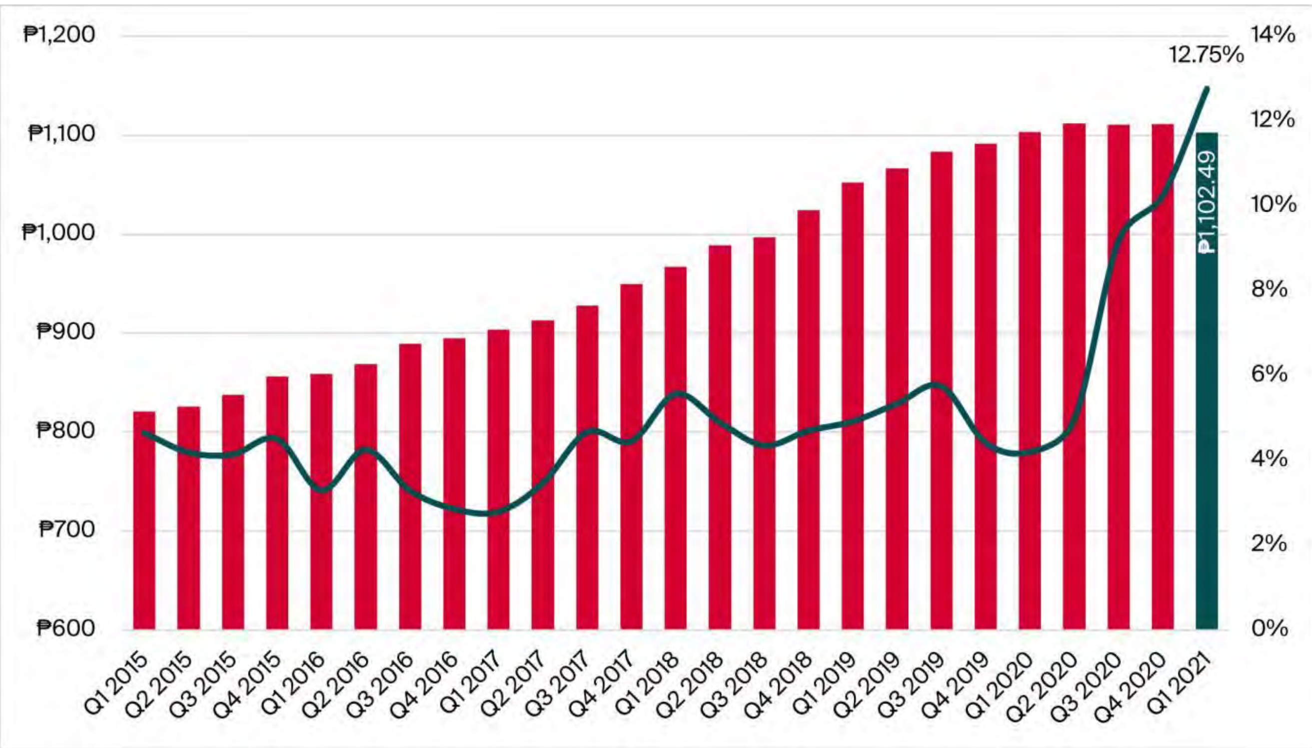
The Metro Manila office market displayed modest market movement at the start of 2021 owing to the sluggish demand driven by the market uncertainties caused by changing lockdown scenarios in Metro Manila. Landlords were challenged to remain relevant as potential occupiers continued to take a cautious approach caused by the growing COVID-19 cases and slow vaccine roll-outs.

Still, new office spaces were introduced during the quarter as developers capitalized on the relaxed quarantine measures to resume their halted construction activities. The local office market supply grew by 163,136 sqm of Grade A office space that mostly catered to IT-BPO companies. Several buildings were completed in Fort Bonifacio, Bay Area, and Quezon City, resulting in an overall office supply in Metro Manila of about 6.9 million sqm.

Consequently, supply growth resulted in an increase in vacancies throughout the metropolis. Office vacancy rates in Metro Manila further spiked to 12.75%, the highest since 2009. Current and potential occupiers remained vigilant towards the health situation of the country. Numerous companies continued to implement Work-From-Home and skeletal workforce arrangements. Office take-up contracted by 28,696 sqm as locators reassessed their need for spaces amid their bid to reduce operational costs.

Monthly average lease rates in Metro Manila further dipped to PHP 1,102.49 per sqm, declining by 0.78% quarter-on-quarter (q-o-q) and 0.07% year-on-year (y-o-y). The downward trend of rents was caused by the landlords' bid to provide more competitive packages to appeal to prospective tenants.

Figure 1. Metro Manila Historical Lease & Vacancy Rates



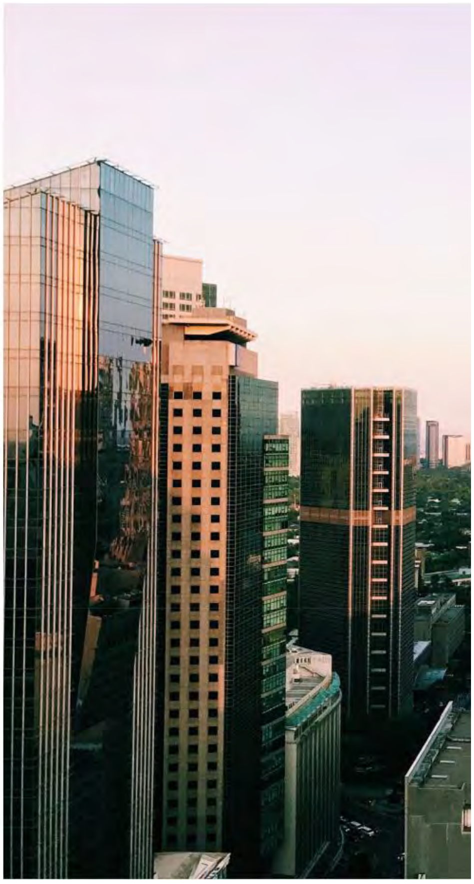
Source: Santos Knight Frank Research

Makati

The adverse effects of the pandemic and the prolonged lockdowns remained evident in the most prominent business district in the country. Vacancy rates spiked to 11.17%, considered to be the highest in the past ten years. Moreover, the expensive rents in Makati CBD were detrimental to the retention of office occupiers. Locators looking to minimize their expenses opted to discontinue their lease, resulting in about 25,557 sqm of office space vacated during the quarter.

Sluggish leasing activity persisted in the area as existing and upcoming locators in Makati were less willing to take up spaces due to the financial distress brought about by the global pandemic. The average monthly rents recorded in Makati went down to PHP 1,348.19 per sqm, contracting by 0.93% q-o-q and 6.05% y-o-y. Despite this, rates in Makati remained the highest in the metropolis.

Several property players are still looking forward to the materialization of their projects in the pipeline. More than 447,552 sqm of Prime and Grade A office supply are anticipated to come online in the next three years, with approximately 164,000 sqm being operational by the end of 2021. The massive influx of upcoming office developments in Makati comes from the backlogs and spillovers from 2019 up to the latter part of 2020.



Taguig

Slow demand in Taguig was also evident as vacancy levels continuously increased to 8.37% from 7.74% in Q4 2020. Despite having the largest supply share in Metro Manila of more than 2 million sqm, the downsized space requirements were seen as the factor in the rising vacancies as locators looked to lessen their operational cost. Moreover, average monthly rental rates in Fort Bonifacio also went down to PHP 1,289.75, translating to a contraction of 0.89% q-o-q.

The ease in quarantine measures allowed private and public projects to resume construction. Office supply in Fort Bonifacio further grew by 28,000 sqm through the completion of BGC Corporate Center 2. Despite the growing vacancy levels, potential developers still have bright prospects in Taguig as it was seen as the youngest but fastest growing business district in Metro Manila. In line with this, upcoming office supply is seen to be augmented by about 864,100 sqm of office space within the next five years. About 344,000 sqm of this will be coming from Arca South which is poised to become a new business district in the south.

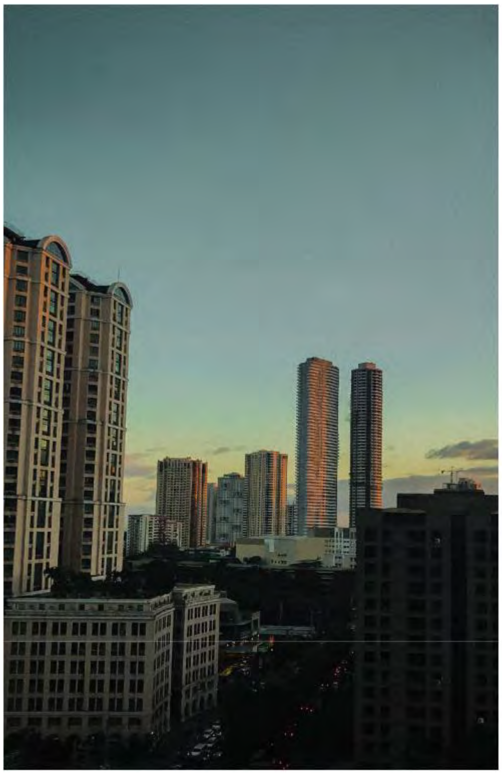
Bay Area

The POGO industry exodus has significantly contributed to the spiking vacancy levels in the Bay Area during Q1 2021, recorded at 12.82%. Slower demand from the sector is seen in the coming periods as more firms have started to postpone their lease contracts. This occurrence implied challenges in the recently fast-moving office market of the Bay Area.

The upsurge in vacancy was also attributed to the completion of Four E-com during the quarter with an additional 89,132 sqm of Grade A office space. Priced above its competitors, this building has helped in pushing the average rents in the area to PHP 1,083.41 per sqm, increasing by 1.66% q-o-q.

The Bay Area is still foreseeing a huge amount of upcoming office supply in the coming years. Developers still recognize the opportunity to invest in the area due to its accessibility and availability of developable land. Approximately, 578,800 sqm of office developments are anticipated to be introduced in the market for the next five years, while 258,000 sqm are expected to become operational by the end of 2021.

Ortigas Center



Vacancy levels in Ortigas Center gradually eased to 12.75% in contrast to 12.88% of the preceding quarter. Despite this, pre-terminated contracts and non-renewals were still observed, as most of the companies are still on a wait-and-see approach towards the office market. Meanwhile, the slow-moving leasing transaction was also felt in the district as the rental rates went down to PHP 806.29 per sqm, contracting by 1.15% q-o-q and still considered the lowest as compared to other major CBDs in the metropolis.

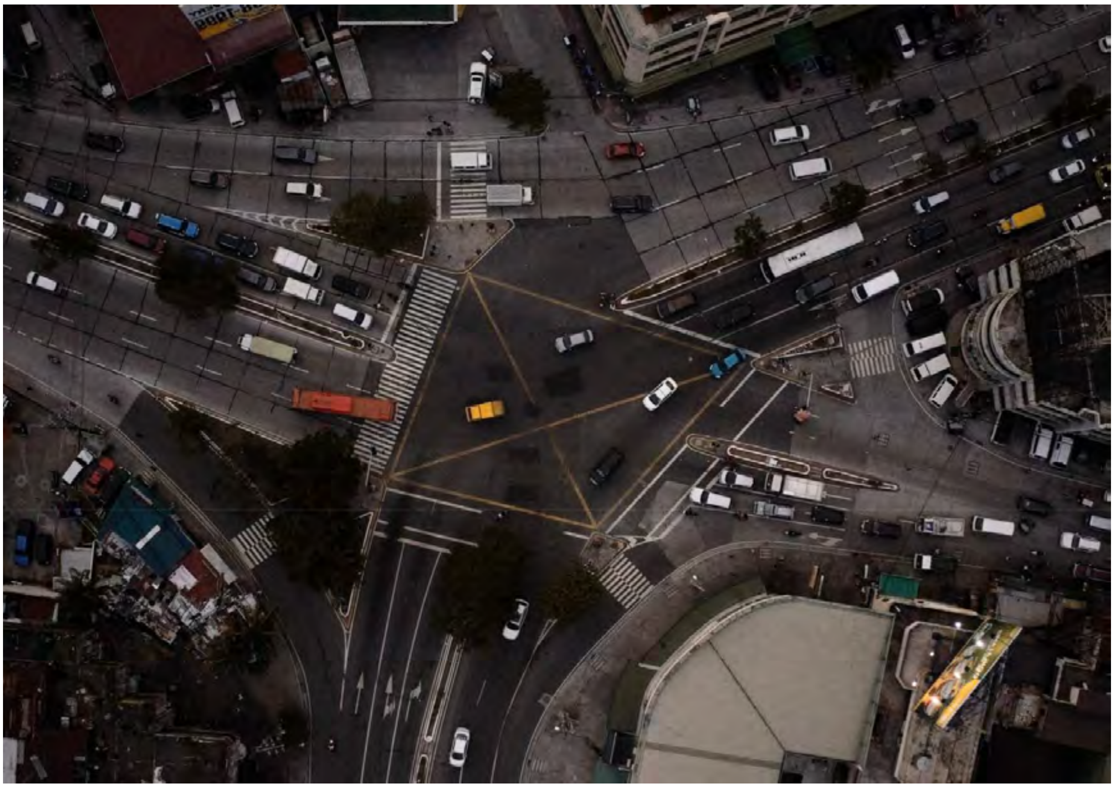
Moreover, the upcoming office supply in Ortigas Center remained high as more than 671,000 sqm of Prime and Grade A office spaces are slated to introduce in the next five years. In addition, the massive influx of 373,000 sqm of space is scheduled to commence their operations within the year such as Cyber Omega, SM Mega Tower, and Jollibee Tower. This includes the spillover from 2019 up to the remaining quarters of 2020 that has been halted due to subsequent lockdowns.

Quezon City

Vacancy rates in Quezon City spiked up to 20.64% as opposed to 16.21% of the preceding quarter, indicating the highest level across all of Metro Manila. Approximately 13,690 sqm of office spaces were freed up in the city during the quarter. Occupiers in the area were more sensitive to the health crisis as compared to locators in other districts The lack of recognized established business districts and limited connectivity of certain townships contributed to the slow demand in the area. Furthermore, the upsurge in vacancy levels was also driven by the opening of SM North Towers 1 and 2 that added more than 45,200 sqm in the massive office supply in Quezon City, and are yet to lease out the majority of their spaces.

Office landlords are trying to alleviate this downtrend and are still vying to mitigate lease terminations. To this end, average headline rates contracted to PHP 925.55 per sqm, translating to a 1.81% decline from the preceding quarter.

Albeit the fast-growing vacancy levels, Quezon City is still expecting a large office supply boost in the coming years. Approximately, 333,700 sqm is anticipated to be introduced in the market in the next five years, in which more than 149,000 sqm will be coming from SM Prime Holdings.



Alabang

Similarly, Alabang CBD experienced rising vacancy levels in Q1 2021 at 16.07% from 14.53% in the preceding quarter. As a result, increased pressures on office landlords in the district were felt as they remain responsive to the slow movement in the office market. This caused rental rates to gradually contract to PHP 846.76 per sqm.

Alabang still holds on to the possibility of becoming one of the major investment hubs in the metropolis due to its vast developable land. Approximately 209,900 sqm of upcoming Grade A office space is anticipated to be operational in the next five years, while 13,800 sqm is slated to become operational by 2021.

Figure 2. Metro Manila Lease & Vacancy Rates per CBD

Source: Santos Knight Frank Research

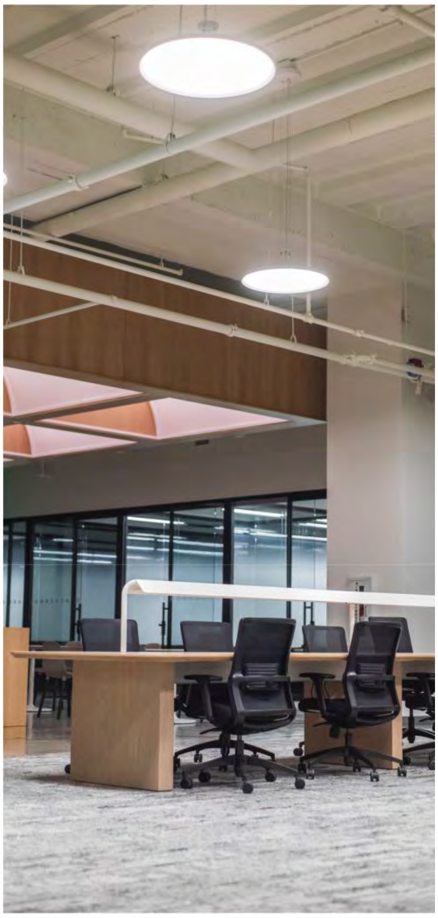
Office Outlook

The easing quarantine measures that started in the second half of 2020 allowed the developers to restart their impeded construction activities. Developers remain bullish in expanding their office footprint in Metro Manila with more than 3 million sqm of office space are slated to operate in the next five years. The nation's economic center is also set to have an additional supply of 1.1 million sqm of Prime and Grade A office space by the end of 2021. This massive influx still stems from the construction backlogs from the developers in 2020.

The robust expansion of office supply in Metro Manila is seen to further propel the vacancy rates in the local office market in the coming quarters. Along with the stagnant office demand, downward pressure on office rents still expected. Office landlords will be forced to implement more flexible payment terms to existing and potential tenants to market their spaces and continue cash flow from their buildings.

The recovery of the office market is also dependent on the pace of vaccine roll-outs in the country. The slow pace in inoculations is seen to weigh down on the recovery of the market. Attaining herd immunity as soon as possible can reinvigorate the interest in the office market.

In the medium- to long-term Green Buildings are seen to gain a competitive edge compared to ordinary office buildings. Buildings accredited by the US Green Building Council (LEED) and the Philippine Green Building Council (BERDE) will be more sought-after for potential office locators. The efficient design that provides better air circulation, ventilation and filtration, and increased open space, will be more



appealing to the market as it puts a premium on the health and well-being of its tenants.

4 Valuation Methodology

Valuation Rationale

4.1 The purpose of this appraisal is to estimate the Market Value of the Property. In any given valuation exercise, market value can be arrived at using either one or a combination of the three (3) approaches to value, namely: Market Data (or Direct Sales Comparison) Approach, Income Capitalization Approach, and the Cost Approach. The determination of the appropriate approach for a given property is based on the quality and quantity of data available, particularly its relevance to the Property under appraisement. If more than one valuation approach is utilized, the resulting values are reconciled to produce a final value conclusion.

Due to the nature of the Property and the purpose of this appraisal, both the Market Approach and Income Approach to value are deemed the most appropriate to use and the Cost Approach was not used.

Market Approach

Market Approach

4.2 This approach is the most common technique, and preferred method when comparable data are available. The Market (or Sales Comparison) Approach to value is basically an appraisal technique in which the Market Value is reached primarily with other properties which have been sold recently, plus current asking prices and offers thereby establishing a measure of market reaction to the subject property. In the process of comparison, adjustments are usually made of the actual sale prices of properties to account for differences in the properties. Functional or economic divergences must be considered, as well as physical variations, and adjustments made accordingly. It is a process of correlation and analysis of similar recently sold or offered for sale properties. The reliability of this technique is dependent upon: (a) the degree of comparability of each property with the Property under appraisal; (b) the time of the sale; (c) the verification of the sale/listing/offer data, and; (d) the absence of unusual conditions affecting the sale or listing/offer. The weight given to this approach is dependent on the availability of recent listings/offerings of properties considered comparable to the Property under appraisement.

These listings/sold properties are compared to the subject in key units of comparison. Appropriate adjustments are made for differences between the subject and the comparables, resulting in adjusted sales values for each of the comparables. These adjusted values are then reconciled for a value conclusion by the Sales Comparison Data Grid.

Adjustments to Sales/Listings Data

The elements of comparison include property rights, legal encumbrances, financing terms, conditions of sale (motivation), market conditions (sale date), location, physical characteristics, and available utilities. The most variable elements of comparison are the site's physical characteristics, which include its size, condition, amenities, architectural quality, and type.

After comparable data are collected and categorized, and the comparable properties are examined and described, data can be assembled in an organized, logical manner. Sales and/or listings are commonly arranged on a market data grid, such as the Sales Comparison Data Grid. Adjustments for dissimilarities between the subject property and the comparable properties are made to the prices of the comparable. Following is an explanation of the major categories of comparison.

Property Rights Conveyed
The particular rights or interests being valued on a site must be defined. This is especially important in appraisals that involve a partial interest in a property, limited rights such as surface or mineral rights, a fee simple estate subject to a long-term lease, or a leasehold interest. Other encumbrances such as easements, mortgages, or special occupancy and use requirements, should also be identified if the comparable sales property rights differ from the subject.

Financing/Conditions of Sale/Listing
Adjustments for conditions of sale reflect the motivations of the buyer and seller. The conditions under which a parcel of land may be sold could differ from property to property. Current market listings of comparable properties were used. Industry practice dictates that listings/asking/offers have a mark-up allowance of 10% to as much as 30% for negotiation purposes.

Market Conditions (Time of Sale)
The time of sale is the date that the comparable parcel was originally purchased and/or offered for sale. In order for the sale property to be deemed comparable to the subject, it must be adjusted for inflation and deflation that has occurred from the date of sale/offer to the present.

Location
The analysis of a site's location focuses on the time-distance relationships between the site and common origins or destinations. It also concerned with the location of the building in relation to heavily traversed thoroughfares and/or intersections. Likewise, location of the condominium units in relation to floor level. Normally, as the floor gets higher, prices of units also tend to be higher.

Size
The size of the comparable is adjusted for superiority or inferiority to the subject. Generally, it is perceived that smaller units are worth more per sq.m. than larger units, due to its affordability, and a much wider spectrum of end-users.

Condition
This pertains to the age and the degree of maintenance of the subject building with consideration to physical deterioration and other factors deemed relevant.

Architectural Quality
The architectural design of a building can greatly enhanced its marketability. A good architectural design may cost more but can certainly boost its marketing power aside from prolonging the economic life of the Property.

Amenities/Utilities
This addresses the availability of basic amenities such as elevators, air-conditioning units, security system and utilities such as water, power, sewer, and storm drains at or near the sites analyzed. These necessities cannot be deferred when the site is developed and any differences between each comparable and the subject represents an expense, which will materially affect the investment value of the Property.

Unit Type
The type of the unit has an effect on the value of the Property as this dictates the return an owner can expect from it. Normally, a commercial unit is valued higher than a similarly situated residential unit.

Summary of Adjustments
The Data Comparison Grids shown on Appendix **7** shows a summary of the aforementioned adjustments, which provides an indication as to the degree of adjustment made to the different elements in comparison. A numeric indicator indicates the level of adjustments, in terms of percentage when compared with the subject property. The use of (-) indicates a negative adjustment and a + indicates a positive adjustment. A downward adjustment (-) used is made to reflect superior characteristics of the comparable sale/listing, while an upward adjustment + reflects inferior characteristics of the comparable sale/listing. Finally, a 0 is used to confirm similarity between the comparable sales/listings and the subject or is used when market information is unavailable or does not support an adjustment for any particular element of comparison.

Evidence of comparable properties

4.3 **Analysis of Comparable Properties Offered for Sale**
In the course of our investigation, we looked at current market listings of comparable properties in the area. The comparable properties selected share the same or similar characteristics as the subject. Whatever information or data we came up with was then analyzed, and comparison made for such factors as size, unit and building locations, architectural quality, building rated classification, and offered amenities/utilities. In the Philippines however, property transactions are not officially disclosed, and quite often, actual transaction price is masked by other undisclosed arrangements and different from the figure shown on the sale and purchase agreement. We have therefore made reference to the following data, made our market judgment, and adjusted for the above-mentioned factors:

1. A 1,407-sq.m. office condominium unit, with 12 appurtenant parking slots, located on the 20th floor of BPI-Philam Life Building, Ayala Avenue, Makati City, Metropolitan Manila, is currently

offered for sale at an asking price of PhP360,180,000. Estimated price of the parking slots is PhP1,875,000 each, thereby leaving PhP337,680,000 for the unit or about of PhP240,000 per sq. m.
Source: Ms. Edna Awa (0917) 773-7787

2. An office unit containing a floor area of 1,471.12 sq. m., more or less, located at the 11h floor of Petron Megaplaza, along Sen. Gil Puyat Avenue, Barangay Salcedo Village, Makati City, with 11 parking slots, is currently offered for sale at an asking price of PhP336,324,200. Estimated price of the parking slots is PhP1,500,000 each, thereby leaving PhP319,824,200 for the unit or about PhP217,402 per sq.m.
Source: Mr. Rafael Salaveria (0917) 837-7239

3. A 126-sq.m. office condominium unit, with 1 parking slot, located on the 10th floor of Ayala Tower One, Ayala Triangle, Ayala Avenue, Makati City, Metropolitan Manila, is currently offered for sale at an asking price of PhP44,100,000. Estimated price of the parking slot is PhP1,750,000, thereby leaving PhP42,350,000 for the unit or about PhP336,111 per sq.m.
Source: Santos Knight Frank – Occupier Services & Commercial Agency

We have found no relevant data on comparable ground floor retail units for sale since retail units are normally leased out and not sold. In the absence of such data, we have valued the subject retail unit using the same upper-level office unit comparable and applied adjustment factor to arrive at the market value.

In addition, we have likewise conducted market survey of parking slots in various similar Grade A office buildings within Makati Central Business District. Based on our research, parking slots in the area are being sold at a price range of PhP1,300,000 to P1,800,000 per slot depending on the slot and building location, building age, and the amenities available in the building.

Unit Value of the Subject Units

4.4 As reflected in the Comparison Grids, attached herein as Appendix **7**, the Unit Value of the subject units, as clustered per zone, are as under:

	Unit Value (PhP/ sq. m.)
Retail (Ground Floor)	238,000
Low Zone (7th to 18th Floor)	196,000
Mid Zone (19th to 28th Floor)	206,000
High Zone (29th to 37th Floor)	217,000

Meanwhile, the value of the Parking Slots is estimated at PhP1,500,000 per slot.

Market Value of the Property by Market Approach

4.5 Having taken into consideration the above comments, assumptions and nature of the Property, the Market Value of the Property by Market Approach is summarized on the next page as:

DESCRIPTION	Total Area/Zone (sq. m.)	Unit Value (PhP/sq. m.)	Market Value (PhP)
Condominium Units			
Retail (Ground Floor) Unit	634.74	238,000	151,068,000
Low Zone (7th to 18th Floor) Office Units	13,212.58	196,000	2,589,666,000
Mid Zone (19th to 28th Floor) Office Units	12,044.20	206,000	2,481,105,000
High Zone (29th to 37th Floor) Office Units	10,750.66	217,000	2,332,893,000

			7,554,732,000
Parking Slots	301 slots @ PhP1,500,000 per slot		**451,500,000**
			===========
		Total	**8,006,232,000**

		Rounded to	**8,006,000,000**
			===========

Income Approach

Income Approach 4.6 The Income Approach is applicable to the valuation of income producing properties, business enterprise as well as the valuation of intangible assets. This approach measures the current value of an asset by calculating the present value of its future economic benefits by discounting expected cash flows at a rate of return that compensates the risks associated with the particular investment.

Discounted Cash Flow Analysis 4.7 The discounted cash flows, or DCF valuation is the most popular fundamental approach in valuing the future economic benefits of a projected income stream. DCF measures actual yield rather than paper income for the asset/business owner and the analysis of DCF is widespread and mandatory in the various fields of business making DCF-based valuation ideal.

4.8 The valuation process, briefly stated, consists of the following:

- Estimation of the revenues generated;
- Estimation of the costs and expenses related to the operations of the development;
- Estimation of an appropriate discount rate;
- Discounting process using an appropriate discount rate to arrive at an indicative market value; and
- Estimation of the Terminal Value of the Property.

Discount Rate 4.9 The discount rate was computed using the build-up method - calculated by adding together the different variables. The basic formula for the traditional build-up model is:

Discount Rate = Rf + P + MR + LR

Where	Variable	Proxy Statistic
Rf	Risk Free Rate	PDEX Risk Free Rate
P	Equity Risk Premium	Country Risk

MR	Management Risk
LR	Liquidity Risk

The variables that were used to generate the Discount Rate are exhibited in the table below, along with the sources and/or dates as at or nearest the 30 June 2021 valuation date.

Risk Free Rate (10Y)	3.92%	As of 30 June 2021, BVAL PDEX
Equity Risk Premium	3.25%	As of 25 June 2021, OECD
Management Risk	0.80%	
Liquidity Risk	0.90%	

4.10 The following assumptions were used to arrive at the Discount Rate using the Build-Up Method.

Risk Free Rate

4.11 For the purposes of this valuation, we adopted the 10-year bond rate sourced from Philippine Dealing & Exchange Corporation (PDEX) as of 30 June 2021 - the valuation date (image shown below). The Philippine Dealing Exchange (PDEx) system has recently appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEX. The PHP BVAL Reference Rate was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

Equity Risk Premium

4.12 We used an equity risk premium of 3.25%. We adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3% plus an additional 0.25% risk premium for unidentifiable risk factors. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors. Shown below is an excerpt of said table.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits
Valid as of: 25 June 2021

			Classification		
nb	Country Code ISO Alpha 3	Country Name [1]	Previous	Current Prevailing	Notes
138	PLW	Palau	-	-	(5)
139	PAN	Panama	4	4	(8)
140	PNG	Papua New Guinea	6	6	
141	PRY	Paraguay	5	5	
142	PER	Peru	3	3	
143	PHL	Philippines	3	3	
144	POL	Poland	-	-	(6)
145	PRT	Portugal	-	-	(6) (7)

Management & Liquidity Risk

4.13 The Management Risk refers to the estimated premium to compensate for the burden of management, while the Liquidity Risk refers to the ease (or the difficulty) with which an investment can be sold or made. A review was done and have arrived at the following: 0.8% for Management Risk and 0.9% for Liquidity Risk.

Resulting Discount Rate

4.14 Resulting Discount Rate used for this valuation is 8.87%, or say, 9.0%.

Capitalization Rate

4.15 A discount rate is used to calculate the present value of future projections of a benefit stream when growth varies from year to year. However, if growth is estimated to remain level throughout the life of the investment, a capitalization rate is often used. In its most basic form, the relationship between discount rate and a capitalization rate can be summarized as follows:

Capitalization Rate = Discount Rate – Growth

For purposes of this valuation, a long-term growth rate of 4.5% has been assumed. This is based on what the Property is perceived to achieve in the long-term considering the present situation of the market. Using this assumption, resulting Capitalization Rate would be 4.5%.

Key Financial Assumptions

4.16 We relied on the historical and projected assumptions brought about by our research and as provided by the Client. These financials were analyzed to ensure reasonableness by comparing projected revenue growth rates and other operating expenses based on historical performance. Based on interviews with the representatives of the company, projections were prepared to reflect the current and expected future market conditions.

a. **Revenues**

i. Cashflow projection starts in 01 July 2021 and runs for a period of 10 years.

ii. The revenues come from the rental of office units and parking slots. In estimating the annual rents of the subject units/slots, we have adopted the contract rents as appearing in the copy of the rent roll provided to us by the Client for the occupied units/leased parking slots. After the expiration of lease, lease rates then are aligned with market rates and are assumed to have an average of 4-year lease contracts. Management Dues and Aircon Dues are likewise charged to the tenants monthly on a per sq.m. basis. Management dues are for common and/ or shared utilities, facilities and services and A/C use (exclusive of power consumption).

iii. It would be important to note that Management Dues collected act as a cost recovery mechanism for all expenses related to the day to day operations of the building and its common areas.

iv. Occupancy assumptions were based on the actual performance of the Property as well as the prevailing trend in the subject area taking into consideration the forecasted effect of the global pandemic in the office market. Occupancy of the Property as of valuation date is at 99% while the historical average performance of the Property for the last two years is at 99%. Occupancy rates include committed leases. For this valuation exercise, we are assuming an average overall vacancy allowance of 3%. This assumed vacancy allowance for the whole cashflow period is used to account for unanticipated vacancies brought about by early terminations and non-renewals, and rental concession requests from tenants.

v. We used actual escalation rates indicated in the rent roll for all existing leases up until their lease expires. After which, an average escalation of 5% was then be applied year on year until the end of the cash flow.

b. **Cost & Expenses**

i. Operating Expenses which would include administrative and utility expenses are normally charged against the Common Use Service Area (CUSA) Fees or Association Dues being collected monthly to the individual tenants. However, there are instances when CUSA funds are insufficient to pay off all common charges. If and when this happens, the owners/administrators would have to pay off these expenses and this has been taken into consideration in the projections.

ii. Operating Costs and Expenses are assumed to be an average of approximately 6% of the Total Net Revenues. Operating costs and expenses included are basically divided in to two – real estate expense and miscellaneous expenses. Real Estate expenses are as follows: repairs & maintenance, management fee, loss from CUSA and miscellaneous expenses. While under General Administrative Expense are –taxes and licenses, commissions, insurance, and communication and supplies expenses.

These expenses are projected either as a percentage of the rental revenues or the total net revenues. These percentage allocations were from the historical and projected performance of the Property.

iii. Annual Capital Expenditures (CAPEX) for the entire cashflow period, on the other hand, was assumed to be 1.5% of the Net Leasing Revenues. This assumption is based on benchmarking and analysis of current market practice in allocating CAPEX reserve.

This allocation would help ensure that the Property would operate efficiently and maintain its good and sound condition.

Resulting Market Value

a. Earnings Before Income Tax, Depreciation and Amortization (EBITDA) for the whole duration of the cashflow shall be discounted at the derived Discount Rate of 9.00%.

b. The sum of discounted cashflows including the Terminal Value of the Property represents the Market Value of the Property.

The Terminal Value of the Property is the value of the property beyond the explicit forecast period. It is assumed that the property or business will continue to generate cashflows in perpetuity. As mentioned earlier, Terminal Capitalization Rate used is 4.5%.

The Discounted Cashflow showing the estimated Market Value of the subject property is attached as Appendix **5**.

Direct Capitalization Method

4.17 The Direct Capitalization Method is a real estate valuation method that helps convert a single year's income into value by dividing the Net Operating Income with an appropriate Capitalization Rate. This method assumes that the Property has a stabilized net operating income. All parameters of a typical investor return expectations are represented either explicitly or implicitly in either income forecast or the capitalization rate. The direct capitalization rate, as the ratio of income to value, serves as a proxy for investor return assumptions.

Resulting Market Value

4.18 We made use of the single year's cashflow projection (2022) to derive the Market Value using the Direct Capitalization Method. Capitalization rate adopted to arrive at the Property Market Value is 4.5%.

Valuation basis

Market Value

4.19 Market Value is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

Valuation date

Valuation date

4.20 The valuation date is **30 June 2021**.

Assumptions

Assumptions

4.21 Our valuation is necessarily based on a number of assumptions which have been drawn to your attention in our General Terms of Business, Letter of Engagement and within this report.

Key Assumptions 4.22 Whilst we have not provided a summary of all these assumptions here, we would in particular draw your attention to a key assumption that we relied on a very considerable extent on the information provided by the Client and have assumed that documents provided to us such as details of the condominium units, floor plans, building tenancies and other relevant matters are factual. We were also advised by the Client that no material facts have been omitted from the information provided.

Special Assumptions 4.23 We were instructed to re-value the Property without a re-inspection. We have, thus, considered changes to the physical attributes and/or characteristics of the Property which have occurred between the valuation date and the date of our previous valuation as confirmed by the Client. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.

4.24 We have adopted the details of the subject units provided to us by the Client and have assumed this to be accurate. Further, the subject units were assumed to be owned by Robinsons Land Corporation.

4.25 In applying Income Approach to value, we have considerably relied on the information provided to us by the Client which includes the following: lease contracts, revenue and expense projections, historical and projected occupancies. Upon expiration of contracts, we estimated the lease rates based on the acceptable escalations in the market.

Valuation Results

Using Market Approach 4.26 Using the **Market Approach**, the Market Value of the Property, may be summarized as under:

DESCRIPTION	Market Value (PhP)
Condominium Units	
Retail (Ground Floor) Unit	151,068,000
Low Zone (7th to 18th Floor) Office Units	2,589,666,000
Mid Zone (19th to 28th Floor) Office Units	2,481,105,000
High Zone (29th to 37th Floor) Office Units	2,332,893,000
	7,554,732,000
Parking Slots	**451,500,000**
TOTAL	**8,006,232,000**
ROUNDED TO	**8,006,000,000**

4.27 The Market Value of the Property is estimated at **PhP8,006,000,000 (EIGHT BILLION, SIX MILLION PHILIPPINE PESOS)**.

Using Income Approach 4.28 Using the **Income Approach** on the other hand, the Market Value of the Property is estimated as follows:

DCF Analysis	**PhP11,476,000,000**
Direct Capitalization Method	**PhP12,359,000,000**

Calculation 4.29 We attach a copy of our valuation calculations for the Income Approach at Appendix **5 & 6**.

Comments 4.30 The values arrived at using the Income Approach are noted to be higher than the value arrived at using the Market Approach. This is because, unlike the Income Approach, the Market Approach does not capture the income potential of the Property.

4.31 For purposes of this valuation, we deemed it appropriate to adopt the results arrived at by the Income Approach – DCF Analysis, since this method is usually used to determine the value of an income-generating property, as it also captures the Property's future economic benefits, giving a better representation of the Property's Market Value at an acceptable rate of return that would compensate for the risks associated with the particular investment. It likewise takes into consideration market cycles that Direct Capitalization Method cannot capture.

Conclusion of Value 4.32 In conclusion, we are of the opinion that the Market Value of the Property, reckoned as of **30 June 2021**, is:

PhP11,476,000,000 (ELEVEN BILLION, FOUR HUNDRED SEVENTY-SIX MILLION PHILIPPINE PESOS).

Note*: The outbreak of the Novel Coronavirus (COVID-19), declared by the World Health Organization as a "Global Pandemic" on 11th March 2020, has impacted global financial markets. Travel restrictions have been implemented by many countries. In the Philippines, market activity is being impacted in all sectors. As at the valuation date, we consider that we can attach less weight to previous market evidence for comparison purposes, to inform opinions of value. Indeed, the current response to COVID-19 means that we are faced with an unprecedented set of circumstances on which to base a judgement. Our valuation is therefore reported on the basis of "material valuation uncertainty" per IVS 103 of the International Valuation Standards. Consequently, less certainty – and a higher degree of caution – should be attached to our valuation than would normally be the case. Given the unknown future impact that COVID-19 might have on the real estate market, we recommend that you keep the valuation of this property under frequent review.*

Value forwarded …………………………… PhP11,476,000,000

Appendix 1 - Assumptions, Limiting Conditions and Disclaimers

Basis of Value	Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion." In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property. It is further assumed that title to the property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable. The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.
Property Rights appraised	The rights appraised in this report are the property rights in fee simple, free and clear. "Fee simple" is defined as absolute ownership, without limitations to any particular class of heirs or restrictions, but subject to the limitations of eminent domain, escheat, police power and taxation. We assume that the fee simple interest is marketable and in compliance with the applicable laws of the Philippines.
Fractional Interests:	When the study contains a valuation relating to an estate in land that is less than the whole fee simple estate, the value reported for such estate relates to a fractional interest only in the real estate involved, and the value of this fractional interest plus the value of all other fractional interests may or may not equal the value of the entire fee simple estate which is considered the whole. When the valuation report contains an allocation of the total valuation between land and building improvements, such allocation applies only under the existing program of utilization. The separate valuations for land and building cannot be used in conjunction with any other valuation/appraisal and will be invalid if so used.
Assumptions:	The valuation is based on the condition of the economy and the purchasing power of the Philippine Peso as of the effective date of valuation. We have assumed that the floor areas provided us have been calculated in accordance with engineering standards, and assumed herein to be true and correct. Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.
Information Supplied By Others	Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser. Information provided by informed local sources, such as government agencies, financial institutions, Realtors, buyers, seller and others, was weighed in the light in which it was supplied and checked by secondary means; however, no responsibility is assumed for possible misinformation.
Legal Issues:	This valuation assumes no responsibility for the validity of legal matters affecting the property. The ownership history reported in this valuation is based on the appraiser's research of public records, which are assumed to be accurate and complete. It is not the intent of the valuation to offer a legal opinion of title. It is further assumed that the property has good title, responsible ownership and competent management. Any liens or encumbrances which may now exist have been disregarded. The appraiser is not required to give testimony or attendance in court by reason of this valuation, with reference to the property in question, unless arrangements have been previously made.
Liability:	The liability of Santos Knight Frank, Inc. and its directors and employees is limited to the addressee of this report only. No accountability, obligation or liability to any third party is accepted. In the event we are subject to any liability in connection with this engagement, regardless of legal theory advanced, such liability will be limited to the amount of fees we received for this engagement.
Environmental Conditions:	It is assumed that there is full compliance with all applicable Philippine environmental regulations and laws unless non-compliance is stated, defined, and considered in this appraisal report.
Town Planning:	It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.
Condition of Improvements:	We have inspected the improvements and structures. However we have not carried out a structural survey nor tested any of the services or facilities, nor have we inspected unexposed or inaccessible portions of the building, and are therefore unable to state that these are free from defect, rot, infestation, asbestos or other hazardous material. We have therefore, viewed the general state of repair of the property and advise that we did not notice any obvious signs of structural defect or dilapidations. Furthermore, the property appears to be in reasonable condition having regard to its age and use and unless otherwise stated. We also assume that the building complies with all relevant statutory requirements in respect of matters such as sanitary, building and fire safety regulations and standards.
Valuation Methodology:	In estimating Fair Value for financial reporting purposes, we still adopted the same Valuation techniques by using any one or the combination of the three (3) Approaches to Value, namely: Market Data (or Direct Sales Comparison) Approach, Cost Approach, and the Income Approach. Briefly described, the Market Data (or Sales Comparison) Approach considers prices recently paid and/or offered for similar items of property with adjustments made to the indicated market prices to reflect the condition and utility of the appraised property relative to market comparatives. The Cost Approach considers the cost to reproduce or replace the property appraised with new assets of like kind, and from this amount an allowance is deducted for depreciation arising from physical deterioration or obsolescence, whether from functional or external causes. In the Income Approach, an estimate is made of the prospective economic benefits of ownership into the future and these benefits are discounted to its present worth or capitalized into an indication of value.
Others:	This report and valuation shall be used only in its entirety and no part shall be used without the whole report. It may not be used for any purpose other than the intended purpose mentioned herein. Possession of this report or any copy thereof does not carry with it the right of copying or publication. All copies will originate from Santos Knight Frank, Inc. and will be signed and dated as such. Neither the whole nor any part of the report or any reference to our name, our valuation and our report may be included in any document, circular or statement nor published without our prior written consent to the form and context in which it may appear. The delivery and acceptance of this report completes this assignment.

Attention: **MR. FREDERICK D. GO**
President and Chief Executive Officer

Subject: **Terms of Engagement for Valuation Services**

Dear Mr. Go:

Thank you for your interest in our Valuation Services. We refer to your invitation of 03 August 2020 requesting Santos Knight Frank, Inc. ("SKF") to submit a proposal for valuation (the "Valuation") in respect of the properties detailed below (the "Properties").

This proposal, together with our General Terms of Business for Valuation Services ("General Terms"), sets out our terms of engagement for carrying out this instruction. Once agreed and signed, this proposal shall constitute our Letter of Engagement ("Letter"). This Letter and the General Terms (together, the "Agreement") exclude any other terms which are not specifically agreed to us in writing. To the extent that there is any inconsistency between the Letter and the General Terms, this Letter shall take precedence.

1. **Client**
   Our Client for this Valuation is Robinsons Land Corporation (the "Client", "you" or "your").

2. **Purpose of Valuation**
   The Valuation is provided solely the purpose of transferring some of the Client's assets to the REIT Company and its application for a Tax-Free Exchange Ruling with the Bureau of Internal Revenue and listing of the REIT Company in the Philippine Stock Exchange (the "Transaction"). Specifically, the Valuation will be used for the Client's Financial Statements to be attached to the Offering Circular as required by the Securities and Exchange Commission (SEC) and will be attached as an appendix to the Client's REIT Plan. In accordance with clause 4.1 of our General Terms, the Valuation may not be used for any other purpose without our express written consent. The Valuation will be made accessible in the public domain as part of the regulatory requirements of the Transaction.

3. **Term & Termination**
   This appointment will commence upon signing of this Agreement and shall continue to be in effect for a period of two (2) years. Any extension of the Term of this Agreement shall be mutually agreed upon by the parties in writing.

23. Electronic Communication

During the engagement, both parties may wish to communicate electronically with each other. However, electronic transmission of information cannot be guaranteed to be secure or virus-or error-free and information could be intercepted, corrupted, lost or destroyed, arrive late or incomplete, or otherwise be adversely affected or unsafe to use. Both parties agree to accept these risks and so each party will be responsible for protecting its own systems and interests in relation to electronic communications. Neither party will have any liability to the other party on any basis for any loss or damage arising from or in connection with the electronic communication of information between both parties or their reliance on such information.

24. Acceptance

Please sign and return a copy of this Letter signifying your acceptance of the terms of the Agreement. We reserve the right to withhold any Valuation and / or refrain from discussing it with you until this Letter has been countersigned and returned.

Your attention is drawn to the "Important Notice" in the General Terms. If you have any questions regarding this Letter and / or the terms of the Agreement, please let us know before signing this Letter.

Thank you for choosing Santos Knight Frank, Inc. and we look forward to working with you on this important engagement.

Sincerely,
SANTOS KNIGHT FRANK, INC.

Subject: **Amendment to Terms of Engagement and General Terms of Business for Valuation Services Dated 03 August 2020 ("Amendment")**

Dear Mr. Go:

We refer to subject Letter of Engagement and General Terms of Business for Valuation Services (together, the "Agreement") between Robinsons Land Corporation (the "Client", "you" or "your") and Santos Knight Frank, Inc. ("SKF") for the valuation of fourteen (14) office buildings (the "Covered Properties").

For this purpose, the Agreement is amended as follows:

The first, second, and third and fourth paragraphs shall now read:

For the Valuation

I. Valuation for Asset Transfer to REIT Company and its application for a Tax-Free Exchange Ruling;

For Valuation Update

II. Valuation of Properties for REIT listing to PSE:

Our Valuation of 14 Properties will be as follows:

1. Valuation for 4 Properties
2. Periodic Update of 14 Properties
   Under REIT Company (Quarterly basis – optional)
3. Valuation Update of 14 Properties under REIT Company

Except as amended hereby, all the provisions of the Agreement which are not inconsistent herewith are incorporated herein by way of reference and from date hereof, the Agreement and this Amendment shall be read as one integrated document.

Kindly affix your signature on the conforme portion below and return one (1) original signed copy to us.

Sincerely, **SANTOS KNIGHT FRANK, INC.**	Approved and agreed to by: **ROBINSONS LAND CORPORATION**

Appendix 3 - General Terms of Business

General Terms of Business for Valuation Services

These General Terms of Business (the "**General Terms**") and our Letter of Engagement (the "**Letter**"), together form the agreement between you and us (the "**Agreement**"). References to "**you**", "**your**" etc. are to persons or entities who are our client and, without prejudice to clauses 3 and 4 below, to any persons purporting to rely on our Valuation.

Unless **the** context otherwise requires, all other terms and expressions used but not defined herein shall have the meaning ascribed to them in the Letter.

When used herein or in the Letter, the term "**Valuation**" shall mean any valuation report, advance report, supplementary report or subsequent/update report, produced pursuant to our engagement and any other replies or information we produce in respect of any such report and/or any relevant property. Any words following the terms "**including**", "**in particular**" or any similar expression shall be construed as illustrative and shall not limit the sense of the words preceding those terms.

All of the terms set out in these General Terms shall survive termination of the Agreement.

1. Santos Knight Frank, Inc.

1.1. Santos Knight Frank, Inc. ("**Santos Knight Frank**", "**our**", "**us**", "**we**") is a Philippine corporation with Securities and Exchange Commission (SEC) Registration Number A199818549.

1.2. Our registered office is at 10/F Ayala Tower & Exchange Plaza, Ayala Avenue, Makati City where a list of members may be inspected.

1.3. Any representative of Santos Knight Frank, Inc. described as *Director* is either a member or an employee of Santos Knight Frank, Inc. and is not a member of the Board of Directors. The term *Director* has been retained because it is an accepted way of referring to senior professionals. The term "**Santos Knight Frank Person**" shall, when used herein, mean any member, employee, or consultant of Santos Knight Frank, Inc.

1.4. Our Tax Identification Number (TIN) is 201-626-570-000.

1.5. The details of our professional indemnity insurance will be provided to you on request.

1.6. Santos Knight Frank, Inc., being a corporation, is regulated by the Philippine Securities and Exchange Commission (SEC). It is also an SEC-accredited asset valuer. In accordance with reportorial filings with the SEC, it may be necessary to disclose valuation files to them. By instructing us, you give us your permission to do so. Where possible we will give you prior notice before making any such disclosure, although, this may not always be possible. We will use reasonable endeavours to limit the scope of any such disclosure and to ensure any disclosed documents are kept confidential.

1.7. Valuations will be carried out in accordance with the 2019 edition of the International Valuation Standards (IVS) by valuers who conform to its requirements and with regard to relevant statutes or regulations. Our senior valuers are Real Estate Appraisers licensed and regulated by the Philippine Professional Regulation Commission (PRC).

2. Governing law and jurisdiction

2.1. The Agreement and any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with it or its subject matter or formation or any Valuation shall be governed by and construed in accordance with Philippine laws.

2.2. Philippine courts shall have exclusive jurisdiction to settle any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with this Agreement or its subject matter or formation or any Valuation. This will apply wherever the relevant property or the client, or any relevant third party, is located or the service is provided.

3. Limitations on liability

3.1. Subject to clause 3.7, our maximum total liability in connection with or arising out of this Agreement and/or its subject matter and/or the Valuation is limited to our total service fees as set out in the Letter.

3.2. Subject to clause 3.7, we will not be liable for any loss of profits or for indirect or consequential loss or damages.

3.3. Subject to clause 3.7, any limitation on our liability will apply however such liability is or would otherwise have been incurred, whether in contract, tort (including negligence), for breach of statutory duty, or otherwise.

3.4. Except as set out in clauses 3.5 and 4.7 and 4.8 below, no third party shall have any right to enforce any of the terms of this Agreement.

3.5. No claim arising out of or in connection with this Agreement may be brought against any Santos Knight Frank Person. Those individuals will not have a personal duty of care to you or any other person and any such claim for losses must be brought against Santos Knight Frank, Inc. Any Santos Knight Frank Person may enforce this clause but the terms of this Agreement may be varied by agreement between the client and Santos Knight Frank, Inc. at any time without the need for any Santos Knight Frank Person to consent.

3.6. No claim, action or proceedings arising out of or in connection with the Agreement and/or any Valuation shall be commenced against us after the expiry of the earlier of (a) two years from the Valuation Date (as set out in the relevant Valuation) or (b) any limitation period prescribed by law.

3.7. Whether or not specifically qualified by reference to this clause, nothing in the Agreement shall exclude or limit our liability in respect of fraud, or for death or personal injury caused by our negligence or negligence of those for whom we are responsible, or for any other liability to the extent that such liability may not be so excluded or limited as a matter of applicable law.

4. Purpose, reliance and disclosure

4.1. The Valuation is prepared and provided solely for the stated purposes. Unless expressly agreed by us in writing, it cannot be relied upon, and must not be used, for any other purpose and, subject to clause 3.7, we will not be liable for any such use.

4.2. Without prejudice to clause 4.1 above, the Valuation may only be relied on by our Client. Unless expressly agreed by us in writing the Valuation may not be relied on by any third party and we will not be liable for any such purported reliance.

4.3. Subject to clause 4.4 below and for the stated purposes, the Valuation is confidential to our Client and must not be disclosed, in whole or in part, to any third party without our express written consent (to be granted or withheld in our absolute discretion). No liability is accepted to any third party for the whole or any part of any Valuation disclosed in breach of this clause.

4.4. Our appraisers are not required to give testimony or attendance in court by reason of this Valuation with reference to the property in question, unless arrangements have been previously made.

4.5. Except for the stated purposes, neither the whole nor any part of the Valuation and/or any reference thereto may be included in any published document, circular or statement nor published in any way whatsoever whether in hard copy or electronically (including on any website) without our prior written consent and approval of the form and context in which it may appear..

4.6. Where permission is given for the publication of a Valuation, neither the whole nor any part thereof, nor any reference thereto, may be used in any publication or transaction that may have the effect of exposing us to liability for actual or alleged violations of SEC Memorandum Circular No. 2, series of 2014 (Guidelines on Asset Valuations) or Republic Act No. 8799 (Securities Regulation Code), as amended and its Implementing Rules and Regulations.

4.7. You agree that we, and/or any Santos Knight Frank Person, may be irreparably harmed by any breach of the terms of this clause 4 and that damages may not be an adequate remedy. Accordingly, you agree that we and/or any Santos Knight Frank Person may be entitled to the remedies of injunction or specific performance, or any other equitable relief, for any anticipated or actual breach of this clause 4.

4.8. You agree to indemnify and keep fully indemnified us, and each relevant Santos Knight Frank Person, from and against all liabilities, claims, costs (including legal and professional costs), expenses, damages and losses arising from or in connection with any breach of this clause 4 and/or from the actions or omissions of any person to whom you have disclosed (or otherwise caused to be made available) our Valuation otherwise than in accordance with this clause 4.

5. Knight Frank network

5.1. Santos Knight Frank, Inc. is a member of an international network of independent firms which may use the "Knight Frank" name and/or logos as part of their business name and operate in jurisdictions outside the Philippines (each such firm, an "**Associated Knight Frank Entity**").

5.2. Unless specifically agreed otherwise, in writing, between you and us: (i) no Associated Knight Frank Entity is our agent or has authority to enter into any legal relations and/or binding contracts on our behalf; and (ii) we will not supervise, monitor or be liable for any Associated Knight Frank Entity or for the work or actions or omissions of any Associated Knight Frank Entity, irrespective of whether we introduced the Associated Knight Frank Entity to you.

5.3. You are responsible for entering into your own agreement with any relevant Associated Knight Frank Entity.

5.4. This document has been originally prepared in the English language. If this document has been translated and to the extent there is any ambiguity between the English language version of this document and any translation thereof, the English language version as prepared by us shall take precedence.

6. Severance

If any provision of the Agreement is invalid, illegal or unenforceable, the parties shall negotiate in good faith to amend such provision so that, as amended, it is legal, valid and enforceable and, to the greatest extent possible, achieves the intended commercial result of the original provision. If express agreement regarding the modification or meaning or any provision affected by this clause is not reached, the provision shall be deemed modified to the minimum extent necessary to make it valid, legal and enforceable. If such modification is not possible, the relevant provision shall be deemed deleted. Any modification to or deletion of a provision under this clause shall not affect the validity and enforceability of the rest of this Agreement.

7. Entire agreement

7.1. The Agreement, together with any Valuation produced pursuant to it (the Agreement and such documents together, the "**Contractual Documents**") constitute the entire agreement between you and us and supersedes and extinguishes all previous agreements, promises, assurances, warranties, representations and understandings between you and us, whether written or oral, relating to its subject matter.

7.2. Subject to clause 3.7 above, you agree that in entering into the Agreement you do not rely on, and shall have no remedies in respect of, any statement, representation, assurance or warranty (whether made innocently or negligently) that is not expressly set out in the Contractual Documents. You further agree that you shall have no claim for innocent or negligent misrepresentation based on any statement set out in the Contractual Documents.

7.3. The Letter and these General Terms shall apply to and be incorporated in the contract between us and will prevail over any inconsistent terms or conditions contained or referred to in your communications or publications or which would otherwise be implied. Your standard terms and conditions (if any) shall not govern or be incorporated into the contract between us.

7.4. Subject to clause 3.7 and clause 6, no addition to, variation of, exclusion or attempted exclusion of any of the terms of the Contractual Documents will be valid or binding unless recorded in writing and signed by duly authorised representatives on behalf of the parties.

8. Assignment

8.1. You shall not assign, transfer, mortgage, charge, subcontract, declare a trust over or deal in any other manner with any of the rights and obligations under the Agreement without our prior written consent (such consent to be granted or withheld in our absolute discretion).

9. Force majeure

9.1. Neither party shall be in breach of this Agreement nor liable for delay in performing, or failure to perform, any of its obligations under this Agreement if such delay or failure results from events, circumstances or causeswhich could not be foreseen, or which, though foreseen, were inevitable.

10. Our fees

10.1. Without prejudice to clause 10.3 below, you become liable to pay our fees upon issuance of the Valuation. For the avoidance of doubt, unless expressly agreed otherwise in writing, the payment of our fees is not conditional on any other events or conditions precedent.

10.2. If any invoice remains unpaid after 30 days of the date on which it is presented, we reserve the right to charge interest, calculated daily, from the date when payment was due until payment is made at 3%

10.3. If we should find it necessary to use legal representatives or collection agents to recover monies due, you will be required to pay all costs and disbursements so incurred.

10.4. If an appraisal analysis is ordered and the assignment is cancelled before completion, we reserve the right to receive compensation, by way of damages, in an amount equal to 70% of the total fee for the assignment.

10.5. If you delay the instruction by more than 30 days or materially alter the instruction so that additional work is required at any stage or if we are instructed to carry out additional work that we consider (in our reasonable opinion) to be either beyond the scope of providing the Valuation or to have been requested after we have finalised our Valuation (including, but not limited to, commenting on reports on title), we will charge additional fees for this work. Such additional fees will be calculated on the basis of a proportion of the total fee by reference to reasonable time and expenses incurred.

10.6. Where we agree to accept payment of our fees from a third party, such fees remain due from you until payment is received by us.

11. Anti-bribery and corruption and Anti-Money Laundering

We agree that throughout the term of our appointment we shall:

(a) comply with all applicable laws, statutes, regulations, and codes relating to anti-bribery and corruption and Anti-Money Laundering laws (the "**Relevant Requirements**");

(b) not engage in any activity, practice or conduct which would constitute an offense;

(c) maintain anti-bribery, anti-corruption, and anti-money laundering policies to comply with the Relevant Requirements and any best practice relating thereto; and

(d) promptly report to you any request or demand for any undue financial or other advantage of any kind in connection with the performance of our services to you.

12. Portfolios

Properties comprising a portfolio, unless specifically agreed with you otherwise, will be valued separately and upon the assumption that the properties have been marketed individually and in an orderly manner.

13. Land Register inspection and searches

We are not required to undertake searches, validations or inspections of any kind for title or price paid information in any publicly available land registry.

14. Title and burdens

We will assume, unless specifically informed and stated otherwise, that each property has good and marketable title and that all documentation is satisfactorily drawn and that there are no unusual outgoings, planning proposals, onerous restrictions or local authority intentions which affect the property, nor any material litigation pending.

15. Disposal costs and liabilities

No allowance is made in our Valuation for expenses of realisation or for taxation which may arise in the event of a disposal and our Valuation is expressed as exclusive of any VAT that may become chargeable. Properties are valued disregarding any mortgages or other charges, including commissions.

16. Sources of information

We rely upon the information provided to us by you, as to details of tenure and tenancies, planning consents and other relevant matters, as summarised in our Valuations. Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser.

17. Identity of property to be valued

We will exercise reasonable care and skill (but will not have an absolute obligation to you) to ensure that the property, identified by the property address in your instructions, is the property inspected by us and contained within our valuation report. If there is ambiguity as to the property address, or the extent of the property to be valued, this should be drawn to our attention in your instructions or immediately upon receipt of our report.

18. Boundaries

Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.

19. Planning, highway and other statutory regulations

19.1. Enquiries of the relevant planning and highways authorities in respect to matters affecting properties, where considered appropriate, are normally only obtained from the corresponding government agency. We can only state whatever current conditions may be. We recommend that formal written enquiries should be undertaken by your lawyers who should also confirm the position with regard to any legal matters referred to in our Valuations.

19.2. It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative, regulatory, or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.

19.3. We assume that the premises comply with all relevant statutory requirements including environmental, building, fire, and sanitation regulations.

20. Property insurance

Our Valuation assumes that each property would, in all respects, be insurable against all identifiable risks.

21. Building areas and age

Where so instructed, areas provided from a quoted source will be relied upon. Any dimensions and areas measured on location or from plan/s are calculated and are quoted to a reasonable approximation, with reference to their source. Where the age of the building is estimated, this is for guidance only.

22. Structural condition

Building, structural and ground condition surveys are detailed investigations of the building, the structure, technical services and ground and soil conditions undertaken by specialist building surveyors or engineers and fall outside the normal scope of a valuation. Since we will not have carried out any of these investigations, we are unable to report that any property is free of any structural fault, rot, infestation or defects of any other nature, including inherent weaknesses due to the use in construction of deleterious materials. We do reflect the contents of any building survey report provided to us in advance, or any defects or items of disrepair of which we are advised or which we note during the course of our ocular inspections but otherwise assume properties to be free from defect.

23. Ground conditions
Unless informed otherwise in writing, we assume there to be no adverse ground or soil conditions and that the load bearing qualities of the sites of each property are sufficient to support the building constructed or to be constructed thereon.

24. Environmental issues

24.1. Investigations into environmental matters by suitably qualified environmental specialists would usually be commissioned by most responsible purchasers or chargees of higher value properties or where there was any reason to suspect contamination or a potential future liability. Furthermore, such investigation would be pursued to the point at which any inherent risk was identified and quantified before a purchase proceeded. Where we are provided with the conclusive results of such investigations, on which we are instructed to rely, these will be reflected in our Valuations with reference to the source and nature of the enquiries. We would endeavour to point out any obvious indications or occurrences known to us of harmful contamination encountered during the course of our valuation enquiries.

24.2. However, we are not environmental specialists and therefore we do not carry out any scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination or any other environmental searches. If we are not provided with the results of appropriate investigations as outlined above and where there is no obvious indication of harmful contamination, our Valuation will be provided on the assumption that the relevant property is unaffected. Where we are informed that contamination is suspected or confirmed, but adequate investigation has not been carried out and made available to us, then the Valuation will be qualified only by reference to it.

25. Minerals, timber, airspace etc.
Unless specifically agreed otherwise in writing and so stated within the main body of the relevant Valuation, we do not value or attempt to value or take into account any potential income stream or other beneficial or detrimental effect or other factor relating to undiscovered or unquantified mineral deposits, timber, airspace, sub-ground space or any other matter which would not be openly known in the market and considered to have value.

26. Legal advice

26.1. We are appointed to provide valuation opinion(s) in accordance with our professional duties as Appraisers. The scope of our service is limited accordingly. The valuation assumes no responsibility for the validity of legal matters affecting the property. It is not the intent of the valuation to offer a legal opinion of title. Any liens or encumbrances which may now exist have been disregarded. We are not qualified legal practitioners and we do not provide legal advice and any statements made by us, or advice given, in a legal context should be construed accordingly.

26.2. Where appropriate we will liaise with your legal advisors. However, we accept no responsibility for any work carried out by them and we will not be liable for anything contained in legal documentation prepared by them.

26.3. Where we consider it is necessary for the provision of the Valuation and/or specifically agree to do so, and any additional fees we require for this work are agreed, we will read legal documents (including leases, licences etc.), however, (save for any comment concerning the impact of our interpretation of such documents on value) our interpretation of such documents cannot be relied upon to be legally correct. Where we do interpret legal documents, we will, for the purposes of providing our Valuation, assume our interpretation to be correct.

27. Loan security
Where instructed to comment on the suitability of property as a loan security we are only able to comment on any inherent property risk. Determination of the degree and adequacy of capital and income cover for loans is the responsibility of the lender having regard to the terms of the loan.

28. Build cost information
In the provision of valuation services we do not hold ourselves out to have expertise in assessing build costs. Where our instruction requires us to have regard to build cost information, for example in the valuation of properties with development potential, we strongly recommend that you supply us with build cost and other relevant information prepared by a suitably qualified construction cost professional, such as a quantity surveyor. The Valuation will be stated to have been arrived at in reliance upon the build cost information supplied to us by you. In the absence of any build cost information supplied to us, we may have regard to published build cost information. Build costs produced using this approach must be assumed to be unreliable or inaccurate; any reliance which can be placed upon our Valuation in these circumstances is severely restricted. Specialist professional advice on the build costs should be sought by you. If you subsequently obtain specialist build cost advice, we recommend that we are instructed to review our Valuation.

29. Reinstatement assessments
A reinstatement assessment for insurance purposes is a specialist service and we recommend that separate instructions are issued for this specific purpose. If an indication is required as a check against the adequacy of existing cover this should be requested and will be so stated in the body of the relevant Valuation. Any indication given is provided for guidance only and must not be relied upon as the basis for insurance cover. In any event, our reinstatement assessment should be compared with the owner's and if there is a material difference, then a full reinstatement valuation should be reconsidered.

30. Comparable evidence
Where comparable evidence information is included in our Valuation, this information is often based upon our oral enquiries and its accuracy cannot always be assured, or may be subject to undertakings as to confidentiality. However, such information would only be referred to where we had reason to believe it or where it was in accordance with our expectation. In addition, we have not inspected comparable properties.

31. Valuation bases
Valuations are carried out on a basis appropriate to the purpose for which they are intended and in accordance with the relevant definitions, commentary and assumptions. The basis of valuation will be agreed with you and specified in the Letter and in the relevant Valuation.

Important Notice

If you have any queries relating to this Agreement please let us know as soon as possible, and in any event before signing the Letter and/or giving us instructions to proceed.

Your instructions to proceed, preferably signing on the space provided for under the Letter, will constitute your acceptance to use our services on the terms of the Agreement.

Accordingly, our commencement of work pursuant to your instructions shall constitute acceptance of your offer and as such establish the contract between us on the terms of the Agreement.

Appendix 8 - Property Description

Robinsons Summit Center

As seen during our inspection for the previous valuation done, Robinsons Summit Center is a thirty-seven (37)-storey, reinforced concrete-framed building with helipad and four (4)-level basement. Construction of the building was reportedly completed in December 2001. The building is divided into three (3) zones; the Low Zone (Ground to 18th Floors), the Mid Zone (19th to 28th Floors) and the High Zone (29th to 37th Floors). The ground floor houses the Landbank of the Philippines, Mini Stop, Highlands Coffee and The Sandwich Company. Architectural details and/or finishes of the building consist of reinforced concrete footings and foundations, reinforced concrete floor slabs at all levels, reinforced concrete columns, girders and beams construction. External finishes of aluminum panels with curtain wall of clear and solar reflective glass and stone cladding to podium. Interior finishes is granite and marble to walls floor finishes for the main and elevator lobbies, Typical standard office floors are plaster and paint to core walls and columns, plasterboard and paint to inside face of curtain wall.

Individual tenancy fit-outs are generally the responsibility of tenants according to their particular requirements. Fit-outs introduced typically comprise of a combination of raised flooring, wall-to-wall carpet, ceramic or vinyl tile coverings, suspended tile or plasterboard lined ceilings with recessed fluorescent lighting. These fit-outs were not considered in the valuation since these were introduced by the tenants. The building is designed to comprise only 6 units per floor with an average floor plate of only 1,200 sq.m. The 8th and 9th floors are occupied by AVALOQ, formerly by Fitness First. The 36th and 37th floor house the Philippine operations of Hewlett-Packard Philippines Corporation. The building also has a helipad located on the roofdeck, a 10-level parking with over 388 regular slots, and is equipped with a state-of-the-art building management and communications system.

The building is provided with mechanical and electrical services such as elevators, air conditioning and ventilating system, electrical power and distribution system, domestic water supply system, fire fighting system, and security monitoring, described in detail and valued in the equipment section of this report. It is painted and provided with complete electrical lighting and plumbing facilities and two (2) cistern tanks at basement 4 with a total capacity of 70,671.30. Based on information provided to us, the building has a total gross floor area of about 60,971.07 sq.m.

Subject Units

Based on documents provided to us by the Client, the Property consists of thirty (30) office condominium units, with a total floor area of **36,007.44 sq. m.**, one (1) retail condominium unit with an area of **634.74 sq.m.** and three hundred one (301) appurtenant parking slots of Robinsons Summit Center. There is only one (1) unit of Robinsons Summit Center that is not owned by RLC and is not covered by this valuation.

* Building already exists but with no assigned value in the 6th revision, assigned ZV in the 7th revision.

** Zonal value for RC was deleted because the building is purely for office/commercial use.

Note: The Zonal Value was not considered in this valuation but merely shown as a guide or tool. Zonal values do not reflect the interplay of market forces in a property but are used solely for establishing the value of a property for taxation purposes, set and implemented by the Bureau of Internal Revenue. Streets are "zoned" accordingly, and valued. These values are used as basis for the payment of Capital Gains Tax in acquisition proceedings. These values do not, per se, reflect the true market conditions in any particular locality, but are merely used as a guide or tool.

Appendices

1 Instructions

Engagement of Santos Knight Frank

Instructions	1.1	We refer to our Letter of Engagement dated 21 September 2020 and Amendment dated 01 June 2021, to provide a Valuation Report on the opinion of **Market Value** using Cost and Income Approaches of that certain Property consisting of leasehold of land, building, and building machinery & equipment of a site identified as Tera Tower located at **Tera Drive corner West Drive, within Bridgetowne, Barangay Ugong Norte, Quezon City, Metropolitan Manila, Philippines**, ("the Property"). A copy of that document is attached herein as Appendix **2**.
	1.2	This valuation has been carried out by Santos Knight Frank, Inc. ("Santos Knight Frank" or "SKF"), in accordance with our General Terms of Business for Valuations ("General Terms of Business"), as attached as Appendix **3**.
Client	1.3	Our client for this instruction is **Robinsons Land Corporation** ("the Client").
Valuation standards	1.4	This valuation has been undertaken in accordance with the International Valuation Standards, as well as other local standards.
Purpose of valuation	1.5	You have confirmed that this valuation is for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
Conflict of interest	1.6	We confirm that we do have a material connection or involvement giving rise to a potential conflict of interest, as set out below: We have conducted the valuation of the same Property for you as of 30 September 2020 for purposes of: i) the tax-free exchange of assets to a REIT Company, and (ii) for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
	1.7	You have confirmed this Engagement notwithstanding this matter, you are content for us to proceed with this instruction. We are providing an objective and unbiased valuation.
	1.8	We are acting as external and independent valuers in this engagement.
Responsibility to third parties	1.9	Our valuation report is only for the use of our Client and for the purposes for which are stated herein, and no liability is accepted to any third party for the whole or any part of its contents.
Disclosure & publication	1.10	Except for the purposes which are stated herein, neither the whole nor any part of this valuation nor any reference thereto may be included in any published

document, circular or statement nor published in any way without our prior written approval of the form or context in which it may appear.

Limitations on liability

1.11 No claim arising out of or in connection with this valuation report may be brought against any member, employee, partner, director or consultant of Santos Knight Frank, Inc. Those individuals will not have a personal duty of care to any party and any claim for losses must be brought against Santos Knight Frank, Inc.

1.12 Santos Knight Frank, Inc.'s total liability for any direct loss or damage caused by negligence or breach of contract in relation to this instruction and valuation report is limited to the amount of the level of our fee, specified in the Letter of Engagement, a copy of which is attached as Appendix **2**. We do not accept liability for any indirect or consequential loss (such as loss of profits).

1.13 The above provisions shall not exclude or limit our liability in respect of fraud or for death or personal injury caused by our negligence or for any other liability to the extent that such liability may not be excluded or limited as a matter of law.

Expertise

1.14 The valuation process was performed by **Raymond F. Dechavez**, under the supervision of **Jacqueline T. Guerta** and **Jesus Constance M. Castro**, both licensed Real Estate Appraisers. The Principal Signatory on behalf of Santos Knight Frank, Inc. and who also reviewed the Valuation Report, is **Wenceslao D. Fuentes, Jr.,** also a licensed Real Estate Appraiser. We confirm that the above-named Licensed Real Estate Appraisers are registered with the Professional Regulation Commission ("the PRC"), having sufficient current knowledge of the particular market and the skills and understanding to undertake the valuation competently.

Vetting

1.15 This report has been vetted as part of Knight Frank global standards.

Scope of enquiries & investigations

Inspection

1.16 In accordance with your instructions, due to the limited timeframe to complete the Engagement, we have not conducted a current inspection. The Property has been previously inspected. Valuation rendered is a result of a revaluation of a property that has previously been inspected.

1.17 The Client has provided us with information regarding the changes to the physical attributes and/or characteristics of the Property; current or anticipated changes in rental income from the Property; and material changes to the non-physical attributes of each property, such as other lease terms, planning consents, statutory notices and other relevant information which have occurred between the valuation date and the date of our previous valuation. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.

Investigations

1.18 The extent of enquiries/investigations made is set out in our General Terms of Business. In carrying out this instruction we have undertaken verbal / internet-

based enquiries referred to in the relevant sections of this report. We have relied upon this information as being accurate and complete.

Information provided

1.19 In this report, we have been provided with information/documents by the Client for the previous valuation done as well as for the current engagement. We have relied upon this information as being materially correct in all aspects. In particular, we detail the following:

- Typical Floor Plan
- Site Development Plan
- Lot Plan
- Floor Area Tabulation
- Rent Roll
- Financial Statements
- Projections
- Historical and Current Occupancy

1.20 In cases where we were not provided with documents or information, we did our own enquiries as outlined and stated in the report. Any assumptions in lieu of the lack of information is also set out in the relevant sections of this report.

Valuation basis

1.21 In accordance with your instructions, we have provided an opinion of value on the basis of **Market Value.**

Market Value (MV)

1.22 Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property.

It is further assumed that title to the Property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable.

The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.

Valuation date

1.23 The valuation date is **30 June 2021.**

2 The Property

Location

Address

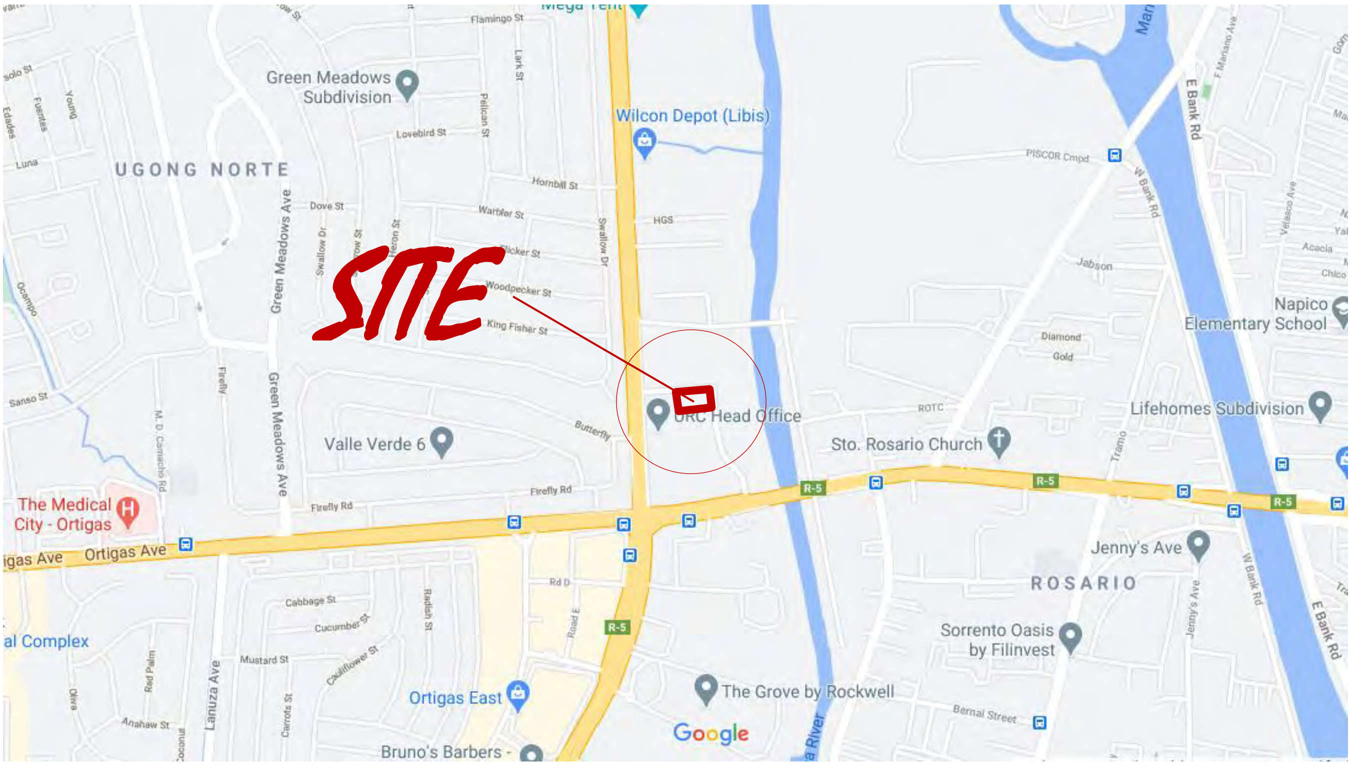
2.1 The Property, identified as Tera Tower, is located at the southwest corner of Tera Drive and West Drive, within Bridgetowne, Barangay Ugong Norte, Quezon City, Metropolitan Manila, Philippines.

The site is approximately 160 meters east from Eulogio Rodrriguez, Jr. Avenue, some 270 meters north from Ortigas Avenue Extension, 2.50 kilometers southeast from Epifanio delos Santos Avenue (EDSA) within the vicinity of Robinsons Galleria and approximately 7.20 kilometers southeast from Quezon City Hall.

Below is a satellite image courtesy of Google Maps showing the Property and its relation to the immediate vicinity.

Note: Image courtesy of Google Maps.

2.2 The street plan below shows the location of the Property.



Neighborhood 2.3 Bridgetowne is a mixed township and business park situated in a former industrial area on both banks of the Marikina River near the junction of Eulogio Rodriguez, Jr. Avenue (C-5 Road) and Ortigas Avenue. The 30.61-hectare (75.6-acre) master-planned community is the first integrated township project by Robinsons Land Corporation, the real estate arm of JG Summit. It is currently anchored by four office towers in its information technology park dedicated to the business process outsourcing sector, its second in Metro Manila after Robinsons Cybergate in Mandaluyong. Once completed, the township will be a community consisting of seven office towers, a shopping mall, five-star hotel and residential condominiums, with a landmark bridge and a light art installation called The Victor as its centerpiece. Upon completion, the Victor will be one of the country's tallest art installation.

Outside Bridgetowne, land utilization is for an intermix of residential, industrial and commercial purposes. Across E. Rodriguez, Jr. Avenue are exclusive, low-density villages such as Valle Verde 2, 5 and 6 and Greenmeadows Subdivision. Still noted near the Property are some industrial sites but recent developments point toward a gradual change in land use.

Some of the significant mixed-use developments nearby that are gradually changing the trend in the area include "Eastwood City", "The Grove" "Metropoli Residenza", "Ayala Land Eton Property" and "Frontera Verde".

Accessibility 2.4 The Property is easily accessible from the rest of Metropolitan Manila thru the nearby E. Rodriguez, Jr. Avenue (C-5 Road) and Ortigas Avenue Extension. Public Transportation such as buses, jeepneys, GT/UV Express Vans, and taxi cabs are readily available along the aforesaid roads.

Other community centers like post office, churches, hospitals, and public and private schools are likewise accessible from the Property.

Land Details

Certificates of Title 2.5 Based on documents provided to us, the land where Tera Tower is erected consists of three (3) adjoining lots containing an aggregate area of **41,423.20 sq.m.**, technically identified as follows:

Lot No	TCT No.	Area (sq.m.)
Lot 2-A (LRC) Psd-284590	004-2011013463	2,259.30
Lot 2-A (LRC) Psd-242244	044-2012006183	10,612.90
Land (LRC) Pcs-668	004-2011010174	28,551.00

		41,423.20

The above Transfer Certificates of Title were all issued in favor of **the Client** by the Registry of Deeds for Quezon City.

Lot Area Allocation 2.6 Based on Lot Plan provided to us by the Client, the allocated land area for “Tera Tower” is about **3,871 sq. m.**

2.7 Image of the said Lot Plan is attached at Appendix **5**.

Draft Contract of Lease 2.8 We were provided by the Client a copy of a Draft Contract of Lease with ROBINSONS LAND CORPORATION, as the Lessor, and RL COMMERCIAL REIT, INC. (formerly Robinsons Realty and Management Corporation)[1], as the Lessee.

Based on the same document, the lease contract stated that it will cover the land being occupied by Robinsons Tera Tower with an area of 3,871 sq.m. Lease term would be for a period of 98 years. It likewise specified that the monthly lease payments would be 7% of the monthly rental income gained from Robinsons Tera Tower which is owned by the Lessee (plus VAT, as appliable).

2.9 The management of RLC disclosed that actual lease commencement shall be the date of the Certificate of Approval of the Increase in Authorized Capital Stock of RCR issued by the SEC. However, for valuation purposes, lease commencement shall be assumed on October 1, 2021.

In the absence of a signed contract, we used the foregoing details to establish the leasehold value of the land.

[1] As of the date of this Valuation Report, application for the change in name from “Robinsons Realty and Management Corporation” to “RL Commercial REIT, Inc.” is pending the approval of the Philippine SEC.

Tenure 2.10 For purposes of this engagement, ownership rights to the land are treated as **leasehold.**

Terrain 2.11 The terrain of the land is flat. Its finished elevation is slightly higher than the existing grade of the fronting roads.

Description of Improvements and Machinery & Equipment

Improvements and Machinery & Equipment 2.12 The land is presently improved with a commercial/office building identified as Tera Tower, a PEZA registered, LEED Gold certified, Prime Grade office building, construction of which was completed sometime in August 2015. Also included in this appraisal are the appurtenant Building Machinery & Equipment. These are all described in detail in the Schedule of Assets (Appendix **11**).

Tenure 2.13 We were advised that the Client owns the improvements described above. As stated, the land would be covered by a long-term Lease Agreement. We have, however, treated the improvements as freehold.

Accommodation

Measurement 2.14 Based on the gross floor area tabulation provided to us by the Client, Tera Tower has a total gross floor area of about 52,248.86 sq.m.

2.15 The gross floor area of Tera Tower, are tabulated as follows:

Tera Tower	GFA (sq m)
Basement	3,438.83
Ground	1,421.87
2nd Floor	3,414.64
3rd Floor	3,414.64
4th Floor	3,414.64
5th Floor	3,414.64
6th Floor	2,248.64
7th Floor	2,248.64
8th Floor	2,248.64
9th Floor	2,248.64
10th Floor	2,248.64
11th Floor	2,248.64
12th Floor	2,248.64
14th Floor	2,248.64
15th Floor	2,248.64
16th Floor	2,248.64
17th Floor	2,248.64
18th Floor	2,248.64
19th Floor	2,248.64
20th Floor	2,248.64
21st Floor	2,248.64
	==========
Total	**52,248.86**

Condition

Scope of Inspection

2.16 As stated earlier, we have previously inspected the Property

2.17 As stated in the General Terms of Business, during our previous inspection, we have not undertaken a building or site survey of the Property, as it is beyond the normal scope of appraisal.

2.18 We have carried out visual inspection only without any structural investigation or building survey. During our limited inspection, we did not inspect any inaccessible area/s. We are unable to confirm whether the Property is free from urgent or significant defects or items of disrepair.

2.19 Unless otherwise stated, we have not been able to carry detailed on-site measurement to verify the site and gross floor areas of the Property and we have no reason to doubt the truthfulness of the areas shown on the documents provided us.

2.20 Moreover, due to the nature of the machinery, we have not carried out mechanical inspection, and our assessment was based on the premise that the machinery is in a condition commensurate with age and normal usage.

2.21 In the Schedule of Assets or Asset Inventory, machinery and/or equipment were listed as complete units i.e., machinery and/or equipment are meant to include all parts and accessories normally comprising the unit.

Comments

2.22 Apart from the matters specifically referred to below, we have assumed that the Property is in sound order and free from structural faults, rot, infestation or other defects, and that the services are in a satisfactory condition.

2.23 The buildings and structures, including the machinery & equipment, were assumed to be in a generally good condition commensurate with their age and use. It was also assumed that there are no urgent or significant defects or items of disrepair which would be likely to give rise to substantial expenditure in the foreseeable future or which fall outside the scope of the normal annual maintenance programme.

Ground conditions

2.24 We have not been provided with a copy of a ground condition report for the site. We have assumed that there is no adverse ground or soil conditions and that the load bearing qualities of the site are sufficient to support the building.

Services

2.25 It would appear from our previous inspection that main supplies of electricity and water are provided to the Property. Telephone communication facilities are likewise available. Sewer and drainage are believed to be discharged to the building's sewerage system.

Tenancies

Tenancy Information

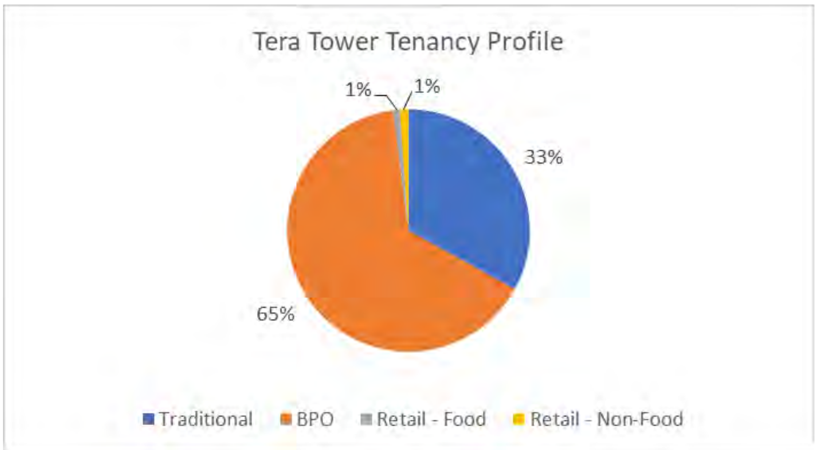
2.26 We have been provided with copy of some of the rent roll including some of the lease contracts by the Client and have relied on that information as being correct. No additional verification has been undertaken.

2.27 A summary of the Property tenancies is presented below.

TENANT	LEASED AREA (GROSS, IN SQM)	Lease Contract START	END
Tenant 1	156.37	01-Jun-15	30-Jun-25
Tenant 2	90.98	01-Jun-15	07-Sep-23
Tenant 3	349.93	01-Jun-15	31-Aug-25
	11,243.20	01-Jun-15	31-Aug-25
Tenant 4	240.80	01-Jun-15	31-Jul-25
Tenant 5	53.97	03-Dec-19	02-Feb-23
Tenant 6	50.90	01-Mar-21	15-Jul-23
Tenant 7	85.27	16-Mar-20	30-Sep-25
Tenant 8	205.71	01-Jul-15	30-Jun-26
	8,675.38	01-Aug-15	30-Jun-26
	4,497.28	01-Oct-15	30-Jun-26
	4,497.28	01-Jan-16	30-Jun-26
	2,567.82	01-Sep-16	30-Jun-26
	2,248.64	01-Oct-18	30-Jun-26
Tenant 9	112.40	08-Jun-15	30-Nov-23
	11.33	08-Jun-15	30-Nov-23

2.28 Based on the rent roll provided, total leasable area is **35,087.26** sq.m. with **458** parking slots available for lease.

2.29 The Property currently hosts to a mix of traditional offices, Business Process Outsourcing (BPO) companies and some retail tenants. Based on the figure below which summarizes the tenancy profile of the Property, BPOs currently take up 65% of the Property's leasable area followed by traditional offices at 33%.



Source: SKF/ RLC

2.30 As of 30 June 2021, the Property is 100% occupied with a Weighted Average Lease Expiry (WALE) of 4.69 years. Earliest period with an expiring lease is 2023 with 1% of total leased area. This is then followed by sizeable lease expirations in 2025 and 2026, with 34% and 65% of leasable area.

Source: SKF/ RLC

2.31 Below are some of the provisions as stated in the Lease Contract.

a. **Care of the Leased Premises**

The LESSEE shall at its expense, maintain the Leased Premises in a clean and sanitary condition, free from noxious odors, disturbing noises or other nuisances and, upon the expiration of the lease, shall return the premises and fixtures in as good condition as that in which they were actually found at the beginning of the lease, ordinary wear and tear excepted. The LESSEE shall not drive nails, screws, hooks or other abutments on or into the walls frames or other portions of the premises or in any manner deface or damage any part thereof. Any damage caused by the LESSEE may be repaired by the LESSOR for the account of the LESSEE. The LESSOR shall have the right to require the LESSEE to remove any display or promotional matter, or any displayed merchandise which LESSOR reasonably and in good faith considers to be improper or inappropriate for the general appearance or presentation of the premises.

The LESSOR shall be responsible for major repairs which are limited to those which affect the structure of the Leased Premises or the building. The LESSEE shall allow access to the LESSOR on the Leased Premises for purposes of repair or remodelling or such other works as may be necessary for the preservation, conservation, improvement or decoration of the building or any part thereof. No compensation or claims shall be allowed against the LESSOR by reason of any inconvenience or annoyance to the LESSEE that may arise by reason thereof.

The LESSEE shall promptly repair, at its own expense, any damage to the Leased Premises or any other improvements within the building caused by bringing into the Leased Premises of any property for the LESSEE's use, or by the installation or removal of such property, regardless of who is at fault or who caused such damage. unless such was clearly caused by the LESSOR, or its agents or employees. In default of such repairs by the LESSEE, the LESSOR may effect the repairs and the LESSEE agrees to promptly pay the LESSOR the cost of such repairs. The LESSEE shall be responsible for the maintenance and repair of the Leased Premises including plumbing and electrical fixtures within the premises or those serving the same.

The LESSEE must notify the LESSOR immediately of any damage to the Leased Premises, their appurtenances as well as any occupation, usurpation or untoward act being committed, or threatened to be committed, within the Leased Premises.

No machinery, furniture, effect, equipment and other properties found within the Leased Premises, whether or not owned by the LESSEE, may be brought into or out of the building without the prior written approval of the LESSOR. Furthermore, in case the LESSEE has any outstanding/unsettled rent, dues or other charges, the LESSOR reserves the right to withhold approval of any request for bringing in or out of any machinery, furniture, effects or other properties found within Leased Premises, whether or not owned by the LESSEE, until such outstanding amounts have been duly settled by the LESSEE. This is without prejudice to such other rights and remedies available to the LESSOR under prevailing laws or the Contract. including these General Terms and Conditions.

The immediately preceding paragraph shall also apply in the event of transfer of machinery, furniture, effects or other properties found within the Leased Premises from one unit to another unit in the building being leased by the LESSEE whether or not the latter unit is owned by the LESSOR. In the event that the unit where the properties to be transferred is not owned by the LESSOR, the written consent of the unit owner shall also be required.

The LESSEE shall further maintain the Leased Premises in a clean condition by utilizing plastic bags for the disposal of both dry and wet garbage. Unless garbage is contained in plastic bags, it will not be allowed to be deposited in the authorized depository for collections.

b. **Sublease, Transfer of Rights**

The LESSEE shall not assign or transfer its rights in the Contract nor sublease or sublet all or any part of the Leased Premises, without the prior written consent of the LESSOR and no rights, title or interest thereto or therein shall be conferred on or vested to anyone other than the LESSEE without such prior written consent. Otherwise, subleasing the leased Premises without the prior written consent of the LESSOR shall be deemed a breach of the contract by the LESSEE and shall be subject to the rights and remedies available to the LESSOR under prevailing laws and Contract, including these General Terms and Conditions. In the event of sublease with or without the prior written consent of the LESSOR, the LESSEE shall remain principally liable. However, the LESSOR shall have the right to exercise such remedies embodied in the Contract, the General Terms and Conditions and under prevailing laws, as against the sublessee in order to protect its right and interests.

Only the LESSEE has the right to use the Leased Premises as its official address to be registered with any government entities for the issuance of necessary permits and licenses for its business operations.

Should the LESSOR give the LESSEE its consent to sublease the Leased Premises, the LESSEE cannot sublease the Leased Premises for the period longer that the Contract of Lease between the LESSOR and the LESSEE.

It is expressly understood that the LESSEE has no goodwill or patronage rights over the Leased Premises; that such rights belong exclusively to the LESSOR, being the owner of the Leased Premises, which forms part of the building; and that the LESSEE may not sell or dispose of said goodwill or patronage rights to any person.

c. **Assignment of Rights/Mortgage/Encumbrance**

The LESSOR reserves the right to assign and convey or mortgage or otherwise encumber its rights to this lease in favor of any affiliate or subsidiary or to any party. In the event of any assignment, conveyance, mortgage, or encumbrance of the Leased Premises, the LESSOR binds itself to require the assignee or mortgage or beneficiary of the encumbrance to respect and abide by all the terms and conditions of the Contract, as well as these General Terms and Conditions.

Roadways and Access

Roadways

2.32 Tera Drive and West Drive are about 20 meters wide. Both are concrete/asphalt-paved and provided with concrete curbs and gutters, and underground drainage system.

2.33 Our informal enquiries with the City Planning Office confirmed that the Property enjoys frontage along the bounding roads.

Access 2.34 In reporting our opinion of value, we have assumed that there are no third-party interests between the boundary of the Property and the adopted highways and that accordingly the Property has unfettered vehicular and pedestrian access.

Environmental Considerations

Flooding 2.35 From our enquiries with the City Planning Office, and also due to its terrain, we have ascertained that the Property is not within an indicative floodplain and that there is therefore a minimal risk of flooding.

Contamination 2.36 As stated in the General Terms of Business, investigations into environmental matters would usually be commissioned from suitably qualified environmental specialists. Santos Knight Frank, Inc. is not qualified to undertake scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination.

2.37 Subject to the above, while carrying out our valuation inspection, we have not been made aware of any uses conducted at the Property that would give cause for concern as to possible environmental contamination. Our valuation is provided on the assumption that the Property is unaffected.

Highest and Best Use

2.38 "*Highest and Best Use*" is defined as the most profitable likely use to which a property can be put. The opinion of such use may be based on the highest and most profitable continuous use to which the Property is adapted and needed, or that use of land which may reasonably be expected to produce the greatest net return to land over a given period of time. Alternatively, it is that use, from among reasonably probable and legal alternative uses, found to be physically possible, appropriately supported, financially feasible, and which results in highest land value.

2.39 Considering the property's size, shape, topography, current zoning classification and the prevailing land uses and development in the area, we are of the opinion that the **existing commercial development** would represent the highest and best use of the Property.

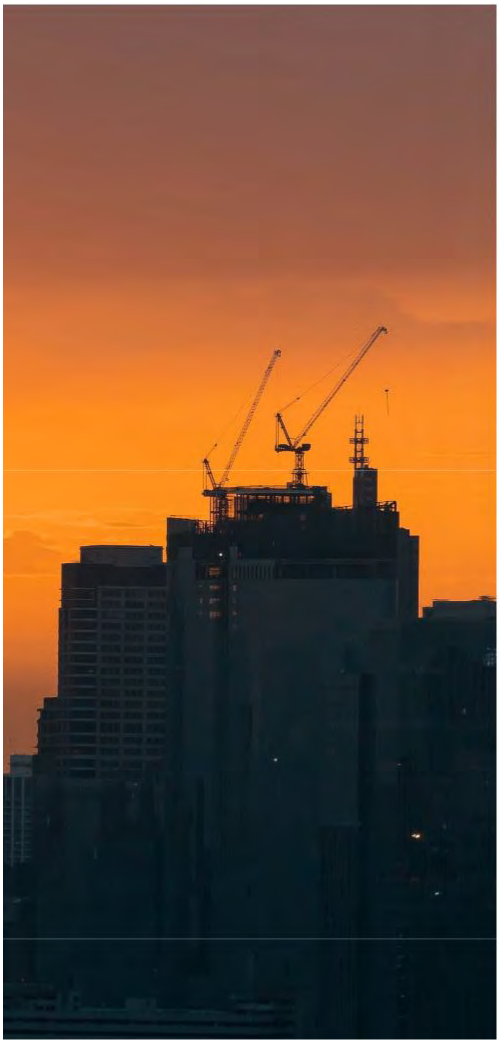
Source of Information

3.2 Our market analysis has been undertaken using market knowledge within Santos Knight Frank, Inc., enquiries of other agents, searches of Property databases, as appropriate and any information provided to us.

OFFICE RENT ROLLBACKS CUSHION INCREASING VACANCIES

General Overview



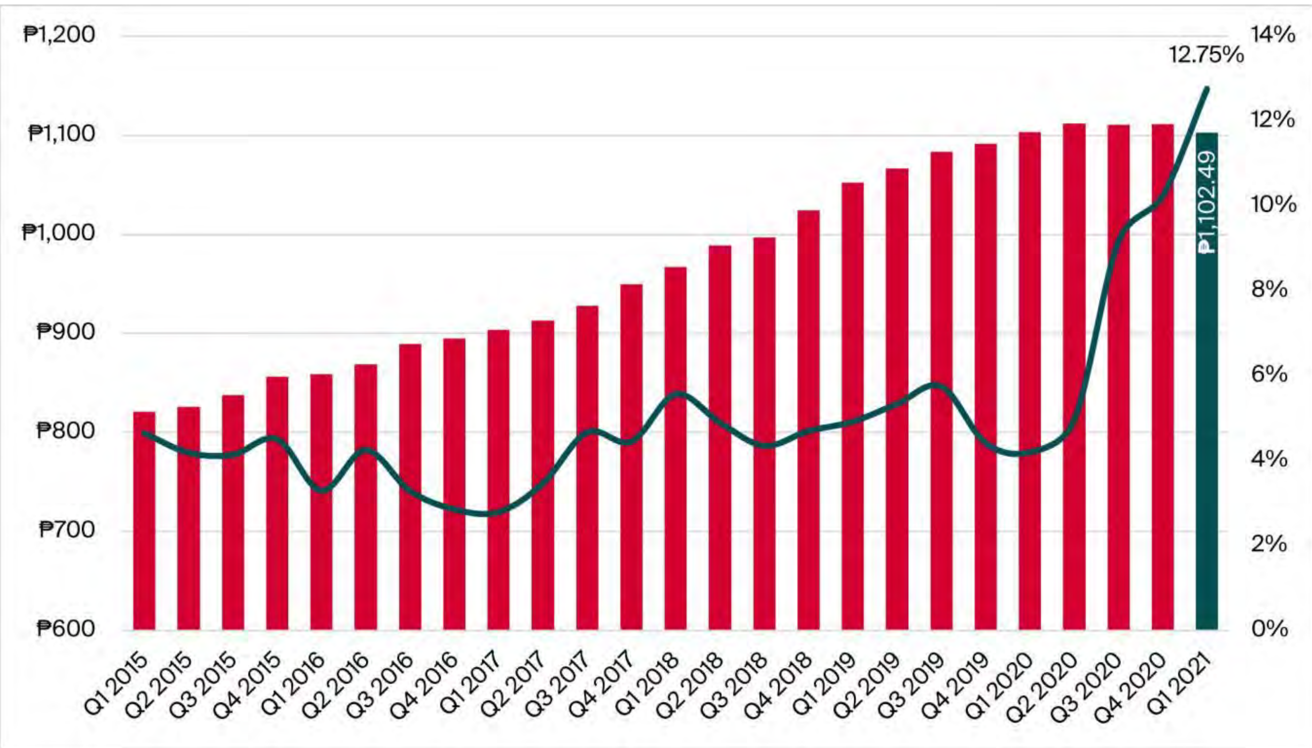
The Metro Manila office market displayed modest market movement at the start of 2021 owing to the sluggish demand driven by the market uncertainties caused by changing lockdown scenarios in Metro Manila. Landlords were challenged to remain relevant as potential occupiers continued to take a cautious approach caused by the growing COVID-19 cases and slow vaccine roll-outs.

Still, new office spaces were introduced during the quarter as developers capitalized on the relaxed quarantine measures to resume their halted construction activities. The local office market supply grew by 163,136 sqm of Grade A office space that mostly catered to IT-BPO companies. Several buildings were completed in Fort Bonifacio, Bay Area, and Quezon City, resulting in an overall office supply in Metro Manila of about 6.9 million sqm.

Consequently, supply growth resulted in an increase in vacancies throughout the metropolis. Office vacancy rates in Metro Manila further spiked to 12.75%, the highest since 2009. Current and potential occupiers remained vigilant towards the health situation of the country. Numerous companies continued to implement Work-From-Home and skeletal workforce arrangements. Office take-up contracted by 28,696 sqm as locators reassessed their need for spaces amid their bid to reduce operational costs.

Monthly average lease rates in Metro Manila further dipped to PHP 1,102.49 per sqm, declining by 0.78% quarter-on-quarter (q-o-q) and 0.07% year-on-year (y-o-y). The downward trend of rents was caused by the landlords' bid to provide more competitive packages to appeal to prospective tenants.

Figure 1. Metro Manila Historical Lease & Vacancy Rates



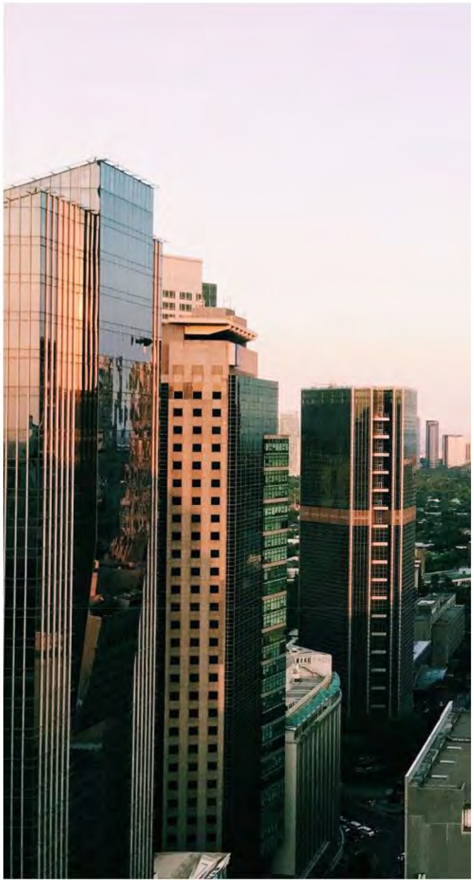
Source: Santos Knight Frank Research

Makati

The adverse effects of the pandemic and the prolonged lockdowns remained evident in the most prominent business district in the country. Vacancy rates spiked to 11.17%, considered to be the highest in the past ten years. Moreover, the expensive rents in Makati CBD were detrimental to the retention of office occupiers. Locators looking to minimize their expenses opted to discontinue their lease, resulting in about 25,557 sqm of office space vacated during the quarter.

Sluggish leasing activity persisted in the area as existing and upcoming locators in Makati were less willing to take up spaces due to the financial distress brought about by the global pandemic. The average monthly rents recorded in Makati went down to PHP 1,348.19 per sqm, contracting by 0.93% q-o-q and 6.05% y-o-y. Despite this, rates in Makati remained the highest in the metropolis.

Several property players are still looking forward to the materialization of their projects in the pipeline. More than 447,552 sqm of Prime and Grade A office supply are anticipated to come online in the next three years, with approximately 164,000 sqm being operational by the end of 2021. The massive influx of upcoming office developments in Makati comes from the backlogs and spillovers from 2019 up to the latter part of 2020.



Taguig

Slow demand in Taguig was also evident as vacancy levels continuously increased to 8.37% from 7.74% in Q4 2020. Despite having the largest supply share in Metro Manila of more than 2 million sqm, the downsized space requirements were seen as the factor in the rising vacancies as locators looked to lessen their operational cost. Moreover, average monthly rental rates in Fort Bonifacio also went down to PHP 1,289.75, translating to a contraction of 0.89% q-o-q.

The ease in quarantine measures allowed private and public projects to resume construction. Office supply in Fort Bonifacio further grew by 28,000 sqm through the completion of BGC Corporate Center 2. Despite the growing vacancy levels, potential developers still have bright prospects in Taguig as it was seen as the youngest but fastest growing business district in Metro Manila. In line with this, upcoming office supply is seen to be augmented by about 864,100 sqm of office space within the next five years. About 344,000 sqm of this will be coming from Arca South which is poised to become a new business district in the south.

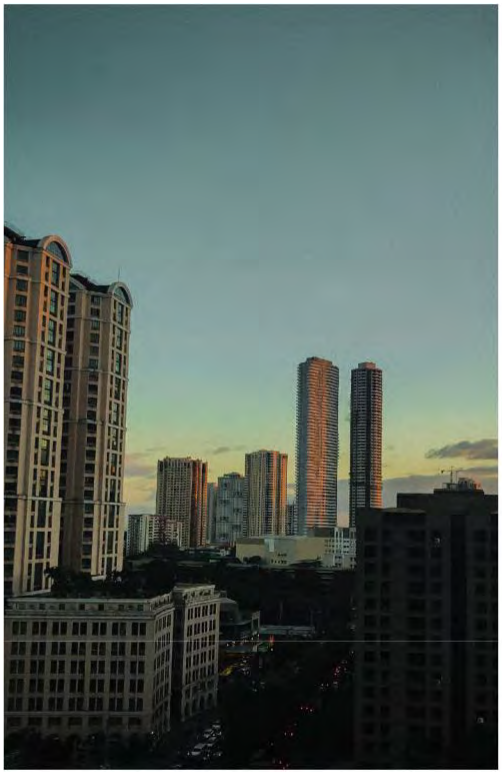
Bay Area

The POGO industry exodus has significantly contributed to the spiking vacancy levels in the Bay Area during Q1 2021, recorded at 12.82%. Slower demand from the sector is seen in the coming periods as more firms have started to postpone their lease contracts. This occurrence implied challenges in the recently fast-moving office market of the Bay Area.

The upsurge in vacancy was also attributed to the completion of Four E-com during the quarter with an additional 89,132 sqm of Grade A office space. Priced above its competitors, this building has helped in pushing the average rents in the area to PHP 1,083.41 per sqm, increasing by 1.66% q-o-q.

The Bay Area is still foreseeing a huge amount of upcoming office supply in the coming years. Developers still recognize the opportunity to invest in the area due to its accessibility and availability of developable land. Approximately, 578,800 sqm of office developments are anticipated to be introduced in the market for the next five years, while 258,000 sqm are expected to become operational by the end of 2021.

Ortigas Center



Vacancy levels in Ortigas Center gradually eased to 12.75% in contrast to 12.88% of the preceding quarter. Despite this, pre-terminated contracts and non-renewals were still observed, as most of the companies are still on a wait-and-see approach towards the office market. Meanwhile, the slow-moving leasing transaction was also felt in the district as the rental rates went down to PHP 806.29 per sqm, contracting by 1.15% q-o-q and still considered the lowest as compared to other major CBDs in the metropolis.

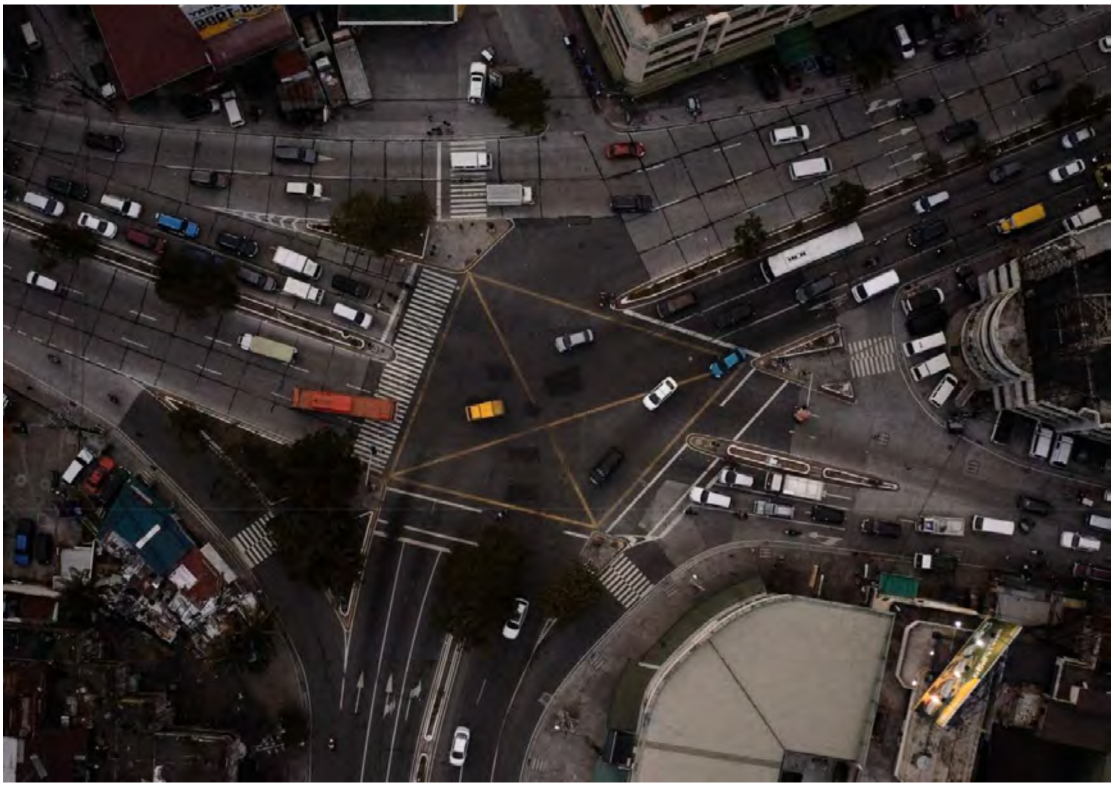
Moreover, the upcoming office supply in Ortigas Center remained high as more than 671,000 sqm of Prime and Grade A office spaces are slated to introduce in the next five years. In addition, the massive influx of 373,000 sqm of space is scheduled to commence their operations within the year such as Cyber Omega, SM Mega Tower, and Jollibee Tower. This includes the spillover from 2019 up to the remaining quarters of 2020 that has been halted due to subsequent lockdowns.

Quezon City

Vacancy rates in Quezon City spiked up to 20.64% as opposed to 16.21% of the preceding quarter, indicating the highest level across all of Metro Manila. Approximately 13,690 sqm of office spaces were freed up in the city during the quarter. Occupiers in the area were more sensitive to the health crisis as compared to locators in other districts The lack of recognized established business districts and limited connectivity of certain townships contributed to the slow demand in the area. Furthermore, the upsurge in vacancy levels was also driven by the opening of SM North Towers 1 and 2 that added more than 45,200 sqm in the massive office supply in Quezon City, and are yet to lease out the majority of their spaces.

Office landlords are trying to alleviate this downtrend and are still vying to mitigate lease terminations. To this end, average headline rates contracted to PHP 925.55 per sqm, translating to a 1.81% decline from the preceding quarter.

Albeit the fast-growing vacancy levels, Quezon City is still expecting a large office supply boost in the coming years. Approximately, 333,700 sqm is anticipated to be introduced in the market in the next five years, in which more than 149,000 sqm will be coming from SM Prime Holdings.



Alabang

Similarly, Alabang CBD experienced rising vacancy levels in Q1 2021 at 16.07% from 14.53% in the preceding quarter. As a result, increased pressures on office landlords in the district were felt as they remain responsive to the slow movement in the office market. This caused rental rates to gradually contract to PHP 846.76 per sqm.

Alabang still holds on to the possibility of becoming one of the major investment hubs in the metropolis due to its vast developable land. Approximately 209,900 sqm of upcoming Grade A office space is anticipated to be operational in the next five years, while 13,800 sqm is slated to become operational by 2021.

Figure 2. Metro Manila Lease & Vacancy Rates per CBD

Source: Santos Knight Frank Research

Office Outlook

The easing quarantine measures that started in the second half of 2020 allowed the developers to restart their impeded construction activities. Developers remain bullish in expanding their office footprint in Metro Manila with more than 3 million sqm of office space are slated to operate in the next five years. The nation's economic center is also set to have an additional supply of 1.1 million sqm of Prime and Grade A office space by the end of 2021. This massive influx still stems from the construction backlogs from the developers in 2020.

The robust expansion of office supply in Metro Manila is seen to further propel the vacancy rates in the local office market in the coming quarters. Along with the stagnant office demand, downward pressure on office rents still expected. Office landlords will be forced to implement more flexible payment terms to existing and potential tenants to market their spaces and continue cash flow from their buildings.

The recovery of the office market is also dependent on the pace of vaccine roll-outs in the country. The slow pace in inoculations is seen to weigh down on the recovery of the market. Attaining herd immunity as soon as possible can reinvigorate the interest in the office market.

In the medium- to long-term Green Buildings are seen to gain a competitive edge compared to ordinary office buildings. Buildings accredited by the US Green Building Council (LEED) and the Philippine Green Building Council (BERDE) will be more sought-after for potential office locators. The efficient design that provides better air circulation, ventilation and filtration, and increased open space, will be more appealing to the market as it puts a premium on the health and well-being of its tenants.

4 Valuation

Methodology

Valuation Rationale

4.1 The purpose of this appraisal is to estimate the Market Value of the Property. In any given valuation exercise, fair value can be arrived at using either one or a combination of the three (3) approaches to value, namely: Market (or Direct Sales Comparison) Approach, Income Approach, and the Cost Approach. The determination of the appropriate approach for a given property is based on the quality and quantity of data available, particularly its relevance to the Property under appraisement. If more than one valuation approach is utilized, the resulting values are reconciled to produce a final value conclusion.

4.2 Due to the nature of the Property and the purpose of this appraisal, both the Cost Approach and Income Approach to value are deemed the most appropriate to use and the Market (or Direct Sales Comparison) Approach was not used.

Cost Approach

4.3 The Cost Approach generally involves the following steps:

A. The value of the subject land is normally estimated by the Market or Sales Comparison Approach. In instances where the land is covered by a Lease Agreement, the value of the leased fee or leasehold rights on the subject land, whichever is applicable, is instead estimated.

B. The depreciated cost of the subject improvement is estimated by calculating the direct cost of reproducing or replacing the improvement, deducting accrued depreciation from all sources, and adding the indirect costs attributed to the improvement.

Combining the estimates shown above results in the indicated value of the Property by the Cost Approach.

4.4 **On Land (Leasehold)**

As mentioned, the land subject of this appraisal is covered by a Lease Contract. In estimating the value of the Property covered by a lease, two interests are involved: the interest of the lessee which is the leasehold; and the interest of the lessor which is the leased fee or the lessor's interest. The Client being the lessee, the purpose of this appraisal is to establish the leasehold value of the subject land.

Leasehold Value is the present (discounted) worth of the rent savings (or rental gains) when the contract rent at the time of the appraisal is less than the current market rent. It is estimated by computing the present worth of the rental gains over the remaining term of the lease agreement using an appropriate discount rate.

The valuation process, briefly stated, consists of the following:

- Estimation of the current market rent of the leased property;
- Estimation of the rental gains over the remaining term of the lease agreement, if any. Rental gains projection is pegged at 10 years while

the 11th year rental gain is used to estimate the terminal value of the Leasehold Rights on the Land;
- Estimation of an appropriate discount rate and terminal capitalization rate; and
- Discounting process based on an appropriate discount rate to arrive at an indicated leasehold value.

Market Rent of the Land

4.5 As mentioned earlier, another purpose of this report is to express an opinion of the Market Rent of the Property if it were to be leased out in accordance with its highest and best use. The amount of annual or monthly rental, which the subject property should command might be estimated by any, or a combination of the following:

1. By Market (Comparison) Approach, in which rentals of similar properties are used a benchmarks; and
2. By Income Approach, in which the value of the Property is first established, and the proper capitalization rate is applied to obtain its rental value.

On the other hand, Market Rent is defined under IVS 2019 as "the estimated amount for which an interest in real property should be leased on the valuation date between a willing lessor and a willing lessee on appropriate lease terms in an arm's length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

It is the rental income that the Property would most likely command in an open market. It is also defined as being the amount at which a willing lessee would pay and a willing Lessor would receive for the use of certain property, neither being under compulsion to transact, and both having reasonable knowledge of all relevant facts.

Market Approach

4.6 We have made a survey of existing ground leases of similar lands in the vicinity of the Property and found scarcity of rental data that may be used for direct comparison purposes.

Income Approach

4.7 In the absence of any comparable rental data, we have estimated the **Market Rent** of the Property by a variation of the Income Approach on the basis of what prudent real estate investors or landowners would be warranted in leasing it in order to realize a fair return on their investment or property, for that matter. Under this approach, the market value of the Property is first established, and the proper capitalization rate is applied to obtain its rental value.

Market Value of the Land

4.8 In valuing the land, we made use of the Market Approach which is the most common technique for valuing land, and is the most preferred method when comparable sales are available. With this method, sales of similar property or parcels of land are analyzed, compared, and adjusted to provide a value

indication for the Property being appraised. The comparison process is based on an analysis of the similarity or dissimilarity of the comparables.

4.9 The appraiser gathers data on actual sales as well as listings and identifies the similarities and differences in the data; ranks the data according to their relevance; adjusts the prices of the comparables to account for the dissimilarities with the land being appraised; and forms a conclusion as to the most reasonable and probable market value of the subject property.

4.10 The elements of comparison include property rights, financing terms, conditions of sale (motivation), market conditions (sale date), location, physical characteristics, available utilities, and zoning. The most variable elements of comparison are the site's physical characteristics, which include its size and shape, frontage, topography, location, and view. The units of comparison applied may be hectares or sq.m., or any other unit used in the market.

Evidence of comparable properties

4.11 **Analysis of Comparable Properties Offered for Sale**

In the course of our investigation, we looked at current market listings of comparable properties in the area. The comparable properties selected share the same or similar characteristics as the subject. Whatever information or data we came up with was then analyzed, and comparison made for such factors as size, characteristics of the lot, location, quality, and prospective use. In the Philippines however, property transactions are not officially disclosed, and quite often, actual transaction price is masked by other undisclosed arrangements and different from the figure shown on the sale and purchase agreement. We have therefore made reference to the following data, made our market judgment, and adjusted for the above-mentioned factors:

1. A commercial lot having a total area of 17,690 sq.m. located along A. Rodriguez Avenue, within Barangay Rosario, Pasig City, is currently offered for sale at an asking price of PhP2,653,500,000 or about PhP150,000 per sq.m.
   Source: Flora Bernardo (Cel. No. 0961-177-6868)
2. A commercial lot having a total area of 3,699 sq.m. located at Pasig Boulevard corner Shaw Boulevard, within Barangay Bagong Ilog, Pasig City, is currently offered for sale at an asking price of PhP665,820,000 or about PhP180,000 per sq.m.
   Source: Bahaypinas Realty Company (Cel. No. 0917-848-1224)
3. A commercial lot having a total area of 1,150 sq.m. with an old building, located at Bonny Serrano Avenue (Santolan Road), within Barangay Socorro, Quezon City, is currently offered for sale at an asking price of PhP250,000,000 or about PhP217,391 per sq.m.
   Source: Richard Aguiluz (Cel. No. 0929-841-9074)

Summary of Adjustments

The Data Comparison Grid shown on Appendix **10** shows a summary of the aforementioned adjustments, which provides an indication as to the degree of adjustment made to the different elements in comparison. A numeric indicator indicates the level of adjustments, in terms of percentage when compared with the subject property. The use of (-) indicates a negative adjustment and a + indicates a positive adjustment. A downward adjustment (-) used is made to reflect superior characteristics of the comparable sale/listing, while an upward adjustment + reflects inferior characteristics of the comparable sale/listing. Finally, a 0 is used to confirm similarity between the comparable sales/listings and the subject or is used when market information is unavailable or does not support an adjustment for any particular element of comparison.

Value of the Land 4.12 As reflected in the said Comparison Grid, the value of the land is estimated at **PhP195,000 per sq.m.**, or a total of **PhP755,000,000** for a land area of **3,871 sq.m.**

Rate of Return 4.13 The value of the land having been established, its rental value may now be estimated considering the prevailing rate of return prudent investors or landowners would expect in ground leases, normally in the range of 4% to 7%. We based this range of rate of return from interviews with land owners and brokers, as well as our analysis of the relationship between prevailing capital values and rental rates and it is believed to be the current yield in the commercial land lease market.

Considering the most recent pandemic and the effect it had on the economy and the leasing market, we have not adopted the average rate of return, and have instead adopted a conservative interest rate (return on investment) of 4%.

In light of the foregoing, our estimate of the Market Rent of the Property is as follows:

Land Value	PhP	755,000,000	
Interest on Land Value			
PhP755,000,000 @ 4%	PhP	30,200,000	
	Total **PhP**	**30,200,000**	**per year**
	Or **PhP**	**2,516,670**	**per month**

Market Rent of the Land 4.14 On the basis of the foregoing, the Market Rent of the land is estimated at **PhP650 per sq. m. per month**, or a total of **PhP2,516,670 per month**, or say, **PhP30,200,000 per annum** for the subject land area of **3,871 sq. m.**

Rental Gain 4.15 Rental Gain is reckoned as the difference between the Market Rent and the Contract Rent.

Discount Rate

4.16 The discount rate was computed using the build-up method. The discount rate is calculated by adding together different variables. The variables that were used to generate it consist of a risk-free rate and a reasonable risk premium. Based on the foregoing, discount rate is estimated at 7.1665%, or say, 7.20% (10-year T-bond rate at about 3.9165% (from Philippine Dealing & Exchange Corporation (PDEx) as of 30 June 2021) plus 3% equity risk premium from OECD and additional 0.25% risk premium for unidentifiable risk factors which include the uncertainty brought about by the Covid-19 global pandemic.).

4.17 For purposes of this valuation, we have adopted, as risk-free rate, the 10-year T-bond rate from PDEx. The Philippine Dealing & Exchange (PDEx) system appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEx. The PHP BVAL Reference Rate dated 30 June 2021 was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

4.18 We have adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3%. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits
Valid as of: **25 June 2021**

nb	Country Code ISO Alpha 3	Country Name [1]	Classification: Previous	Classification: Current Prevailing	Classification: Notes
138	PLW	Palau	-	-	(5)
139	PAN	Panama	4	4	(8)
140	PNG	Papua New Guinea	6	6	
141	PRY	Paraguay	5	5	
142	PER	Peru	3	3	
143	PHL	Philippines	3	3	
144	POL	Poland	-	-	(6)
145	PRT	Portugal	-	-	(6) (7)

Capitalization Rate 4.19 Capitalization rate adopted to arrive at the terminal value is 4.2% (Discount Rate less Projected Long-term Growth Rate (3.0%). The long-term growth rate is based on a growth forecast of the prevailing commercial market over the forecast period. This is based on what the Property is perceived to achieve in the long-term considering the present situation of the market.

Remaining Life of the Lease 4.20 Remaining life of the lease as of the date of valuation is 98 years.

Summary of Leasehold Assumptions 4.21 In summary, below are the assumptions/statistics used in determining the leasehold value of the subject land.

TERA TOWER			
Lease Details			
Lot Area	:	3,871	sq.m.
Term of Lease	:	98	years
Assumed Commencement Date	:	01-Oct-21	
Lease Rate	:	7%	of net leasing revenue
Market Rent (in PhP)			
Monthly Rent	:	650.13	/sq.m./ month
Annual Rent	:	30,200,000	
Annual Escalation	:	3%	starting Y2
Discount Rate			
Risk Free Rate		3.92	as of June 30, 2021 (BVAL PDEX)
Risk Premium		3.00	as of June 25, 2021 (OECD)
Additional Risk		0.25	risk premium for unidentifiable risk factors
		7.17	
Resulting Discount Rate, say		7.20%	
Terminal Capitalization Rate		4.20%	

Leasehold Value 4.22 On the basis of the foregoing, the leasehold value of the subject land may reasonably be estimated at **PhP212,000,000**.

We attach a copy of our valuation calculations at Appendix **8**.

4.23 **On Leasehold Improvements and Machinery & Equipment**

The estimate of the leasehold improvements can be either replacement or reproduction cost, new. Replacement Cost, New is defined as "The cost of construction, at current prices, of a building having utility equivalent to the building being appraised but built with modern materials and according to current standards, design, and layout." On the other hand, Reproduction Cost, New is defined as "The cost of construction, at current prices, of an exact duplicate, or replica, using the same materials, construction standards, design, layout, and quality of workmanship, and embodying all the deficiencies, super-adequacies, and obsolescence of the subject building."

In estimating the Replacement Cost of the buildings and improvements, we have made reference to the building cost index or other building cost as available in the market or published by a reputable quantity surveyor firm. We have likewise referred to our own database of building construction costs. We do not hold ourselves to be construction cost advisers and a formal estimate can only be given by a specialist construction cost consultant. It is recommended that a professional quantity surveyor or a firm of professional quantity surveyors should be consulted in order to assess an accurate building/improvement replacement cost.

In arriving at our assessment using the Cost Approach for the Equipment, we first developed the Replacement Cost, New ("RCN") of the asset. In developing our RCN, we have obtained current cost information from equipment dealers in the region. We relied on data furnished by equipment manufacturers, dealers and importers, as well as information contained in price catalogues, other published materials including the Internet and inquiries from local suppliers

RCN is the estimated amount of money needed to acquire a similar new item having the nearest equivalent utility as the Property being valued taking into consideration current prices of materials and manufactured equipment, shipping and handling, labour, contractor's overhead, design and supervision, profit and fees, and other attendant costs associated with its acquisition and installation, but without provision for overtime or bonuses for labour and premium for materials.

Having developed the RCN, we then deducted for the various elements of depreciation to arrive at the Depreciated Replacement Cost ("DRC"). DRC includes depreciation allowance or loss of value arising from condition, utility, age, wear and tear, and obsolescence present (physical, functional or economic), taking into consideration past and present maintenance policy and rebuilding history.

General
Where elements are of foreign origin, the assessment process give full consideration to all expenditures normally incurred in importation such as packing and crating charges, inland and ocean freight, insurance, duties and taxes, bank charges and commissions, wharfage, brokerage and handling

In estimating the depreciation of the assets, we have utilized the age-life method tempered with our observed condition of the assets. The remaining lease period was likewise considered in arriving at the value of the leasehold improvements.

Appendix **11** contains the Schedule of Assets describing in detail these assets.

Income Approach

Definition 4.24 The Income Approach is applicable to the valuation of income producing properties, business enterprise as well as the valuation of intangible assets. This approach measures the current value of an asset by calculating the present value of its future economic benefits by discounting expected cash flows at a rate of return that compensates the risks associated with the particular investment.

For this particular engagement, we have applied both the Discounted Cash Flow Analysis and the Direct Capitalization Method.

Discounted Cash Flow Analysis 4.25 The discounted cash flows, or DCF valuation is the most popular fundamental approach in valuing the future economic benefits of a projected income stream. DCF measures actual yield rather than paper income for the asset/business owner and the analysis of DCF is widespread and mandatory in the various fields of business making DCF-based valuation ideal.

4.26 The valuation process, briefly stated, consists of the following:

- Estimation of the revenues generated;
- Estimation of the costs and expenses related to the operations of the development;
- Estimation of an appropriate discount rate;
- Discounting process using an appropriate discount rate to arrive at an indicative market value; and
- Estimation of the Terminal Value of the Property.

Discount Rate 4.27 The discount rate was computed using the build-up method - calculated by adding together the different variables. The basic formula for the traditional build-up model is:

Discount Rate = Rf + P + MR + LR

Where	Variable	Proxy Statistic
Rf	Risk Free Rate	PDEX Risk Free Rate
P	Equity Risk Premium	Country Risk
MR	Management Risk	
LR	Liquidity Risk	

The variables that were used to generate the Discount Rate are exhibited in the table below, along with the sources and/or dates as at or nearest the 30 June 2021 valuation date.

Risk Free Rate (10Y)	3.92%	As of 30 June 2021, BVAL PDEX
Equity Risk Premium	3.25%	As of 25 June 2021, OECD
Management Risk	0.80%	
Liquidity Risk	0.90%	

4.28 The following assumptions were used to arrive at the Discount Rate using the Build-Up Method.

Risk Free Rate 4.29 For the purposes of this valuation, we adopted the 10-year bond rate sourced from Philippine Dealing & Exchange Corporation (PDEX) as of 30 June 2021 - the valuation date (image shown below). The Philippine Dealing Exchange (PDEx) system has recently appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEX. The PHP BVAL Reference Rate was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

Equity Risk Premium 4.3 We used an equity risk premium of 3.25%. We adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3% plus an additional 0.25% risk premium for unidentifiable risk factors. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors. Shown below is an excerpt of said table.

Management & Liquidity Risk 4.31 The Management Risk refers to the estimated premium to compensate for the burden of management, while the Liquidity Risk refers to the ease (or the difficulty) with which an investment can be sold or made. A review was done and we have arrived at the following: Management Risk was classified into four categories, with the corresponding rates: Poor – 1.2; Average – 1.0; Above Average - 0.90 and Excellent - 0.80 while Liquidity Risk has three (3) categories: Poor –1.2; Average – 1.0; and Good – 0.90. After the said review, we deemed it appropriate to use 0.80% for Management Risk and 0.90% for Liquidity Risk.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits
Valid as of: **25 June 2021**

			Classification		
nb	Country Code ISO Alpha 3	Country Name [1]	Previous	Current Prevailing	Notes
138	PLW	Palau	-	-	(5)
139	PAN	Panama	4	4	(8)
140	PNG	Papua New Guinea	6	6	
141	PRY	Paraguay	5	5	
142	PER	Peru	3	3	
143	PHL	Philippines	3	3	
144	POL	Poland	-	-	(6)
145	PRT	Portugal	-	-	(6) (7)

Resulting Discount Rate 4.32 Resulting Discount Rate used for this valuation is 8.87%, or say, 9.0%.

Capitalization Rate 4.33 A discount rate is used to calculate the present value of future projections of a benefit stream when growth varies from year to year. However, if growth is estimated to remain level throughout the life of the investment, a capitalization rate is often used. In its most basic form, the relationship between discount rate and a capitalization rate can be summarized as follows:

Capitalization Rate = Discount Rate – Growth

For purposes of this valuation, a long-term growth rate of 4.5% has been assumed. This is based on what the Property is perceived to achieve in the long-term considering the present situation of the market. Using this assumption, resulting Capitalization Rate would be 4.5%.

Key Financial Assumptions 4.34 We relied on the historical and projected assumptions brought about by our research and as provided by the Client. These financials were analysed to ensure reasonableness by comparing projected revenue growth rates and other operating expenses based on historical performance. Based on interviews with the representatives of the company, projections were prepared to reflect the current and expected future market conditions.

a. **Revenues**

Cashflow projection starts in 01 July 2021 and runs for a period of 10 years.

The revenues come from the rental of retail units, office units and parking slots. In estimating the annual rents of the subject units/slots, we have adopted the contract rents as appearing in the copy of the rent roll provided to us by the Client for the occupied units/leased parking slots. After the expiration of lease, lease rates then are aligned with market rates and are assumed to have an average of 4-year lease contracts. Aside from the monthly rentals from leasable areas, revenues likewise include Management and Aircon Dues which are likewise charged to the tenants monthly on a per sq.m. basis. Management dues are for common and/ or shared utilities, facilities and services. These are inclusive of air-conditioning equipment rental during office hours (but exclusive of power consumption).

It would be important to note that as the building administrators, they collect the said dues as a cost recovery mechanism for all expenses related to the day-to-day operations of the building and its common areas.

Occupancy assumptions were based on the actual performance of the Property as well as the prevailing trend in the subject area taking into consideration the forecasted effect of the global pandemic in the office market. Occupancy of the Property as of valuation date is at 100% while the historical average performance of the Property for the last two years is at 100%. Occupancy rate includes committed leases. For this valuation exercise, we are assuming an average overall vacancy allowance of However, for the purposes of this valuation exercise, we are assuming an average vacancy allowance of 2%. This assumed vacancy allowance for the whole cashflow period is used to account for unanticipated vacancies brought about by early terminations and non-renewals, and rental concession requests from tenants.

We used actual escalation rates indicated in the rent roll for all existing leases up until their lease expires. After which, an average escalation of 5% was then be applied year on year until the end of the cash flow.

b. **Cost & Expenses**

Operating Expenses which would include administrative and utility expenses are normally charged against the Common Use Service Area (CUSA) Fees or Association Dues being collected monthly to the individual tenants. However, there are instances when CUSA funds are insufficient to pay off all common charges. If and when this happens, the owners/administrators would have to pay off these expenses and this has been taken into consideration in the projections.

Operating Costs and Expenses are assumed to be an average of approximately 17% of the Total Net Revenues. Operating costs and expenses included are basically divided in to two – real estate expense and general administrative expenses. Real Estate expenses are as follows: contracted services, repairs & maintenance, management fee and loss from CUSA and miscellaneous expenses. While under General Administrative Expense are – salaries & wages, taxes and licenses, advertising & promotions, commission, insurance, communication, rent expense, supplies, travel & transportation, and representation & entertainment expenses.

These expenses are projected either as a percentage of the rental revenues or the total net revenues. These percentage allocations were from the historical and projected performance of the Property.

This allocation would help ensure that the Property would operate efficiently and maintain its good and sound condition

Resulting Market Value 4.35

a. Earnings Before Income Tax, Depreciation and Amortization (EBITDA) for the whole duration of the cashflow shall be discounted at the derived Discount Rate of 9.00%.
b. The sum of discounted cashflows including the Terminal Value of the Property represents the Market Value of the Property.

   The Terminal Value of the Property is the value of the property beyond the explicit forecast period. It is assumed that the property or business will continue to generate cashflows in perpetuity. As mentioned earlier, Terminal Capitalization Rate used is 4.5%.

The Discounted Cashflow showing the estimated Market Value of the subject property is attached as Appendix **9**.

Direct Capitalization Method 4.36 The Direct Capitalization Method is a real estate valuation method that helps convert a single year's income into value by dividing the Net Operating Income with an appropriate Capitalization Rate. This method assumes that the Property has a stabilized net operating income. All parameters of a typical investor return expectations are represented either explicitly or implicitly in either income forecast or the capitalization rate. The direct capitalization rate, as the ratio of income to value, serves as a proxy for investor return assumptions.

Resulting Market Value 4.37 We made use of the single year's cashflow projection (2022) to derive the Market Value using the Direct Capitalization Method. Capitalization rate adopted to arrive at the Property Market Value is 4.5%.

Valuation basis

Market Value 4.38 Market Value is defined in the 2019 **International Valuation Standards** as: "The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

Valuation date

Valuation date 4.39 The valuation date is **30 June 2021**.

General Assumptions

Assumptions 4.40 Our valuation is necessarily based on a number of assumptions which have been drawn to your attention in our General Terms of Business, Letter of Engagement and within this report.

Key Assumptions 4.41 Whilst we have not provided a summary of all these assumptions here, we would in particular draw your attention to a key assumption that we relied on a very considerable extent on the information provided by the Client and have assumed that documents provided to us such as gross floor area tabulation, floor plans, building tenancies and other relevant matters are factual. We were also advised by the Client that no material facts have been omitted from the information provided.

Special Assumption

4.42 We were instructed to re-value the Property without a re-inspection. We have, thus, considered changes to the physical attributes and/or characteristics of the Property which have occurred between the valuation date and the date of our previous valuation as confirmed by the Client. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.

4.43 We have adopted the floor area details provided to us by the Client and have assumed these to be accurate.

4.44 Our valuation of Machinery & Equipment has also undertaken the following special assumptions:

We have not carried out a full mechanical survey, or structural test, nor have inspected the machinery and equipment, which are covered, unexposed or inaccessible. Our assessment is based on the premised that the items are in a condition commensurate with age and usage.

Machinery & Equipment associated with the supply of services to the building such as Elevators, Air Conditioning Systems are valued on the assumption that they are permanently installed or attached to the building.

4.45 In applying Income Approach to value, we have considerably relied on the information provided to us by the Client which includes the following: lease contracts, revenue and expense projections, historical and projected occupancies. Upon expiration of contracts, we estimated the lease rates based on the acceptable escalations in the market.

4.46 Given the 98-year leasehold, we assumed that the Property is comparable to a freehold property given the duration of the leasehold interest on the land. Thus, a terminal value of the Property was computed at the end of the cashflow.

Valuation Results

Using Cost Approach	4.47	Using the **Cost Approach,** the Market Value of the Property, may be summarized as under

Land (Leasehold Value)	**PhP212,000,000**
Building	**1,460,000,000**
Building Machinery & Equipment	**310,203,000**

	PhP1,982,203,000
	=============
	PhP1,982,000,000
	=============

4.48 The Market Value of the Property is estimated at **PhP1,982,000,000 (ONE BILLION, NINE HUNDRED EIGHTY-TWO MILLION PHILIPPINE PESOS)**

Using Income Approach 4.49 Using the **Income Approach** on the other hand, the Market Value of the Property is estimated as follows:

DCF Analysis	**PhP6,066,000,000**
Direct Capitalization Method	**PhP6,821,000,000**

Calculation 4.50 We attach a copy of our valuation calculations for the Income Approach at Appendix **8 & 9**.

Comments 4.51 The values arrived at using the Income Approach are noted to be higher than the value arrived at using the Cost Approach. This is because, unlike the Income Approach, the Cost Approach does not capture the income potential of the Property.

4.52 For purposes of this valuation, we deemed it appropriate to adopt the results arrived at by the Income Approach – DCF Analysis, since this method is usually used to determine the value of an income-generating property, as it also captures the Property's future economic benefits, giving a better representation of the Property's Market Value at an acceptable rate of return that would compensate for the risks associated with the particular investment. It likewise takes into consideration market cycles that Direct Capitalization Method cannot capture.

Conclusion of Value 4.53 In conclusion, we are of the opinion that the Market Value of the Property, reckoned as of **30 June 2021**, is:

PhP6,066,000,000 (SIX BILLION, SIXTY-SIX MILLION PHILIPPINE PESOS).

***Note**: The outbreak of the Novel Coronavirus (COVID-19), declared by the World Health Organization as a "Global Pandemic" on 11th March 2020, has impacted global financial markets. Travel restrictions have been implemented by many countries. In the Philippines, market activity is being impacted in all sectors. As at the valuation date, we consider that we can attach less weight to previous market evidence for comparison purposes, to inform opinions of value. Indeed, the current response to COVID-19 means that we are faced with an unprecedented set of circumstances on which to base a judgement. Our valuation* *is therefore reported on the basis of "material valuation uncertainty" per IVS 103 of the International Valuation Standards. Consequently, less certainty – and a higher degree of caution – should be attached to our valuation than would normally be the case. Given the unknown future impact that COVID-19 might have on the real estate market, we recommend that you keep the valuation of this property under frequent review.*

Value forwarded ……………………………. PhP6,066,000,000

Appendix 1 - Assumptions, Limiting Conditions and Disclaimers

Basis of Value	Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion." In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property. It is further assumed that title to the property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable. The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.
Property Rights appraised	The rights appraised in this report are the property rights in fee simple, free and clear. "Fee simple" is defined as absolute ownership, without limitations to any particular class of heirs or restrictions, but subject to the limitations of eminent domain, escheat, police power and taxation. We assume that the fee simple interest is marketable and in compliance with the applicable laws of the Philippines.
Fractional Interests:	When the study contains a valuation relating to an estate in land that is less than the whole fee simple estate, the value reported for such estate relates to a fractional interest only in the real estate involved, and the value of this fractional interest plus the value of all other fractional interests may or may not equal the value of the entire fee simple estate which is considered the whole. When the valuation report contains an allocation of the total valuation between land and building improvements, such allocation applies only under the existing program of utilization. The separate valuations for land and building cannot be used in conjunction with any other valuation/appraisal and will be invalid if so used.
Assumptions:	The valuation is based on the condition of the economy and the purchasing power of the Philippine Peso as of the effective date of valuation. We have assumed that the floor areas provided us have been calculated in accordance with engineering standards, and assumed herein to be true and correct. Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.
Information Supplied By Others	Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser. Information provided by informed local sources, such as government agencies, financial institutions, Realtors, buyers, seller and others, was weighed in the light in which it was supplied and checked by secondary means; however, no responsibility is assumed for possible misinformation.
Legal Issues:	This valuation assumes no responsibility for the validity of legal matters affecting the property. The ownership history reported in this valuation is based on the appraiser's research of public records, which are assumed to be accurate and complete. It is not the intent of the valuation to offer a legal opinion of title. It is further assumed that the property has good title, responsible ownership and competent management. Any liens or encumbrances which may now exist have been disregarded. The appraiser is not required to give testimony or attendance in court by reason of this valuation, with reference to the property in question, unless arrangements have been previously made.
Liability:	The liability of Santos Knight Frank, Inc. and its directors and employees is limited to the addressee of this report only. No accountability, obligation or liability to any third party is accepted. In the event we are subject to any liability in connection with this engagement, regardless of legal theory advanced, such liability will be limited to the amount of fees we received for this engagement.
Environmental Conditions:	It is assumed that there is full compliance with all applicable Philippine environmental regulations and laws unless non-compliance is stated, defined, and considered in this appraisal report.
Town Planning:	It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.
Condition of Improvements:	We have inspected the improvements and structures. However we have not carried out a structural survey nor tested any of the services or facilities, nor have we inspected unexposed or inaccessible portions of the building, and are therefore unable to state that these are free from defect, rot, infestation, asbestos or other hazardous material. We have therefore, viewed the general state of repair of the property and advise that we did not notice any obvious signs of structural defect or dilapidations. Furthermore, the property appears to be in reasonable condition having regard to its age and use and unless otherwise stated. We also assume that the building complies with all relevant statutory requirements in respect of matters such as sanitary, building and fire safety regulations and standards.
Valuation Methodology:	Santos Knight Frank uses any one or a combination of the Market Data Approach, the Cost Approach, and the Income Capitalization Approach. Each methodology begins with a set of assumptions. The result is the best estimate of value Santos Knight Frank can produce, but it is an estimate and not a prediction or guarantee and it is fully dependent upon the accuracy of the assumptions as to income, expense and market conditions. These primary methodologies use market derived assumptions, including rents, yields and discount rates, obtained from analyzed transactions. We do not represent ourselves as experts for data, such as economic, demographic or construction costs, which has been obtained from external sources.
Others:	This report and valuation shall be used only in its entirety and no part shall be used without the whole report. It may not be used for any purpose other than the intended purpose mentioned herein. Possession of this report or any copy thereof does not carry with it the right of copying or publication. All copies will originate from Santos Knight Frank, Inc. and will be signed and dated as such. Neither the whole nor any part of the report or any reference to our name, our valuation and our report may be included in any document, circular or statement nor published without our prior written consent to the form and context in which it may appear. The delivery and acceptance of this report completes this assignment.

Attention: **MR. FREDERICK D. GO**
President and Chief Executive Officer

Subject: **Terms of Engagement for Valuation Services**

Dear Mr. Go:

Thank you for your interest in our Valuation Services. We refer to your invitation of 03 August 2020 requesting Santos Knight Frank, Inc. ("SKF") to submit a proposal for valuation (the "Valuation") in respect of the properties detailed below (the "Properties").

This proposal, together with our General Terms of Business for Valuation Services ("General Terms"), sets out our terms of engagement for carrying out this instruction. Once agreed and signed, this proposal shall constitute our Letter of Engagement ("Letter"). This Letter and the General Terms (together, the "Agreement") exclude any other terms which are not specifically agreed to us in writing. To the extent that there is any inconsistency between the Letter and the General Terms, this Letter shall take precedence.

1. Client

Our Client for this Valuation is Robinsons Land Corporation (the "Client", "you" or "your").

2. Purpose of Valuation

The Valuation is provided solely the purpose of transferring some of the Client's assets to the REIT Company and its application for a Tax-Free Exchange Ruling with the Bureau of Internal Revenue and listing of the REIT Company in the Philippine Stock Exchange (the "Transaction"). Specifically, the Valuation will be used for the Client's Financial Statements to be attached to the Offering Circular as required by the Securities and Exchange Commission (SEC) and will be attached as an appendix to the Client's REIT Plan. In accordance with clause 4.1 of our General Terms, the Valuation may not be used for any other purpose without our express written consent. The Valuation will be made accessible in the public domain as part of the regulatory requirements of the Transaction.

3. Term & Termination

This appointment will commence upon signing of this Agreement and shall continue to be in effect for a period of two (2) years. Any extension of the Term of this Agreement shall be mutually agreed upon by the parties in writing.

23. **Electronic Communication**

During the engagement, both parties may wish to communicate electronically with each other. However, electronic transmission of information cannot be guaranteed to be secure or virus-or error-free and information could be intercepted, corrupted, lost or destroyed, arrive late or incomplete, or otherwise be adversely affected or unsafe to use. Both parties agree to accept these risks and so each party will be responsible for protecting its own systems and interests in relation to electronic communications. Neither party will have any liability to the other party on any basis for any loss or damage arising from or in connection with the electronic communication of information between both parties or their reliance on such information.

24. **Acceptance**

Please sign and return a copy of this Letter signifying your acceptance of the terms of the Agreement. We reserve the right to withhold any Valuation and / or refrain from discussing it with you until this Letter has been countersigned and returned.

Your attention is drawn to the "Important Notice" in the General Terms. If you have any questions regarding this Letter and / or the terms of the Agreement, please let us know before signing this Letter.

Thank you for choosing Santos Knight Frank, Inc. and we look forward to working with you on this important engagement.

Sincerely,
SANTOS KNIGHT FRANK, INC.

Subject: **Amendment to Terms of Engagement and General Terms of Business for Valuation Services Dated 03 August 2020 ("Amendment")**

Dear Mr. Go:

We refer to subject Letter of Engagement and General Terms of Business for Valuation Services (together, the "Agreement") between Robinsons Land Corporation (the "Client", "you" or "your") and Santos Knight Frank, Inc. ("SKF") for the valuation of fourteen (14) office buildings (the "Covered Properties").

For this purpose, the Agreement is amended as follows:

The first, second, and third and fourth paragraphs shall now read:

For the Valuation

I. Valuation for Asset Transfer to REIT Company and its application for a Tax-Free Exchange Ruling:

For Valuation Update

II. Valuation of Properties for REIT listing to PSE:
Our Valuation of 14 Properties will be as follows:
1. Valuation for 4 Properties
2. Periodic Update of 14 Properties
Under REIT Company (Quarterly basis – optional)
3. Valuation Update of 14 Properties under REIT Company

Except as amended hereby, all the provisions of the Agreement which are not inconsistent herewith are incorporated herein by way of reference and from date hereof, the Agreement and this Amendment shall be read as one integrated document.

Kindly affix your signature on the conforme portion below and return one (1) original signed copy to us.

Sincerely,
SANTOS KNIGHT FRANK, INC.

Appendix 3 - General Terms of Business

General Terms of Business for Valuation Services

These General Terms of Business (the "**General Terms**") and our Letter of Engagement (the "**Letter**"), together form the agreement between you and us (the "**Agreement**"). References to "**you**", "**your**" etc. are to persons or entities who are our client and, without prejudice to clauses 3 and 4 below, to any persons purporting to rely on our Valuation.

Unless **the** context otherwise requires, all other terms and expressions used but not defined herein shall have the meaning ascribed to them in the Letter.

When used herein or in the Letter, the term "**Valuation**" shall mean any valuation report, advance report, supplementary report or subsequent/update report, produced pursuant to our engagement and any other replies or information we produce in respect of any such report and/or any relevant property. Any words following the terms "**including**", "**in particular**" or any similar expression shall be construed as illustrative and shall not limit the sense of the words preceding those terms.

All of the terms set out in these General Terms shall survive termination of the Agreement.

1. Santos Knight Frank, Inc.

1.1. Santos Knight Frank, Inc. ("**Santos Knight Frank**", "**our**", "**us**", "**we**") is a Philippine corporation with Securities and Exchange Commission (SEC) Registration Number A199818549.

1.2. Our registered office is at 10/F Ayala Tower & Exchange Plaza, Ayala Avenue, Makati City where a list of members may be inspected.

1.3. Any representative of Santos Knight Frank, Inc. described as *Director* is either a member or an employee of Santos Knight Frank, Inc. and is not a member of the Board of Directors. The term *Director* has been retained because it is an accepted way of referring to senior professionals. The term "**Santos Knight Frank Person**" shall, when used herein, mean any member, employee, or consultant of Santos Knight Frank, Inc.

1.4. Our Tax Identification Number (TIN) is 201-626-570-000.

1.5. The details of our professional indemnity insurance will be provided to you on request.

1.6. Santos Knight Frank, Inc., being a corporation, is regulated by the Philippine Securities and Exchange Commission (SEC). It is also an SEC-accredited asset valuer. In accordance with reportorial filings with the SEC, it may be necessary to disclose valuation files to them. By instructing us, you give us your permission to do so. Where possible we will give you prior notice before making any such disclosure, although, this may not always be possible. We will use reasonable endeavours to limit the scope of any such disclosure and to ensure any disclosed documents are kept confidential.

1.7. Valuations will be carried out in accordance with the 2019 edition of the International Valuation Standards (IVS) by valuers who conform to its requirements and with regard to relevant statutes or regulations. Our senior valuers are Real Estate Appraisers licensed and regulated by the Philippine Professional Regulation Commission (PRC).

2. Governing law and jurisdiction

2.1. The Agreement and any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with it or its subject matter or formation or any Valuation shall be governed by and construed in accordance with Philippine laws.

2.2. Philippine courts shall have exclusive jurisdiction to settle any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with this Agreement or its subject matter or formation or any Valuation. This will apply wherever the relevant property or the client, or any relevant third party, is located or the service is provided.

3. Limitations on liability

3.1. Subject to clause 3.7, our maximum total liability in connection with or arising out of this Agreement and/or its subject matter and/or the Valuation is limited to our total service fees as set out in the Letter.

3.2. Subject to clause 3.7, we will not be liable for any loss of profits or for indirect or consequential loss or damages.

3.3. Subject to clause 3.7, any limitation on our liability will apply however such liability is or would otherwise have been incurred, whether in contract, tort (including negligence), for breach of statutory duty, or otherwise.

3.4. Except as set out in clauses 3.5 and 4.7 and 4.8 below, no third party shall have any right to enforce any of the terms of this Agreement.

3.5. No claim arising out of or in connection with this Agreement may be brought against any Santos Knight Frank Person. Those individuals will not have a personal duty of care to you or any other person and any such claim for losses must be brought against Santos Knight Frank, Inc. Any Santos Knight Frank Person may enforce this clause but the terms of this Agreement may be varied by agreement between the client and Santos Knight Frank, Inc. at any time without the need for any Santos Knight Frank Person to consent.

3.6. No claim, action or proceedings arising out of or in connection with the Agreement and/or any Valuation shall be commenced against us after the expiry of the earlier of (a) two years from the Valuation Date (as set out in the relevant Valuation) or (b) any limitation period prescribed by law.

3.7. Whether or not specifically qualified by reference to this clause, nothing in the Agreement shall exclude or limit our liability in respect of fraud, or for death or personal injury caused by our negligence or negligence of those for whom we are responsible, or for any other liability to the extent that such liability may not be so excluded or limited as a matter of applicable law.

4. Purpose, reliance and disclosure

4.1. The Valuation is prepared and provided solely for the stated purposes. Unless expressly agreed by us in writing, it cannot be relied upon, and must not be used, for any other purpose and, subject to clause 3.7, we will not be liable for any such use.

4.2. Without prejudice to clause 4.1 above, the Valuation may only be relied on by our Client. Unless expressly agreed by us in writing the Valuation may not be relied on by any third party and we will not be liable for any such purported reliance.

4.3. Subject to clause 4.4 below and for the stated purposes, the Valuation is confidential to our Client and must not be disclosed, in whole or in part, to any third party without our express written consent (to be granted or withheld in our absolute discretion). No liability is accepted to any third party for the whole or any part of any Valuation disclosed in breach of this clause.

4.4. Our appraisers are not required to give testimony or attendance in court by reason of this Valuation with reference to the property in question, unless arrangements have been previously made.

4.5. Except for the stated purposes, neither the whole nor any part of the Valuation and/or any reference thereto may be included in any published document, circular or statement nor published in any way whatsoever whether in hard copy or electronically (including on any website) without our prior written consent and approval of the form and context in which it may appear.

4.6. Where permission is given for the publication of a Valuation, neither the whole nor any part thereof, nor any reference thereto, may be used in any publication or transaction that may have the effect of exposing us to liability for actual or alleged violations of SEC Memorandum Circular No. 2, series of 2014 (Guidelines on Asset Valuations) or Republic Act No. 8799 (Securities Regulation Code), as amended and its Implementing Rules and Regulations.

4.7. You agree that we, and/or any Santos Knight Frank Person, may be irreparably harmed by any breach of the terms of this clause 4 and that damages may not be an adequate remedy. Accordingly, you agree that we and/or any Santos Knight Frank Person may be entitled to the remedies of injunction or specific performance, or any other equitable relief, for any anticipated or actual breach of this clause 4.

4.8. You agree to indemnify and keep fully indemnified us, and each relevant Santos Knight Frank Person, from and against all liabilities, claims, costs (including legal and professional costs), expenses, damages and losses arising from or in connection with any breach of this clause 4 and/or from the actions or omissions of any person to whom you have disclosed (or otherwise caused to be made available) our Valuation otherwise than in accordance with this clause 4.

5. Knight Frank network

5.1. Santos Knight Frank, Inc. is a member of an international network of independent firms which may use the "Knight Frank" name and/or logos as part of their business name and operate in jurisdictions outside the Philippines (each such firm, an "**Associated Knight Frank Entity**").

5.2. Unless specifically agreed otherwise, in writing, between you and us: (i) no Associated Knight Frank Entity is our agent or has authority to enter into any legal relations and/or binding contracts on our behalf; and (ii) we will not supervise, monitor or be liable for any Associated Knight Frank Entity or for the work or actions or omissions of any Associated Knight Frank Entity, irrespective of whether we introduced the Associated Knight Frank Entity to you.

5.3. You are responsible for entering into your own agreement with any relevant Associated Knight Frank Entity.

5.4. This document has been originally prepared in the English language. If this document has been translated and to the extent there is any ambiguity between the English language version of this document and any translation thereof, the English language version as prepared by us shall take precedence.

6. Severance

If any provision of the Agreement is invalid, illegal or unenforceable, the parties shall negotiate in good faith to amend such provision so that, as amended, it is legal, valid and enforceable and, to the greatest extent possible, achieves the intended commercial result of the original provision. If express agreement regarding the modification or meaning or any provision affected by this clause is not reached, the provision shall be deemed modified to the minimum extent necessary to make it valid, legal and enforceable. If such modification is not possible, the relevant provision shall be deemed deleted. Any modification to or deletion of a provision under this clause shall not affect the validity and enforceability of the rest of this Agreement.

7. Entire agreement

7.1. The Agreement, together with any Valuation produced pursuant to it (the Agreement and such documents together, the "**Contractual Documents**") constitute the entire agreement between you and us and supersedes and extinguishes all previous agreements, promises, assurances, warranties, representations and understandings between you and us, whether written or oral, relating to its subject matter.

7.2. Subject to clause 3.7 above, you agree that in entering into the Agreement you do not rely on, and shall have no remedies in respect of, any statement, representation, assurance or warranty (whether made innocently or negligently) that is not expressly set out in the Contractual Documents. You further agree that you shall have no claim for innocent or negligent misrepresentation based on any statement set out in the Contractual Documents.

7.3. The Letter and these General Terms shall apply to and be incorporated in the contract between us and will prevail over any inconsistent terms or conditions contained or referred to in your communications or publications or which would otherwise be implied. Your standard terms and conditions (if any) shall not govern or be incorporated into the contract between us.

7.4. Subject to clause 3.7 and clause 6, no addition to, variation of, exclusion or attempted exclusion of any of the terms of the Contractual Documents will be valid or binding unless recorded in writing and signed by duly authorised representatives on behalf of the parties.

8. Assignment

8.1. You shall not assign, transfer, mortgage, charge, subcontract, declare a trust over or deal in any other manner with any of the rights and obligations under the Agreement without our prior written consent (such consent to be granted or withheld in our absolute discretion).

9. Force majeure

9.1. Neither party shall be in breach of this Agreement nor liable for delay in performing, or failure to perform, any of its obligations under this Agreement if such delay or failure results from events, circumstances or causeswhich could not be foreseen, or which, though foreseen, were inevitable.

10. Our fees

10.1. Without prejudice to clause 10.3 below, you become liable to pay our fees upon issuance of the Valuation. For the avoidance of doubt, unless expressly agreed otherwise in writing, the payment of our fees is not conditional on any other events or conditions precedent.

10.2. If any invoice remains unpaid after 30 days of the date on which it is presented, we reserve the right to charge interest, calculated daily, from the date when payment was due until payment is made at 3%

10.3. If we should find it necessary to use legal representatives or collection agents to recover monies due, you will be required to pay all costs and disbursements so incurred.

10.4. If an appraisal analysis is ordered and the assignment is cancelled before completion, we reserve the right to receive compensation, by way of damages, in an amount equal to 70% of the total fee for the assignment.

10.5. If you delay the instruction by more than 30 days or materially alter the instruction so that additional work is required at any stage or if

we are instructed to carry out additional work that we consider (in our reasonable opinion) to be either beyond the scope of providing the Valuation or to have been requested after we have finalised our Valuation (including, but not limited to, commenting on reports on title), we will charge additional fees for this work. Such additional fees will be calculated on the basis of a proportion of the total fee by reference to reasonable time and expenses incurred.

10.6. Where we agree to accept payment of our fees from a third party, such fees remain due from you until payment is received by us.

11. Anti-bribery and corruption and Anti-Money Laundering
We agree that throughout the term of our appointment we shall:

(a) comply with all applicable laws, statutes, regulations, and codes relating to anti-bribery and corruption and Anti-Money Laundering laws (the "**Relevant Requirements**");

(b) not engage in any activity, practice or conduct which would constitute an offense;

(c) maintain anti-bribery, anti-corruption, and anti-money laundering policies to comply with the Relevant Requirements and any best practice relating thereto; and

(d) promptly report to you any request or demand for any undue financial or other advantage of any kind in connection with the performance of our services to you.

12. Portfolios
Properties comprising a portfolio, unless specifically agreed with you otherwise, will be valued separately and upon the assumption that the properties have been marketed individually and in an orderly manner.

13. Land Register inspection and searches
We are not required to undertake searches, validations or inspections of any kind for title or price paid information in any publicly available land registry.

14. Title and burdens
We will assume, unless specifically informed and stated otherwise, that each property has good and marketable title and that all documentation is satisfactorily drawn and that there are no unusual outgoings, planning proposals, onerous restrictions or local authority intentions which affect the property, nor any material litigation pending.

15. Disposal costs and liabilities
No allowance is made in our Valuation for expenses of realisation or for taxation which may arise in the event of a disposal and our Valuation is expressed as exclusive of any VAT that may become chargeable. Properties are valued disregarding any mortgages or other charges, including commissions.

16. Sources of information
We rely upon the information provided to us by you, as to details of tenure and tenancies, planning consents and other relevant matters, as summarised in our Valuations. Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser.

17. Identity of property to be valued
We will exercise reasonable care and skill (but will not have an absolute obligation to you) to ensure that the property, identified by the property address in your instructions, is the property inspected by us and contained within our valuation report. If there is ambiguity as to the property address, or the extent of the property to be valued, this should be drawn to our attention in your instructions or immediately upon receipt of our report.

18. Boundaries
Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.

19. Planning, highway and other statutory regulations

19.1. Enquiries of the relevant planning and highways authorities in respect to matters affecting properties, where considered appropriate, are normally only obtained from the corresponding government agency. We can only state whatever current conditions may be. We recommend that formal written enquiries should be undertaken by your lawyers who should also confirm the position with regard to any legal matters referred to in our Valuations.

19.2. It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative, regulatory, or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.

19.3. We assume that the premises comply with all relevant statutory requirements including environmental, building, fire, and sanitation regulations.

20. Property insurance
Our Valuation assumes that each property would, in all respects, be insurable against all identifiable risks.

21. Building areas and age
Where so instructed, areas provided from a quoted source will be relied upon. Any dimensions and areas measured on location or from plan/s are calculated and are quoted to a reasonable approximation, with reference to their source. Where the age of the building is estimated, this is for guidance only.

22. Structural condition
Building, structural and ground condition surveys are detailed investigations of the building, the structure, technical services and ground and soil conditions undertaken by specialist building surveyors or engineers and fall outside the normal scope of a valuation. Since we will not have carried out any of these investigations, we are unable to report that any property is free of any structural fault, rot, infestation or defects of any other nature, including inherent weaknesses due to the use in construction of deleterious materials. We do reflect the contents of any building survey report provided to us in advance, or any defects or items of disrepair of which we are advised or which we note during the course of our ocular inspections but otherwise assume properties to be free from defect.

23. Ground conditions
Unless informed otherwise in writing, we assume there to be no adverse ground or soil conditions and that the load bearing qualities of the sites of each property are sufficient to support the building constructed or to be constructed thereon.

24. Environmental issues

24.1. Investigations into environmental matters by suitably qualified environmental specialists would usually be commissioned by most responsible purchasers or chargees of higher value properties or where there was any reason to suspect contamination or a potential future liability. Furthermore, such investigation would be pursued to the point at which any inherent risk was identified and quantified before a purchase proceeded. Where we are provided with the conclusive results of such investigations, on which we are instructed to rely, these will be reflected in our Valuations with reference to the source and nature of the enquiries. We would endeavour to point out any obvious indications or occurrences known to us of harmful contamination encountered during the course of our valuation enquiries.

24.2. However, we are not environmental specialists and therefore we do not carry out any scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination or any other environmental searches. If we are not provided with the results of appropriate investigations as outlined above and where there is no obvious indication of harmful contamination, our Valuation will be provided on the assumption that the relevant property is unaffected. Where we are informed that contamination is suspected or confirmed, but adequate investigation has not been carried out and made available to us, then the Valuation will be qualified only by reference to it.

25. Minerals, timber, airspace etc.

Unless specifically agreed otherwise in writing and so stated within the main body of the relevant Valuation, we do not value or attempt to value or take into account any potential income stream or other beneficial or detrimental effect or other factor relating to undiscovered or unquantified mineral deposits, timber, airspace, sub-ground space or any other matter which would not be openly known in the market and considered to have value.

26. Legal advice

26.1. We are appointed to provide valuation opinion(s) in accordance with our professional duties as Appraisers. The scope of our service is limited accordingly. The valuation assumes no responsibility for the validity of legal matters affecting the property. It is not the intent of the valuation to offer a legal opinion of title. Any liens or encumbrances which may now exist have been disregarded. We are not qualified legal practitioners and we do not provide legal advice and any statements made by us, or advice given, in a legal context should be construed accordingly.

26.2. Where appropriate we will liaise with your legal advisors. However, we accept no responsibility for any work carried out by them and we will not be liable for anything contained in legal documentation prepared by them.

26.3. Where we consider it is necessary for the provision of the Valuation and/or specifically agree to do so, and any additional fees we require for this work are agreed, we will read legal documents (including leases, licences etc.), however, (save for any comment concerning the impact of our interpretation of such documents on value) our interpretation of such documents cannot be relied upon to be legally correct. Where we do interpret legal documents, we will, for the purposes of providing our Valuation, assume our interpretation to be correct.

27. Loan security

Where instructed to comment on the suitability of property as a loan security we are only able to comment on any inherent property risk. Determination of the degree and adequacy of capital and income cover for loans is the responsibility of the lender having regard to the terms of the loan.

28. Build cost information

In the provision of valuation services we do not hold ourselves out to have expertise in assessing build costs. Where our instruction requires us to have regard to build cost information, for example in the valuation of properties with development potential, we strongly recommend that you supply us with build cost and other relevant information prepared by a suitably qualified construction cost professional, such as a quantity surveyor. The Valuation will be stated to have been arrived at in reliance upon the build cost information supplied to us by you. In the absence of any build cost information supplied to us, we may have regard to published build cost information. Build costs produced using this approach must be assumed to be unreliable or inaccurate; any reliance which can be placed upon our Valuation in these circumstances is severely restricted. Specialist professional advice on the build costs should be sought by you. If you subsequently obtain specialist build cost advice, we recommend that we are instructed to review our Valuation.

29. Reinstatement assessments

A reinstatement assessment for insurance purposes is a specialist service and we recommend that separate instructions are issued for this specific purpose. If an indication is required as a check against the adequacy of existing cover this should be requested and will be so stated in the body of the relevant Valuation. Any indication given is provided for guidance only and must not be relied upon as the basis for insurance cover. In any event, our reinstatement assessment should be compared with the owner's and if there is a material difference, then a full reinstatement valuation should be reconsidered.

30. Comparable evidence

Where comparable evidence information is included in our Valuation, this information is often based upon our oral enquiries and its accuracy cannot always be assured, or may be subject to undertakings as to confidentiality. However, such information would only be referred to where we had reason to believe it or where it was in accordance with our expectation. In addition, we have not inspected comparable properties.

31. Valuation bases

Valuations are carried out on a basis appropriate to the purpose for which they are intended and in accordance with the relevant definitions, commentary and assumptions. The basis of valuation will be agreed with you and specified in the Letter and in the relevant Valuation.

Important Notice

If you have any queries relating to this Agreement please let us know as soon as possible, and in any event before signing the Letter and/or giving us instructions to proceed.

Your instructions to proceed, preferably signing on the space provided for under the Letter, will constitute your acceptance to use our services on the terms of the Agreement.

Accordingly, our commencement of work pursuant to your instructions shall constitute acceptance of your offer and as such establish the contract between us on the terms of the Agreement.

Appendix 11 - Schedule of Assets

BUILDING	
Description	**Market Value (PhP)**
Tera Tower - As seen during our inspection for the previous valuation done, this is a twenty (20)-storey, reinforced concrete-framed building with one (1) basement level and a roof deck. The ground floor is being utilized as lobby and for retail purposes. The second up to the fifth floor as well as the basement level are used as parking areas with some office and equipment rooms while the rest of the upper floors are used as offices. Some equipment rooms, meanwhile, can also be found at the roof deck. Tera Tower is a Gold LEED (Leadership in Energy and Environment Design) certified building. Construction was reportedly completed sometime in August 2015. Some of the energy efficient and environment-friendly features of the building include double glazed glass windows that allow natural light into the building while blocking out noise and heat; LED lighting for common areas; water recycling for plant irrigation; column-free office spaces; disabled-friendly ramps; and garden. Other construction features include partly granite tiles and plastered cement finish precast concrete exterior walls and mainly double glazed glass curtain walls; concrete slab roofing with waterproofing membrane; mainly granite tiles on concrete flooring at lobbies and hallways, and epoxy paint finish concrete flooring on parking areas; mainly granite tiles finish concrete partitions in lobbies; mainly gypsum board and fiber cement board ceiling in common areas; and frameless glass main entrance doors. The office units during handover to the tenants reportedly have plain cement finish concrete flooring, acoustic board on aluminum T-runner ceiling (uninstalled) and electrical lighting facilities. The retail units, meanwhile, have plain cement finish concrete flooring, open ceiling and electrical lighting facilities upon turnover to the tenants. All interior works done on the leased areas were reportedly shouldered by the tenants and were, therefore, excluded in this report. The building is painted and provided with electrical lighting and plumbing facilities, and 2 concrete cisterns at the basement with a capacity of about 60,000 gallons each. It is also provided with building machinery and equipment such as elevators and air conditioning system, among others, described and valued in the succeeding sections of this report. The building is connected to Giga Tower from Basement to 5th Floor. Reportedly, the connection of the two towers, which is not part of this valuation, was built sometime in 2019. Based on information provided to us by the client, total gross floor area of the building is approximately 52,248.86 sq. m.	**1,460,000,000**

BUILDING MACHINERY & EQUIPMENT

Description	Market Value (PhP)
Elevators	
5-Passenger Elevators- Schindler, 1,350 kgs., 20 persons capacity, 16 landings, complete with electric drive motor, governor, control panel, wires, cables and other standard accessories	45,012,000
Passenger Elevator- Schindler, 1,350 kgs., 20 persons capacity, 17 landings, complete with electric drive motor, governor, control panel, wires, cables and other standard accessories	9,565,000
Service Elevator- Schindler, 2,000 kgs., 20 persons capacity, 22 landings, complete with electric drive motor, governor, control panel, wires, cables and other standard accessories	16,776,000
Parking Elevator- Schindler, 1,350 kgs., 20 persons capacity, 6 landings, machine less room, complete with electric drive motor, control panel, wires, cables and other standard accessories	3,069,000
Total for Elevators -	**74,422,000**

Air Conditioning and Ventilating System

Lot-Air Conditioning System-
Mitsubishi Electric Citi Multi, Variable Refrigerant Flow (VRF) System, modular type, system comprsing of:
ACCU Outdoor Unit -
50 kw cooling capacity series
61 - ACCU Outdoor Units -
45 kw cooling capacity series
61 - ACCU Outdoor Units -
38 kw cooling capacity series
61 - ACCU Outdoor Units -
33 kw cooling capacity series
180-ERV Units-

300 - ACCU Indoor Units (FCU) -
Ceiling mounted, ranges from 2.5 to 5 TR cooling capacity
300 - ACCU Indoor Units (FCU) -
Ceiling concealed type, 2.5 TR cooling capacity each
17 - ACCU Indoor Units (FCU) -
Ceiling concealed type, ranges from 4.5 to 8 TR cooling capacity
Air Handling Unit-
Mitsubishi Electric Co., unitary package ducted type, 20 TR capacity
Note: Located at Second Floor
4-Air Conditioning Units-
Carrier, window type, 2.5 kw capacity
Note: Located at Machine Rooms
System complete with piping connections, electrical and controls system, valve and fittings, and other standard accessories
Note: Installed in various locations 117,911,000

Lot-Air Ventilation and Exhaust System-
Consisting of:
7-Jet Fans-
Jet type, driven by 320 watts motor
Note: Located at Basement
Smoke Evacuation Fan-
Niagara, driven by 3.73 kw electric motor
Note: Located at Roofdeck
Pressurization Evacuation Fan-
Niagara, driven by 3.73 kw electric motor
Note: Located at Roofdeck
2-Pressurization Evacuation Fans-
Niagara, driven by 5.6 kw electric motor
Note: Located at Roofdeck
32-Exhaust Fans-
Niagara, driven by .144 kw electric motor
Note: Located at Comfort Rooms
2-Exhaust Fans-
Niagara, driven by 2.24 kw electric motor
Note: Located at Roofdeck
15-Exhaust Fans-
Niagara, driven by .04 kw electric motor
Note: Located at Ground to 5th Floors
15-Exhaust Fans-
Niagara, driven by .04 kw electric motor
Note: Located at Ground to 5th Floors
8-Exhaust Fans-
Niagara, driven by .75 kw electric motor
Note: Located at Ground to 2nd Floors
13-Exhaust Fans-

Niagara, drive motor ranges from 0.75 kw to 2.2 kw

Note: Located at Basement

Fresh Air Fan-

Niagara, driven by 1 kw electric motor

Note: Located at Basement

System complete with ductings installations, electrical and controls system and other standard accessories — 2,213,000

Total for Air Conditioning and Ventilating System - 120,124,000

Lot-Building Management System-

Consisting of:

CPU (Air Conditioning System)-

HP, Core i7 with keyboard and mouse

LCD Monitor-

HP

UPS-

Intex 650 VA

CPU (Elevator)-

Transformer type console

LCD Monitor-

Claxan

System complete with electrical wiring installations and other standard accessories — **5,486,000**

Lot-Standby Power Supply and Electrical Power Distribution System-

System consisting of:

3-AC Electric Generating Set-

Leroy Somer, Model MG-L51S58, May 2014 Mfg Date, Ser \. Nos. 068673001, 068673002 and 068673003, 2165 kva (1732 kw) rated capacity, 0.80 power factor, 1800 rpm, 3 phase, 60 hz, powered by:

16 Cylinder Diesel Engine-

Mitsubishi, turbo-charged, direct injection, water cooled, complete with battery, controls and other standard accessories, steel skid base mounted on concrete foundation

Generator Synchronizing Panel-

Metal clad casement, free standing with 6 vertical sections, complete with main breakers, sub-breakers, magnetic contactors, relays, timers, on/off switches, pushbutton switches, pilot lights, automatic transfer switch and other standard accessories

Fuel Day Tank-

Mild steel plate of welded construction, 14,000 liters capacity

Fuel Storage Tank-

Mild steel plate of welded construction, 80,000 liters capacity

Note: Located at Basement

2-Fuel Pumps-

Tuthill, rotary gear type, driven by 5.5 kw electric motor
Note: Located at Basement
2-Power Transformers-
No available brand, 2.5 mva rated capacity, 34.5 kv and 400 volts primary and secondary voltages, oil immersed, pad mounted, 3 phase
Vacuum Fault Interrupter-
Cooper, metal clad casement, 2 swing-out door panels
Low Voltage Switchgear-
Metal clad casement, free standing with 9 vertical sections, complete with main breakers, sub-breakers, magnetic contactors, relays, timers, on/off switches, pushbutton switches, pilot lights automatic transfer switch and standard accessories
Main Distribution Panel-
Metal clad casement, free standing with 1 vertical section, 1,250 amperes rating
Automatic Transfer Switch-
Metal clad casement, free standing with 1 vertical section, 1,000 amperes rating
2-Capacitor Banks-
Metal clad casement, free standing with 2 swing-out door panels, approx. 800 kvar capacity, 400 volts
System complete with electrical wiring installations, piping connections, contactors, relays and other standard accessories **87,511,000**

Lot-Water Supply and Sewerage System-
Consisting of:
2-Water Storage Tanks-
Stainless steel construction, 5,000 gallons capacity
Note: Located at Roof Deck
2-Booster Pumps-
Goulds Water Technology, centrifugal type, driven by 2.2 kw electric motor, equipped with;
Pressure Tank-
Super Flow, GWS, mild steel construction, 850 liters capacity
Note: Unut located near Upper Deck Machine Room
Rain Water Storage Tank-
Stainless steel construction, 5,000 gallons capacity, 4570 mm x 2745 mm x 2440 mm overall dimensions, equipped with;
2-Booster Pumps-
Lowara, vertical turbine type, driven by 5.5 kw electric motor
Pressure Tank-
Super Flow, GWS, mild steel construction, 850 liters capacity
Note: Located at Basement
2-Transfer Pumps-
Worthington, vertical turbine type, 180 gpm capacity, driven by 18.5 kw electric motor
Note: Located at Basement
2-Sump Pumps-

Submersible type, driven by 8.2 kw electric motor

Note: Located at Basement

System complete with piping connections, valves and fittings, controls and other standard accessories	**3,998,000**

Lot-Automatic Fire Fighting, Fire Protection and Alarm System

Consisting of:

Fire Pump-

AC Fire Pump, vertical turbine type, 750 gpm capacity, driven by 75 kw electric motor

Fire Pump-

AC Fire Pump, vertical turbine type, 750 gpm capacity, driven by 4 Cylinder Clarke / John Deere Diesel Engine

Jockey Pump-

Submersible type, driven by 5.6 kw electric motor

Automatic Transfer Switch-

Metal clad casement, free standing, 1,200 amperes

2-Fire Pump Controllers-

Eaton

Jockey Pump Controller-

Eaton

40-Fire Hose Cabinets-

Aluminum frame with glass panel door, wall mounted, complete with fire hose, nozzle and 10 lbs dry chemical type fire extinguisher

System complete with automatic sprinkler heads, 2 FDAS Protec Algo Tec 6300 with lcd repeat display, fire extinguishers, smoke and heat detectors, fire alarm bells, burglar alarm, piping connections, valves, fittings, and other standard accessories

Note: Installed in various locations.	**9,118,000**

Lot-Sewage Treatment Plant -

Approximately at an average of 100 to 150 cubic meters per day effluent working capacity, complete with 2 - 3.12 kw air blowers, 2 effluent pumps, 2 influent pumps, sump pump, 4 carbon filters, air diffusers, valves, fittings, piping installations, collecting chamber tanks, controls and other standard accessories	**3,411,000**

Lot-CCTV Security Monitoring System-

Consisting of:

82-CCTV Cameras-

Fix dome type

2-CCTV Camera-

Moving type

6-LCD Monitors-

Samsung, 32" screen size

6-DVR-

GMG Advanced K.264

Switch-

EN Genius, EGS5110P
4-UPS-
Liebert Eaton / AWD
AVR-
Auto Stac, ST-1500W
System complete with controller, electrical and wiring installations, controls and other standard accessories **2,611,000**

<u>**Others**</u>

Walkthrough Metal Detector-	171,000
Seismic Accelorographs-	
IMV Corp., wall mounted, digital display	1,472,000
Gondola-	
MHE Demag, 2015 year model, 200 kgs capacity, complete with cage, winch, weights, drive motor and other standard accessories	1,804,000
2-Parking Boom Barriers-	
Nice, with 6 meters long tubular barrier	75,000

Total for Others -	**3,522,000**

Total for Building Machinery & Equipment -	**310,203,000**

PROFESSIONAL PROFILE

WENCESLAO D. FUENTES, JR.
Director

T 632.752.2580

F 632.752.2571

Bong.Fuentes@santos.knightfrank.ph

Bong D. Fuentes, Jr. is a Director of Santos Knight Frank, Inc. under the Valuations Group. His major functions include scheduling, monitoring, and overseeing the various engagements of the Group, and also supervises the valuation pertaining to Plant and Machinery. He also has parallel involvement in Real Property appraisal, being a Licensed Real Estate Appraiser. Other responsibilities include business development for corporate and financial institution accounts.

Prior to joining Santos Knight Frank, Inc., Bong was involved with other appraisal companies like Sallmanns Phil., Inc. and Asian Appraisal Company, Inc. where he started his appraisal career. He was also involved with financial institutions like Bank of the Philippine Islands (BPI) and the former Far East Bank & Trust Company. His experience in his field spans a period of almost twenty-one (21) years, and he has handled appraisal/valuation studies for all types of Plant and Machinery and Real Property Valuation in the Philippines. His experience in the valuation of Plant Machinery include assignments in the People's Republic of China (PROC), Hong Kong, United Arab of Emirates, Malaysia and Thailand.

Appendices

1 Instructions

Engagement of Santos Knight Frank

Instructions	1.1	We refer to our Letter of Engagement dated 21 September 2020 and Amendment dated 01 June 2021, to provide a Valuation Report on the opinion of **Market Value** using Cost and Income Approaches of that certain Property consisting of leasehold of land, building, and building machinery & equipment of a site identified as Luisita Office 1, located within **Luisita Business Complex, Barangay San Miguel, Tarlac City, Province of Tarlac, Philippines**, ("the Property"). A copy of that document is attached herein as Appendix **2**.
	1.2	This valuation has been carried out by Santos Knight Frank, Inc. ("Santos Knight Frank" or "SKF"), in accordance with our General Terms of Business for Valuations ("General Terms of Business"), as attached as Appendix **3**.
Client	1.3	Our client for this instruction is **Robinsons Land Corporation** ("the Client").
Valuation standards	1.4	This valuation has been undertaken in accordance with the International Valuation Standards, as well as other local standards.
Purpose of valuation	1.5	You have confirmed that this valuation is for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
Conflict of interest	1.6	We confirm that we do have a material connection or involvement giving rise to a potential conflict of interest, as set out below: We have conducted the valuation of the same Property for you as of 30 September 2020 for purposes of: i) the tax-free exchange of assets to a REIT Company, and (ii) for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
	1.7	You have confirmed this Engagement notwithstanding this matter, you are content for us to proceed with this instruction. We are providing an objective and unbiased valuation.
	1.8	We are acting as external and independent valuers in this engagement.
Responsibility to third parties	1.9	Our valuation report is only for the use of our Client and for the purposes for which are stated herein, and no liability is accepted to any third party for the whole or any part of its contents.
Disclosure & publication	1.10	Except for the purposes which are stated herein, neither the whole nor any part of this valuation nor any reference thereto may be included in any published

document, circular or statement nor published in any way without our prior written approval of the form or context in which it may appear.

Limitations on liability

1.11 No claim arising out of or in connection with this valuation report may be brought against any member, employee, partner, director or consultant of Santos Knight Frank, Inc. Those individuals will not have a personal duty of care to any party and any claim for losses must be brought against Santos Knight Frank, Inc.

1.12 Santos Knight Frank, Inc.'s total liability for any direct loss or damage caused by negligence or breach of contract in relation to this instruction and valuation report is limited to the amount of the level of our fee, specified in the Letter of Engagement, a copy of which is attached as Appendix 2. We do not accept liability for any indirect or consequential loss (such as loss of profits).

1.13 The above provisions shall not exclude or limit our liability in respect of fraud or for death or personal injury caused by our negligence or for any other liability to the extent that such liability may not be excluded or limited as a matter of law.

Expertise

1.14 The valuation process was performed by **Raymond F. Dechavez** and **Vincent S. Lano**, under the supervision of **Jacqueline T. Guerta** and **Jesus Constance M. Castro**, both licensed Real Estate Appraisers. The Principal Signatory on behalf of Santos Knight Frank, Inc. and who also reviewed the Valuation Report, is **Wenceslao D. Fuentes, Jr.,** also a licensed Real Estate Appraiser. We confirm that the above-named Licensed Real Estate Appraisers are registered with the Professional Regulation Commission ("the PRC"), having sufficient current knowledge of the particular market and the skills and understanding to undertake the valuation competently.

Vetting

1.15 This report has been vetted as part of Knight Frank global standards.

Scope of enquiries & investigations

Inspection

1.16 In accordance with your instructions, due to the limited timeframe to complete the Engagement, we have not conducted a current inspection. The Property has been previously inspected. Valuation rendered is a result of a revaluation of a property that has previously been inspected.

1.17 The Client has provided us with information regarding the changes to the physical attributes and/or characteristics of the Property; current or anticipated changes in rental income from the Property; and material changes to the non-physical attributes of each property, such as other lease terms, planning consents, statutory notices and other relevant information which have occurred between the valuation date and the date of our previous valuation. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.

Investigations

1.18 The extent of enquiries/investigations made is set out in our General Terms of Business. In carrying out this instruction we have undertaken verbal / internet-

based enquiries referred to in the relevant sections of this report. We have relied upon this information as being accurate and complete.

Information provided

1.19 In this report, we have been provided with information/documents by the Client for the previous valuation done as well as for the current engagement. We have relied upon this information as being materially correct in all aspects. In particular, we detail the following:

- floor plans
- gross floor area tabulation
- title
- lot area allocation
- site development plan
- rent roll
- financial statements
- projections
- historical and current occupancy

1.20 In cases where we were not provided with documents or information, we did our own enquiries as outlined and stated in the report. Any assumptions in lieu of the lack of information is also set out in the relevant sections of this report.

Valuation basis

1.21 In accordance with your instructions, we have provided an opinion of value on the basis of **Market Value**.

Market Value (MV)

1.22 Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property.

It is further assumed that title to the Property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable.

The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.

Valuation date

1.23 The valuation date is **30 June 2021.**

2 The Property

Location

Address 2.1 The Property, identified as Luisita Office 1, is located at the southwest corner of two unnamed roads, within Luisita Business Complex beside or east of Robinsons Luisita, Barangay San Miguel, Tarlac City, Province of Tarlac, Philippines.

The Property is located across Luisita Office 2, also being tenanted by Sitel, about 150 meters east from McArthur Highway, some 200 meters southeast from Toyota Tarlac City, 600 meters southwest from Microtel Tarlac, almost a kilometer southwest from Central Park Hotel, some 5.1 kilometers southeast from SM City Tarlac, about 7.3 kilometres southwest from Hacienda Luisita SCTEx Exit and approximately 6.2 kilometers southeast from Tarlac City Hall.

Below is a satellite image courtesy of Google Maps showing the Property and its relation to the immediate vicinity

Note: Image courtesy of Google Maps.

2.2 The street plan below shows the location of the Property.

Neighborhood 2.3 The Property is located in an area where land development is generally for commercial purposes. Aside from the Property, other commercial/retail developments can be found within Luisita Business Complex such as “Robinsons Luisita”, “Starbucks”, “Max’s”, “McDonald’s” and “Toyota Tarlac City” among others.

The Property was formerly a part of the Hacienda Luisita, a 6,453-hectare sugar plantation owned by the Cojuangco’s. Nearby areas are generally characterized by a mixture of commercial, industrial and residential developments. Some of the notable developments within Hacienda Luisita include Microtel Inn and Suites, Aquino Center & Museum, Luisita Central Park Hotel, Las Haciendas Luisita Subdivision, Luisita Industrial Park, Luisita Techno Park and Central Azucarera de Tarlac.

Accessibility 2.4 The Property fronts an unnamed road which connects to McArthur Highway making the site accessible from other sections of Tarlac City as well as the neighboring towns of Tarlac and the rest of Central Luzon. Public transport like buses, jeepneys, tricycles and UV Express are available throughout the day along McArthur Highway.

Other community centers like post office, churches, hospitals, and public and private schools are likewise accessible from the Property.

Land Details

Certificate of Title 2.5 The land where the Property is erected consists of a lot technically identified as Lot 2-B-1-D-2, Psd-03-149567 containing an area of **12,703 sq. m.**, more or less, covered by Transfer Certificate of Title No. 423148 issued in favor of **the Client** on June 27, 2007 by the Registry of Deeds for Tarlac City.

Lot Area Allocation 2.6 The land site is shared by another building identified as Robinsons Luisita, which is not covered by this valuation. Based on information provided to us by the Client, land area share or allocated land site for "Luisita Office 1" is about **2,806.45 sq.m.**

Draft Contract of Lease 2.7 We were provided by the Client a copy of a Draft Contract of Lease with ROBINSONS LAND CORPORATION, as the Lessor, and RL COMMERCIAL REIT, INC. (formerly Robinsons Realty and Management Corporation)[1], as the Lessee.

Based on the same document, the lease contract stated that it will cover the land being occupied by Robinsons Luisita Office 1 with an area of 2,806.45 sq.m. Lease term would be for a period of 99 years. It likewise specified that the monthly lease payments would be 7% of the monthly rental income gained from Robinsons Luisita Office 1 which is owned by the Lessee (plus VAT, as appliable).

2.8 The management of RLC disclosed that actual lease commencement shall be the date of the Certificate of Approval of the Increase in Authorized Capital Stock of RCR issued by the SEC. However, for valuation purposes, lease commencement shall be assumed on October 1, 2021.

In the absence of a signed contract, we used the foregoing details to establish the leasehold value of the land.

Tenure 2.9 For purposes of this engagement, ownership rights to the land are treated as **leasehold.**

Terrain 2.10 The terrain of the land is flat. Its finished elevation is slightly higher than the existing grade of the fronting roads.

Description of Improvements and Machinery & Equipment

Improvements and Machinery & Equipment 2.11 The land is presently improved with an office building identified as Luisita Office 1, a PEZA registered, Grade B office building, construction of which was completed sometime in January 2018. Also included in this valuation are the appurtenant building machinery & equipment. These are all described in detail in the Schedule of Assets (Appendix **9**).

Tenure 2.12 We were advised that the Client owns the improvements described above. As stated, the land would be covered by a long-term Lease Agreement. We have, however, treated the improvements as freehold.

Accommodation

Measurement 2.13 Based on the gross floor area tabulation provided to us by the Client, the building has a total gross floor area of approximately 5,969.19 sq.m.

2.14 The Gross Floor Area is tabulated as follows:

[1] As of the date of this Valuation Report, application for the change in name from "Robinsons Realty and Management Corporation" to "RL Commercial REIT, Inc." is pending the approval of the Philippine SEC.

Floor	Description	Floor Area (sq.m.)
Ground	Lobby, Pantry, Office Units	1,993.59
Second	Office Units	1,987.80
Third	Office Units	1,987.80

	Total	**5,969.19**

Condition

Scope of Inspection

2.15 As stated earlier, we have previously inspected the Property.

2.16 As stated in the General Terms of Business, during our previous inspection, we have not undertaken a building or site survey of the Property, as it is beyond the normal scope of appraisal.

2.17 We have carried out visual inspection only without any structural investigation or building survey. During our limited inspection, we did not inspect any inaccessible area/s. We are unable to confirm whether the Property is free from urgent or significant defects or items of disrepair.

2.18 Unless otherwise stated, we have not been able to carry detailed on-site measurement to verify the site and gross floor areas of the Property and we have no reason to doubt the truthfulness of the areas shown on the documents provided us.

2.19 Moreover, due to the nature of the machinery, we have not carried out mechanical inspection, and our assessment was based on the premise that the machinery is in a condition commensurate with age and normal usage.

2.20 In the Schedule of Assets or Asset Inventory, machinery and/or equipment were listed as complete units i.e., machinery and/or equipment are meant to include all parts and accessories normally comprising the unit.

Comments

2.21 Apart from the matters specifically referred to below, we have assumed that the Property is in sound order and free from structural faults, rot, infestation or other defects, and that the services are in a satisfactory condition.

2.22 The buildings and structures, including the machinery & equipment, were assumed to be in a generally good condition commensurate with their age and use. It was also assumed that there are no urgent or significant defects or items of disrepair which would be likely to give rise to substantial expenditure in the foreseeable future or which fall outside the scope of the normal annual maintenance programme.

Ground conditions

2.23 We have not been provided with a copy of a ground condition report for the site. We have assumed that there is no adverse ground or soil conditions and that the load bearing qualities of the site are sufficient to support the building.

Services

2.24 It would appear from our previous inspection that main supplies of electricity and water are provided to the Property. Telephone communication facilities are likewise available. Sewer and drainage are believed to be discharged to the building's sewerage treatment plant.

Tenancies

Tenancy Information

2.25 We have been provided with copy of some of the rent roll including some of the lease contracts by the Client and have relied on that information as being correct. No additional verification has been undertaken.

2.26 A summary of the Property tenancies is presented below.

TENANT	LEASED AREA (GROSS, in sq.m.)	Lease Contract	
		Start	End
Tenant 1	1,987.80	1-Jul-17	30-Sep-27
	1,894.18	1-Jul-17	30-Sep-27
	1,903.67	1-Jul-17	30-Sep-27

2.27 Based on the rent roll provided, total leasable area is **5,785.65** sq.m. It is currently being occupied by a single tenant involved in the BPO industry.

2.28 As of 30 June 2021, the Property is 100% occupied with a Weighted Average Lease Expiry (WALE) of 6.25 years. All leases are expected to expire by 2027.

2.29 Below are some of the provisions as stated in the Lease Contract.

a. **Care of the Leased Premises**

The LESSEE shall at its expense, maintain the Leased Premises in a clean and sanitary condition, free from noxious odors, disturbing noises or other nuisances and, upon the expiration of the lease, shall return the premises and fixtures in as good condition as that in which they were actually found at the beginning of the lease, ordinary wear and tear excepted. The LESSEE shall not drive nails, screws, hooks or other abutments on or into the walls frames or other portions of the premises or in any manner deface or damage any part thereof. Any damage caused by the LESSEE may be repaired by the LESSOR for the account of the LESSEE. The LESSOR shall have the right to require the LESSEE to remove any display or promotional matter, or any displayed merchandise which LESSOR reasonably and in good faith considers to be improper or inappropriate for the general appearance or presentation of the premises.

The LESSOR shall be responsible for major repairs which are limited to those which affect the structure of the Leased Premises or the building. The LESSEE shall allow access to the LESSOR on the

Leased Premises for purposes of repair or remodelling or such other works as may be necessary for the preservation, conservation, improvement or decoration of the building or any part thereof. No compensation or claims shall be allowed against the LESSOR by reason of any inconvenience or annoyance to the LESSEE that may arise by reason thereof.

The LESSEE shall promptly repair, at its own expense, any damage to the Leased Premises or any other improvements within the building caused by bringing into the Leased Premises of any property for the LESSEE's use, or by the installation or removal of such property, regardless of who is at fault or who caused such damage. unless such was clearly caused by the LESSOR, or its agents or employees. In default of such repairs by the LESSEE, the LESSOR may effect the repairs and the LESSEE agrees to promptly pay the LESSOR the cost of such repairs. The LESSEE shall be responsible for the maintenance and repair of the Leased Premises including plumbing and electrical fixtures within the premises or those serving the same.

The LESSEE must notify the LESSOR immediately of any damage to the Leased Premises, their appurtenances as well as any occupation, usurpation or untoward act being committed, or threatened to be committed, within the Leased Premises.

No machinery, furniture, effect, equipment and other properties found within the Leased Premises, whether or not owned by the LESSEE, may be brought into or out of the building without the prior written approval of the LESSOR. Furthermore, in case the LESSEE has any outstanding/unsettled rent, dues or other charges, the LESSOR reserves the right to withhold approval of any request for bringing in or out of any machinery, furniture, effects or other properties found within Leased Premises, whether or not owned by the LESSEE, until such outstanding amounts have been duly settled by the LESSEE. This is without prejudice to such other rights and remedies available to the LESSOR under prevailing laws or the Contract. including these General Terms and Conditions.

The immediately preceding paragraph shall also apply in the event of transfer of machinery, furniture, effects or other properties found within the Leased Premises from one unit to another unit in the building being leased by the LESSEE whether or not the latter unit is owned by the LESSOR. In the event that the unit where the properties to be transferred is not owned by the LESSOR, the written consent of the unit owner shall also be required.

The LESSEE shall further maintain the Leased Premises in a clean condition by utilizing plastic bags for the disposal of both dry and wet garbage. Unless garbage is contained in plastic bags, it will not be allowed to be deposited in the authorized depository for collections.

b. **Sublease, Transfer of Rights**

The LESSEE shall not assign or transfer its rights in the Contract nor sublease or sublet all or any part of the Leased Premises, without the prior written consent of the LESSOR and no rights, title or interest thereto or therein shall be conferred on or vested to anyone other than the LESSEE without such prior written consent. Otherwise, subleasing the leased Premises without the prior written consent of the LESSOR shall be deemed a breach of the contract by the LESSEE and shall be subject to the rights and remedies available to the LESSOR under prevailing laws and Contract, including these General Terms and Conditions. In the event of sublease with or without the prior written consent of the LESSOR, the LESSEE shall remain principally liable. However, the LESSOR shall have the right to exercise such remedies embodied in the Contract, the General Terms and Conditions and under prevailing laws, as against the sublessee in order to protect its right and interests.

Only the LESSEE has the right to use the Leased Premises as its official address to be registered with any government entities for the issuance of necessary permits and licenses for its business operations.

Should the LESSOR give the LESSEE its consent to sublease the Leased Premises, the LESSEE cannot sublease the Leased Premises for the period longer that the Contract of Lease between the LESSOR and the LESSEE.

It is expressly understood that the LESSEE has no goodwill or patronage rights over the Leased Premises; that such rights belong exclusively to the LESSOR, being the owner of the Leased Premises which forms part of the building; and that the LESSEE may not sell or dispose of said goodwill or patronage rights to any person.

c. **Assignment of Rights/Mortgage/Encumbrance**

The LESSOR reserves the right to assign and convey or mortgage or otherwise encumber its rights to this lease in favor of any affiliate or subsidiary or to any party. In the event of any assignment, conveyance, mortgage, or encumbrance of the Leased Premises, the LESSOR binds itself to require the assignee or mortgage or beneficiary of the encumbrance to respect and abide by all the terms and conditions of the Contract, as well as these General Terms and Conditions.

Roadways and Access

Roadways 2.30 The fronting roads are both 10 meters wide, concrete-paved and provided with concrete curbs and gutters, cemented sidewalks and underground drainage system. Meanwhile, McArthur Highway is about 20 meters wide, and concrete/asphalt-paved.

2.31 Our informal enquiries with the City Assessor's Office – Tax Mapping Division confirmed that the Property enjoys frontages along the bounding roads.

Access 2.32 In reporting our opinion of value, we have assumed that there are no third-party interests between the boundary of the Property and the abutting roads and that accordingly the Property has unfettered vehicular and pedestrian access.

Environmental Considerations

Flooding 2.33 From our enquiries with **DOST-UP and Phil-LiDAR Program (City of Tarlac, 5 Year Flood Hazard Map),** we have ascertained that the Property is not within an indicative floodplain and that there is therefore a **minimal risk** of flooding.

Contamination 2.34 As stated in the General Terms of Business, investigations into environmental matters would usually be commissioned from suitably qualified environmental specialists. Santos Knight Frank, Inc. is not qualified to undertake scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination.

2.35 Subject to the above, while carrying out our valuation inspection, we have not been made aware of any uses conducted at the Property that would give cause for concern as to possible environmental contamination. Our valuation is provided on the assumption that the Property is unaffected.

Highest and Best Use

2.36 "*Highest and Best Use*" is defined as the most profitable likely use to which a property can be put. The opinion of such use may be based on the highest and most profitable continuous use to which the Property is adapted and needed, or that use of land which may reasonably be expected to produce the greatest net return to land over a given period of time. Alternatively, it is that use, from among reasonably probable and legal alternative uses, found to be physically possible, appropriately supported, financially feasible, and which results in highest land value.

2.37 Considering the Property's size, shape, topography, current zoning classification and the prevailing land uses and development in the area, we are of the opinion that the **existing commercial development** would represent the highest and best use of the Property.

Photographs

(SKF File Photos)

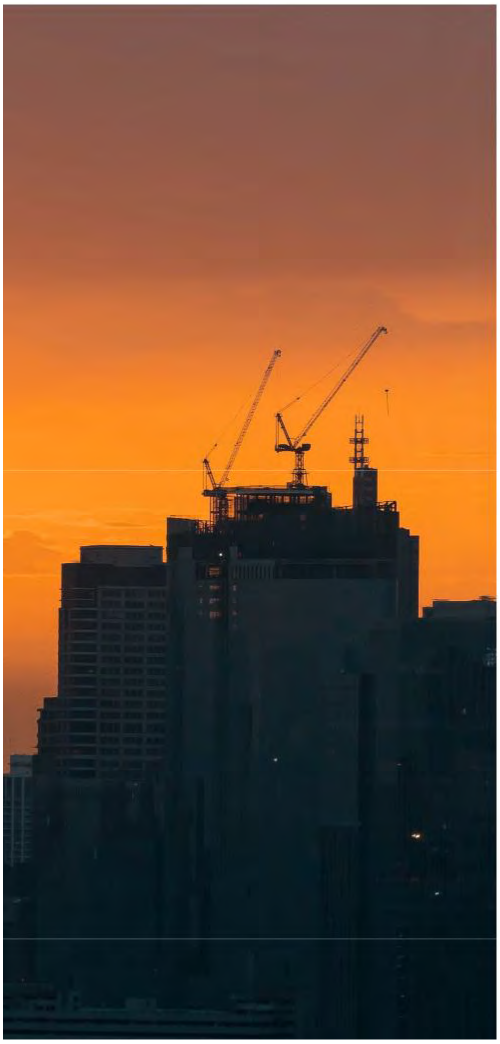
3.2 Our market analysis has been undertaken using market knowledge within Santos Knight Frank, Inc., enquiries of other agents, searches of Property databases, as appropriate and any information provided to us.

OFFICE RENT ROLLBACKS CUSHION INCREASING VACANCIES

General Overview



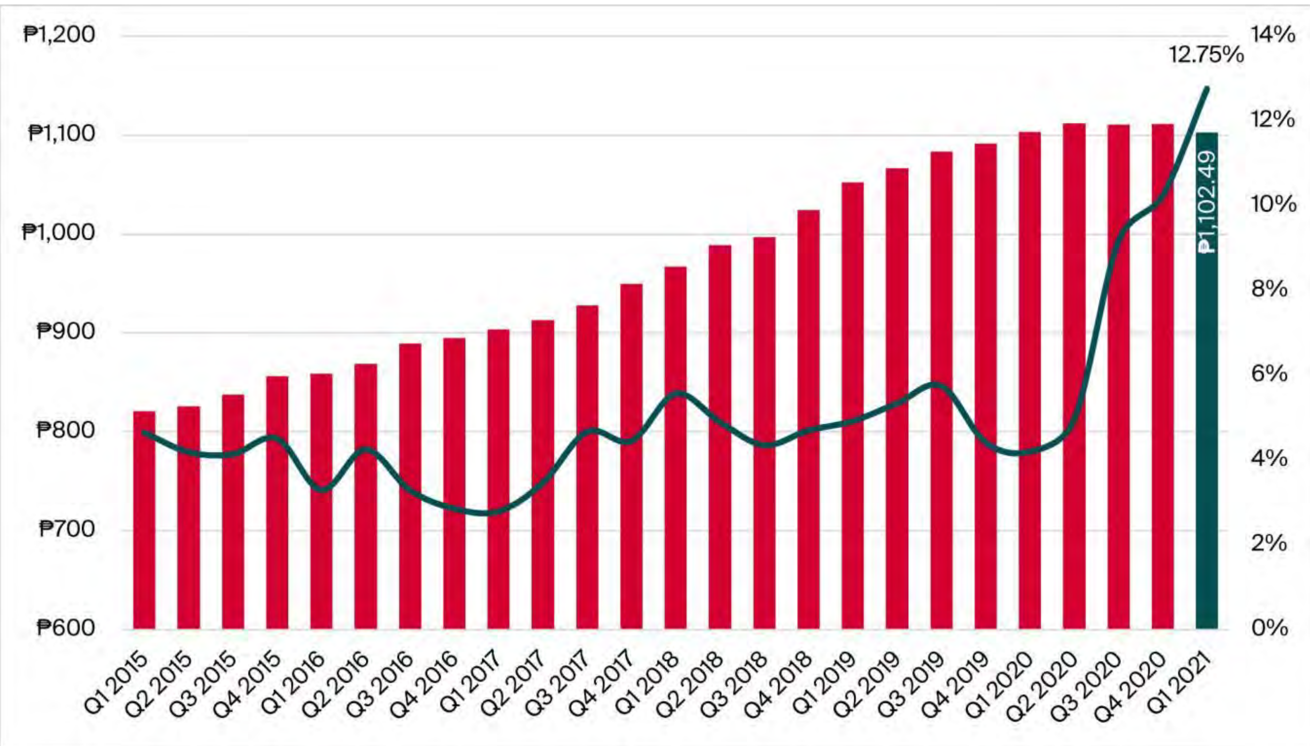
The Metro Manila office market displayed modest market movement at the start of 2021 owing to the sluggish demand driven by the market uncertainties caused by changing lockdown scenarios in Metro Manila. Landlords were challenged to remain relevant as potential occupiers continued to take a cautious approach caused by the growing COVID-19 cases and slow vaccine roll-outs.

Still, new office spaces were introduced during the quarter as developers capitalized on the relaxed quarantine measures to resume their halted construction activities. The local office market supply grew by 163,136 sqm of Grade A office space that mostly catered to IT-BPO companies. Several buildings were completed in Fort Bonifacio, Bay Area, and Quezon City, resulting in an overall office supply in Metro Manila of about 6.9 million sqm.

Consequently, supply growth resulted in an increase in vacancies throughout the metropolis. Office vacancy rates in Metro Manila further spiked to 12.75%, the highest since 2009. Current and potential occupiers remained vigilant towards the health situation of the country. Numerous companies continued to implement Work-From-Home and skeletal workforce arrangements. Office take-up contracted by 28,696 sqm as locators reassessed their need for spaces amid their bid to reduce operational costs.

Monthly average lease rates in Metro Manila further dipped to PHP 1,102.49 per sqm, declining by 0.78% quarter-on-quarter (q-o-q) and 0.07% year-on-year (y-o-y). The downward trend of rents was caused by the landlords' bid to provide more competitive packages to appeal to prospective tenan

Figure 1. Metro Manila Historical Lease & Vacancy Rates



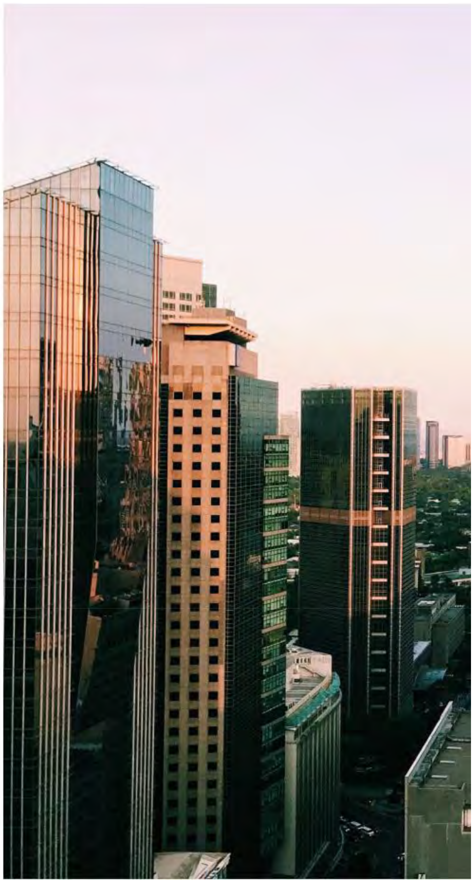
Source: Santos Knight Frank Research

Makati

The adverse effects of the pandemic and the prolonged lockdowns remained evident in the most prominent business district in the country. Vacancy rates spiked to 11.17%, considered to be the highest in the past ten years. Moreover, the expensive rents in Makati CBD were detrimental to the retention of office occupiers. Locators looking to minimize their expenses opted to discontinue their lease, resulting in about 25,557 sqm of office space vacated during the quarter.

Sluggish leasing activity persisted in the area as existing and upcoming locators in Makati were less willing to take up spaces due to the financial distress brought about by the global pandemic. The average monthly rents recorded in Makati went down to PHP 1,348.19 per sqm, contracting by 0.93% q-o-q and 6.05% y-o-y. Despite this, rates in Makati remained the highest in the metropolis.

Several property players are still looking forward to the materialization of their projects in the pipeline. More than 447,552 sqm of Prime and Grade A office supply are anticipated to come online in the next three years, with approximately 164,000 sqm being operational by the end of 2021. The massive influx of upcoming office developments in Makati comes from the backlogs and spillovers from 2019 up to the latter part of 2020.



Taguig

Slow demand in Taguig was also evident as vacancy levels continuously increased to 8.37% from 7.74% in Q4 2020. Despite having the largest supply share in Metro Manila of more than 2 million sqm, the downsized space requirements were seen as the factor in the rising vacancies as locators looked to lessen their operational cost. Moreover, average monthly rental rates in Fort Bonifacio also went down to PHP 1,289.75, translating to a contraction of 0.89% q-o-q.

The ease in quarantine measures allowed private and public projects to resume construction. Office supply in Fort Bonifacio further grew by 28,000 sqm through the completion of BGC Corporate Center 2. Despite the growing vacancy levels, potential developers still have bright prospects in Taguig as it was seen as the youngest but fastest growing business district in Metro Manila. In line with this, upcoming office supply is seen to be augmented by about 864,100 sqm of office space within the next five years. About 344,000 sqm of this will be coming from Arca South which is poised to become a new business district in the south.

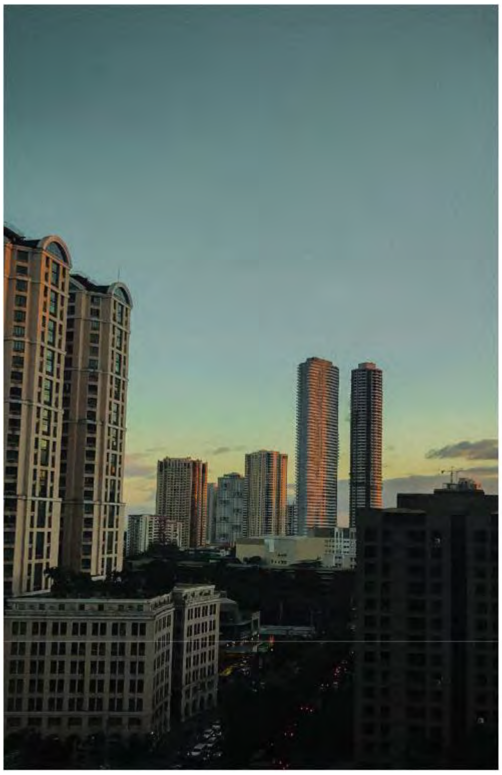
Bay Area

The POGO industry exodus has significantly contributed to the spiking vacancy levels in the Bay Area during Q1 2021, recorded at 12.82%. Slower demand from the sector is seen in the coming periods as more firms have started to postpone their lease contracts. This occurrence implied challenges in the recently fast-moving office market of the Bay Area.

The upsurge in vacancy was also attributed to the completion of Four E-com during the quarter with an additional 89,132 sqm of Grade A office space. Priced above its competitors, this building has helped in pushing the average rents in the area to PHP 1,083.41 per sqm, increasing by 1.66% q-o-q.

The Bay Area is still foreseeing a huge amount of upcoming office supply in the coming years. Developers still recognize the opportunity to invest in the area due to its accessibility and availability of developable land. Approximately, 578,800 sqm of office developments are anticipated to be introduced in the market for the next five years, while 258,000 sqm are expected to become operational by the end of 2021.

Ortigas Center



Vacancy levels in Ortigas Center gradually eased to 12.75% in contrast to 12.88% of the preceding quarter. Despite this, pre-terminated contracts and non-renewals were still observed, as most of the companies are still on a wait-and-see approach towards the office market. Meanwhile, the slow-moving leasing transaction was also felt in the district as the rental rates went down to PHP 806.29 per sqm, contracting by 1.15% q-o-q and still considered the lowest as compared to other major CBDs in the metropolis.

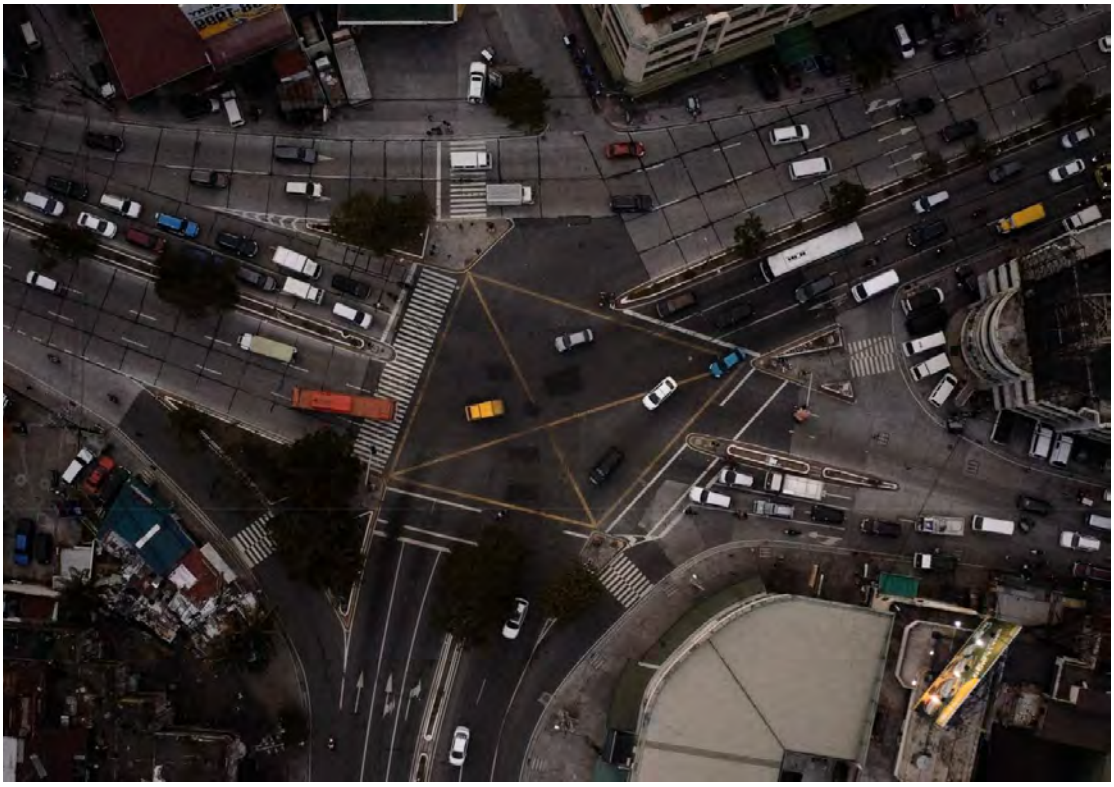
Moreover, the upcoming office supply in Ortigas Center remained high as more than 671,000 sqm of Prime and Grade A office spaces are slated to introduce in the next five years. In addition, the massive influx of 373,000 sqm of space is scheduled to commence their operations within the year such as Cyber Omega, SM Mega Tower, and Jollibee Tower. This includes the spillover from 2019 up to the remaining quarters of 2020 that has been halted due to subsequent lockdowns.

Quezon City

Vacancy rates in Quezon City spiked up to 20.64% as opposed to 16.21% of the preceding quarter, indicating the highest level across all of Metro Manila. Approximately 13,690 sqm of office spaces were freed up in the city during the quarter. Occupiers in the area were more sensitive to the health crisis as compared to locators in other districts The lack of recognized established business districts and limited connectivity of certain townships contributed to the slow demand in the area. Furthermore, the upsurge in vacancy levels was also driven by the opening of SM North Towers 1 and 2 that added more than 45,200 sqm in the massive office supply in Quezon City, and are yet to lease out the majority of their spaces.

Office landlords are trying to alleviate this downtrend and are still vying to mitigate lease terminations. To this end, average headline rates contracted to PHP 925.55 per sqm, translating to a 1.81% decline from the preceding quarter.

Albeit the fast-growing vacancy levels, Quezon City is still expecting a large office supply boost in the coming years. Approximately, 333,700 sqm is anticipated to be introduced in the market in the next five years, in which more than 149,000 sqm will be coming from SM Prime Holdings.



Alabang

Similarly, Alabang CBD experienced rising vacancy levels in Q1 2021 at 16.07% from 14.53% in the preceding quarter. As a result, increased pressures on office landlords in the district were felt as they remain responsive to the slow movement in the office market. This caused rental rates to gradually contract to PHP 846.76 per sqm.

Alabang still holds on to the possibility of becoming one of the major investment hubs in the metropolis due to its vast developable land. Approximately 209,900 sqm of upcoming Grade A office space is anticipated to be operational in the next five years, while 13,800 sqm is slated to become operational by 2021.

Figure 2. Metro Manila Lease & Vacancy Rates per CBD

Source: Santos Knight Frank Research

Office Outlook

The easing quarantine measures that started in the second half of 2020 allowed the developers to restart their impeded construction activities. Developers remain bullish in expanding their office footprint in Metro Manila with more than 3 million sqm of office space are slated to operate in the next five years. The nation's economic center is also set to have an additional supply of 1.1 million sqm of Prime and Grade A office space by the end of 2021. This massive influx still stems from the construction backlogs from the developers in 2020.

The robust expansion of office supply in Metro Manila is seen to further propel the vacancy rates in the local office market in the coming quarters. Along with the stagnant office demand, downward pressure on office rents still expected. Office landlords will be forced to implement more flexible payment terms to existing and potential tenants to market their spaces and continue cash flow from their buildings.

The recovery of the office market is also dependent on the pace of vaccine roll-outs in the country. The slow pace in inoculations is seen to weigh down on the recovery of the market. Attaining herd immunity as soon as possible can reinvigorate the interest in the office market.

In the medium- to long-term Green Buildings are seen to gain a competitive edge compared to ordinary office buildings. Buildings accredited by the US Green Building Council (LEED) and the Philippine Green Building Council (BERDE) will be more sought-after for potential office locators. The efficient design that provides better air circulation, ventilation and filtration, and increased open space, will be more appealing to the market as it puts a premium on the health and well-being of its tenants.

4 Valuation

Methodology

Valuation Rationale

4.1 The purpose of this appraisal is to estimate the Market Value of the Property. In any given valuation exercise, fair value can be arrived at using either one or a combination of the three (3) approaches to value, namely: Market (or Direct Sales Comparison) Approach, Income Approach, and the Cost Approach. The determination of the appropriate approach for a given property is based on the quality and quantity of data available, particularly its relevance to the Property under appraisement. If more than one valuation approach is utilized, the resulting values are reconciled to produce a final value conclusion.

4.2 Due to the nature of the Property and the purpose of this appraisal, both the Cost Approach and Income Approach to value are deemed the most appropriate to use and the Market (or Direct Sales Comparison) Approach was not used.

Cost Approach

4.3 The Cost Approach generally involves the following steps:

A. The value of the subject land is normally estimated by the Market or Sales Comparison Approach. In instances where the land is covered by a Lease Agreement, the value of the leased fee or leasehold rights on the subject land, whichever is applicable, is instead estimated.

B. The depreciated cost of the subject improvement is estimated by calculating the direct cost of reproducing or replacing the improvement, deducting accrued depreciation from all sources, and adding the indirect costs attributed to the improvement.

Combining the estimates shown above results in the indicated value of the Property by the Cost Approach

4.4 **On Land (Leasehold)**

As mentioned, the land subject of this appraisal is covered by a Lease Contract. In estimating the value of the Property covered by a lease, two interests are involved: the interest of the lessee which is the leasehold; and the interest of the lessor which is the leased fee or the lessor's interest. The Client being the lessee, the purpose of this appraisal is to establish the leasehold value of the subject land.

Leasehold Value is the present (discounted) worth of the rent savings (or rental gains) when the contract rent at the time of the appraisal is less than the current market rent. It is estimated by computing the present worth of the rental gains over the remaining term of the lease agreement using an appropriate discount rate.

The valuation process, briefly stated, consists of the following:

- Estimation of the current market rent of the leased property;
- Estimation of the rental gains over the remaining term of the lease agreement, if any. Rental gains projection is pegged at 10 years while the 11th year rental gain is used to estimate the terminal value of the Leasehold Rights on the Land;
- Estimation of an appropriate discount rate and terminal capitalization rate; and
- Discounting process based on an appropriate discount rate to arrive at an indicated leasehold value.

Market Rent of the Land 4.5 As mentioned earlier, another purpose of this report is to express an opinion of the Market Rent of the Property if it were to be leased out in accordance with its highest and best use. The amount of annual or monthly rental, which the subject Property should command might be estimated by any, or a combination of the following:

11. By Market (Comparison) Approach, in which rentals of similar properties are used a benchmarks; and
12. By Income Approach, in which the value of the Property is first established, and the proper capitalization rate is applied to obtain its rental value

On the other hand, Market Rent is defined under IVS 2019 as "the estimated amount for which an interest in real property should be leased on the valuation date between a willing lessor and a willing lessee on appropriate lease terms in an arm's length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

It is the rental income that the Property would most likely command in an open market. It is also defined as being the amount at which a willing lessee would pay and a willing Lessor would receive for the use of certain property, neither being under compulsion to transact, and both having reasonable knowledge of all relevant facts.

Market Approach 4.6 We have made a survey of existing ground leases of similar lands in the vicinity of the Property and found scarcity of rental data that may be used for direct comparison purposes

Income Approach 4.7 In the absence of any comparable rental data, we have estimated the **Market Rent** of the Property by a variation of the Income Approach on the basis of what prudent real estate investors or landowners would be warranted in leasing it in order to realize a fair return on their investment or property, for that matter. Under this approach, the market value of the Property is first established, and the proper capitalization rate is applied to obtain its rental value.

Market Value of the Land 4.8 In valuing the land, we made use of the Market Approach which is the most common technique for valuing land, and is the most preferred method when comparable sales are available. With this method, sales of similar property or parcels of land are analyzed, compared, and adjusted to provide a value indication for the Property being appraised. The comparison process is based on an analysis of the similarity or dissimilarity of the comparables

4.9 The appraiser gathers data on actual sales as well as listings and identifies the similarities and differences in the data; ranks the data according to their relevance; adjusts the prices of the comparables to account for the dissimilarities with the land being appraised; and forms a conclusion as to the most reasonable and probable market value of the subject property

4.10 The elements of comparison include property rights, financing terms, conditions of sale (motivation), market conditions (sale date), location, physical characteristics, available utilities, and zoning. The most variable elements of comparison are the site's physical characteristics, which include its size and shape, frontage, topography, location, and view. The units of comparison applied may be hectares or sq.m., or any other unit used in the market

Evidence of comparable properties

4.11 **Analysis of Comparable Properties Offered for Sale**

In the course of our investigation, we looked at current market listings of comparable properties in the area. The comparable properties selected share the same or similar characteristics as the subject. Whatever information or data we came up with was then analyzed, and comparison made for such factors as size, characteristics of the lot, location, quality, and prospective use. In the Philippines however, property transactions are not officially disclosed, and quite often, actual transaction price is masked by other undisclosed arrangements and different from the figure shown on the sale and purchase agreement. We have therefore made reference to the following data, made our market judgment, and adjusted for the above-mentioned factors:

1 A 2,354-sq.m. commercial lot along McArthur Highway, within Barangay Sto. Cristo, Tarlac City, in front of Asia United Bank, is currently being offered for sale at an asking price of PhP70,000,000 or about PhP29,737 per sq.m.
Source: Dolores Tipay Lingwa 0917 179 8657 / 0920 902 9291

2 A 3,249-sq.m. commercial lot along M.H. Del Pilar, within Barangay Santo Cristo, Tarlac City, right beside GM Bank, is currently being offered for sale at an asking price of PhP81,225,000 or about 25,000 per sq.m.
Source: Mr. Wsyly Fu 0917 551 0846

3 A 245-sq.m. commercial lot along Romulo Boulevard, within Barangay San Vincente, Tarlac City, in front of the Premiere Insurance and Surety Corporation, is currently being offered for sale at an asking price of PhP8,500,000 or about PhP34,693 per sq.m.
Source: Mr. Allen Sandiego 0956 943 2262

Summary of Adjustments

The Data Comparison Grid shown on Appendix **8** shows a summary of the aforementioned adjustments, which provides an indication as to the degree of adjustment made to the different elements in comparison. A numeric indicator indicates the level of adjustments, in terms of percentage when compared with the subject property. The use of (-) indicates a negative adjustment and a + indicates a positive adjustment. A downward adjustment (-) used is made to reflect superior characteristics of the comparable sale/listing, while an upward adjustment + reflects inferior characteristics of the comparable sale/listing. Finally, a 0 is used to confirm similarity between the comparable sales/listings and the subject or is used when market information is unavailable or does not support an adjustment for any particular element of comparison.

Value of the Land 4.12 As reflected in the said Comparison Grid, the value of the land is estimated at **PhP21,100 per sq.m.**, or a total of **PhP59,200,000** for a land area of **2,806.45 sq.m.**

Rate of Return 4.13 The value of the land having been established, its rental value may now be estimated considering the prevailing rate of return prudent investors or landowners would expect in ground leases, normally in the range of 4% to 7%. We based this range of rate of return from interviews with land owners and brokers, as well as our analysis of the relationship between prevailing capital values and rental rates and it is believed to be the current yield in the commercial land lease market.

Considering the most recent pandemic and the effect it had on the economy and the leasing market, we have not adopted the average rate of return, and have instead adopted a conservative interest rate (return on investment) of 4%.

In light of the foregoing, our estimate of the Market Rent of the Property is as follows:

Land Value	PhP	59,200,000	
Interest on Land Value			
PhP59,200,000 @ 4%	PhP	2,368,000	

Total	**PhP**	**2,368,000**	**per year**
		=========	
Or	**PhP**	**197,330**	**per month**
		=======	

Market Rent of the Land 4.14 On the basis of the foregoing, the Market Rent of the land is estimated at **PhP70.31 per sq. m. per month**, or a total of **PhP197,330 per month**, or say, **PhP2,368,000 per annum** for the subject land area of **2,806.45 sq. m**

Rental Gain 4.15 Rental Gain is reckoned as the difference between the Market Rent and the Contract Rent.

Discount Rate

4.16 The discount rate was computed using the build-up method. The discount rate is calculated by adding together different variables. The variables that were used to generate it consist of a risk-free rate and a reasonable risk premium. Based on the foregoing, discount rate is estimated at 7.1665%, or say, 7.20% (10-year T-bond rate at about 3.9165% (from Philippine Dealing & Exchange Corporation (PDEx) as of 30 June 2021) plus 3% equity risk premium from OECD and additional 0.25% risk premium for unidentifiable risk factors which include the uncertainty brought about by the Covid-19 global pandemic.).

For purposes of this valuation, we have adopted, as risk-free rate, the 10-year T-bond rate from PDEx. The Philippine Dealing & Exchange (PDEx) system appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEx. The PHP BVAL Reference Rate dated 30 June 2021 was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

4.17 We have adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3%. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits
Valid as of: **25 June 2021**

			Classification		
nb	Country Code ISO Alpha 3	Country Name [1]	Previous	Current Prevailing	Notes
138	PLW	Palau	-	-	(5)
139	PAN	Panama	4	4	(8)
140	PNG	Papua New Guinea	6	6	
141	PRY	Paraguay	5	5	
142	PER	Peru	3	3	
143	PHL	Philippines	3	3	
144	POL	Poland	-	-	(6)
145	PRT	Portugal	-	-	(6) (7)

Capitalization Rate 4.18 Capitalization rate adopted to arrive at the terminal value is 4.7% (Discount Rate less Projected Long-term Growth Rate (2.5%). The long-term growth rate is based on a growth forecast of the prevailing commercial market over the forecast period. This is based on what the Property is perceived to achieve in the long-term considering the present situation of the market.

Remaining Life of the Lease 4.19 Remaining life of the lease as of the date of valuation is 99 years.

Summary of Leasehold Assumptions 4.20 In summary, below are the assumptions/statistics used in determining the leasehold value of the subject land.

LUISITA OFFICE 1			
Lease Details			
Lot Area	:	2,806	sq.m.
Term of Lease	:	99	years
Assumed Commencement Date	:	01-Oct-21	
Lease Rate	:	7%	of net leasing revenue
Market Rent (in PhP)			
Monthly Rent	:	70.31	/sq.m./ month
Annual Rent	:	2,368,000	
Annual Escalation	:	3%	starting Y2
Discount Rate			
Risk Free Rate		3.92	as of June 30, 2021 (BVAL PDEX)
Risk Premium		3.00	as of June 25, 2021 (OECD)
Additional Risk		0.25	risk premium for unidentifiable risk factors
		7.17	
Resulting Discount Rate, say		7.20%	
Terminal Capitalization Rate		4.70%	

Leasehold Value 4.21 On the basis of the foregoing, the subject land was estimated to have no leasehold value.

We attach a copy of our valuation calculations at Appendix **5**.

4.22 **On Leasehold Improvements and Machinery & Equipment**

The estimate of the leasehold improvements can be either replacement or reproduction cost, new. Replacement Cost, New is defined as "The cost of construction, at current prices, of a building having utility equivalent to the building being appraised but built with modern materials and according to current standards, design, and layout." On the other hand, Reproduction Cost, New is defined as "The cost of construction, at current prices, of an exact duplicate, or replica, using the same materials, construction standards, design, layout, and quality of workmanship, and embodying all the deficiencies, super-adequacies, and obsolescence of the subject building."

In estimating the Replacement Cost of the buildings and improvements, we have made reference to the building cost index or other building cost as available in the market or published by a reputable quantity surveyor firm. We have likewise referred to our own database of building construction costs. We do not hold ourselves to be construction cost advisers and a formal estimate can only be given by a specialist construction cost consultant. It is recommended that a professional quantity surveyor or a firm of professional quantity surveyors should be consulted in order to assess an accurate building/improvement replacement cost.

In arriving at our assessment using the Cost Approach for the Equipment, we first developed the Replacement Cost, New (“RCN”) of the asset. In developing our RCN, we have obtained current cost information from equipment dealers in the region. We relied on data furnished by equipment manufacturers, dealers and importers, as well as information contained in price catalogues, other published materials including the Internet and inquiries from local suppliers

RCN is the estimated amount of money needed to acquire a similar new item having the nearest equivalent utility as the Property being valued taking into consideration current prices of materials and manufactured equipment, shipping and handling, labour, contractor's overhead, design and supervision, profit and fees, and other attendant costs associated with its acquisition and installation, but without provision for overtime or bonuses for labour and premium for materials.

Having developed the RCN, we then deducted for the various elements of depreciation to arrive at the Depreciated Replacement Cost (“DRC”). DRC includes depreciation allowance or loss of value arising from condition, utility, age, wear and tear, and obsolescence present (physical, functional or economic), taking into consideration past and present maintenance policy and rebuilding history.

General

Where elements are of foreign origin, the assessment process give full consideration to all expenditures normally incurred in importation such as packing and crating charges, inland and ocean freight, insurance, duties and taxes, bank charges and commissions, wharfage, brokerage and handling

In estimating the depreciation of the assets, we have utilized the age-life method tempered with our observed condition of the assets. The remaining lease period was likewise considered in arriving at the value of the leasehold improvements.

Appendix **9** contains the Schedule of Assets describing in detail these assets.

Income Approach

Definition

4.23 The Income Approach is applicable to the valuation of income producing properties, business enterprise as well as the valuation of intangible assets. This approach measures the current value of an asset by calculating the present value of its future economic benefits by discounting expected cash flows at a rate of return that compensates the risks associated with the particular investment.

For this particular engagement, we have applied both the Discounted Cash Flow Analysis and the Direct Capitalization Method.

Discounted Cash Flow Analysis

4.24 The discounted cash flows, or DCF valuation is the most popular fundamental approach in valuing the future economic benefits of a projected income stream. DCF measures actual yield rather than paper income for the asset/business owner and the analysis of DCF is widespread and mandatory in the various fields of business making DCF-based valuation ideal.

4.25 The valuation process, briefly stated, consists of the following:

- Estimation of the revenues generated;
- Estimation of the costs and expenses related to the operations of the development;
- Estimation of an appropriate discount rate;
- Discounting process using an appropriate discount rate to arrive at an indicative market value; and
- Estimation of the Terminal Value of the Property.

Discount Rate

4.26 The discount rate was computed using the build-up method - calculated by adding together the different variables. The basic formula for the traditional build-up model is:

Discount Rate = Rf + P + MR + LR

Where	Variable	Proxy Statistic
Rf	Risk Free Rate	PDEX Risk Free Rate
P	Equity Risk Premium	Country Risk
MR	Management Risk	
LR	Liquidity Risk	

The variables that were used to generate the Discount Rate are exhibited in the table below, along with the sources and/or dates as at or nearest the 30 June 2021 valuation date.

Risk Free Rate (10Y)	3.92%	As of 30 June 2021, BVAL PDEX
Equity Risk Premium	3.25%	As of 25 June 2021, OECD
Management Risk	0.80%	
Liquidity Risk	0.90%	

4.27 The following assumptions were used to arrive at the Discount Rate using the Build-Up Method.

Risk Free Rate 4.28 For the purposes of this valuation, we adopted the 10-year bond rate sourced from Philippine Dealing & Exchange Corporation (PDEX) as of 30 June 2021 - the valuation date (image shown below). The Philippine Dealing Exchange (PDEx) system has recently appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEX. The PHP BVAL Reference Rate was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

Equity Risk Premium 4.29 We used an equity risk premium of 3.25%. We adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3% plus an additional 0.25% risk premium for unidentifiable risk factors. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors. Shown below is an excerpt of said table.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits

145	PRT	Portugal	-	-	(6) (7)

Management & Liquidity Risk	4.30	The Management Risk refers to the estimated premium to compensate for the burden of management, while the Liquidity Risk refers to the ease (or the difficulty) with which an investment can be sold or made. A review was done and we have arrived at the following: Management Risk was classified into four categories, with the corresponding rates: Poor – 1.2; Average – 1.0; Above Average - 0.90 and Excellent - 0.80 while Liquidity Risk has three (3) categories: Poor –1.2; Average – 1.0; and Good – 0.90. After the said review, we deemed it appropriate to use 0.80% for Management Risk and 0.90% for Liquidity Risk.
Resulting Discount Rate	4.31	Resulting Discount Rate used for this valuation is 8.87%, or say, 9.0%.
Capitalization Rate	4.32	A discount rate is used to calculate the present value of future projections of a benefit stream when growth varies from year to year. However, if growth is estimated to remain level throughout the life of the investment, a capitalization rate is often used. In its most basic form, the relationship between discount rate and a capitalization rate can be summarized as follows: Capitalization Rate = Discount Rate – Growth For purposes of this valuation, a long-term growth rate of 4% has been assumed. This is based on what the Property is perceived to achieve in the long-term considering the present situation of the market. Using this assumption, resulting Capitalization Rate would be 5%.
Key Financial Assumptions	4.33	We relied on the historical and projected assumptions brought about by our research and as provided by the Client. These financials were analysed to ensure reasonableness by comparing projected revenue growth rates and other operating expenses based on historical performance. Based on interviews with the representatives of the company, projections were prepared to reflect the current and expected future market conditions.
	a.	Revenues Cashflow projection starts in 01 July 2021, it will run for a period of 10 years. The revenues come from the rental of retail units, office units and parking slots. In estimating the annual rents of the subject units/slots, we have adopted the contract rents as appearing in the copy of the rent roll provided to us by the Client for the occupied units/leased parking slots. After the expiration of lease, lease rates then are aligned with market rates and are assumed to have an average of 4-year lease contracts. Aside from the monthly rentals from leasable areas, revenues likewise include Management and Aircon Dues which are likewise charged to the tenants monthly on a per sq.m. basis. Management dues are for common and/ or shared utilities,

facilities and services. These are inclusive of air conditioning equipment rental during office hours (but exclusive of power consumption).

It would be important to note that as the building administrators, they collect the said dues as a cost recovery mechanism for all expenses related to the day-to-day operations of the building and its common areas.

Occupancy assumptions were based on the actual performance of the Property as well as the prevailing trend in the subject area taking into consideration the forecasted effect of the global pandemic in the office market. Occupancy of the Property as of valuation date is at 100% while the historical average performance of the Property for the last two years is at 100%. Occupancy rate includes committed leases. For this valuation exercise, we are assuming an average overall vacancy allowance of 10%. Based on the historical performance of the Property for the last two years, average occupancy is 100%. The property is a build-to-suit facility, customized to serve the needs and operations of its current tenant who has committed to stay for the long term. This tenant has in fact added to their building foot print by occupying other build to suit buildings in the same area.

We used actual escalation rates indicated in the rent roll for all existing leases up until their lease expires. After which, an average escalation of 5% was then be applied year on year until the end of the cash flow.

b. Cost & Expenses

Operating Expenses which would include administrative and utility expenses are normally charged against the Common Use Service Area (CUSA) Fees or Association Dues being collected monthly to the individual tenants. However, there are instances when CUSA funds are insufficient to pay off all common charges. If and when this happens, the owners/administrators would have to pay off these expenses and this has been taken into consideration in the projections.

Operating Costs and Expenses are assumed to be an average of approximately 28% of the Total Net Revenues. Operating costs and expenses included are basically divided in to two – real estate expense and general administrative expenses. Real Estate expenses are as follows: contracted services, repairs & maintenance, management fee and loss from CUSA and miscellaneous expenses. While under General Administrative Expense are – salaries & wages, taxes and licenses, advertising & promotions, commission, insurance, communication, rent expense, supplies, travel & transportation, and representation & entertainment expenses.

These expenses are projected either as a percentage of the rental revenues or the total net revenues. These percentage allocations were from the historical and projected performance of the Property.

Annual Capital Expenditures (CAPEX) for the entire cashflow period, on the other hand, was assumed to be 1.5% of the Net Leasing Revenues. This assumption is based on benchmarking and analysis of current market practice in allocating CAPEX reserve.

This allocation would help ensure that the Property would operate efficiently and maintain its good and sound condition

Resulting Market Value 4.34

a. Earnings Before Income Tax, Depreciation and Amortization (EBITDA) for the whole duration of the cashflow shall be discounted at the derived Discount Rate of 9.00%.
b. The sum of discounted cashflows including the Terminal Value of the Property represents the Market Value of the Property.

   The Terminal Value of the Property is the value of the property beyond the explicit forecast period. It is assumed that the property or business will continue to generate cashflows in perpetuity. As mentioned earlier, Terminal Capitalization Rate used is 5%.

The Discounted Cashflow showing the estimated Market Value of the subject property is attached as Appendix **6**.

Direct Capitalization Method 4.35 The Direct Capitalization Method is a real estate valuation method that helps convert a single year's income into value by dividing the Net Operating Income with an appropriate Capitalization Rate. This method assumes that the Property has a stabilized net operating income. All parameters of a typical investor return expectations are represented either explicitly or implicitly in either income forecast or the capitalization rate. The direct capitalization rate, as the ratio of income to value, serves as a proxy for investor return assumptions.

Resulting Market Value 4.36 We made use of the single year's cashflow projection (2022) to derive the Market Value using the Direct Capitalization Method. Capitalization rate adopted to arrive at the Property Market Value is 5%.

Valuation basis

Market Value 4.37 Market Value is defined in the 2019 **International Valuation Standards** as:
"The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

Valuation date

Valuation date 4.38 The valuation date is **30 June 2021.**

General Assumptions

Assumptions 4.39 Our valuation is necessarily based on a number of assumptions which have been drawn to your attention in our General Terms of Business, Letter of Engagement and within this report.

Key Assumptions	4.40	Whilst we have not provided a summary of all these assumptions here, we would in particular draw your attention to a key assumption that we relied on a very considerable extent on the information provided by the Client and have assumed that documents provided to us such as gross floor area tabulation, floor plans, lot area allocation, building tenancies and other relevant matters are factual. We were also advised by the Client that no material facts have been omitted from the information provided.
Special Assumption	4.41	We were instructed to re-value the Property without a re-inspection. We have, thus, considered changes to the physical attributes and/or characteristics of the Property which have occurred between the valuation date and the date of our previous valuation as confirmed by the Client. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.
	4.42	We have adopted the floor area details provided to us by the Client and have assumed these to be accurate.
	4.43	We were not provided with a lot plan where Luisita Office 1 is erected. In line with our valuation analysis, the subject land was assumed to be rectangular in shape.
	4.44	Our valuation of Machinery & Equipment has also undertaken the following special assumptions: We have not carried out a full mechanical survey, or structural test, nor have inspected the machinery and equipment, which are covered, unexposed or inaccessible. Our assessment is based on the premised that the items are in a condition commensurate with age and usage. Machinery & Equipment associated with the supply of services to the building such as Elevators, Air Conditioning Systems are valued on the assumption that they are permanently installed or attached to the building.
	4.45	In applying Income Approach to value, we have considerably relied on the information provided to us by the Client which includes the following: lease contracts, revenue and expense projections, historical and projected occupancies. Upon expiration of contracts, we estimated the lease rates based on the acceptable escalations in the market.
	4.46	Given the 99-year leasehold, we assumed that the Property is comparable to a freehold property given the duration of the leasehold interest on the land. Thus, a terminal value of the Property was computed at the end of the cashflow.

Valuation Results

Using Cost Approach

4.47 Using the **Cost Approach,** the Market Value of the Property, may be summarized as under

Land (Leasehold Value)	**N/A**
Building	**166,900,000**
Building Machinery & Equipment	**68,049,000**

TOTAL	**234,949,000**

ROUNDED TO	**235,000,000**
	============

4.48 The Market Value of the Property is estimated at **PhP235,000,000 (TWO HUNDRED THIRTY-FIVE MILLION PHILIPPINE PESOS).**

Using Income Approach

4.49 Using the **Income Approach** on the other hand, the Market Value of the Property is estimated as follows:

DCF Analysis	**PhP620,000,000**
Direct Capitalization Method	**PhP675,000,000**

Calculation

4.50 We attach a copy of our valuation calculations for the Income Approach at Appendix **6 & 7**.

Comments

4.51 The values arrived at using the Income Approach are noted to be higher than the value arrived at using the Cost Approach. This is because, unlike the Income Approach, the Cost Approach does not capture the income potential of the Property.

4.52 For purposes of this valuation, we deemed it appropriate to adopt the results arrived at by the Income Approach – DCF Analysis, since this method is usually used to determine the value of an income-generating property, as it also captures the Property's future economic benefits, giving a better representation of the Property's Market Value at an acceptable rate of return that would compensate for the risks associated with the particular investment. It likewise takes into consideration market cycles that Direct Capitalization Method cannot capture.

Conclusion of Value

4.53 In conclusion we are of the opinion that the Market Value of the Property, reckoned as of **30 June 2021**, is:

PhP620,000,000 (SIX HUNDRED TWENTY MILLION PHILIPPINE PESOS).

Value forwarded ……………………………….. PhP620,000,000

***Note**: The outbreak of the Novel Coronavirus (COVID-19), declared by the World Health Organization as a "Global Pandemic" on 11th March 2020, has impacted global financial markets. Travel restrictions have been implemented by many countries. In the Philippines, market activity is being impacted in all sectors. As at the valuation date, we consider that we can attach less weight to previous market evidence for comparison purposes, to inform opinions of value. Indeed, the current response to COVID-19 means that we are faced with an unprecedented set of circumstances on which to base a judgement. Our valuation is therefore reported on the basis of "material valuation uncertainty" per IVS 103 of the International Valuation Standards. Consequently, less certainty – and a higher degree of caution – should be attached to our valuation than would normally be the case. Given the unknown future impact that COVID-19 might have on the real estate market, we recommend that you keep the valuation of this property under frequent review.*

Appendix 1 - Assumptions, Limiting Conditions and Disclaimers

Basis of Value	Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion." In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property. It is further assumed that title to the property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable. The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.
Property Rights appraised	The rights appraised in this report are the property rights in fee simple, free and clear. "Fee simple" is defined as absolute ownership, without limitations to any particular class of heirs or restrictions, but subject to the limitations of eminent domain, escheat, police power and taxation. We assume that the fee simple interest is marketable and in compliance with the applicable laws of the Philippines.
Fractional Interests:	When the study contains a valuation relating to an estate in land that is less than the whole fee simple estate, the value reported for such estate relates to a fractional interest only in the real estate involved, and the value of this fractional interest plus the value of all other fractional interests may or may not equal the value of the entire fee simple estate which is considered the whole. When the valuation report contains an allocation of the total valuation between land and building improvements, such allocation applies only under the existing program of utilization. The separate valuations for land and building cannot be used in conjunction with any other valuation/appraisal and will be invalid if so used.
Assumptions:	The valuation is based on the condition of the economy and the purchasing power of the Philippine Peso as of the effective date of valuation. We have assumed that the floor areas provided us have been calculated in accordance with engineering standards, and assumed herein to be true and correct. Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.
Information Supplied By Others	Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser. Information provided by informed local sources, such as government agencies, financial institutions, Realtors, buyers, seller and others, was weighed in the light in which it was supplied and checked by secondary means; however, no responsibility is assumed for possible misinformation.
Legal Issues:	This valuation assumes no responsibility for the validity of legal matters affecting the property. The ownership history reported in this valuation is based on the appraiser's research of public records, which are assumed to be accurate and complete. It is not the intent of the valuation to offer a legal opinion of title. It is further assumed that the property has good title, responsible ownership and competent management. Any liens or encumbrances which may now exist have been disregarded. The appraiser is not required to give testimony or attendance in court by reason of this valuation, with reference to the property in question, unless arrangements have been previously made.
Liability:	The liability of Santos Knight Frank, Inc. and its directors and employees is limited to the addressee of this report only. No accountability, obligation or liability to any third party is accepted. In the event we are subject to any liability in connection with this engagement, regardless of legal theory advanced, such liability will be limited to the amount of fees we received for this engagement.
Environmental Conditions:	It is assumed that there is full compliance with all applicable Philippine environmental regulations and laws unless non-compliance is stated, defined, and considered in this appraisal report.
Town Planning:	It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.
Condition of Improvements:	We have inspected the improvements and structures. However we have not carried out a structural survey nor tested any of the services or facilities, nor have we inspected unexposed or inaccessible portions of the building, and are therefore unable to state that these are free from defect, rot, infestation, asbestos or other hazardous material. We have therefore, viewed the general state of repair of the property and advise that we did not notice any obvious signs of structural defect or dilapidations. Furthermore, the property appears to be in reasonable condition having regard to its age and use and unless otherwise stated. We also assume that the building complies with all relevant statutory requirements in respect of matters such as sanitary, building and fire safety regulations and standards.
Valuation Methodology:	Santos Knight Frank uses any one or a combination of the Market Data Approach, the Cost Approach, and the Income Capitalization Approach. Each methodology begins with a set of assumptions. The result is the best estimate of value Santos Knight Frank can produce, but it is an estimate and not a prediction or guarantee and it is fully dependent upon the accuracy of the assumptions as to income, expense and market conditions. These primary methodologies use market derived assumptions, including rents, yields and discount rates, obtained from analyzed transactions. We do not represent ourselves as experts for data, such as economic, demographic or construction costs, which has been obtained from external sources.
Others:	This report and valuation shall be used only in its entirety and no part shall be used without the whole report. It may not be used for any purpose other than the intended purpose mentioned herein. Possession of this report or any copy thereof does not carry with it the right of copying or publication. All copies will originate from Santos Knight Frank, Inc. and will be signed and dated as such. Neither the whole nor any part of the report or any reference to our name, our valuation and our report may be included in any document, circular or statement nor published without our prior written consent to the form and context in which it may appear. The delivery and acceptance of this report completes this assignment.

Attention: **MR. FREDERICK D. GO**
President and Chief Executive Officer

Subject: **Terms of Engagement for Valuation Services**

Dear Mr. Go:

Thank you for your interest in our Valuation Services. We refer to your invitation of 03 August 2020 requesting Santos Knight Frank, Inc. ("SKF") to submit a proposal for valuation (the "Valuation") in respect of the properties detailed below (the "Properties").

This proposal, together with our General Terms of Business for Valuation Services ("General Terms"), sets out our terms of engagement for carrying out this instruction. Once agreed and signed, this proposal shall constitute our Letter of Engagement ("Letter"). This Letter and the General Terms (together, the "Agreement") exclude any other terms which are not specifically agreed to us in writing. To the extent that there is any inconsistency between the Letter and the General Terms, this Letter shall take precedence.

1. **Client**
Our Client for this Valuation is Robinsons Land Corporation (the "Client", "you" or "your").

2. **Purpose of Valuation**
The Valuation is provided solely the purpose of transferring some of the Client's assets to the REIT Company and its application for a Tax-Free Exchange Ruling with the Bureau of Internal Revenue and listing of the REIT Company in the Philippine Stock Exchange (the "Transaction"). Specifically, the Valuation will be used for the Client's Financial Statements to be attached to the Offering Circular as required by the Securities and Exchange Commission (SEC) and will be attached as an appendix to the Client's REIT Plan. In accordance with clause 4.1 of our General Terms, the Valuation may not be used for any other purpose without our express written consent. The Valuation will be made accessible in the public domain as part of the regulatory requirements of the Transaction.

3. **Term & Termination**
This appointment will commence upon signing of this Agreement and shall continue to be in effect for a period of two (2) years. Any extension of the Term of this Agreement shall be mutually agreed upon by the parties in writing.

23. **Electronic Communication**

During the engagement, both parties may wish to communicate electronically with each other. However, electronic transmission of information cannot be guaranteed to be secure or virus-or error-free and information could be intercepted, corrupted, lost or destroyed, arrive late or incomplete, or otherwise be adversely affected or unsafe to use. Both parties agree to accept these risks and so each party will be responsible for protecting its own systems and interests in relation to electronic communications. Neither party will have any liability to the other party on any basis for any loss or damage arising from or in connection with the electronic communication of information between both parties or their reliance on such information.

24. **Acceptance**

Please sign and return a copy of this Letter signifying your acceptance of the terms of the Agreement. We reserve the right to withhold any Valuation and / or refrain from discussing it with you until this Letter has been countersigned and returned.

Your attention is drawn to the "Important Notice" in the General Terms. If you have any questions regarding this Letter and / or the terms of the Agreement, please let us know before signing this Letter.

Thank you for choosing Santos Knight Frank, Inc. and we look forward to working with you on this important engagement.

Sincerely,
SANTOS KNIGHT FRANK, INC.

Attention: **MR. FREDERICK D. GO**
President and Chief Executive Officer

Subject: **Amendment to Terms of Engagement and General Terms of Business for Valuation Services Dated 03 August 2020 ("Amendment")**

Dear Mr. Go:

We refer to subject Letter of Engagement and General Terms of Business for Valuation Services (together, the "Agreement") between Robinsons Land Corporation (the "Client", "you" or "your") and Santos Knight Frank, Inc. ("SKF") for the valuation of fourteen (14) office buildings (the "Covered Properties").

For this purpose, the Agreement is amended as follows:

The first, second, and third and fourth paragraphs shall now read:

For the Valuation

I. Valuation for Asset Transfer to REIT Company and its application for a Tax-Free Exchange Ruling;

For Valuation Update

II. Valuation of Properties for REIT listing to PSE:
Our Valuation of 14 Properties will be as follows:
1. Valuation for 4 Properties
2. Periodic Update of 14 Properties
Under REIT Company (Quarterly basis – optional)
3. Valuation Update of 14 Properties under REIT Company

Except as amended hereby, all the provisions of the Agreement which are not inconsistent herewith are incorporated herein by way of reference and from date hereof, the Agreement and this Amendment shall be read as one integrated document.

Kindly affix your signature on the conforme portion below and return one (1) original signed copy to us.

Sincerely,
SANTOS KNIGHT FRANK, INC.

Appendix 3 - General Terms of Business

General Terms of Business for Valuation Services

These General Terms of Business (the "**General Terms**") and our Letter of Engagement (the "**Letter**"), together form the agreement between you and us (the "**Agreement**"). References to "**you**", "**your**" etc. are to persons or entities who are our client and, without prejudice to clauses 3 and 4 below, to any persons purporting to rely on our Valuation.

Unless **the** context otherwise requires, all other terms and expressions used but not defined herein shall have the meaning ascribed to them in the Letter.

When used herein or in the Letter, the term "**Valuation**" shall mean any valuation report, advance report, supplementary report or subsequent/update report, produced pursuant to our engagement and any other replies or information we produce in respect of any such report and/or any relevant property. Any words following the terms "**including**", "**in particular**" or any similar expression shall be construed as illustrative and shall not limit the sense of the words preceding those terms.

All of the terms set out in these General Terms shall survive termination of the Agreement.

1. Santos Knight Frank, Inc.

1.1. Santos Knight Frank, Inc. ("**Santos Knight Frank**", "**our**", "**us**", "**we**") is a Philippine corporation with Securities and Exchange Commission (SEC) Registration Number A199818549.

1.2. Our registered office is at 10/F Ayala Tower & Exchange Plaza, Ayala Avenue, Makati City where a list of members may be inspected.

1.3. Any representative of Santos Knight Frank, Inc. described as *Director* is either a member or an employee of Santos Knight Frank, Inc. and is not a member of the Board of Directors. The term *Director* has been retained because it is an accepted way of referring to senior professionals. The term "**Santos Knight Frank Person**" shall, when used herein, mean any member, employee, or consultant of Santos Knight Frank, Inc.

1.4. Our Tax Identification Number (TIN) is 201-626-570-000.

1.5. The details of our professional indemnity insurance will be provided to you on request.

1.6. Santos Knight Frank, Inc., being a corporation, is regulated by the Philippine Securities and Exchange Commission (SEC). It is also an SEC-accredited asset valuer. In accordance with reportorial filings with the SEC, it may be necessary to disclose valuation files to them. By instructing us, you give us your permission to do so. Where possible we will give you prior notice before making any such disclosure, although, this may not always be possible. We will use reasonable endeavours to limit the scope of any such disclosure and to ensure any disclosed documents are kept confidential.

1.7. Valuations will be carried out in accordance with the 2019 edition of the International Valuation Standards (IVS) by valuers who conform to its requirements and with regard to relevant statutes or regulations. Our senior valuers are Real Estate Appraisers licensed and regulated by the Philippine Professional Regulation Commission (PRC).

2. Governing law and jurisdiction

2.1. The Agreement and any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with it or its subject matter or formation or any Valuation shall be governed by and construed in accordance with Philippine laws.

2.2. Philippine courts shall have exclusive jurisdiction to settle any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with this Agreement or its subject matter or formation or any Valuation. This will apply wherever the relevant property or the client, or any relevant third party, is located or the service is provided.

3. Limitations on liability

3.1. Subject to clause 3.7, our maximum total liability in connection with or arising out of this Agreement and/or its subject matter and/or the Valuation is limited to our total service fees as set out in the Letter.

3.2. Subject to clause 3.7, we will not be liable for any loss of profits or for indirect or consequential loss or damages.

3.3. Subject to clause 3.7, any limitation on our liability will apply however such liability is or would otherwise have been incurred, whether in contract, tort (including negligence), for breach of statutory duty, or otherwise.

3.4. Except as set out in clauses 3.5 and 4.7 and 4.8 below, no third party shall have any right to enforce any of the terms of this Agreement.

3.5. No claim arising out of or in connection with this Agreement may be brought against any Santos Knight Frank Person. Those individuals will not have a personal duty of care to you or any other person and any such claim for losses must be brought against Santos Knight Frank, Inc. Any Santos Knight Frank Person may enforce this clause but the terms of this Agreement may be varied by agreement between the client and Santos Knight Frank, Inc. at any time without the need for any Santos Knight Frank Person to consent.

3.6. No claim, action or proceedings arising out of or in connection with the Agreement and/or any Valuation shall be commenced against us after the expiry of the earlier of (a) two years from the Valuation Date (as set out in the relevant Valuation) or (b) any limitation period prescribed by law.

3.7. Whether or not specifically qualified by reference to this clause, nothing in the Agreement shall exclude or limit our liability in respect of fraud, or for death or personal injury caused by our negligence or negligence of those for whom we are responsible, or for any other liability to the extent that such liability may not be so excluded or limited as a matter of applicable law.

4. Purpose, reliance and disclosure

4.1. The Valuation is prepared and provided solely for the stated purposes. Unless expressly agreed by us in writing, it cannot be relied upon, and must not be used, for any other purpose and, subject to clause 3.7, we will not be liable for any such use.

4.2. Without prejudice to clause 4.1 above, the Valuation may only be relied on by our Client. Unless expressly agreed by us in writing the Valuation may not be relied on by any third party and we will not be liable for any such purported reliance.

4.3. Subject to clause 4.4 below and for the stated purposes, the Valuation is confidential to our Client and must not be disclosed, in whole or in part, to any third party without our express written consent (to be granted or withheld in our absolute discretion). No liability is accepted to any third party for the whole or any part of any Valuation disclosed in breach of this clause.

4.4. Our appraisers are not required to give testimony or attendance in court by reason of this Valuation with reference to the property in question, unless arrangements have been previously made.

4.5. Except for the stated purposes, neither the whole nor any part of the Valuation and/or any reference thereto may be included in any published document, circular or statement nor published in any way whatsoever whether in hard copy or electronically (including on any website) without our prior written consent and approval of the form and context in which it may appear.

4.6. Where permission is given for the publication of a Valuation, neither the whole nor any part thereof, nor any reference thereto, may be used in any publication or transaction that may have the effect of exposing us to liability for actual or alleged violations of SEC Memorandum Circular No. 2, series of 2014 (Guidelines on Asset Valuations) or Republic Act No. 8799 (Securities Regulation Code), as amended and its Implementing Rules and Regulations.

4.7. You agree that we, and/or any Santos Knight Frank Person, may be irreparably harmed by any breach of the terms of this clause 4 and that damages may not be an adequate remedy. Accordingly, you agree that we and/or any Santos Knight Frank Person may be entitled to the remedies of injunction or specific performance, or any other equitable relief, for any anticipated or actual breach of this clause 4.

4.8. You agree to indemnify and keep fully indemnified us, and each relevant Santos Knight Frank Person, from and against all liabilities, claims, costs (including legal and professional costs), expenses, damages and losses arising from or in connection with any breach of this clause 4 and/or from the actions or omissions of any person to whom you have disclosed (or otherwise caused to be made available) our Valuation otherwise than in accordance with this clause 4.

5. Knight Frank network

5.1. Santos Knight Frank, Inc. is a member of an international network of independent firms which may use the "Knight Frank" name and/or logos as part of their business name and operate in jurisdictions outside the Philippines (each such firm, an "**Associated Knight Frank Entity**").

5.2. Unless specifically agreed otherwise, in writing, between you and us: (i) no Associated Knight Frank Entity is our agent or has authority to enter into any legal relations and/or binding contracts on our behalf; and (ii) we will not supervise, monitor or be liable for any Associated Knight Frank Entity or for the work or actions or omissions of any Associated Knight Frank Entity, irrespective of whether we introduced the Associated Knight Frank Entity to you.

5.3. You are responsible for entering into your own agreement with any relevant Associated Knight Frank Entity.

5.4. This document has been originally prepared in the English language. If this document has been translated and to the extent there is any ambiguity between the English language version of this document and any translation thereof, the English language version as prepared by us shall take precedence.

6. Severance

If any provision of the Agreement is invalid, illegal or unenforceable, the parties shall negotiate in good faith to amend such provision so that, as amended, it is legal, valid and enforceable and, to the greatest extent possible, achieves the intended commercial result of the original provision. If express agreement regarding the modification or meaning or any provision affected by this clause is not reached, the provision shall be deemed modified to the minimum extent necessary to make it valid, legal and enforceable. If such modification is not possible, the relevant provision shall be deemed deleted. Any modification to or deletion of a provision under this clause shall not affect the validity and enforceability of the rest of this Agreement.

7. Entire agreement

7.1. The Agreement, together with any Valuation produced pursuant to it (the Agreement and such documents together, the "**Contractual Documents**") constitute the entire agreement between you and us and supersedes and extinguishes all previous agreements, promises, assurances, warranties, representations and understandings between you and us, whether written or oral, relating to its subject matter.

7.2. Subject to clause 3.7 above, you agree that in entering into the Agreement you do not rely on, and shall have no remedies in respect of, any statement, representation, assurance or warranty (whether made innocently or negligently) that is not expressly set out in the Contractual Documents. You further agree that you shall have no claim for innocent or negligent misrepresentation based on any statement set out in the Contractual Documents.

7.3. The Letter and these General Terms shall apply to and be incorporated in the contract between us and will prevail over any inconsistent terms or conditions contained or referred to in your communications or publications or which would otherwise be implied. Your standard terms and conditions (if any) shall not govern or be incorporated into the contract between us.

7.4. Subject to clause 3.7 and clause 6, no addition to, variation of, exclusion or attempted exclusion of any of the terms of the Contractual Documents will be valid or binding unless recorded in writing and signed by duly authorised representatives on behalf of the parties.

8. Assignment

8.1. You shall not assign, transfer, mortgage, charge, subcontract, declare a trust over or deal in any other manner with any of the rights and obligations under the Agreement without our prior written consent (such consent to be granted or withheld in our absolute discretion).

9. Force majeure

9.1. Neither party shall be in breach of this Agreement nor liable for delay in performing, or failure to perform, any of its obligations under this Agreement if such delay or failure results from events, circumstances or causeswhich could not be foreseen, or which, though foreseen, were inevitable.

10. Our fees

10.1. Without prejudice to clause 10.3 below, you become liable to pay our fees upon issuance of the Valuation. For the avoidance of doubt, unless expressly agreed otherwise in writing, the payment of our fees is not conditional on any other events or conditions precedent.

10.2. If any invoice remains unpaid after 30 days of the date on which it is presented, we reserve the right to charge interest, calculated daily, from the date when payment was due until payment is made at 3%

10.3. If we should find it necessary to use legal representatives or collection agents to recover monies due, you will be required to pay all costs and disbursements so incurred.

10.4. If an appraisal analysis is ordered and the assignment is cancelled before completion, we reserve the right to receive compensation, by way of damages, in an amount equal to 70% of the total fee for the assignment.

10.5. If you delay the instruction by more than 30 days or materially alter the instruction so that additional work is required at any stage or if

we are instructed to carry out additional work that we consider (in our reasonable opinion) to be either beyond the scope of providing the Valuation or to have been requested after we have finalised our Valuation (including, but not limited to, commenting on reports on title), we will charge additional fees for this work. Such additional fees will be calculated on the basis of a proportion of the total fee by reference to reasonable time and expenses incurred.

10.6. Where we agree to accept payment of our fees from a third party, such fees remain due from you until payment is received by us.

11. Anti-bribery and corruption and Anti-Money Laundering
We agree that throughout the term of our appointment we shall:

(a) comply with all applicable laws, statutes, regulations, and codes relating to anti-bribery and corruption and Anti-Money Laundering laws (the "**Relevant Requirements**");

(b) not engage in any activity, practice or conduct which would constitute an offense;

(c) maintain anti-bribery, anti-corruption, and anti-money laundering policies to comply with the Relevant Requirements and any best practice relating thereto; and

(d) promptly report to you any request or demand for any undue financial or other advantage of any kind in connection with the performance of our services to you.

12. Portfolios
Properties comprising a portfolio, unless specifically agreed with you otherwise, will be valued separately and upon the assumption that the properties have been marketed individually and in an orderly manner.

13. Land Register inspection and searches
We are not required to undertake searches, validations or inspections of any kind for title or price paid information in any publicly available land registry.

14. Title and burdens
We will assume, unless specifically informed and stated otherwise, that each property has good and marketable title and that all documentation is satisfactorily drawn and that there are no unusual outgoings, planning proposals, onerous restrictions or local authority intentions which affect the property, nor any material litigation pending.

15. Disposal costs and liabilities
No allowance is made in our Valuation for expenses of realisation or for taxation which may arise in the event of a disposal and our Valuation is expressed as exclusive of any VAT that may become chargeable. Properties are valued disregarding any mortgages or other charges, including commissions.

16. Sources of information
We rely upon the information provided to us by you, as to details of tenure and tenancies, planning consents and other relevant matters, as summarised in our Valuations. Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser.

17. Identity of property to be valued
We will exercise reasonable care and skill (but will not have an absolute obligation to you) to ensure that the property, identified by the property address in your instructions, is the property inspected by us and contained within our valuation report. If there is ambiguity as to the property address, or the extent of the property to be valued, this should be drawn to our attention in your instructions or immediately upon receipt of our report.

18. Boundaries
Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.

19. Planning, highway and other statutory regulations

19.1. Enquiries of the relevant planning and highways authorities in respect to matters affecting properties, where considered appropriate, are normally only obtained from the corresponding government agency. We can only state whatever current conditions may be. We recommend that formal written enquiries should be undertaken by your lawyers who should also confirm the position with regard to any legal matters referred to in our Valuations.

19.2. It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative, regulatory, or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.

19.3. We assume that the premises comply with all relevant statutory requirements including environmental, building, fire, and sanitation regulations.

20. Property insurance
Our Valuation assumes that each property would, in all respects, be insurable against all identifiable risks.

21. Building areas and age
Where so instructed, areas provided from a quoted source will be relied upon. Any dimensions and areas measured on location or from plan/s are calculated and are quoted to a reasonable approximation, with reference to their source. Where the age of the building is estimated, this is for guidance only.

22. Structural condition
Building, structural and ground condition surveys are detailed investigations of the building, the structure, technical services and ground and soil conditions undertaken by specialist building surveyors or engineers and fall outside the normal scope of a valuation. Since we will not have carried out any of these investigations, we are unable to report that any property is free of any structural fault, rot, infestation or defects of any other nature, including inherent weaknesses due to the use in construction of deleterious materials. We do reflect the contents of any building survey report provided to us in advance, or any defects or items of disrepair of which we are advised or which we note during the course of our ocular inspections but otherwise assume properties to be free from defect.

23. Ground conditions
Unless informed otherwise in writing, we assume there to be no adverse ground or soil conditions and that the load bearing qualities of the sites of each property are sufficient to support the building constructed or to be constructed thereon.

24. **Environmental issues**

24.1. Investigations into environmental matters by suitably qualified environmental specialists would usually be commissioned by most responsible purchasers or chargees of higher value properties or where there was any reason to suspect contamination or a potential future liability. Furthermore, such investigation would be pursued to the point at which any inherent risk was identified and quantified before a purchase proceeded. Where we are provided with the conclusive results of such investigations, on which we are instructed to rely, these will be reflected in our Valuations with reference to the source and nature of the enquiries. We would endeavour to point out any obvious indications or occurrences known to us of harmful contamination encountered during the course of our valuation enquiries.

24.2. However, we are not environmental specialists and therefore we do not carry out any scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination or any other environmental searches. If we are not provided with the results of appropriate investigations as outlined above and where there is no obvious indication of harmful contamination, our Valuation will be provided on the assumption that the relevant property is unaffected. Where we are informed that contamination is suspected or confirmed, but adequate investigation has not been carried out and made available to us, then the Valuation will be qualified only by reference to it.

25. **Minerals, timber, airspace etc.**

Unless specifically agreed otherwise in writing and so stated within the main body of the relevant Valuation, we do not value or attempt to value or take into account any potential income stream or other beneficial or detrimental effect or other factor relating to undiscovered or unquantified mineral deposits, timber, airspace, sub-ground space or any other matter which would not be openly known in the market and considered to have value.

26. **Legal advice**

26.1. We are appointed to provide valuation opinion(s) in accordance with our professional duties as Appraisers. The scope of our service is limited accordingly. The valuation assumes no responsibility for the validity of legal matters affecting the property. It is not the intent of the valuation to offer a legal opinion of title. Any liens or encumbrances which may now exist have been disregarded. We are not qualified legal practitioners and we do not provide legal advice and any statements made by us, or advice given, in a legal context should be construed accordingly.

26.2. Where appropriate we will liaise with your legal advisors. However, we accept no responsibility for any work carried out by them and we will not be liable for anything contained in legal documentation prepared by them.

26.3. Where we consider it is necessary for the provision of the Valuation and/or specifically agree to do so, and any additional fees we require for this work are agreed, we will read legal documents (including leases, licences etc.), however, (save for any comment concerning the impact of our interpretation of such documents on value) our interpretation of such documents cannot be relied upon to be legally correct. Where we do interpret legal documents, we will, for the purposes of providing our Valuation, assume our interpretation to be correct.

27. **Loan security**

Where instructed to comment on the suitability of property as a loan security we are only able to comment on any inherent property risk. Determination of the degree and adequacy of capital and income cover for loans is the responsibility of the lender having regard to the terms of the loan.

28. **Build cost information**

In the provision of valuation services we do not hold ourselves out to have expertise in assessing build costs. Where our instruction requires us to have regard to build cost information, for example in the valuation of properties with development potential, we strongly recommend that you supply us with build cost and other relevant information prepared by a suitably qualified construction cost professional, such as a quantity surveyor. The Valuation will be stated to have been arrived at in reliance upon the build cost information supplied to us by you. In the absence of any build cost information supplied to us, we may have regard to published build cost information. Build costs produced using this approach must be assumed to be unreliable or inaccurate; any reliance which can be placed upon our Valuation in these circumstances is severely restricted. Specialist professional advice on the build costs should be sought by you. If you subsequently obtain specialist build cost advice, we recommend that we are instructed to review our Valuation.

29. **Reinstatement assessments**

A reinstatement assessment for insurance purposes is a specialist service and we recommend that separate instructions are issued for this specific purpose. If an indication is required as a check against the adequacy of existing cover this should be requested and will be so stated in the body of the relevant Valuation. Any indication given is provided for guidance only and must not be relied upon as the basis for insurance cover. In any event, our reinstatement assessment should be compared with the owner's and if there is a material difference, then a full reinstatement valuation should be reconsidered.

30. **Comparable evidence**

Where comparable evidence information is included in our Valuation, this information is often based upon our oral enquiries and its accuracy cannot always be assured, or may be subject to undertakings as to confidentiality. However, such information would only be referred to where we had reason to believe it or where it was in accordance with our expectation. In addition, we have not inspected comparable properties.

31. **Valuation bases**

Valuations are carried out on a basis appropriate to the purpose for which they are intended and in accordance with the relevant definitions, commentary and assumptions. The basis of valuation will be agreed with you and specified in the Letter and in the relevant Valuation.

Important Notice

If you have any queries relating to this Agreement please let us know as soon as possible, and in any event before signing the Letter and/or giving us instructions to proceed.

Your instructions to proceed, preferably signing on the space provided for under the Letter, will constitute your acceptance to use our services on the terms of the Agreement.

Accordingly, our commencement of work pursuant to your instructions shall constitute acceptance of your offer and as such establish the contract between us on the terms of the Agreement.

Appendix 9 - Schedule of Assets

BUILDING	
Description	Market Value (PhP)
Luisita Office 1 - As seen during our inspection for the previous valuation done, this is a three (3)-storey, reinforced concrete-framed building with roof deck. The entire building is currently tenanted by Sitel, a call center company. The ground floor is being utilized as lobby, pantry and office rooms. The second and third floor, meanwhile, are office areas. Construction features include plastered cement finish precast concrete exterior walls; concrete slab roof deck with waterproofing membrane; mainly ceramic tiles on concrete flooring at lobbies and hallways; gypsum board ceiling on aluminum t-runners in common areas; frameless glass main entrance doors and mainly glass panels on aluminum frame windows. Based from information provided to us, interior finishes are reportedly introduced by the tenants and were, therefore, excluded in this valuation. The building is reportedly built sometime in January 2018. It is provided with canopies and elevated walkway/platform around the building, and planter boxes. The building is painted and provided with electrical lighting and plumbing facilities. It is also provided with mechanical and electrical services, with the building equipment installed at the roof deck and in various building locations. These equipment are described in detail and valued in the equipment section of this report. Based on the floor area tabulation provided to us by the client, the building has a total gross floor area of about 5,969.19 square meter.	**166,900,000**

Lot-Air Ventilation and Exhaust System-

Consisting of:
2 - Stair Pressurization Blowers -
Niagara, Model/Size: DIDW-FC 20, centrifugal fan, Capacity: 12,750 CMH, Motor: 10.0 Hp (7.5 Kw), 1760 rpm
Note: Located at Roofdeck
Toilet Exhuast Blower -
Niagara, Model: GPA 20 PLR CW-TH, centrifugal fan, Capacity: 9,810 CMH, driven by 3.0 Hp (2.24 Kw) electric motor
Note: Located at Roofdeck
3 - Supply Fans-
Belt-Driven, 230V, 3-Phase, driven by a 0.75 Kw (1.0 Hp) motor,
Note: Located at GF, Genset Room
3 - Exhuast Fans-
Belt-Driven, 230V, 3-Phase, driven by a 0.75 Kw (1.0 Hp) motor,
Note: Located at GF, Genset Room
3 - Exhuast Fans-
Belt-Driven, 230V, 3-Phase, driven by a 0.75 Kw (1.0 Hp) motor,
Note: Located at Substation
System complete with ductings installations, electrical and controls system and other standard accessories 583,000

Total for Air Conditioning and Ventilating System -

27,686,000

Lot-Standby Power Supply and Electrical Power Distribution System-

System consisting of:
2-AC Electric Generating Set-
Baifa, Model BF-C825-60, 2017.02 Mfg Date, Ser \. Nos. 1612071 and 1612072, 1000 KVa (800 Kw) rated capacity, 0.80 power factor, 1800 rpm, 3 phase, 60 hz, powered by:
12 - Cylinder Diesel Engine-
Cummins, turbo-charged, direct injection, water cooled, complete with battery, controls and other standard accessories, steel skid base mounted on concrete foundation
Generator Synchronizing Panel-
Metal clad casement, free standing with 3 vertical sections, complete with main breakers, sub-breakers, magnetic contactors, relays, timers, on/off switches, pushbutton switches, pilot lights, automatic transfer switch and other standard accessories
Mother Fuel Storage Tank-
Mild steel plate of welded construction, 6,000 liters capacity
Note: GF, Fuel Room
Power Transformer-
SGB, 750 KVa rated capacity, 13.8 KV and 400 volts primary and secondary voltages, oil immersed, pad mounted, 3 phase
Low Voltage Switchgear-

Metal clad casement, free standing with 4 vertical sections, complete with main breakers, sub-breakers, magnetic contactors, relays, timers, on/off switches, pushbutton switches, pilot lights automatic transfer switch and standard accessories
Medium Voltage Switchgear Panel-
Metal clad casement, free standing with 1 vertical section, complete with main breakers, sub-breakers, magnetic contactors, relays, timers, on/off switches, pushbutton switches and standard accessories
Battery Bank-
Metal clad casement, free standing with 1 swing-out door panels
System complete with electrical wiring installations, piping connections, contactors, relays and other standard accessories **30,449,000**

Lot-Water Supply and Sewerage System-
Consisting of:
2-Vertical Turbine Pumps-
Goulds Water Technology, Model: 15SV04F0556, Q: 10-29 cu.m/h, Hmax: 78.7 m, Hmin: 39.1 m, rpm: 3500 P: 2500 KPa, driven by 5.5 kw electric motor, equipped with;
Pressure Tank-
Pentair, Wellmate, Model: WM0330 CPVC Drain, mild steel construction, 328.2 liters (86.7 gal) capacity
Note: Located at GF, Pump Room
Booster Pump-
Goulds Water Technology, driven by 0.75 kw (1.0 Hp) electric motor
Elevator Pump-
Daichi, submersible type, Q: 0.35 cu.m/min, driven by 0.75 kw (1.0 Hp) electric motor
Note: Located at Elevator Sump Pit
System complete with piping connections, valves and fittings, controls and other standard accessories **808,000**

Lot-Automatic Fire Fighting, Fire Protection and Alarm System
Consisting of:
Fire Pump-
AC Fire Pump, centrifugal fire pump, vertical turbine type, 1780 rpm, 120 psi, 750 gpm capacity, driven by 75 kw (100 Hp) electric motor
Fire Pump-
AC Fire Pump, vertical turbine type, 100 BHp, 2100 rpm, 120 psi 750 gpm capacity, driven by 4 Cylinder Clarke Diesel Engine
Jockey Pump-
Submersible type, 40 gpm, 3550 rpm, 125 psi, driven by 5.5 kw (7.5 Hp) electric motor
Automatic Transfer Switch-
Metal clad casement, free standing, 250 amperes
2-Fire Pump Controllers-
Eaton, CAT. Nos. FD120-L1 and FD70-100-H-L1
Jockey Pump Controller-
Eaton CAT No. XTJP-G06-L1
20-Fire Extinguishers-
HCFC
56-Fire Extinguishers-
ABC Dry Chemical
14-Fire Hose Cabinets-
Aluminum frame with glass panel door, wall mounted, complete with fire hose, nozzle and 10 lbs dry chemical type fire extinguisher
670-Sprinkler Heads

Note: Located at Various areas
System complete with FDAS, smoke and heat detectors, fire alarm bells, burglar alarm, piping connections, valves, fittings, and other standard accessories **7,874,000**

Total for Building Machinery & Equipment - 68,049,000

1 Instructions

Engagement of Santos Knight Frank

Instructions	1.1	We refer to our Letter of Engagement dated 21 September 2020 and Amendment dated 01 June 2021, to provide a Valuation Report on the opinion of **Market Value** using Market and Income Approaches of that certain Property consisting of ninety-six (96) office condominium units and thirty-eight (38) parking slots situated at various levels of **Robinsons Equitable Tower, ADB Avenue corner Poveda Road, Ortigas Center, Pasig City, Metro Manila**, ("the Property"). A copy of that document is attached herein as Appendix **2**.
	1.2	This valuation has been carried out by Santos Knight Frank, Inc. ("Santos Knight Frank" or "SKF"), in accordance with our General Terms of Business for Valuations ("General Terms of Business"), attached as Appendix **3**.
Client	1.3	Our client for this instruction is **Robinsons Land Corporation** ("the Client").
Valuation standards	1.4	This valuation has been undertaken in accordance with the International Valuation Standards, as well as other local standards.
Purpose of valuation	1.5	You have confirmed that this valuation is for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
Conflict of interest	1.6	We confirm that we do have a material connection or involvement giving rise to a potential conflict of interest, as set out below: We have conducted the valuation of the same Property for you as of 30 September 2020 for purposes of: i) the tax-free exchange of assets to a REIT Company, and (ii) for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
	1.7	You have confirmed this Engagement notwithstanding this matter, you are content for us to proceed with this instruction. We are providing an objective and unbiased valuation.
	1.8	We are acting as external and independent valuers in this engagement.
Responsibility to third parties	1.9	Our valuation report is only for the use of our Client and for the purposes for which are stated herein, and no liability is accepted to any third party for the whole or any part of its contents.
Disclosure & publication	1.10	Except for the purposes which are stated herein, neither the whole nor any part of this valuation nor any reference thereto may be included in any published

document, circular or statement nor published in any way without our prior written approval of the form or context in which it may appear.

Limitations on liability	1.11	No claim arising out of or in connection with this valuation report may be brought against any member, employee, partner, director or consultant of Santos Knight Frank, Inc. Those individuals will not have a personal duty of care to any party and any claim for losses must be brought against Santos Knight Frank, Inc.
	1.12	Santos Knight Frank, Inc.'s total liability for any direct loss or damage caused by negligence or breach of contract in relation to this instruction and valuation report is limited to the amount of the level of our fee, specified in the Letter of Engagement. We do not accept liability for any indirect or consequential loss (such as loss of profits).
	1.13	The above provisions shall not exclude or limit our liability in respect of fraud or for death or personal injury caused by our negligence or for any other liability to the extent that such liability may not be excluded or limited as a matter of law.
Expertise	1.14	The valuation process was performed by **Raymond F. Dechavez** and **Brig Noli M. Rosanes**, under the supervision of **Jacqueline T. Guerta** and **Jesus Constance M. Castro**, both licensed Real Estate Appraisers. The Principal Signatory on behalf of Santos Knight Frank, Inc. and who also reviewed the Valuation Report, is **Wenceslao D. Fuentes, Jr.,** also a licensed Real Estate Appraiser. We confirm that the above-named Licensed Real Estate Appraisers are registered with the Professional Regulation Commission ("the PRC"), having sufficient current knowledge of the particular market and the skills and understanding to undertake the valuation competently.
Vetting	1.15	This report has been vetted as part of Knight Frank global standards.

Scope of enquiries & investigations

Inspection	1.16	In accordance with your instructions, due to the limited timeframe to complete the Engagement, we have not conducted a current inspection. The Property has been previously inspected. Valuation rendered is a result of a revaluation of a property that has previously been inspected.
	1.17	The Client has provided us with information regarding the changes to the physical attributes and/or characteristics of the Property; current or anticipated changes in rental income from the Property; and material changes to the non-physical attributes of each property, such as other lease terms, planning consents, statutory notices and other relevant information which have occurred between the valuation date and the date of our previous valuation. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.
Investigations	1.18	The extent of enquiries/investigations made is set out in our General Terms of Business. In carrying out this instruction we have undertaken verbal / internet-

based enquiries referred to in the relevant sections of this report. We have relied upon this information as being accurate and complete.

Information provided

1.19 In this report, we have been provided with information/documents by the Client for the previous valuation done as well as for the current engagement. We have relied upon this information as being materially correct in all aspects. In particular, we detail the following:

- floor plans
- details of subject office units and parking slots
- rent roll
- financial statements
- projections
- historical and current occupancy

1.20 In cases where we were not provided with documents or information, we did our own enquiries as outlined and stated in the report. Any assumptions in lieu of the lack of information is also set out in the relevant sections of this report.

Valuation basis

1.21 In accordance with your instructions, we have provided an opinion of value on the basis of **Market Value.**

Market Value (MV)

1.22 Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property.

It is further assumed that title to the Property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable.

The rights appraised in this report are the property rights in fee simple, free and clear. "Fee simple" is defined as absolute ownership, without limitations to any particular class of heirs or restrictions, but subject to the limitations of eminent domain, escheat, police power and taxation.

The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.

Definition of Condominium 1.23 Under Section 2 of Republic Act No. 4726 or the Condominium Act, Condominium is defined as:

> "A Condominium is an interest in real property consisting of a separate interest in a unit in a residential, industrial or commercial building or in an industrial estate and an undivided interest in common, directly and indirectly, in the land, or the appurtenant interest of their respective units in the common areas."

Briefly stated, it is a form of ownership less than the whole. Each co-owner enjoys absolute ownership in his separate unit and owns jointly, in direct proportion to his holdings, the common areas designated in the Property.

Valuation date 1.24 The valuation date is **30 June 2021.**

2 The Property

Location

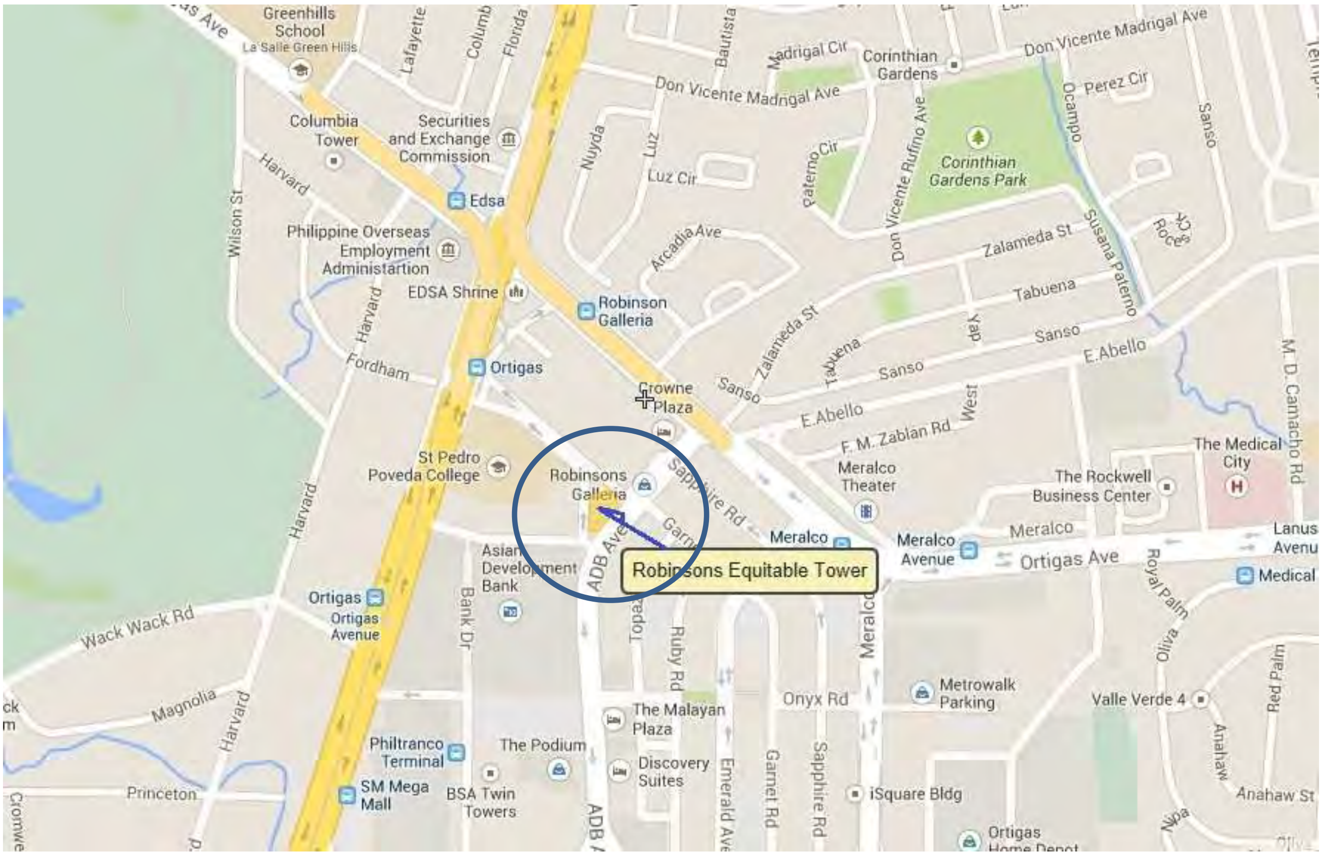
Address 2.1 The Property consists of ninety-six (96) office condominium units and thirty-eight (38) parking slots, located at various levels of Robinsons Equitable Tower, an office building situated at the north corner of ADB Avenue and Poveda Road, within Ortigas Center, Pasig City, Metro Manila, Philippines.

The tower forms part of Robinsons Galleria Complex. It is located adjacent to Holiday Inn Hotel, in the northern section of Ortigas Center where the boundary of Quezon City, Mandaluyong and Pasig converged. It is about 220 meters southeast from Epifanio Delos Santos Avenue (EDSA) and approximately 800 meters northwest from SM Megamall by way of ADB Avenue.

Below is the aerial view of the area courtesy of Google Maps showing the location of the building in relation to the immediate vicinity.

Note: Image courtesy of Google Maps.

2.2 The street plan below shows the location of the building.



Neighborhood

2.3 Ortigas Center is Metro Manila's third most important business district after the Makati and BGC. Like other CBDs in the metropolis, it is also home to many skyscrapers and shopping malls. Located along EDSA are three shopping malls, namely: Robinson's Galleria, SM Megamall and the elite Shangri-la Plaza. Right behind SM Megamall are St. Francis Square, The Podium, San Miguel Corporation Headquarters and the ADB Complex. The district is also the home to University of Asia and the Pacific, and Saint Pedro Poveda College.

Accessibility

2.4 The Property is situated at the north corner of ADB Avenue and Poveda Road making it easily accessible. The district where the Property is located, meanwhile, is surrounded by four (4) major thoroughfares: on the west by EDSA, on the north by Ortigas Avenue, on the east by Meralco Avenue, and on the south by Shaw Boulevard. These thoroughfares provide easy access to/from various sections of metropolis.

Public transportation such as buses and taxicabs are mainly available throughout the day along the nearby EDSA. MRT Line also runs along EDSA, a mass public transport linking the district to Pasay, Makati, Mandaluyong and Quezon City.

Legal Title

Unit Details 2.5 Based on documents provided to us by the Client, the Property consists of ninety-six (96) office condominium units, with a total floor area of **11,464.03 sq. m.**, and thirty-eight (38) standard-type parking slots, tabulated as under:

The condominium units and parking slots are reportedly owned by the Client, the real estate arm of JG Summit Holdings.

The ninety-six (96) units owned by Robinsons Land Corporation only comprised 27% of all units of Robinsons Equitable Tower.

2.6 The floor levels of Robinsons Equitable Tower are clustered into three (3) zones, the Low Zone (8th to 21st floor), the Mid Zone (22nd to 32nd floor), and the High Zone (33rd to 45th floor). For purposes of this valuation, the subject units were also clustered based on the above zones, summarized as under:

DESCRIPTION	Ave. Unit Area (sq. m.)	Total Area/Zone (sq. m.)
Low Zone (12th to 21st Floor)	116.33	698.00
Mid Zone (22nd to 32nd Floor)	117.80	7,539.00
High Zone (33rd to 45th Floor)	124.12	3,227.03

2.7 In our valuation, we have assumed a good and marketable title and that all documentation is satisfactorily drawn.

Tenure

2.8 As evidenced by the available Condominium Certificates of Title, ownership rights to all of the units are freehold.

Remarks on Highest and Best Use

2.9 The Highest and Best Use of the land where Robinsons Equitable Tower is erected is the existing high-rise office condominium development.

Description of Condominium Units

Condominium Units

2.10 The Property comprises ninety-six (96) office condominium units and thirty-eight (38) parking slots of the Robinsons Equitable Tower, described in detail in Appendix **8**.

Condition

Scope of Inspection

2.11 As stated earlier, we have previously inspected the Property.

Our inspection of the Property was limited only to the common areas and exterior of the building, as we were not able to gain entry to the subject units.

We have carried out visual inspection only without any structural investigation or building survey. During our limited inspection, we did not inspect any inaccessible area/s. We are unable to confirm whether the Property is free from urgent or significant defects or items of disrepair.

Unless otherwise stated, we have not been able to carry detailed on-site measurement to verify areas and actual configuration of the subject units and we have no reason to doubt the truthfulness of the areas shown on the documents provided us.

Comments

2.12 Apart from the matters specifically referred to below, we have assumed that the Property is in sound order and free from structural faults, rot, infestation or other defects, and that the services are in a satisfactory condition.

2.13 Information provided to us shows that the units are in good condition consumerate with age and normal usage. No urgent or defects or items of disrepair were reported to us, which would be likely to give rise to substantial expenditure in the foreseeable future or which fall outside the scope of the normal annual maintenance of the units.

Services

2.14 It would appear from our previous inspection that main supplies of electricity and water are provided to the building. Telephone communication facilities are likewise available. Sewer and drainage are believed to be discharged to the building's sewerage system.

Tenancies

Tenancy Information

2.15 We have been provided with copy of some of the rent roll including some of the lease contracts by the Client and have relied on that information as being correct. No additional verification has been undertaken.

2.16 A summary of the Property tenancies is presented on the next page.

TENANTS	LEASED AREA (GROSS, in sq.m.)	Lease Contract Start	End
Tenant 1	146.89	26-Sep-16	25-Nov-21
Tenant 2	1,428.71	16-Sep-13	15-Dec-23
Tenant 3	757.17	07-Jul-13	06-Jul-21
Tenant 4	296.03	01-Nov-20	31-Jul-23

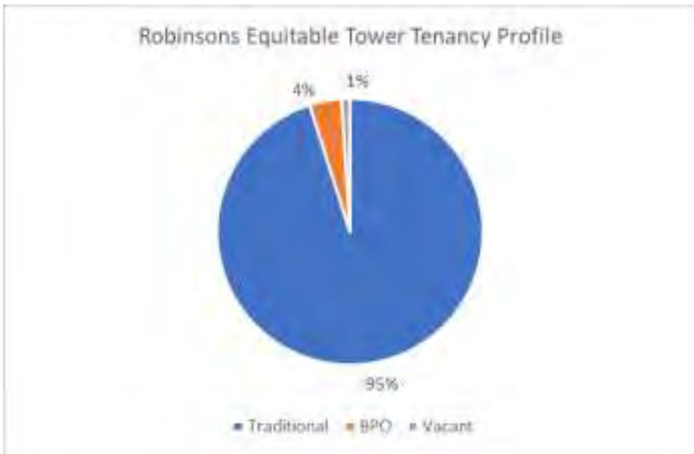
Tenant 16	289.97	20-Jan-16	19-Mar-24
Tenant 17	150.22	06-Apr-16	05-Jun-23
Tenant 18	423.28	15-Dec-13	14-Dec-22
Tenant 19	423.28	15-Dec-13	14-Dec-22
Tenant 20	423.28	01-Apr-21	31-Mar-26
	287.44	01-Apr-21	31-Mar-26
Tenant 21	448.16	01-Mar-21	28-Feb-26
Tenant 22	278.95	01-May-21	30-Apr-26

2.17 Based on the rent roll provided, total leasable area is **14,364.50** sq.m. with 38 parking slots available for lease.

Comments on Leasable Areas

2.18 The total leasable area is bigger than the total floor area of the units since it includes some of the common areas for whole floor occupiers. Inclusion of common areas has been likewise reflected in the individual Contract of Lease.

Most of the Property's tenants are traditional offices with only a handful of Business Process Outsourcing (BPO) companies. Based on the figure below which summarizes the tenancy profile of the Property, traditional offices currently take up 95% of the Property's leasable area followed by BPOs at 4%.



Source: SKF, RLC

2.19 As of 30 June 2021, the Property is 99% occupied with a Weighted Average Lease Expiry (WALE) of 2.42 years. Earliest period with an expiring lease is 2021 with 11% of total leased area. In 2022, 18% of the leased area will be up for renewal or a new lease.

Source: SKF, RLC

2.20 Below are some of the provisions as stated in the Lease Contract.

a. **Care of the Leased Premises**

The LESSEE shall at its expense, maintain the Leased Premises in a clean and sanitary condition, free from noxious odors, disturbing noises or other nuisances and, upon the expiration of the lease, shall return the premises and fixtures in as good condition as that in which they were actually found at the beginning of the lease, ordinary wear and tear excepted. The LESSEE shall not drive nails, screws, hooks or other abutments on or into the wall's frames or other portions of the premises or in any manner deface or damage any part thereof. Any damage caused by the LESSEE may be repaired by the LESSOR for the account of the LESSEE. The LESSOR shall have the right to require the LESSEE to remove any display or promotional matter, or any displayed merchandise which LESSOR reasonably and in good faith considers to be improper or inappropriate for the general appearance or presentation of the premises.

The LESSOR shall be responsible for major repairs which are limited to those which affect the structure of the Leased Premises or the building. The LESSEE shall allow access to the LESSOR on the Leased Premises for purposes of repair or remodelling or such other works as may be necessary for the preservation, conservation, improvement or decoration of the building or any part thereof. No compensation or claims shall be allowed against the LESSOR by reason of any inconvenience or annoyance to the LESSEE that may arise by reason thereof.

The LESSEE shall promptly repair, at its own expense, any damage to the Leased Premises or any other improvements within the building caused by bringing into the Leased Premises of any property for the LESSEE's use, or by the installation or removal of such property, regardless of who is at fault or who caused such damage. unless such was clearly caused by the LESSOR, or its agents or employees. In default of such repairs by the LESSEE, the LESSOR may affect the repairs and the LESSEE agrees to promptly pay the LESSOR the cost of such repairs. The LESSEE shall be responsible for the maintenance and repair of the Leased Premises including plumbing and electrical fixtures within the premises or those serving the same.

The LESSEE must notify the LESSOR immediately of any damage to the Leased Premises, their appurtenances as well as any occupation, usurpation or untoward act being committed, or threatened to be committed, within the Leased Premises.

No machinery, furniture, effect, equipment and other properties found within the Leased Premises, whether or not owned by the LESSEE, may be brought into or out of the building without the prior written approval of the LESSOR. Furthermore, in case the LESSEE has any outstanding/unsettled rent, dues or other charges, the LESSOR reserves the right to withhold approval of any request for bringing in or out of any machinery, furniture, effects or other properties found within Leased Premises, whether or not owned by the LESSEE, until such outstanding amounts have been duly settled by the LESSEE. This is without prejudice to such other rights and remedies available to the LESSOR under prevailing laws or the Contract. including these General Terms and Conditions.

The immediately preceding paragraph shall also apply in the event of transfer of machinery, furniture, effects or other properties found within the Leased Premises from one unit to another unit in the building being leased by the LESSEE whether or not the latter unit is owned by the LESSOR. In the event that the unit where the properties to be transferred is not owned by the LESSOR, the written consent of the unit owner shall also be required.

The LESSEE shall further maintain the Leased Premises in a clean condition by utilizing plastic bags for the disposal of both dry and wet garbage. Unless garbage is contained in plastic bags, it will not be allowed to be deposited in the authorized depository for collections.

b. **Sublease, Transfer of Rights**

The LESSEE shall not assign or transfer its rights in the Contract nor sublease or sublet all or any part of the Leased Premises, without the prior written consent of the LESSOR and no rights, title or interest thereto or therein shall be conferred on or vested to anyone other than the LESSEE without such prior written consent. Otherwise, subleasing the leased Premises without the prior written consent of the LESSOR shall be deemed a breach of the contract by the LESSEE and shall be subject to the rights and remedies available to the LESSOR under prevailing laws and Contract, including these General Terms and Conditions. In the event of sublease with or without the prior written consent of the LESSOR, the LESSEE shall remain principally liable. However, the LESSOR shall have the right to exercise such remedies embodied in the Contract, the General Terms and Conditions and under prevailing laws, as against the sublessee in order to protect its right and interests.

Only the LESSEE has the right to use the Leased Premises as its official address to be registered with any government entities for the issuance of necessary permits and licenses for its business operations.

Should the LESSOR give the LESSEE its consent to sublease the Leased Premises, the LESSEE cannot sublease the Leased Premises for the period longer that the Contract of Lease between the LESSOR and the LESSEE.

It is expressly understood that the LESSEE has no goodwill or patronage rights over the Leased Premises; that such rights belong exclusively to the LESSOR, being the owner of the Leased Premises, which forms part of the building; and that the LESSEE may not sell or dispose of said goodwill or patronage rights to any person.

c. **Assignment of Rights/Mortgage/Encumbrance**

The LESSOR reserves the right to assign and convey or mortgage or otherwise encumber its rights to this lease in favor of any affiliate or subsidiary or to any party. In the event of any assignment, conveyance, mortgage, or encumbrance of the Leased Premises, the LESSOR binds itself to require the assignee or mortgage or beneficiary of the encumbrance to respect and abide by all the terms and conditions of the Contract, as well as these General Terms and Conditions.

Roadways and Access

Roadways 2.21 The road network within Ortigas Center can accommodate light to moderate pedestrian and vehicular traffic loads and has multiple connections to the surrounding thoroughfares. The roads range from 10 to 15 meters wide, mostly are concrete-paved and some have asphalt overlay, provided with cemented sidewalks, curbs and gutters, and underground drainage system. There are also modern pedestrian overpasses provided at the major road intersections of the district.

Access 2.22 In reporting our opinion of value, we have assumed that there are no third-party interests between the boundary of the building premises and the abutting roads and that accordingly the Property has unfettered vehicular and pedestrian access.

Zonal Value

Source of Information 2.23 Based on the Zonal Table of the Bureau of Internal Revenue, the zonal value of commercial condominium units within Robinsons Equitable Tower is pegged at PhP71,000 per sq. m. while the parking slot is pegged at PhP42,000 per sq. m. Normally, the standard area of parking slot in condominium buildings is 12.50 sq. m., thus, translating the zonal value to about PhP525,000 per slot.

2.24 An excerpt of the said zonal table is attached herewith as Appendix **9**.

Environmental Considerations

Flooding 2.25 From our enquiries with the City Planning Office, we have ascertained that the Property is not within an indicative floodplain and that there is therefore a zero risk of flooding.

Contamination 2.26 As stated in the General Terms of Business, investigations into environmental matters would usually be commissioned from suitably qualified environmental specialists. SKF is not qualified to undertake scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination.

Subject to the above, while carrying out our valuation inspection, we have not been made aware of any uses conducted at the subject property that would give cause for concern as to possible environmental contamination. Our valuation is provided on the assumption that the Property is unaffected.

3 Market Analysis

Philippine Market Commentary

3.1 Shown below is SKF's latest **Metro Manila Office Market Update**.

Source of Information 3.2 Our market analysis has been undertaken using market knowledge within Santos Knight Frank, Inc., enquiries of other agents, searches of Property databases, as appropriate and any information provided to us.

OFFICE RENT ROLLBACKS CUSHION INCREASING VACANCIES

General Overview

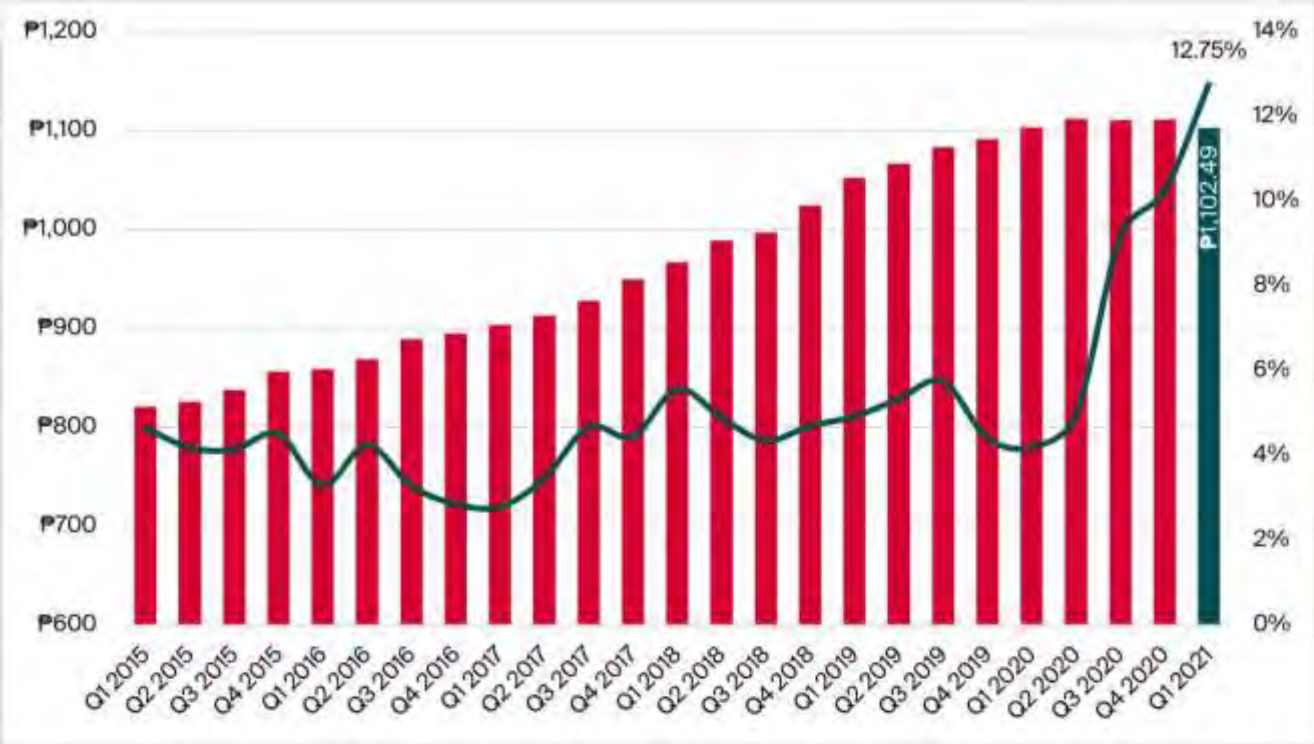
The Metro Manila office market displayed modest market movement at the start of 2021 owing to the sluggish demand driven by the market uncertainties caused by changing lockdown scenarios in Metro Manila. Landlords were challenged to remain relevant as potential occupiers continued to take a cautious approach caused by the growing COVID-19 cases and slow vaccine roll-outs.

Still, new office spaces were introduced during the quarter as developers capitalized on the relaxed quarantine measures to resume their halted construction activities. The local office market supply grew by 163,136 sqm of Grade A office space that mostly catered to IT-BPO companies. Several buildings were completed in Fort Bonifacio, Bay Area, and Quezon City, resulting in an overall office supply in Metro Manila of about 6.9 million sqm.

Consequently, supply growth resulted in an increase in vacancies throughout the metropolis. Office vacancy rates in Metro Manila further spiked to 12.75%, the highest since 2009. Current and potential occupiers remained vigilant towards the health situation of the country. Numerous companies continued to implement Work-From-Home and skeletal workforce arrangements. Office take-up contracted by 28,696 sqm as locators reassessed their need for spaces amid their bid to reduce operational costs.

Monthly average lease rates in Metro Manila further dipped to PHP 1,102.49 per sqm, declining by 0.78% quarter-on-quarter (q-o-q) and 0.07% year-on-year (y-o-y). The downward trend of rents was caused by the landlords' bid to provide more competitive packages to appeal to prospective tenants.

Figure 1. Metro Manila Historical Lease & Vacancy Rates



Source: Santos Knight Frank Research

Makati

The adverse effects of the pandemic and the prolonged lockdowns remained evident in the most prominent business district in the country. Vacancy rates spiked to 11.17%, considered to be the highest in the past ten years. Moreover, the expensive rents in Makati CBD were detrimental to the retention of office occupiers. Locators looking to minimize their expenses opted to discontinue their lease, resulting in about 25,557 sqm of office space vacated during the quarter.

Sluggish leasing activity persisted in the area as existing and upcoming locators in Makati were less willing to take up spaces due to the financial distress brought about by the global pandemic. The average monthly rents recorded in Makati went down to PHP 1,348.19 per sqm, contracting by 0.93% q-o-q and 6.05% y-o-y. Despite this, rates in Makati remained the highest in the metropolis.

Several property players are still looking forward to the materialization of their projects in the pipeline. More than 447,552 sqm of Prime and Grade A office supply are anticipated to come online in the next three years, with approximately 164,000 sqm being operational by the end of 2021. The massive influx of upcoming office developments in Makati comes from the backlogs and spillovers from 2019 up to the latter part of 2020.

Taguig

Slow demand in Taguig was also evident as vacancy levels continuously increased to 8.37% from 7.74% in Q4 2020. Despite having the largest supply share in Metro Manila of more than 2 million sqm, the downsized space requirements were seen as the factor in the rising vacancies as locators looked to lessen their operational cost. Moreover, average monthly rental rates in Fort Bonifacio also went down to PHP 1,289.75, translating to a contraction of 0.89% q-o-q.

The ease in quarantine measures allowed private and public projects to resume construction. Office supply in Fort Bonifacio further grew by 28,000 sqm through the completion of BGC Corporate Center 2. Despite the growing vacancy levels, potential developers still have bright prospects in Taguig as it was seen as the youngest but fastest growing business district in Metro Manila. In line with this, upcoming office supply is seen to be augmented by about 864,100 sqm of office space within the next five years. About 344,000 sqm of this will be coming from Arca South which is poised to become a new business district in the south.

Bay Area

The POGO industry exodus has significantly contributed to the spiking vacancy levels in the Bay Area during Q1 2021, recorded at 12.82%. Slower demand from the sector is seen in the coming periods as more firms have started to postpone their lease contracts. This occurrence implied challenges in the recently fast-moving office market of the Bay Area.

The upsurge in vacancy was also attributed to the completion of Four E-com during the quarter with an additional 89,132 sqm of Grade A office space. Priced above its competitors, this building has helped in pushing the average rents in the area to PHP 1,083.41 per sqm, increasing by 1.66% q-o-q.

The Bay Area is still foreseeing a huge amount of upcoming office supply in the coming years. Developers still recognize the opportunity to invest in the area due to its accessibility and availability of developable land. Approximately, 578,800 sqm of office developments are anticipated to be introduced in the market for the next five years, while 258,000 sqm are expected to become operational by the end of 2021.

Ortigas Center

Vacancy levels in Ortigas Center gradually eased to 12.75% in contrast to 12.88% of the preceding quarter. Despite this, pre-terminated contracts and non-renewals were still observed, as most of the companies are still on a wait-and-see approach towards the office market. Meanwhile, the slow-moving leasing transaction was also felt in the district as the rental rates went down to PHP 806.29 per sqm, contracting by 1.15% q-o-q and still considered the lowest as compared to other major CBDs in the metropolis.

Moreover, the upcoming office supply in Ortigas Center remained high as more than 671,000 sqm of Prime and Grade A office spaces are slated to introduce in the next five years. In addition, the massive influx of 373,000 sqm of space is scheduled to commence their operations within the year such as Cyber Omega, SM Mega Tower, and Jollibee Tower. This includes the spillover from 2019 up to the remaining quarters of 2020 that has been halted due to subsequent lockdowns.

Quezon City

Vacancy rates in Quezon City spiked up to 20.64% as opposed to 16.21% of the preceding quarter, indicating the highest level across all of Metro Manila. Approximately 13,690 sqm of office spaces were freed up in the city during the quarter. Occupiers in the area were more sensitive to the health crisis as compared to locators in other districts The lack of recognized established business districts and limited connectivity of certain townships contributed to the slow demand in the area. Furthermore, the upsurge in vacancy levels was also driven by the opening of SM North Towers 1 and 2 that added more than 45,200 sqm in the massive office supply in Quezon City, and are yet to lease out the majority of their spaces.

Office landlords are trying to alleviate this downtrend and are still vying to mitigate lease terminations. To this end, average headline rates contracted to PHP 925.55 per sqm, translating to a 1.81% decline from the preceding quarter.

Albeit the fast-growing vacancy levels, Quezon City is still expecting a large office supply boost in the coming years. Approximately, 333,700 sqm is anticipated to be introduced in the market in the next five years, in which more than 149,000 sqm will be coming from SM Prime Holdings.

Alabang

Similarly, Alabang CBD experienced rising vacancy levels in Q1 2021 at 16.07% from 14.53% in the preceding quarter. As a result, increased pressures on office landlords in the district were felt as they remain responsive to the slow movement in the office market. This caused rental rates to gradually contract to PHP 846.76 per sqm.

Alabang still holds on to the possibility of becoming one of the major investment hubs in the metropolis due to its vast developable land. Approximately 209,900 sqm of upcoming Grade A office space is anticipated to be operational in the next five years, while 13,800 sqm is slated to become operational by 2021.

Figure 2. Metro Manila Lease & Vacancy Rates per CBD

Source: Santos Knight Frank Research

Office Outlook

The easing quarantine measures that started in the second half of 2020 allowed the developers to restart their impeded construction activities. Developers remain bullish in expanding their office footprint in Metro Manila with more than 3 million sqm of office space are slated to operate in the next five years. The nation's economic center is also set to have an additional supply of 1.1 million sqm of Prime and Grade A office space by the end of 2021. This massive influx still stems from the construction backlogs from the developers in 2020.

The robust expansion of office supply in Metro Manila is seen to further propel the vacancy rates in the local office market in the coming quarters. Along with the stagnant office demand, downward pressure on office rents still expected. Office landlords will be forced to implement more flexible payment terms to existing and potential tenants to market their spaces and continue cash flow from their buildings.

The recovery of the office market is also dependent on the pace of vaccine roll-outs in the country. The slow pace in inoculations is seen to weigh down on the recovery of the market. Attaining herd immunity as soon as possible can reinvigorate the interest in the office market.

In the medium- to long-term Green Buildings are seen to gain a competitive edge compared to ordinary office buildings. Buildings accredited by the US Green Building Council (LEED) and the Philippine Green Building Council (BERDE) will be more sought-after for potential office locators. The efficient design that provides better air circulation, ventilation and filtration, and increased open space, will be more appealing to the market as it puts a premium on the health and well-being of its tenants.

4 Valuation

Methodology

Valuation Rationale

4.1 The purpose of this appraisal is to estimate the Market Value of the Property. In any given valuation exercise, market value can be arrived at using either one or a combination of the three (3) approaches to value, namely: Market Data (or Direct Sales Comparison) Approach, Income Capitalization Approach, and the Cost Approach. The determination of the appropriate approach for a given property is based on the quality and quantity of data available, particularly its relevance to the Property under appraisement. If more than one valuation approach is utilized, the resulting values are reconciled to produce a final value conclusion.

Due to the nature of the Property and the purpose of this appraisal, both the Market Approach and Income Approach to value are deemed the most appropriate to use and the Cost Approach was not used.

Market Approach

Market Approach

4.2 This approach is the most common technique, and preferred method when comparable data are available. The Market (or Sales Comparison) Approach to value is basically an appraisal technique in which the Market Value is reached primarily with other properties which have been sold recently, plus current asking prices and offers thereby establishing a measure of market reaction to the subject property. In the process of comparison, adjustments are usually made of the actual sale prices of properties to account for differences in the properties. Functional or economic divergences must be considered, as well as physical variations, and adjustments made accordingly. It is a process of correlation and analysis of similar recently sold or offered for sale properties. The reliability of this technique is dependent upon: (a) the degree of comparability of each property with the Property under appraisal; (b) the time of the sale; (c) the verification of the sale/listing/offer data, and; (d) the absence of unusual conditions affecting the sale or listing/offer. The weight given to this approach is dependent on the availability of recent listings/offerings of properties considered comparable to the Property under appraisement.

These listings/sold properties are compared to the subject in key units of comparison. Appropriate adjustments are made for differences between the subject and the comparables, resulting in adjusted sales values for each of the comparables. These adjusted values are then reconciled for a value conclusion by the Sales Comparison Data Grid.

Adjustments to Sales/Listings Data

The elements of comparison include property rights, legal encumbrances, financing terms, conditions of sale (motivation), market conditions (sale date), location, physical characteristics, and available utilities. The most variable elements of comparison are the site's physical characteristics, which include its size, condition, amenities, architectural quality, and type.

After comparable data are collected and categorized, and the comparable properties are examined and described, data can be assembled in an organized, logical manner. Sales and/or listings are commonly arranged on a market data grid, such as the Sales Comparison Data Grid. Adjustments for dissimilarities between the subject property and the comparable properties are made to the prices of the comparable. Following is an explanation of the major categories of comparison.

Property Rights Conveyed

The particular rights or interests being valued on a site must be defined. This is especially important in appraisals that involve a partial interest in a property, limited rights such as surface or mineral rights, a fee simple estate subject to a long-term lease, or a leasehold interest. Other encumbrances such as easements, mortgages, or special occupancy and use requirements, should also be identified if the comparable sales property rights differ from the subject.

Financing/Conditions of Sale/Listing

Adjustments for conditions of sale reflect the motivations of the buyer and seller. The conditions under which a parcel of land may be sold could differ from property to property. Current market listings of comparable properties were used. Industry practice dictates that listings/asking/offers have a mark-up allowance of 10% to as much as 30% for negotiation purposes.

Market Conditions (Time of Sale)

The time of sale is the date that the comparable parcel was originally purchased and/or offered for sale. In order for the sale property to be deemed comparable to the subject, it must be adjusted for inflation and deflation that has occurred from the date of sale/offer to the present.

Location

The analysis of a site's location focuses on the time-distance relationships between the site and common origins or destinations. It also concerned with the location of the building in relation to heavily traversed thoroughfares and/or intersections. Likewise, location of the condominium units in relation to floor level. Normally, as the floor gets higher, prices of units also tend to be higher.

Size

The size of the comparable is adjusted for superiority or inferiority to the subject. Generally, it is perceived that smaller units are worth more per sq.m. than larger units, due to its affordability, and a wider spectrum of end-users.

Condition

This pertains to the age and the degree of maintenance of the subject building with consideration to physical deterioration and other factors deemed relevant.

Architectural Quality

The architectural design of a building can greatly enhanced its marketability. A good architectural design may cost more but can certainly boost its marketing power aside from prolonging the economic life of the Property.

Amenities/Utilities

This addresses the availability of basic amenities such as elevators, air-conditioning units, security system and utilities such as water, power, sewer, and storm drains at or near the sites analysed. These necessities cannot be deferred when the site is developed and any differences between each comparable and the subject represents an expense, which will materially affect the investment value of the Property.

Unit Type

The type of the unit has an effect on the value of the Property as this dictates the return an owner can expect from it. Normally, a commercial unit is valued higher than a similarly situated residential unit.

Summary of Adjustments

The Data Comparison Grid shown on Appendix **7** shows a summary of the aforementioned adjustments, which provides an indication as to the degree of adjustment made to the different elements in comparison. A numeric indicator indicates the level of adjustments, in terms of percentage when compared with the subject property. The use of (-) indicates a negative adjustment and a + indicates a positive adjustment. A downward adjustment (-) used is made to reflect superior characteristics of the comparable sale/listing, while an upward adjustment + reflects inferior characteristics of the comparable sale/listing. Finally, a 0 is used to confirm similarity between the comparable sales/listings and the subject or is used when market information is unavailable or does not support an adjustment for any particular element of comparison.

Evidence of comparable properties

4.3 Analysis of Comparable Properties Offered for Sale

Based on our interview with the building manager of Robinsons Equitable Tower, majority of the units within Robinsons Equitable Tower are not being offered for sale but rather being offered for lease only. Due to scarcity of data, we widened our market survey to other similar office buildings within Ortigas Center. The comparable properties selected share the same or similar characteristics as the subject. Whatever information or data we came up with was then analysed, and comparison made for such factors as size, unit and building locations, architectural quality, building rated classification, and offered amenities/utilities. In the Philippines however, property transactions are not officially disclosed, and quite often, actual transaction price is masked by other undisclosed arrangements and different from the figure shown on the sale and purchase agreement. We have therefore made reference to the following data, made our market judgment, and adjusted for the above-mentioned factors:

1. A warm shell office unit containing a floor area of 110.00 sq. m., more or less, located at the 16th Floor of Philippine Stock Exchange Center, along Exchange Road, Ortigas Center, Pasig City, is currently offered for sale at an asking price of PhP14,000,000 or about of PhP127,272.73 per sq. m.
   Source: Mr. Gerald Evangelista (0917) 552-2298

2. A warm shell office unit containing a floor area of 101.00 sq. m., more or less, located at the 4th floor of AIC Burgundy Empire Tower, along ADB Avenue corner Garnet Road, Ortigas Center, Pasig City, is currently offered for sale at an asking price of PhP12,400,000 or about PhP122,722.28 per sq.m.
   Source: Ms. Regine Meynagcot (0917) 512-7184

3. A fitted office unit containing a floor area of 130.00 sq. m. located at the 28th floor of Jollibee Plaza, along Emerald Avenue, Ortigas Center, Pasig City, is currently offered for sale at an asking price of PhP13,000,000 or about PhP100,000 per sq.m.
   Source: Mr. Jayson Manaol (0917) 822-1447

In addition, we have likewise conducted market survey of parking slots in various similar condominium buildings within Ortigas Center. Normally, parking slots are sold on a per slot basis and according to our survey, the value may range from PhP700,000 to P800,000 per slot, and can go as high as PhP1,000,000, depending on the slot and building location, building age, and the amenities available in the building.

Unit Value of the Subject Units

4.4 As reflected in the Comparison Grids, attached herein as Appendix **7**, the Unit Value of the subject units, as clustered per zone, are as under:

	Unit Value (PhP/ sq. m.)
Low Zone (12th to 21st Floor)	92,000
Mid Zone (22nd to 32nd Floor)	96,000
High Zone (33rd to 45th Floor)	101,000

Meanwhile, the value of the Parking Slots is estimated at PhP800,000 per slot.

Market Value of the Property by Market Approach

4.5 Having taken into consideration the above comments, assumptions and nature of the Property, the Market Value of the Property by Market Approach is summarized on the next page as:

DESCRIPTION	Total Area/Zone (sq. m.)	Unit Value (PhP/sq. m.)	Market Value (PhP)
Office Condominium Units			
Low Zone (12th to 21st Floor)	698.00	92,000	64,216,000
Mid Zone (22nd to 32nd Floor)	7,539.00	96,000	723,744,000
High Zone (33rd to 45th Floor)	3,227.03	101,000	325,930,000

			1,113,890,000
Parking Slots	38 slots @ PhP800,000 per slot		**30,400,000**

		Total	**1,144,290,000**
			===========
		Rounded to	**1,144,000,000**
			===========

Income Approach

Income Approach 4.6 The Income Approach is applicable to the valuation of income producing properties, business enterprise as well as the valuation of intangible assets. This approach measures the current value of an asset by calculating the present value of its future economic benefits by discounting expected cash flows at a rate of return that compensates the risks associated with the particular investment.

Discounted Cash Flow Analysis 4.7 The discounted cash flows, or DCF valuation is the most popular fundamental approach in valuing the future economic benefits of a projected income stream. DCF measures actual yield rather than paper income for the asset/business owner and the analysis of DCF is widespread and mandatory in the various fields of business making DCF-based valuation ideal.

4.8 The valuation process, briefly stated, consists of the following:

- Estimation of the revenues generated;
- Estimation of the costs and expenses related to the operations of the development;
- Estimation of an appropriate discount rate;
- Discounting process using an appropriate discount rate to arrive at an indicative market value; and
- Estimation of the Terminal Value of the Property.

Discount Rate 4.9 The discount rate was computed using the build-up method - calculated by adding together the different variables. The basic formula for the traditional build-up model is:

Discount Rate = Rf + P + MR + LR

Where	Variable	Proxy Statistic
Rf	Risk Free Rate	PDEX Risk Free Rate
P	Equity Risk Premium	Country Risk
MR	Management Risk	
LR	Liquidity Risk	

The variables that were used to generate the Discount Rate are exhibited in the table below, along with the sources and/or dates as at or nearest the 30 June 2021 valuation date.

Risk Free Rate (10Y)	3.92%	As of 30 June 2021, BVAL PDEX
Equity Risk Premium	3.25%	As of 25 June 2021, OECD
Management Risk	0.80%	
Liquidity Risk	0.90%	

4.10 The following assumptions were used to arrive at the Discount Rate using the Build-Up Method.

Risk Free Rate

4.11 For the purposes of this valuation, we adopted the 10-year bond rate sourced from Philippine Dealing & Exchange Corporation (PDEX) as of 30 June 2021 - the valuation date (image shown below). The Philippine Dealing Exchange (PDEx) system has recently appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEX. The PHP BVAL Reference Rate was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

Equity Risk Premium

4.12 We used an equity risk premium of 3.25%. We adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3% plus an additional 0.25% risk premium for unidentifiable risk factors. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors. Shown on the next page is an excerpt of said table.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits
Valid as of: **25 June 2021**

nb	Country Code ISO Alpha 3	Country Name [1]	Classification Previous	Classification Current Prevailing	Notes
138	PLW	Palau	-	-	(5)
139	PAN	Panama	4	4	(8)
140	PNG	Papua New Guinea	6	6	
141	PRY	Paraguay	5	5	
142	PER	Peru	3	3	
143	PHL	Philippines	3	3	
144	POL	Poland	-	-	(6)
145	PRT	Portugal	-	-	(6) (7)

Management & Liquidity Risk

4.13 The Management Risk refers to the estimated premium to compensate for the burden of management, while the Liquidity Risk refers to the ease (or the difficulty) with which an investment can be sold or made. A review was done and have arrived at the following: 0.8% for Management Risk and 0.9% for Liquidity Risk.

Resulting Discount Rate

4.14 Resulting Discount Rate used for this valuation is 8.87%, or say, 9.0%.

Capitalization Rate

4.15 A discount rate is used to calculate the present value of future projections of a benefit stream when growth varies from year to year. However, if growth is estimated to remain level throughout the life of the investment, a capitalization rate is often used. In its most basic form, the relationship between discount rate and a capitalization rate can be summarized as follows:

Capitalization Rate = Discount Rate – Growth

For purposes of this valuation, a long-term growth rate of 4.5% has been assumed. This is based on what the Property is perceived to achieve in the long-term considering the present situation of the market. Using this assumption, resulting Capitalization Rate would be 4.5%.

Key Financial Assumptions

4.16 We relied on the historical and projected assumptions brought about by our research and as provided by the Client. These financials were analysed to ensure reasonableness by comparing projected revenue growth rates and other operating expenses based on historical performance. Based on interviews with the representatives of the company, projections were prepared to reflect the current and expected future market conditions.

a. **Revenues**

i. Cashflow projection starts in 01 July 2021 for a period of 10 years.

ii. The revenues come from the rental of office units and parking slots. In estimating the annual rents of the subject units/slots, we have adopted the contract rents as appearing in the copy of the rent roll provided to us by the Client for the occupied units/leased parking slots. After the expiration of lease, lease rates then are aligned with market rates and are assumed to have an average of 4-year lease contracts. Management Dues and Aircon Dues are likewise charged to the tenants monthly on a per sq.m. basis. Management dues are for common and/ or shared utilities, facilities and services and A/C use (exclusive of power consumption).

iii. It would be important to note that Management Dues collected act as a cost recovery mechanism for all expenses related to the day-to-day operations of the building and its common areas.

iv. Occupancy assumptions were based on the actual performance of the Property as well as the prevailing trend in the subject area taking into consideration the forecasted effect of the global pandemic in the office market. Occupancy of the Property as of valuation date is at 99% while the historical average performance of the Property for the last two years is at 97%. For this valuation exercise, we are assuming an average vacancy allowance of 3%. This assumed vacancy allowance for the whole cashflow period is used to account for unanticipated vacancies brought about by early terminations and non-renewals, and rental concession requests from tenants.

v. We used actual escalation rates indicated in the rent roll for all existing leases up until their lease expires. After which, an average escalation of 5% was then be applied year on year until the end of the cash flow.

b. **Cost & Expenses**

i. Operating Expenses which would include administrative and utility expenses are normally charged against the Common Use Service Area (CUSA) Fees or Association Dues being collected monthly to the individual tenants. However, there are instances when CUSA funds are insufficient to pay off all common charges. If and when this happens, the owners/administrators would have to pay off these expenses and this has been taken into consideration in the projections.

ii. Operating Costs and Expenses are assumed to be an average of approximately 7% of the Total Net Revenues. Operating costs and expenses included are basically divided in to two – real estate expense and general administrative expenses. Real Estate expenses are as follows: repairs & maintenance, management fee, loss from CUSA and miscellaneous expenses. While under General Administrative Expense are –taxes and licenses, commissions, insurance, communication and supplies expenses.

These expenses are projected either as a percentage of the rental revenues or the total net revenues. These percentage allocations were from the historical and projected performance of the Property.

iii. Annual Capital Expenditures (CAPEX) for the entire cashflow period, on the other hand, was assumed to be 1.5% of the Net Leasing Revenues. This assumption is based on benchmarking and analysis of current market practice in allocating CAPEX reserve.

This allocation would help ensure that the Property would operate efficiently and maintain its good and sound condition.

Resulting Market Value

a. Earnings Before Income Tax, Depreciation and Amortization (EBITDA) for the whole duration of the cashflow shall be discounted at the derived Discount Rate of 9.00%.

b. The sum of discounted cashflows including the Terminal Value of the Property represents the Market Value of the Property.

The Terminal Value of the Property is the value of the property beyond the explicit forecast period. It is assumed that the property or business will continue to generate cashflows in perpetuity. As mentioned earlier, Terminal Capitalization Rate used is 4.5%.

The Discounted Cashflow showing the estimated Market Value of the subject property is attached as Appendix **5**.

Direct Capitalization Method

4.17 The Direct Capitalization Method is a real estate valuation method that helps convert a single year's income into value by dividing the Net Operating Income with an appropriate Capitalization Rate. This method assumes that the Property has a stabilized net operating income. All parameters of a typical investor return expectations are represented either explicitly or implicitly in either income forecast or the capitalization rate. The direct capitalization rate, as the ratio of income to value, serves as a proxy for investor return assumptions.

Resulting Market Value

4.18 We made use of the single year's cashflow projection (2022) to derive the Market Value using the Direct Capitalization Method. Capitalization rate adopted to arrive at the Property Market Value is 4.5%.

Valuation basis

Market Value

4.19 Market Value is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

Valuation date

Valuation date

4.20 The valuation date is **30 June 2021**.

Assumptions

Assumptions

4.21 Our valuation is necessarily based on a number of assumptions which have been drawn to your attention in our General Terms of Business, Letter of Engagement and within this report.

Key Assumptions

4.22 Whilst we have not provided a summary of all these assumptions here, we would in particular draw your attention to a key assumption that we relied on a very considerable extent on the information provided by the Client and have assumed that documents provided to us such as details of the condominium units, floor plans, building tenancies and other relevant matters are factual. We were also advised by the Client that no material facts have been omitted from the information provided.

Special Assumptions

4.23 We were instructed to re-value the Property without a re-inspection. We have, thus, considered changes to the physical attributes and/or characteristics of the Property which have occurred between the valuation date and the date of our previous valuation as confirmed by the Client. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.

4.24 We have adopted the details of the subject units provided to us by the Client and have assumed this to be accurate. Further, the subject units were assumed to be owned by Robinsons Land Corporation.

4.25 In applying Income Approach to value, we have considerably relied on the information provided to us by the Client which includes the following: lease contracts, revenue and expense projections, historical and projected occupancies. Upon expiration of contracts, we estimated the lease rates based on the acceptable escalations in the market.

Valuation Results

Using Market Approach

4.26 Using the **Market Approach**, the Market Value of the Property, may be summarized on the next page as:

DESCRIPTION	Market Value (PhP)
Office Condominium Units	
Low Zone (12th to 21st Floor)	64,216,000
Mid Zone (22nd to 32nd Floor)	723,744,000
High Zone (33rd to 45th Floor)	325,930,000
	1,113,890,000
Parking Slots	**30,400,000**
TOTAL	**1,144,290,000**
ROUNDED TO	**1,144,000,000**

4.27 The Market Value of the Property is estimated at **PhP1,144,000,000 (ONE BILLION, ONE HUNDRED FORTY-FOUR MILLION PHILIPPINE PESOS).**

Using Income Approach

4.28 Using the **Income Approach** on the other hand, the Market Value of the Property is estimated as follows:

DCF Analysis	**PhP3,426,000,000**
Direct Capitalization Method	**PhP3,971,000,000**

Calculation 4.29 We attach a copy of our valuation calculations for the Income Approach at Appendix **5 & 6**.

Comments 4.30 The values arrived at using the Income Approach are noted to be higher than the value arrived at using the Market Approach. This is because, unlike the Income Approach, the Market Approach does not capture the income potential of the Property.

4.31 For purposes of this valuation, we deemed it appropriate to adopt the results arrived at by the Income Approach – DCF Analysis, since this method is usually used to determine the value of an income-generating property, as it also captures the Property's future economic benefits, giving a better representation of the Property's Market Value at an acceptable rate of return that would compensate for the risks associated with the particular investment. It likewise takes into consideration market cycles that Direct Capitalization Method cannot capture.

Conclusion of Value 4.32 In conclusion, we are of the opinion that the Market Value of the Property, reckoned as of **30 June 2021**, is:

PhP3,426,000,000 (THREE BILLION, FOUR HUNDRED TWENTY-SIX MILLION PHILIPPINE PESOS).

***Note**: The outbreak of the Novel Coronavirus (COVID-19), declared by the World Health Organization as a "Global Pandemic" on 11th March 2020, has impacted global financial markets. Travel restrictions have been implemented by many countries. In the Philippines, market activity is being impacted in all sectors. As at the valuation date, we consider that we can attach less weight to previous market evidence for comparison purposes, to inform opinions of value. Indeed, the current response to COVID-19 means that we are faced with an unprecedented set of circumstances on which to base a judgement. Our valuation is therefore reported on the basis of "material valuation uncertainty" per IVS 103 of the International Valuation Standards. Consequently, less certainty – and a higher degree of caution – should be attached to our valuation than would normally be the case. Given the unknown future impact that COVID-19 might have on the real estate market, we recommend that you keep the valuation of this property under frequent review.*

Appendix 1 - Assumptions, Limiting Conditions and Disclaimers

Basis of Value	Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion." In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property. It is further assumed that title to the property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable. The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.
Property Rights appraised	The rights appraised in this report are the property rights in fee simple, free and clear. "Fee simple" is defined as absolute ownership, without limitations to any particular class of heirs or restrictions, but subject to the limitations of eminent domain, escheat, police power and taxation. We assume that the fee simple interest is marketable and in compliance with the applicable laws of the Philippines.
Fractional Interests:	When the study contains a valuation relating to an estate in land that is less than the whole fee simple estate, the value reported for such estate relates to a fractional interest only in the real estate involved, and the value of this fractional interest plus the value of all other fractional interests may or may not equal the value of the entire fee simple estate which is considered the whole. When the valuation report contains an allocation of the total valuation between land and building improvements, such allocation applies only under the existing program of utilization. The separate valuations for land and building cannot be used in conjunction with any other valuation/appraisal and will be invalid if so used.
Assumptions:	The valuation is based on the condition of the economy and the purchasing power of the Philippine Peso as of the effective date of valuation. We have assumed that the floor areas provided us have been calculated in accordance with engineering standards, and assumed herein to be true and correct. Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.
Information Supplied By Others	Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser. Information provided by informed local sources, such as government agencies, financial institutions, Realtors, buyers, seller and others, was weighed in the light in which it was supplied and checked by secondary means; however, no responsibility is assumed for possible misinformation.
Legal Issues:	This valuation assumes no responsibility for the validity of legal matters affecting the property. The ownership history reported in this valuation is based on the appraiser's research of public records, which are assumed to be accurate and complete. It is not the intent of the valuation to offer a legal opinion of title. It is further assumed that the property has good title, responsible ownership and competent management. Any liens or encumbrances which may now exist have been disregarded. The appraiser is not required to give testimony or attendance in court by reason of this valuation, with reference to the property in question, unless arrangements have been previously made.
Liability:	The liability of Santos Knight Frank, Inc. and its directors and employees is limited to the addressee of this report only. No accountability, obligation or liability to any third party is accepted. In the event we are subject to any liability in connection with this engagement, regardless of legal theory advanced, such liability will be limited to the amount of fees we received for this engagement.
Environmental Conditions:	It is assumed that there is full compliance with all applicable Philippine environmental regulations and laws unless non-compliance is stated, defined, and considered in this appraisal report.
Town Planning:	It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.
Condition of Improvements:	We have inspected the improvements and structures. However we have not carried out a structural survey nor tested any of the services or facilities, nor have we inspected unexposed or inaccessible portions of the building, and are therefore unable to state that these are free from defect, rot, infestation, asbestos or other hazardous material. We have therefore, viewed the general state of repair of the property and advise that we did not notice any obvious signs of structural defect or dilapidations. Furthermore, the property appears to be in reasonable condition having regard to its age and use and unless otherwise stated. We also assume that the building complies with all relevant statutory requirements in respect of matters such as sanitary, building and fire safety regulations and standards.
Valuation Methodology:	In estimating Fair Value for financial reporting purposes, we still adopted the same Valuation techniques by using any one or the combination of the three (3) Approaches to Value, namely: Market Data (or Direct Sales Comparison) Approach, Cost Approach, and the Income Approach. Briefly described, the Market Data (or Sales Comparison) Approach considers prices recently paid and/or offered for similar items of property with adjustments made to the indicated market prices to reflect the condition and utility of the appraised property relative to market comparatives. The Cost Approach considers the cost to reproduce or replace the property appraised with new assets of like kind, and from this amount an allowance is deducted for depreciation arising from physical deterioration or obsolescence, whether from functional or external causes. In the Income Approach, an estimate is made of the prospective economic benefits of ownership into the future and these benefits are discounted to its present worth or capitalized into an indication of value.
Others:	This report and valuation shall be used only in its entirety and no part shall be used without the whole report. It may not be used for any purpose other than the intended purpose mentioned herein. Possession of this report or any copy thereof does not carry with it the right of copying or publication. All copies will originate from Santos Knight Frank, Inc. and will be signed and dated as such. Neither the whole nor any part of the report or any reference to our name, our valuation and our report may be included in any document, circular or statement nor published without our prior written consent to the form and context in which it may appear. The delivery and acceptance of this report completes this assignment.

Attention: **MR. FREDERICK D. GO**
President and Chief Executive Officer

Subject: **Terms of Engagement for Valuation Services**

Dear Mr. Go:

Thank you for your interest in our Valuation Services. We refer to your invitation of 03 August 2020 requesting Santos Knight Frank, Inc. ("SKF") to submit a proposal for valuation (the "Valuation") in respect of the properties detailed below (the "Properties").

This proposal, together with our General Terms of Business for Valuation Services ("General Terms"), sets out our terms of engagement for carrying out this instruction. Once agreed and signed, this proposal shall constitute our Letter of Engagement ("Letter"). This Letter and the General Terms (together, the "Agreement") exclude any other terms which are not specifically agreed to us in writing. To the extent that there is any inconsistency between the Letter and the General Terms, this Letter shall take precedence.

1. **Client**
Our Client for this Valuation is Robinsons Land Corporation (the "Client", "you" or "your").

2. **Purpose of Valuation**
The Valuation is provided solely the purpose of transferring some of the Client's assets to the REIT Company and its application for a Tax-Free Exchange Ruling with the Bureau of Internal Revenue and listing of the REIT Company in the Philippine Stock Exchange (the "Transaction"). Specifically, the Valuation will be used for the Client's Financial Statements to be attached to the Offering Circular as required by the Securities and Exchange Commission (SEC) and will be attached as an appendix to the Client's REIT Plan. In accordance with clause 4.1 of our General Terms, the Valuation may not be used for any other purpose without our express written consent. The Valuation will be made accessible in the public domain as part of the regulatory requirements of the Transaction.

3. **Term & Termination**
This appointment will commence upon signing of this Agreement and shall continue to be in effect for a period of two (2) years. Any extension of the Term of this Agreement shall be mutually agreed upon by the parties in writing.

23. **Electronic Communication**

During the engagement, both parties may wish to communicate electronically with each other. However, electronic transmission of information cannot be guaranteed to be secure or virus-or error-free and information could be intercepted, corrupted, lost or destroyed, arrive late or incomplete, or otherwise be adversely affected or unsafe to use. Both parties agree to accept these risks and so each party will be responsible for protecting its own systems and interests in relation to electronic communications. Neither party will have any liability to the other party on any basis for any loss or damage arising from or in connection with the electronic communication of information between both parties or their reliance on such information.

24. **Acceptance**

Please sign and return a copy of this Letter signifying your acceptance of the terms of the Agreement. We reserve the right to withhold any Valuation and / or refrain from discussing it with you until this Letter has been countersigned and returned.

Your attention is drawn to the "Important Notice" in the General Terms. If you have any questions regarding this Letter and / or the terms of the Agreement, please let us know before signing this Letter.

Thank you for choosing Santos Knight Frank, Inc. and we look forward to working with you on this important engagement.

Sincerely, **SANTOS KNIGHT FRANK, INC.**	Approved and Agreed to by: **ROBINSONS LAND CORPORATION**

Attention: **MR. FREDERICK D. GO**
President and Chief Executive Officer

Subject: **Amendment to Terms of Engagement and General Terms of Business for Valuation Services Dated 03 August 2020 ("Amendment")**

Dear Mr. Go:

We refer to subject Letter of Engagement and General Terms of Business for Valuation Services (together, the "Agreement") between Robinsons Land Corporation (the "Client", "you" or "your") and Santos Knight Frank, Inc. ("SKF") for the valuation of fourteen (14) office buildings (the "Covered Properties").

For this purpose, the Agreement is amended as follows:

The first, second, and third and fourth paragraphs shall now read:

For the Valuation

I. Valuation for Asset Transfer to REIT Company and its application for a Tax-Free Exchange Ruling:

For Valuation Update

II. Valuation of Properties for REIT listing to PSE:
Our Valuation of 14 Properties will be as follows:
   1. Valuation for 4 Properties
   2. Periodic Update of 14 Properties
      Under REIT Company (Quarterly basis – optional)
   3. Valuation Update of 14 Properties under REIT Company

Except as amended hereby, all the provisions of the Agreement which are not inconsistent herewith are incorporated herein by way of reference and from date hereof, the Agreement and this Amendment shall be read as one integrated document.

Kindly affix your signature on the conforme portion below and return one (1) original signed copy to us.

Sincerely,
SANTOS KNIGHT FRANK, INC.

Appendix 3 - General Terms of Business

General Terms of Business for Valuation Services

These General Terms of Business (the "**General Terms**") and our Letter of Engagement (the "**Letter**"), together form the agreement between you and us (the "**Agreement**"). References to "**you**", "**your**" etc. are to persons or entities who are our client and, without prejudice to clauses 3 and 4 below, to any persons purporting to rely on our Valuation.

Unless **the** context otherwise requires, all other terms and expressions used but not defined herein shall have the meaning ascribed to them in the Letter.

When used herein or in the Letter, the term "**Valuation**" shall mean any valuation report, advance report, supplementary report or subsequent/update report, produced pursuant to our engagement and any other replies or information we produce in respect of any such report and/or any relevant property. Any words following the terms "**including**", "**in particular**" or any similar expression shall be construed as illustrative and shall not limit the sense of the words preceding those terms.

All of the terms set out in these General Terms shall survive termination of the Agreement.

1. Santos Knight Frank, Inc.

1.1. Santos Knight Frank, Inc. ("**Santos Knight Frank**", "**our**", "**us**", "**we**") is a Philippine corporation with Securities and Exchange Commission (SEC) Registration Number A199818549.

1.2. Our registered office is at 10/F Ayala Tower & Exchange Plaza, Ayala Avenue, Makati City where a list of members may be inspected.

1.3. Any representative of Santos Knight Frank, Inc. described as *Director* is either a member or an employee of Santos Knight Frank, Inc. and is not a member of the Board of Directors. The term *Director* has been retained because it is an accepted way of referring to senior professionals. The term "**Santos Knight Frank Person**" shall, when used herein, mean any member, employee, or consultant of Santos Knight Frank, Inc.

1.4. Our Tax Identification Number (TIN) is 201-626-570-000.

1.5. The details of our professional indemnity insurance will be provided to you on request.

1.6. Santos Knight Frank, Inc., being a corporation, is regulated by the Philippine Securities and Exchange Commission (SEC). It is also an SEC-accredited asset valuer. In accordance with reportorial filings with the SEC, it may be necessary to disclose valuation files to them. By instructing us, you give us your permission to do so. Where possible we will give you prior notice before making any such disclosure, although, this may not always be possible. We will use reasonable endeavours to limit the scope of any such disclosure and to ensure any disclosed documents are kept confidential.

1.7. Valuations will be carried out in accordance with the 2019 edition of the International Valuation Standards (IVS) by valuers who conform to its requirements and with regard to relevant statutes or regulations. Our senior valuers are Real Estate Appraisers licensed and regulated by the Philippine Professional Regulation Commission (PRC).

2. Governing law and jurisdiction

2.1. The Agreement and any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with it or its subject matter or formation or any Valuation shall be governed by and construed in accordance with Philippine laws.

2.2. Philippine courts shall have exclusive jurisdiction to settle any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with this Agreement or its subject matter or formation or any Valuation. This will apply wherever the relevant property or the client, or any relevant third party, is located or the service is provided.

3. Limitations on liability

3.1. Subject to clause 3.7, our maximum total liability in connection with or arising out of this Agreement and/or its subject matter and/or the Valuation is limited to our total service fees as set out in the Letter.

3.2. Subject to clause 3.7, we will not be liable for any loss of profits or for indirect or consequential loss or damages.

3.3. Subject to clause 3.7, any limitation on our liability will apply however such liability is or would otherwise have been incurred, whether in contract, tort (including negligence), for breach of statutory duty, or otherwise.

3.4. Except as set out in clauses 3.5 and 4.7 and 4.8 below, no third party shall have any right to enforce any of the terms of this Agreement.

3.5. No claim arising out of or in connection with this Agreement may be brought against any Santos Knight Frank Person. Those individuals will not have a personal duty of care to you or any other person and any such claim for losses must be brought against Santos Knight Frank, Inc. Any Santos Knight Frank Person may enforce this clause but the terms of this Agreement may be varied by agreement between the client and Santos Knight Frank, Inc. at any time without the need for any Santos Knight Frank Person to consent.

3.6. No claim, action or proceedings arising out of or in connection with the Agreement and/or any Valuation shall be commenced against us after the expiry of the earlier of (a) two years from the Valuation Date (as set out in the relevant Valuation) or (b) any limitation period prescribed by law.

3.7. Whether or not specifically qualified by reference to this clause, nothing in the Agreement shall exclude or limit our liability in respect of fraud, or for death or personal injury caused by our negligence or negligence of those for whom we are responsible, or for any other liability to the extent that such liability may not be so excluded or limited as a matter of applicable law.

4. Purpose, reliance and disclosure

4.1. The Valuation is prepared and provided solely for the stated purposes. Unless expressly agreed by us in writing, it cannot be relied upon, and must not be used, for any other purpose and, subject to clause 3.7, we will not be liable for any such use.

4.2. Without prejudice to clause 4.1 above, the Valuation may only be relied on by our Client. Unless expressly agreed by us in writing the Valuation may not be relied on by any third party and we will not be liable for any such purported reliance.

4.3. Subject to clause 4.4 below and for the stated purposes, the Valuation is confidential to our Client and must not be disclosed, in whole or in part, to any third party without our express written consent (to be granted or withheld in our absolute discretion). No liability is accepted to any third party for the whole or any part of any Valuation disclosed in breach of this clause.

4.4. Our appraisers are not required to give testimony or attendance in court by reason of this Valuation with reference to the property in question, unless arrangements have been previously made.

4.5. Except for the stated purposes, neither the whole nor any part of the Valuation and/or any reference thereto may be included in any published document, circular or statement nor published in any way whatsoever whether in hard copy or electronically (including on any website) without our prior written consent and approval of the form and context in which it may appear..

4.6. Where permission is given for the publication of a Valuation, neither the whole nor any part thereof, nor any reference thereto, may be used in any publication or transaction that may have the effect of exposing us to liability for actual or alleged violations of SEC Memorandum Circular No. 2, series of 2014 (Guidelines on Asset Valuations) or Republic Act No. 8799 (Securities Regulation Code), as amended and its Implementing Rules and Regulations.

4.7. You agree that we, and/or any Santos Knight Frank Person, may be irreparably harmed by any breach of the terms of this clause 4 and that damages may not be an adequate remedy. Accordingly, you agree that we and/or any Santos Knight Frank Person may be entitled to the remedies of injunction or specific performance, or any other equitable relief, for any anticipated or actual breach of this clause 4.

4.8. You agree to indemnify and keep fully indemnified us, and each relevant Santos Knight Frank Person, from and against all liabilities, claims, costs (including legal and professional costs), expenses, damages and losses arising from or in connection with any breach of this clause 4 and/or from the actions or omissions of any person to whom you have disclosed (or otherwise caused to be made available) our Valuation otherwise than in accordance with this clause 4.

5. Knight Frank network

5.1. Santos Knight Frank, Inc. is a member of an international network of independent firms which may use the "Knight Frank" name and/or logos as part of their business name and operate in jurisdictions outside the Philippines (each such firm, an "**Associated Knight Frank Entity**").

5.2. Unless specifically agreed otherwise, in writing, between you and us: (i) no Associated Knight Frank Entity is our agent or has authority to enter into any legal relations and/or binding contracts on our behalf; and (ii) we will not supervise, monitor or be liable for any Associated Knight Frank Entity or for the work or actions or omissions of any Associated Knight Frank Entity, irrespective of whether we introduced the Associated Knight Frank Entity to you.

5.3. You are responsible for entering into your own agreement with any relevant Associated Knight Frank Entity.

5.4. This document has been originally prepared in the English language. If this document has been translated and to the extent there is any ambiguity between the English language version of this document and any translation thereof, the English language version as prepared by us shall take precedence.

6. Severance

If any provision of the Agreement is invalid, illegal or unenforceable, the parties shall negotiate in good faith to amend such provision so that, as amended, it is legal, valid and enforceable and, to the greatest extent possible, achieves the intended commercial result of the original provision. If express agreement regarding the modification or meaning or any provision affected by this clause is not reached, the provision shall be deemed modified to the minimum extent necessary to make it valid, legal and enforceable. If such modification is not possible, the relevant provision shall be deemed deleted. Any modification to or deletion of a provision under this clause shall not affect the validity and enforceability of the rest of this Agreement.

7. Entire agreement

7.1. The Agreement, together with any Valuation produced pursuant to it (the Agreement and such documents together, the "**Contractual Documents**") constitute the entire agreement between you and us and supersedes and extinguishes all previous agreements, promises, assurances, warranties, representations and understandings between you and us, whether written or oral, relating to its subject matter.

7.2. Subject to clause 3.7 above, you agree that in entering into the Agreement you do not rely on, and shall have no remedies in respect of, any statement, representation, assurance or warranty (whether made innocently or negligently) that is not expressly set out in the Contractual Documents. You further agree that you shall have no claim for innocent or negligent misrepresentation based on any statement set out in the Contractual Documents.

7.3. The Letter and these General Terms shall apply to and be incorporated in the contract between us and will prevail over any inconsistent terms or conditions contained or referred to in your communications or publications or which would otherwise be implied. Your standard terms and conditions (if any) shall not govern or be incorporated into the contract between us.

7.4. Subject to clause 3.7 and clause 6, no addition to, variation of, exclusion or attempted exclusion of any of the terms of the Contractual Documents will be valid or binding unless recorded in writing and signed by duly authorised representatives on behalf of the parties.

8. Assignment

8.1. You shall not assign, transfer, mortgage, charge, subcontract, declare a trust over or deal in any other manner with any of the rights and obligations under the Agreement without our prior written consent (such consent to be granted or withheld in our absolute discretion).

9. Force majeure

9.1. Neither party shall be in breach of this Agreement nor liable for delay in performing, or failure to perform, any of its obligations under this Agreement if such delay or failure results from events, circumstances or causeswhich could not be foreseen, or which, though foreseen, were inevitable.

10. Our fees

10.1. Without prejudice to clause 10.3 below, you become liable to pay our fees upon issuance of the Valuation. For the avoidance of doubt, unless expressly agreed otherwise in writing, the payment of our fees is not conditional on any other events or conditions precedent.

10.2. If any invoice remains unpaid after 30 days of the date on which it is presented, we reserve the right to charge interest, calculated daily, from the date when payment was due until payment is made at 3%

10.3. If we should find it necessary to use legal representatives or collection agents to recover monies due, you will be required to pay all costs and disbursements so incurred.

10.4. If an appraisal analysis is ordered and the assignment is cancelled before completion, we reserve the right to receive compensation, by way of damages, in an amount equal to 70% of the total fee for the assignment.

10.5. If you delay the instruction by more than 30 days or materially alter the instruction so that additional work is required at any stage or if

we are instructed to carry out additional work that we consider (in our reasonable opinion) to be either beyond the scope of providing the Valuation or to have been requested after we have finalised our Valuation (including, but not limited to, commenting on reports on title), we will charge additional fees for this work. Such additional fees will be calculated on the basis of a proportion of the total fee by reference to reasonable time and expenses incurred.

10.6. Where we agree to accept payment of our fees from a third party, such fees remain due from you until payment is received by us.

11. Anti-bribery and corruption and Anti-Money Laundering
We agree that throughout the term of our appointment we shall:

(a) comply with all applicable laws, statutes, regulations, and codes relating to anti-bribery and corruption and Anti-Money Laundering laws (the "**Relevant Requirements**");

(b) not engage in any activity, practice or conduct which would constitute an offense;

(c) maintain anti-bribery, anti-corruption, and anti-money laundering policies to comply with the Relevant Requirements and any best practice relating thereto; and

(d) promptly report to you any request or demand for any undue financial or other advantage of any kind in connection with the performance of our services to you.

12. Portfolios
Properties comprising a portfolio, unless specifically agreed with you otherwise, will be valued separately and upon the assumption that the properties have been marketed individually and in an orderly manner.

13. Land Register inspection and searches
We are not required to undertake searches, validations or inspections of any kind for title or price paid information in any publicly available land registry.

14. Title and burdens
We will assume, unless specifically informed and stated otherwise, that each property has good and marketable title and that all documentation is satisfactorily drawn and that there are no unusual outgoings, planning proposals, onerous restrictions or local authority intentions which affect the property, nor any material litigation pending.

15. Disposal costs and liabilities
No allowance is made in our Valuation for expenses of realisation or for taxation which may arise in the event of a disposal and our Valuation is expressed as exclusive of any VAT that may become chargeable. Properties are valued disregarding any mortgages or other charges, including commissions.

16. Sources of information
We rely upon the information provided to us by you, as to details of tenure and tenancies, planning consents and other relevant matters, as summarised in our Valuations. Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser.

17. Identity of property to be valued
We will exercise reasonable care and skill (but will not have an absolute obligation to you) to ensure that the property, identified by the property address in your instructions, is the property inspected by us and contained within our valuation report. If there is ambiguity as to the property address, or the extent of the property to be valued, this should be drawn to our attention in your instructions or immediately upon receipt of our report.

18. Boundaries
Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.

19. Planning, highway and other statutory regulations
19.1. Enquiries of the relevant planning and highways authorities in respect to matters affecting properties, where considered appropriate, are normally only obtained from the corresponding government agency. We can only state whatever current conditions may be. We recommend that formal written enquiries should be undertaken by your lawyers who should also confirm the position with regard to any legal matters referred to in our Valuations.

19.2. It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative, regulatory, or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.

19.3. We assume that the premises comply with all relevant statutory requirements including environmental, building, fire, and sanitation regulations.

20. Property insurance
Our Valuation assumes that each property would, in all respects, be insurable against all identifiable risks.

21. Building areas and age
Where so instructed, areas provided from a quoted source will be relied upon. Any dimensions and areas measured on location or from plan/s are calculated and are quoted to a reasonable approximation, with reference to their source. Where the age of the building is estimated, this is for guidance only.

22. Structural condition
Building, structural and ground condition surveys are detailed investigations of the building, the structure, technical services and ground and soil conditions undertaken by specialist building surveyors or engineers and fall outside the normal scope of a valuation. Since we will not have carried out any of these investigations, we are unable to report that any property is free of any structural fault, rot, infestation or defects of any other nature, including inherent weaknesses due to the use in construction of deleterious materials. We do reflect the contents of any building survey report provided to us in advance, or any defects or items of disrepair of which we are advised or which we note during the course of our ocular inspections but otherwise assume properties to be free from defect.

23. Ground conditions
Unless informed otherwise in writing, we assume there to be no adverse ground or soil conditions and that the load bearing qualities of the sites of each property are sufficient to support the building constructed or to be constructed thereon.

24. Environmental issues

24.1. Investigations into environmental matters by suitably qualified environmental specialists would usually be commissioned by most responsible purchasers or chargees of higher value properties or where there was any reason to suspect contamination or a potential future liability. Furthermore, such investigation would be pursued to the point at which any inherent risk was identified and quantified before a purchase proceeded. Where we are provided with the conclusive results of such investigations, on which we are instructed to rely, these will be reflected in our Valuations with reference to the source and nature of the enquiries. We would endeavour to point out any obvious indications or occurrences known to us of harmful contamination encountered during the course of our valuation enquiries.

24.2. However, we are not environmental specialists and therefore we do not carry out any scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination or any other environmental searches. If we are not provided with the results of appropriate investigations as outlined above and where there is no obvious indication of harmful contamination, our Valuation will be provided on the assumption that the relevant property is unaffected. Where we are informed that contamination is suspected or confirmed, but adequate investigation has not been carried out and made available to us, then the Valuation will be qualified only by reference to it.

25. Minerals, timber, airspace etc.

Unless specifically agreed otherwise in writing and so stated within the main body of the relevant Valuation, we do not value or attempt to value or take into account any potential income stream or other beneficial or detrimental effect or other factor relating to undiscovered or unquantified mineral deposits, timber, airspace, sub-ground space or any other matter which would not be openly known in the market and considered to have value.

26. Legal advice

26.1. We are appointed to provide valuation opinion(s) in accordance with our professional duties as Appraisers. The scope of our service is limited accordingly. The valuation assumes no responsibility for the validity of legal matters affecting the property. It is not the intent of the valuation to offer a legal opinion of title. Any liens or encumbrances which may now exist have been disregarded. We are not qualified legal practitioners and we do not provide legal advice and any statements made by us, or advice given, in a legal context should be construed accordingly.

26.2. Where appropriate we will liaise with your legal advisors. However, we accept no responsibility for any work carried out by them and we will not be liable for anything contained in legal documentation prepared by them.

26.3. Where we consider it is necessary for the provision of the Valuation and/or specifically agree to do so, and any additional fees we require for this work are agreed, we will read legal documents (including leases, licences etc.), however, (save for any comment concerning the impact of our interpretation of such documents on value) our interpretation of such documents cannot be relied upon to be legally correct. Where we do interpret legal documents, we will, for the purposes of providing our Valuation, assume our interpretation to be correct.

27. Loan security

Where instructed to comment on the suitability of property as a loan security we are only able to comment on any inherent property risk. Determination of the degree and adequacy of capital and income cover for loans is the responsibility of the lender having regard to the terms of the loan.

28. Build cost information

In the provision of valuation services we do not hold ourselves out to have expertise in assessing build costs. Where our instruction requires us to have regard to build cost information, for example in the valuation of properties with development potential, we strongly recommend that you supply us with build cost and other relevant information prepared by a suitably qualified construction cost professional, such as a quantity surveyor. The Valuation will be stated to have been arrived at in reliance upon the build cost information supplied to us by you. In the absence of any build cost information supplied to us, we may have regard to published build cost information. Build costs produced using this approach must be assumed to be unreliable or inaccurate; any reliance which can be placed upon our Valuation in these circumstances is severely restricted. Specialist professional advice on the build costs should be sought by you. If you subsequently obtain specialist build cost advice, we recommend that we are instructed to review our Valuation.

29. Reinstatement assessments

A reinstatement assessment for insurance purposes is a specialist service and we recommend that separate instructions are issued for this specific purpose. If an indication is required as a check against the adequacy of existing cover this should be requested and will be so stated in the body of the relevant Valuation. Any indication given is provided for guidance only and must not be relied upon as the basis for insurance cover. In any event, our reinstatement assessment should be compared with the owner's and if there is a material difference, then a full reinstatement valuation should be reconsidered.

30. Comparable evidence

Where comparable evidence information is included in our Valuation, this information is often based upon our oral enquiries and its accuracy cannot always be assured, or may be subject to undertakings as to confidentiality. However, such information would only be referred to where we had reason to believe it or where it was in accordance with our expectation. In addition, we have not inspected comparable properties.

31. Valuation bases

Valuations are carried out on a basis appropriate to the purpose for which they are intended and in accordance with the relevant definitions, commentary and assumptions. The basis of valuation will be agreed with you and specified in the Letter and in the relevant Valuation.

Important Notice

If you have any queries relating to this Agreement please let us know as soon as possible, and in any event before signing the Letter and/or giving us instructions to proceed.

Your instructions to proceed, preferably signing on the space provided for under the Letter, will constitute your acceptance to use our services on the terms of the Agreement.

Accordingly, our commencement of work pursuant to your instructions shall constitute acceptance of your offer and as such establish the contract between us on the terms of the Agreement.

Appendix 8 - Property Description

Robinsons Equitable Tower

As seen during our inspection for the previous valuation done, Robinsons Equitable Tower is a PEZA registered, Grade A office building. Formerly known as Robinsons PCI Bank Tower, the building was completed sometime in September 1999 and stands at 175 meters, making it one of the tallest building in the country then.

It is a forty-five (45)-storey building with 4-level basement, owned and developed by Robinsons Land Corporation. Originally intended to be a 40-storey condominium project between Robinsons Land Corp. and the former PCI Bank (which later on became Equitable PCI Bank after the merger of Equitable Bank and PCI Bank, hence the name change) and will follow the original model of the Robinsons Galleria complex, it was then changed to a taller office building with a different design as originally planned.

The building was master-planned by the renowned architectural firm Hellmuth, Obata + Kassabaum (HOK), and was designed by Philippine architectural firm W.V. Coscolluela & Associates. R.S. Caparros Associates & Company, undertook the structural design consulting for the building. Construction Management services were provided by D.A. Abcede & Associates, an established construction management company in the Philippines, the Project Management services were provided by Veldon Corporation Phils. Inc. led by its Project Manager Anthony Gulliver and his Assistant Project Manager Nelson G. Evangelista, MSCE, MBA, MSML, an established project management company, while the general contractor for the project is D.M. Consunji, Inc., one of the largest construction firm in the country.

The building's exterior made use of green-shaded aluminum high-performance glass curtain and ACP cladding walls and punched windows, with a sleek semi-circular and almost cylindrical portion rising from the corner of ADB Avenue and Poveda Road. The building also has a rooftop master antenna provided for the entire building's communication system needs, and has a distinctive rooftop crown serving as an architectural highlight to the entire building.

Ground floor is utilized as main lobby and partly for retail purposes. The four (4)-level basement and 3rd up to the 7th floors are used mainly as parking areas exclusively intended for the unit owners, while the rest of the upper floors up to the 45th floor is intended for office use. Portion of the 45th floor also houses the sub-station while on top of it are various machine rooms.

The building is equipped with a building management, security surveillance system, fire protection & detection systems, and CCTV security system. The building is provided with ample provision for entrance cables of telephone lines, space provisions for unit owner-supplied Variable Refrigerant Volume (VRV) air conditioning systems, and individual metering systems for effective operation and maintenance. It is also equipped with a centrally located service core housing twelve (12) high-speed passenger elevators, one (1) freight/cargo elevators and two (2) shuttle elevators. In addition, there is also a helipad provided at the roof deck for VIP access.

Unit Description

The Property consists of several office condominium units located at various levels of the Robinsons Equitable Tower. We were not able to gain access to the interior of the subject units as these are presently occupied by various tenants. Based on exterior inspection and information obtained from interview gathered on site during our inspection, the interior finishes and fit-out of the units may vary from marble, ceramic, carpet and vinyl tiles flooring; gypsum and acoustic board ceiling; gypsum board, glass panel, and wood veneer partitions; and tempered glass and hollow core flush-type doors. The units are provided with lighting system and plumbing fixtures. Likewise, we were also informed that most of the interior finishes and fit-outs were introduced by the tenants themselves and these were disregarded in this valuation.

Based on documents provided to us by the Client, the Property consists of ninety-six (96) office condominium units, with a total floor area of **11,464.03 sq. m.**, and thirty-eight (38) standard-type parking slots. The ninety-six (96) units owned by Robinsons Land Corporation only comprised 27% of all units of Robinsons Equitable Tower.

Note: 1.) Zonal Value of parking slot of a condominium/townhouse shall be seventy (70%) of the established zonal value of the condominium/townhouse.
2.) The ground floor of the residential condominium shall be classified as commercial and twenty percent (20%) of the established value shall be added thereto.

Note: The Zonal Value was not considered in this valuation but merely shown as a guide or tool. Zonal values do not reflect the interplay of market forces in a property but are used solely for establishing the value of a property for taxation purposes, set and implemented by the Bureau of Internal Revenue. Streets are "zoned" accordingly, and valued. These values are used as basis for the payment of Capital Gains Tax in acquisition proceedings. These values do not, per se, reflect the true market conditions in any particular locality, but are merely used as a guide or tool.

PROFESSIONAL PROFILE

WENCESLAO D. FUENTES, JR.
Director

1 Instructions

Engagement of Santos Knight Frank

Instructions	1.1	We refer to our Letter of Engagement dated 21 September 2020 and Amendment dated 01 June 2021, to provide a Valuation Report on the opinion of **Market Value** using Cost and Income Approaches of that certain Property consisting of land (leasehold), leasehold improvements, and building machinery & equipment of a site identified as "Cyber Sigma" located along **Lawton Avenue, McKinley West, Fort Bonifacio, Taguig City, Metropolitan Manila**, ("the Property"). A copy of that document is attached herein as Appendix **2**.
	1.2	This valuation has been carried out by Santos Knight Frank, Inc. ("Santos Knight Frank" or "SKF"), in accordance with our General Terms of Business for Valuations ("General Terms of Business"), as attached as Appendix **3**.
Client	1.3	Our client for this instruction is **Robinsons Land Corporation** ("the Client").
Valuation standards	1.4	This valuation has been undertaken in accordance with the International Valuation Standards, as well as other local standards.
Purpose of valuation	1.5	You have confirmed that this valuation is for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
Conflict of interest	1.6	We confirm that we do have a material connection or involvement giving rise to a potential conflict of interest, as set out below: We have conducted the valuation of the same Property for you as of 30 September 2020 for purposes of: i) the tax-free exchange of assets to a REIT Company, and (ii) for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
	1.7	You have confirmed this Engagement notwithstanding this matter, you are content for us to proceed with this instruction. We are providing an objective and unbiased valuation.
	1.8	We are acting as external and independent valuers in this engagement.
Responsibility to third parties	1.9	Our valuation report is only for the use of our Client and for the purposes for which are stated herein, and no liability is accepted to any third party for the whole or any part of its contents.
Disclosure & publication	1.10	Except for the purposes which are stated herein, neither the whole nor any part of this valuation nor any reference thereto may be included in any published

document, circular or statement nor published in any way without our prior written approval of the form or context in which it may appear.

Limitations on liability

1.11 No claim arising out of or in connection with this valuation report may be brought against any member, employee, partner, director or consultant of Santos Knight Frank, Inc. Those individuals will not have a personal duty of care to any party and any claim for losses must be brought against Santos Knight Frank, Inc.

1.12 Santos Knight Frank, Inc.'s total liability for any direct loss or damage caused by negligence or breach of contract in relation to this instruction and valuation report is limited to the amount of the level of our fee, specified in the Letter of Engagement, a copy of which is attached as Appendix **2**. We do not accept liability for any indirect or consequential loss (such as loss of profits).

1.13 The above provisions shall not exclude or limit our liability in respect of fraud or for death or personal injury caused by our negligence or for any other liability to the extent that such liability may not be excluded or limited as a matter of law.

Expertise

1.14 The valuation process was performed by **Martin John L. Encomienda** and **Raymond F. Dechavez**, under the supervision of **Jacqueline T. Guerta** and **Jesus Constance M. Castro**, both licensed Real Estate Appraisers. The Principal Signatory on behalf of Santos Knight Frank, Inc. and who also reviewed the Valuation Report, is **Wenceslao D. Fuentes, Jr.,** also a licensed Real Estate Appraiser. We confirm that the above-named Licensed Real Estate Appraisers are registered with the Professional Regulation Commission ("the PRC"), having sufficient current knowledge of the particular market and the skills and understanding to undertake the valuation competently.

Vetting

1.15 This report has been vetted as part of Knight Frank global standards.

Scope of enquiries & investigations

Inspection

1.16 In accordance with your instructions, due to the limited timeframe to complete the Engagement, we have not conducted a current inspection. The Property has been previously inspected. Valuation rendered is a result of a revaluation of a property that has previously been inspected.

1.17 The Client has provided us with information regarding the changes to the physical attributes and/or characteristics of the Property; current or anticipated changes in rental income from the Property; and material changes to the non-physical attributes of each property, such as other lease terms, planning consents, statutory notices and other relevant information which have occurred between the valuation date and the date of our previous valuation. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.

Investigations

1.18 The extent of enquiries/investigations made is set out in our General Terms of Business. In carrying out this instruction we have undertaken verbal / internet-

based enquiries referred to in the relevant sections of this report. We have relied upon this information as being accurate and complete.

Information provided

1.19 In this report, we have been provided with information/documents by the Client for the previous valuation done as well as for the current engagement. We have relied upon this information as being materially correct in all aspects. In particular, we detail the following:

- floor plans
- floor area tabulation
- lease contract/revised lease payment/deed of assignment
- rent roll
- financial statements
- projections
- historical and current occupancy

1.20 In cases where we were not provided with documents or information, we did our own enquiries as outlined and stated in the report. Any assumptions in lieu of the lack of information is also set out in the relevant sections of this report.

Valuation basis

1.21 In accordance with your instructions, we have provided an opinion of value on the basis of **Market Value**.

Market Value (MV)

1.22 Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property.

It is further assumed that title to the Property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable.

The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.

Valuation date

1.23 The valuation date is **30 June 2021.**

2 The Property

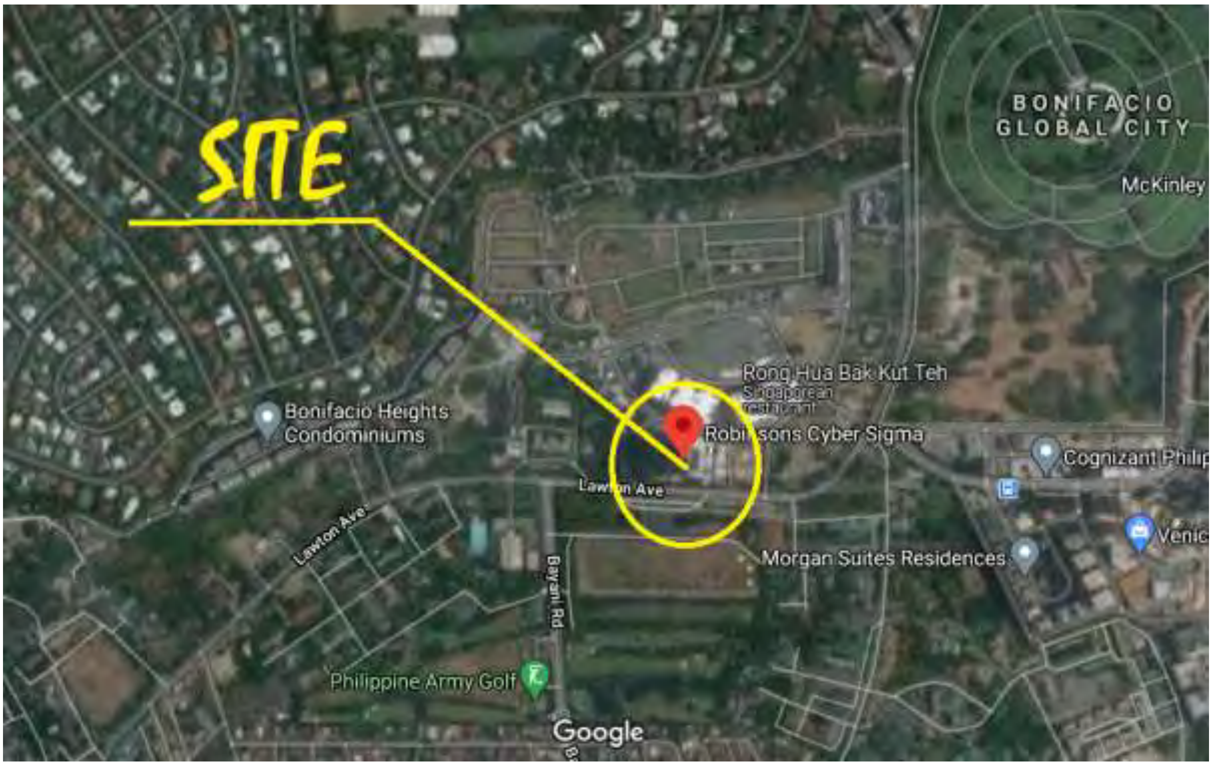
Location

Address 2.1 The Property, identified as Cyber Sigma, is an office building located along the north side of Lawton Avenue extending northward to Le Grand Avenue, within McKinley West, Fort Bonifacio, Taguig City, Metropolitan Manila.

The site is between the National Mapping and Resource Information Authority (NaMRIA) compound and Ten West campus, just across West Campus Towers on the north and Philippine Army National Head Quarters Compound on the south, about 420 meters west from the corner of Upper McKinley Road and Lawton Avenue, some 1.3 kilometers southwest from Essensa Towers, and about 1.5 kilometers southwest from the intersection of 5th Avenue and McKinley Parkway. Additionally, it is about 2.3 kilometers northeast from the corner of Lawton Avenue and South Luzon Expressway.

Lawton Avenue is about 18 meters wide, concrete-paved and provided with concrete curbs and gutters, underground drainage system, cemented sidewalks and a center island.

Below is a satellite image of the district courtesy of Google Maps showing the Property and its relation to the immediate vicinity.



Note: Image courtesy of Google Maps.

2.2 The street plan below shows the location of the Property.

Neighborhood

2.3 The Property is situated within McKinley West, a 34.5-hectare high-end township in Fort Bonifacio beside and south of Forbes Park. Apart from a posh residential village and rows of luxury residential estates, it will also have its own business park offering modern office towers as well as commercial/retail buildings.

Generally, the streets in the neighbourhood are designed to accommodate light to heavy vehicular and pedestrian traffic loads. Major thoroughfares are asphalted and concreted, with widths ranging from 12 to 20 meters and lighted with mercury arc lamps.

Some of the notable developments in the area include “West Campus Towers”, “McDonalds NXTGEN”, “One World Square”, “McKinley West Village”, “The Venice Luxury Residences”, “The Venice Grand Canal Mall”, “Philippine Army National Headquarters Compound” and several others.

Accessibility

2.4 The Property fronts Lawton Avenue, a main thoroughfare providing excellent access to other major sections of the metropolis. It connects to South Luzon Expressway on the southwest and to the heart of Bonifacio Global City on the northeast. Public transport like jeepneys and taxicabs are available throughout the day along the fronting Lawton Avenue.

Other community centers like post office, churches, hospitals, and public and private schools are likewise accessible from the Property.

Legal Details

Contract of Lease and Deed of Assignment

2.5 We were provided with a copy of the Contract of Lease with Option to Purchase dated 14 August 2014 covering the subject land, executed by and between **Bases Conversion Development Authority**, as the Lessor, and **Altus San Nicolas Corporation**, as the Lessee.

We were also provided with a copy of the Deed of Assignment dated September 2014 assigning the above-mentioned Contract of Lease covering the subject land between **Bases Conversion Development Authority** and **Altus San Nicolas Corporation**. The Deed of Assignment was executed by and between **Altus San Nicolas Corporation**, as the Assignor, and **Robinsons Land Corporation**, as the Assignee.

Some of the salient details of the contract are as under:

- The Property is a 5,000-sqm portion of the Property identified as Lot 3 located along Lawton Avenue in Bonifacio Global City, Taguig City, Metropolitan Manila, Philippines;
- The Property is being leased on an "As-Is, Where-Is" basis for a period of twenty-five (25) years, commencing upon signing of the Contract, renewable under the same terms and condition (except for the lease rate) for a maximum of twenty-five (25) years, with an option to purchase on the 24th year of the initial lease period;
- If the Option to Purchase is not exercised, all buildings and permanent facilities/improvements the Lessee introduced shall automatically become BCDA's properties upon the expiration of the Contract's original term. For this purpose, improvements shall refer to those introduced by the Lessee which cannot be removed without defacing or damaging the integrity of the structure of the building.
- The Contract shall not be tacitly renewed despite the Lessee's continuous possession of the Property for any period of time after the expiration of the Contract's term. For this purpose, the Lessee shall inform BCDA of its intention to renew the lease or exercise its Option to Purchase not earlier than three (3) years or later than one (1) year prior to the Contract's expiration. Consequently, in the event that the Lessee exercises its option to renew its lease over the Property, the new lease rate shall cover the land as well as the building and improvements transferred to BCDA.
- The Lessee shall pay to BCDA the total amount of FIVE HUNDRED SIXTY MILLION EIGHT HUNDRED THOUSAND (PhP560,800,000) VAT inclusive, as Advance Lease Rental for the first fourteen (14) years of this Contract.
- The Fixed Lease starting on the fifteenth year of this Contract shall be FIFTY MILLION PESOS (PHP50,000,000), inclusive of twelve percent (12%) VAT. It shall be subject to three percent (3%) escalation every year until the 25th year of the lease.

- The Fixed Lease shall be accordingly adjusted if and when there is any change in the VAT rate since VAT is a pass-on tax. The LESSEE agrees to pay any other gross receipts tax and any other taxes which may be legally imposed by the pertinent government entity on the Lessee on the lease payment in the future.
- In the event that the Lessee exercises its option to renew as provided in Section 2 of Contract of Lease with Option to Purchase, the Parties shall have the Property, including the improvements, appraised by two (2) independent appraisers mutually acceptable to them at the beginning of the 25th year of the lease. The cost of the appraisal shall be equally borne by the Parties.
- The Fixed Lease for the initial year of the extension period shall be five percent (5%) of the average appraised fair market value of the Property on the 25th year of the lease including the improvements.
- The escalation rate of three percent (3%) every year shall again apply on the Annual Lease beginning the second (2nd) year of extension period.
- The maximum allowable GFA for the Property is sixty thousand square meters (60,000 sq.m.) excluding parking spaces and allowable FAR shall be FAR 12.

Revised Lease Payment 2.6 We were also provided with a copy of a letter from BCDA dated 01 August 2016 that pertains to the revised lease payment for the Property. Based on this, a 13.63% rental reduction was applied on the original rental rates. We did not conduct further research regarding the veracity of this document and have relied on the information therein in our valuation.

Tenure 2.7 As evidenced by the Contract of Lease above, ownership rights to the Land is **leasehold.**

Terrain 2.8 The terrain of the land is flat. Its finished elevation is slightly higher than the existing grade of the fronting roads.

Description of Leasehold Improvements and Machinery & Equipment

Improvements and Machinery & Equipment 2.9 The land is presently improved with a twenty-one (21)-storey office building with roof deck identified as Cyber Sigma, a PEZA registered, Grade A office building, construction of which was completed sometime in August 2017. Also included in this valuation are the appurtenant Building Machinery and Equipment. These are all described in detail in the Schedule of Assets (Appendix **8**).

Tenure 2.10 We were advised that the Client owns the improvements described above. As stated, the land is covered by a Lease Agreement. We have, however, treated the improvements as freehold.

Accommodation

Measurement 2.11 Based on the gross floor area tabulation provided to us by the Client, the building has a total gross floor area of approximately 73,522.08 sq. m.

2.12 The Gross Floor Area (GFA) is tabulated as follows:

Unit	Description	Sq m
Lower Ground	Parking Spaces and Retail Units	4,879.35
Ground Floor	Retail Units	2,839.70
2nd to 6th Floor	Parking Spaces	17,690.50
7th to 21st Floor	Office Units	48,112.53

	Total	**73,522.08**

Condition

Scope of Inspection

2.13 As stated earlier, we have previously inspected the Property.

2.14 As stated in the General Terms of Business, during our previous inspection, we have not undertaken a building or site survey of the Property, as it is beyond the normal scope of appraisal.

2.15 We have carried out visual inspection only without any structural investigation or building survey. During our limited inspection, we did not inspect any inaccessible area/s. We are unable to confirm whether the Property is free from urgent or significant defects or items of disrepair.

2.16 Unless otherwise stated, we have not been able to carry detailed on-site measurement to verify the site and gross floor areas of the Property and we have no reason to doubt the truthfulness of the areas shown on the documents provided us.

2.17 Moreover, due to the nature of the machinery, we have not carried out mechanical inspection, and our assessment was based on the premise that the machinery is in a condition commensurate with age and normal usage.

2.18 In the Schedule of Assets or Asset Inventory, machinery and/or equipment were listed as complete units i.e., machinery and/or equipment are meant to include all parts and accessories normally comprising the unit.

Comments

2.19 Apart from the matters specifically referred to below, we have assumed that the Property is in sound order and free from structural faults, rot, infestation or other defects, and that the services are in a satisfactory condition.

2.20 The buildings and structures, including the machinery & equipment, were assumed to be in a generally good condition commensurate with their age and use. It was also assumed that there are no urgent or significant defects or items of disrepair which would be likely to give rise to substantial expenditure in the foreseeable future or which fall outside the scope of the normal annual maintenance programme.

Ground conditions

2.21 We have not been provided with a copy of a ground condition report for the site. We have assumed that there is no adverse ground or soil conditions and that the load bearing qualities of the site are sufficient to support the building.

Services

2.22 It would appear from our previous inspection that main supplies of electricity and water are provided to the Property. Telephone communication facilities are likewise available. Sewer and drainage are believed to be discharged to the building's sewerage system.

Tenancies

Tenancy Information

2.23 We have been provided with copy of some of the rent roll including some of the lease contracts by the Client and have relied on that information as being correct. No additional verification has been undertaken.

2.24 A summary of the Property tenancies is presented below.

TENANT	LEASED AREA (GROSS, in sq.m.)	Lease Contract Start	Lease Contract End
Tenant 1	147.97	02-May-17	01-Jul-22

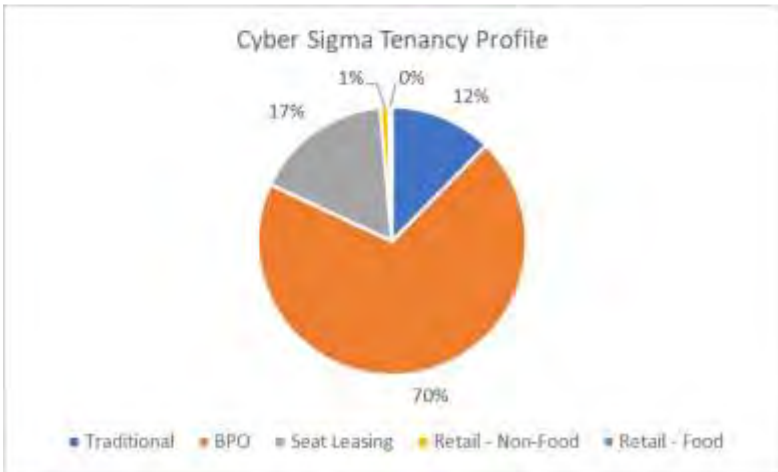
	3,408.93	01-Jan-18	31-Oct-29
	1,881.45	01-Jan-18	31-Oct-29
	1,527.48	01-Apr-19	31-Oct-29

TENANT	LEASED AREA (GROSS, in sq.m.)	Lease Contract Start	Lease Contract End
Tenant 20	3,408.93	01-Feb-18	31-May-23
	3,408.93	01-Jul-17	31-May-23
Tenant 21	2,568.84	01-Oct-17	31-Dec-22
	840.09	01-Mar-18	31-Dec-22
Tenant 22	304.15	01-Jan-21	31-Dec-23
Tenant 23	1,191.47	01-Jan-21	31-Dec-23

2.25 Based on the rent roll provided, total leasable area is **49,970.31** sq.m. with **565** parking slots are available for lease.

2.26 The Property currently has a mix of traditional offices, Business Process Outsourcing (BPO) companies, seat leasing offices and some retail tenants. Based on the figure below which summarizes the tenancy profile of the Property, BPOs currently take up 70% of the Property's leasable area followed by seat leasing offices at 17% and traditional offices at 12%.



Source:SKF/RLC

2.27 As of 30 June 2020, the Property is 100% occupied with a Weighted Average Lease Expiry (WALE) of 4.08 years. It has been noted that a sizeable area will expire in the years 2022, 2023 and 2029 with 24%, 35% and 34% of leased area respectively

Source:SKF/RLC

2.28 Below are some of the provisions as stated in the Lease Contract.

a. **Care of the Leased Premises**

The LESSEE shall at its expense, maintain the Leased Premises in a clean and sanitary condition, free from noxious odors, disturbing noises or other nuisances and, upon the expiration of the lease, shall return the premises and fixtures in as good condition as that in which they were actually found at the beginning of the lease, ordinary wear and tear excepted. The LESSEE shall not drive nails, screws, hooks or other abutments on or into the walls frames or other portions of the premises or in any manner deface or damage any part thereof. Any damage caused by the LESSEE may be repaired by the LESSOR for the account of the LESSEE. The LESSOR shall have the right to require the LESSEE to remove any display or promotional matter, or any displayed merchandise which LESSOR reasonably and in good faith considers to be improper or inappropriate for the general appearance or presentation of the premises.

The LESSOR shall be responsible for major repairs which are limited to those which affect the structure of the Leased Premises or the building. The LESSEE shall allow access to the LESSOR on the Leased Premises for purposes of repair or remodelling or such other works as may be necessary for the preservation, conservation, improvement or decoration of the building or any part thereof. No compensation or claims shall be allowed against the LESSOR by reason of any inconvenience or annoyance to the LESSEE that may arise by reason thereof.

The LESSEE shall promptly repair, at its own expense, any damage to the Leased Premises or any other improvements within the building caused by bringing into the Leased Premises of any property for the LESSEE's use, or by the installation or removal of such property, regardless of who is at fault or who caused such damage. unless such was clearly caused by the LESSOR, or its agents or employees. In default of such repairs by the LESSEE, the LESSOR may effect the repairs and the LESSEE agrees to promptly pay the LESSOR the cost of such repairs. The LESSEE shall be responsible for the maintenance and repair of the Leased Premises including plumbing and electrical fixtures within the premises or those serving the same.

The LESSEE must notify the LESSOR immediately of any damage to the Leased Premises, their appurtenances as well as any occupation, usurpation or untoward act being committed, or threatened to be committed, within the Leased Premises.

No machinery, furniture, effect, equipment and other properties found within the Leased Premises, whether or not owned by the LESSEE, may be brought into or out of the building without the prior written approval of the LESSOR. Furthermore, in case the LESSEE has any outstanding/unsettled rent, dues or other charges, the LESSOR reserves the right to withhold approval of any request for bringing in or out of any machinery, furniture, effects or other properties found within Leased Premises, whether or not owned by the LESSEE, until such outstanding amounts have been duly settled by the LESSEE. This is without prejudice to such other rights and remedies available to the LESSOR under prevailing laws or the Contract. including these General Terms and Conditions.

The immediately preceding paragraph shall also apply in the event of transfer of machinery, furniture, effects or other properties found within the Leased Premises from one unit to another unit in the building being leased by the LESSEE whether or not the latter unit is owned by the LESSOR. In the event that the unit where the properties to be transferred is not owned by the LESSOR, the written consent of the unit owner shall also be required.

The LESSEE shall further maintain the Leased Premises in a clean condition by utilizing plastic bags for the disposal of both dry and wet garbage. Unless garbage is contained in plastic bags, it will not be allowed to be deposited in the authorized depository for collections.

b. **Sublease, Transfer of Rights**

The LESSEE shall not assign or transfer its rights in the Contract nor sublease or sublet all or any part of the Leased Premises, without the prior written consent of the LESSOR and no rights, title or interest thereto or therein shall be conferred on or vested to anyone other than the LESSEE without such prior written consent. Otherwise, subleasing the leased Premises without the prior written consent of the LESSOR shall be deemed a breach of the contract by the LESSEE and shall be subject to the rights and remedies available to the LESSOR under prevailing laws and Contract, including these General Terms and Conditions. In the event of sublease with or without the prior written consent of the LESSOR, the LESSEE shall remain principally liable. However, the LESSOR shall have the right to exercise such remedies embodied in the Contract, the General Terms and Conditions and under prevailing laws, as against the sublessee in order to protect its right and interests.

Only the LESSEE has the right to use the Leased Premises as its official address to be registered with any government entities for the issuance of necessary permits and licenses for its business operations.

Should the LESSOR give the LESSEE its consent to sublease the Leased Premises, the LESSEE cannot sublease the Leased Premises for the period longer that the Contract of Lease between the LESSOR and the LESSEE.

It is expressly understood that the LESSEE has no goodwill or patronage rights over the Leased Premises; that such rights belong exclusively to the LESSOR, being the owner of the Leased Premises which forms part of the building; and that the LESSEE may not sell or dispose of said goodwill or patronage rights to any person.

c. **Assignment of Rights/Mortgage/Encumbrance**

The LESSOR reserves the right to assign and convey or mortgage or otherwise encumber its rights to this lease in favor of any affiliate or subsidiary or to any party. In the event of any assignment, conveyance, mortgage, or encumbrance of the Leased Premises, the LESSOR binds itself to require the assignee or mortgage or beneficiary of the encumbrance to respect and abide by all the terms and conditions of the Contract, as well as these General Terms and Conditions.

Roadways and Access

Roadways 2.29 The fronting roads are both 18 meters wide, concrete-paved and provided with curbs and gutters, cemented sidewalks and underground drainage system.

Access 2.30 In reporting our opinion of value, we have assumed that there are no third-party interests between the boundary of the Property and the abutting roads and that accordingly the Property has unfettered vehicular and pedestrian access.

Environmental Considerations

Flooding 2.31 From our enquiries with the City Planning Office, and also due to its terrain, we have ascertained that the Property is not within an indicative floodplain and that there is therefore a minimal risk of flooding.

Contamination 2.32 As stated in the General Terms of Business, investigations into environmental matters would usually be commissioned from suitably qualified environmental specialists. Santos Knight Frank, Inc. is not qualified to undertake scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination.

2.33 Subject to the above, while carrying out our valuation inspection, we have not been made aware of any uses conducted at the Property that would give cause for concern as to possible environmental contamination. Our valuation is provided on the assumption that the Property is unaffected.

Highest and Best Use

2.34 "*Highest and Best Use*" is defined as the most profitable likely use to which a property can be put. The opinion of such use may be based on the highest and most profitable continuous use to which the Property is adapted and needed, or that use of land which may reasonably be expected to produce the greatest net return to land over a given period of time. Alternatively, it is that use, from among reasonably probable and legal alternative uses, found to be physically possible, appropriately supported, financially feasible, and which results in highest land value.

2.35 Considering the Property's size, shape, topography, current zoning classification and the prevailing land uses and development in the area, we are of the opinion that the **existing commercial development** would represent the highest and best use of the Property.

Source of Information

3.2 Our market analysis has been undertaken using market knowledge within Santos Knight Frank, Inc., enquiries of other agents, searches of Property databases, as appropriate and any information provided to us.

OFFICE RENT ROLLBACKS CUSHION INCREASING VACANCIES

General Overview

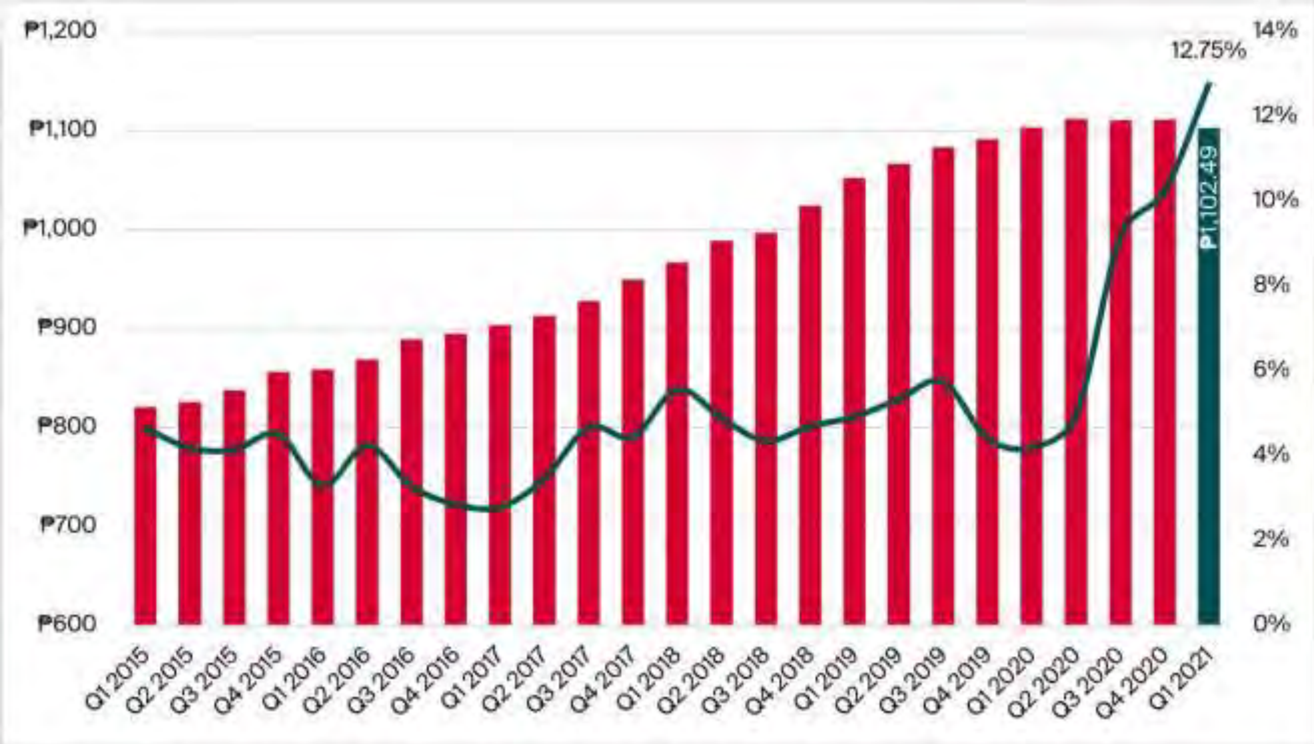
The Metro Manila office market displayed modest market movement at the start of 2021 owing to the sluggish demand driven by the market uncertainties caused by changing lockdown scenarios in Metro Manila. Landlords were challenged to remain relevant as potential occupiers continued to take a cautious approach caused by the growing COVID-19 cases and slow vaccine roll-outs.

Still, new office spaces were introduced during the quarter as developers capitalized on the relaxed quarantine measures to resume their halted construction activities. The local office market supply grew by 163,136 sqm of Grade A office space that mostly catered to IT-BPO companies. Several buildings were completed in Fort Bonifacio, Bay Area, and Quezon City, resulting in an overall office supply in Metro Manila of about 6.9 million sqm.

Consequently, supply growth resulted in an increase in vacancies throughout the metropolis. Office vacancy rates in Metro Manila further spiked to 12.75%, the highest since 2009. Current and potential occupiers remained vigilant towards the health situation of the country. Numerous companies continued to implement Work-From-Home and skeletal workforce arrangements. Office take-up contracted by 28,696 sqm as locators reassessed their need for spaces amid their bid to reduce operational costs.

Monthly average lease rates in Metro Manila further dipped to PHP 1,102.49 per sqm, declining by 0.78% quarter-on-quarter (q-o-q) and 0.07% year-on-year (y-o-y). The downward trend of rents was caused by the landlords' bid to provide more competitive packages to appeal to prospective tenants.

Figure 1. Metro Manila Historical Lease & Vacancy Rates



Source: Santos Knight Frank Research

Makati

The adverse effects of the pandemic and the prolonged lockdowns remained evident in the most prominent business district in the country. Vacancy rates spiked to 11.17%, considered to be the highest in the past ten years. Moreover, the expensive rents in Makati CBD were detrimental to the retention of office occupiers. Locators looking to minimize their expenses opted to discontinue their lease, resulting in about 25,557 sqm of office space vacated during the quarter.

Sluggish leasing activity persisted in the area as existing and upcoming locators in Makati were less willing to take up spaces due to the financial distress brought about by the global pandemic. The average monthly rents recorded in Makati went down to PHP 1,348.19 per sqm, contracting by 0.93% q-o-q and 6.05% y-o-y. Despite this, rates in Makati remained the highest in the metropolis.

Several property players are still looking forward to the materialization of their projects in the pipeline. More than 447,552 sqm of Prime and Grade A office supply are anticipated to come online in the next three years, with approximately 164,000 sqm being operational by the end of 2021. The massive influx of upcoming office developments in Makati comes from the backlogs and spillovers from 2019 up to the latter part of 2020.

Taguig

Slow demand in Taguig was also evident as vacancy levels continuously increased to 8.37% from 7.74% in Q4 2020. Despite having the largest supply share in Metro Manila of more than 2 million sqm, the downsized space requirements were seen as the factor in the rising vacancies as locators looked to lessen their operational cost. Moreover, average monthly rental rates in Fort Bonifacio also went down to PHP 1,289.75, translating to a contraction of 0.89% q-o-q.

The ease in quarantine measures allowed private and public projects to resume construction. Office supply in Fort Bonifacio further grew by 28,000 sqm through the completion of BGC Corporate Center 2. Despite the growing vacancy levels, potential developers still have bright prospects in Taguig as it was seen as the youngest but fastest growing business district in Metro Manila. In line with this, upcoming office supply is seen to be augmented by about 864,100 sqm of office space within the next five years. About 344,000 sqm of this will be coming from Arca South which is poised to become a new business district in the south.

Bay Area

The POGO industry exodus has significantly contributed to the spiking vacancy levels in the Bay Area during Q1 2021, recorded at 12.82%. Slower demand from the sector is seen in the coming periods as more firms have started to postpone their lease contracts. This occurrence implied challenges in the recently fast-moving office market of the Bay Area.

The upsurge in vacancy was also attributed to the completion of Four E-com during the quarter with an additional 89,132 sqm of Grade A office space. Priced above its competitors, this building has helped in pushing the average rents in the area to PHP 1,083.41 per sqm, increasing by 1.66% q-o-q.

The Bay Area is still foreseeing a huge amount of upcoming office supply in the coming years. Developers still recognize the opportunity to invest in the area due to its accessibility and availability of developable land. Approximately, 578,800 sqm of office developments are anticipated to be introduced in the market for the next five years, while 258,000 sqm are expected to become operational by the end of 2021.

Ortigas Center

Vacancy levels in Ortigas Center gradually eased to 12.75% in contrast to 12.88% of the preceding quarter. Despite this, pre-terminated contracts and non-renewals were still observed, as most of the companies are still on a wait-and-see approach towards the office market. Meanwhile, the slow-moving leasing transaction was also felt in the district as the rental rates went down to PHP 806.29 per sqm, contracting by 1.15% q-o-q and still considered the lowest as compared to other major CBDs in the metropolis.

Moreover, the upcoming office supply in Ortigas Center remained high as more than 671,000 sqm of Prime and Grade A office spaces are slated to introduce in the next five years. In addition, the massive influx of 373,000 sqm of space is scheduled to commence their operations within the year such as Cyber Omega, SM Mega Tower, and Jollibee Tower. This includes the spillover from 2019 up to the remaining quarters of 2020 that has been halted due to subsequent lockdowns.

Quezon City

Vacancy rates in Quezon City spiked up to 20.64% as opposed to 16.21% of the preceding quarter, indicating the highest level across all of Metro Manila. Approximately 13,690 sqm of office spaces were freed up in the city during the quarter. Occupiers in the area were more sensitive to the health crisis as compared to locators in other districts The lack of recognized established business districts and limited connectivity of certain townships contributed to the slow demand in the area. Furthermore, the upsurge in vacancy levels was also driven by the opening of SM North Towers 1 and 2 that added more than 45,200 sqm in the massive office supply in Quezon City, and are yet to lease out the majority of their spaces.

Office landlords are trying to alleviate this downtrend and are still vying to mitigate lease terminations. To this end, average headline rates contracted to PHP 925.55 per sqm, translating to a 1.81% decline from the preceding quarter.

Albeit the fast-growing vacancy levels, Quezon City is still expecting a large office supply boost in the coming years. Approximately, 333,700 sqm is anticipated to be introduced in the market in the next five years, in which more than 149,000 sqm will be coming from SM Prime Holdings.

Alabang

Similarly, Alabang CBD experienced rising vacancy levels in Q1 2021 at 16.07% from 14.53% in the preceding quarter. As a result, increased pressures on office landlords in the district were felt as they remain responsive to the slow movement in the office market. This caused rental rates to gradually contract to PHP 846.76 per sqm.

Alabang still holds on to the possibility of becoming one of the major investment hubs in the metropolis due to its vast developable land. Approximately 209,900 sqm of upcoming Grade A office space is anticipated to be operational in the next five years, while 13,800 sqm is slated to become operational by 2021.

Source: Santos Knight Frank Research

Office Outlook

The easing quarantine measures that started in the second half of 2020 allowed the developers to restart their impeded construction activities. Developers remain bullish in expanding their office footprint in Metro Manila with more than 3 million sqm of office space are slated to operate in the next five years. The nation's economic center is also set to have an additional supply of 1.1 million sqm of Prime and Grade A office space by the end of 2021. This massive influx still stems from the construction backlogs from the developers in 2020.

The robust expansion of office supply in Metro Manila is seen to further propel the vacancy rates in the local office market in the coming quarters. Along with the stagnant office demand, downward pressure on office rents still expected. Office landlords will be forced to implement more flexible payment terms to existing and potential tenants to market their spaces and continue cash flow from their buildings.

The recovery of the office market is also dependent on the pace of vaccine roll-outs in the country. The slow pace in inoculations is seen to weigh down on the recovery of the market. Attaining herd immunity as soon as possible can reinvigorate the interest in the office market.

In the medium- to long-term Green Buildings are seen to gain a competitive edge compared to ordinary office buildings. Buildings accredited by the US Green Building Council (LEED) and the Philippine Green Building Council (BERDE) will be more sought-after for potential office locators. The efficient design that provides better air circulation, ventilation and filtration, and increased open space, will be more appealing to the market as it puts a premium on the health and well-being of its tenants.

4 Valuation

Methodology

Valuation Rationale

4.1 The purpose of this appraisal is to estimate the Market Value of the Property. In any given valuation exercise, fair value can be arrived at using either one or a combination of the three (3) approaches to value, namely: Market (or Direct Sales Comparison) Approach, Income Approach, and the Cost Approach. The determination of the appropriate approach for a given property is based on the quality and quantity of data available, particularly its relevance to the Property under appraisement. If more than one valuation approach is utilized, the resulting values are reconciled to produce a final value conclusion.

4.2 Due to the nature of the Property and the purpose of this appraisal, both the Cost Approach and Income Approach to value are deemed the most appropriate to use and the Market (or Direct Sales Comparison) Approach was not used.

Cost Approach

Cost Approach

4.3 The Cost Approach generally involves the following steps:

A. The value of the subject land is normally estimated by the Market or Sales Comparison Approach. In instances where the land is covered by a Lease Agreement, the value of the leased fee or leasehold rights on the subject land, whichever is applicable, is instead estimated.

B. The depreciated cost of the subject improvement is estimated by calculating the direct cost of reproducing or replacing the improvement, deducting accrued depreciation from all sources, and adding the indirect costs attributed to the improvement.

Combining the estimates shown above results in the indicated value of the Property by the Cost Approach.

4.4 **On Land (Leasehold)**

As mentioned, the land subject of this appraisal is covered by a Lease Contract. In estimating the value of the Property covered by a lease, two interests are involved: the interest of the lessee which is the leasehold; and the interest of the lessor which is the leased fee or the lessor's interest. The Client being the lessee, the purpose of this appraisal is to establish the leasehold value of the subject land.

Leasehold Value is the present (discounted) worth of the rent savings (or rental gains) when the contract rent at the time of the appraisal is less than the current market rent. It is estimated by computing the present worth of the rental gains over the remaining term of the lease agreement using an appropriate discount rate.

The valuation process, briefly stated, consists of the following:

- Estimation of the current market rent of the leased property;

- Estimation of the rental gains over the remaining term of the lease agreement, if any;
- Estimation of an appropriate discount rate; and
- Discounting process based on an appropriate discount rate to arrive at an indicated leasehold value.

Market Rent of the Land

4.5 We have made a survey of existing ground leases of similar land in the vicinity of the subject property and found the following rental data that may be used for benchmarking or comparison purposes:

1. A commercial lot having an area of 2,052 sq.m. located along 29th Street near Burgos Circle, Bonifacio Global City, Taguig City, Metropolitan Manila, is currently offered for lease at an asking rate of PhP3,385,800 per month or about PhP1,650 per sq.m. per month. The Property is within an area classified as Urban Core Zone/Commercial with a maximum FAR of 12.
   Source: Ms. Minie Patolot (Cel. No. 0917-512-4595)
2. A commercial lot having an area of 988 sq.m. located along 21st Drive, Bonifacio South, Bonifacio Global City, Taguig City, Metropolitan Manila, is currently offered for lease at an asking rate of PhP1,185,600 per month or about PhP1,200 per sq.m. per month. The Property is within an area classified as Urban Core Zone/Commercial with a maximum FAR of 8.
   Source: Roma Barte (Cel. No. 0966-988-4190)
3. A commercial lot having an area of 1,083 sq.m. located along 20th Drive, Bonifacio South, Bonifacio Global City, Taguig City, Metropolitan Manila, is currently offered for lease at an asking rate of PhP1,299,600 per month or about PhP1,200 per sq.m. per month. The Property is within an area classified as Urban Core Zone/Commercial with a maximum FAR of 8.
   Source: Roma Barte (Cel. No. 0966-988-4190)

4.6 On the basis of the foregoing, the Market Rent of the land is estimated at **PhP1,470 per sq. m. per month**, or a total of **PhP7,350,000 per month**, or say, **PhP88,200,000 per annum** for the subject land area of **5,000 sq. m.**

We attach a copy of our valuation calculations (comparison grid) at Appendix **7**.

Rental Gain

4.7 Rental Gain is reckoned as the difference between the Market Rent and the Contract Rent.

Discount Rate

4.8 The discount rate was computed using the build-up method. The discount rate is calculated by adding together different variables. The variables that were used to generate it consist of a risk-free rate and a reasonable risk premium. Based on the foregoing, discount rate is estimated at 8.078%, or say, 8.10% (18.68-year T-bond rate at about 4.828% (from Philippine Dealing & Exchange Corporation (PDEx) as of 30 June 2021) plus 3% equity risk premium from OECD and additional 0.25% risk premium for unidentifiable risk factors which include the uncertainty brought about by the Covid-19 global pandemic.

For purposes of this valuation, we have adopted, as risk-free rate, the 18.68-year T-bond rate from PDEx which was arrived at by interpolating the 10 and 20-year rates. The Philippine Dealing & Exchange (PDEx) system appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEx. The PHP BVAL Reference Rate dated 30 June 2021 was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

4.9 We have adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3%. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits
Valid as of: **25 June 2021**

			Classification

Remaining Life of the Lease

4.10 Following instructions from the Client, 01 October 2021 was assumed as the date of commencement of sublease arrangement with RLC. Remaining life of the lease as of the date of valuation is 18.68 years.

Summary of Leasehold Assumptions

4.11 In summary, below are the assumptions/statistics used in determining the leasehold value of the subject land.

CYBER SIGMA			
Lease Details			
Lessor	:	BASES CONVERSION DEVELOPMENT AUTHORITY (BCDA)	
Lessee	:	ALTUS SAN NICOLAS CORPORATION	
Lot Area	:	5,000	sq.m.
Term of Lease	:	25	years
Commencement Date	:	14-Aug-14	
Expiry Date	:	06-Mar-40	
Revised Lease Rate			
First 14 Years	:	484,362,960.00	(paid in advance)
Year 15 onwards	:	43,185,000.00	(annual)
Annual Escalation	:	3%	starting on year 16
Market Rent (in PhP)			
Monthly Rent	:	1,470.00	per sq.m.
Annual Rent	:	88,200,000	
Annual Escalation	:	3%	starting Y2
Discount Rate			
Risk Free Rate		4.828	as of June 30, 2021 (BVAL PDEX)
Risk Premium		3.000	as of June 25, 2021 (OECD)
Additional Risk		0.250	risk premium for unidentifiable risk factors
		8.078	
Resulting Discount Rate, say		8.10%	

Leasehold Value

4.12 On the basis of the foregoing, the leasehold value of the subject land may reasonably be estimated at **PhP949,000,000.**

We attach a copy of our valuation calculations at Appendix **5**.

4.13 **On Leasehold Improvements and Machinery & Equipment**

The estimate of the leasehold improvements can be either replacement or reproduction cost, new. Replacement Cost, New is defined as "The cost of construction, at current prices, of a building having utility equivalent to the building being appraised but built with modern materials and according to current standards, design, and layout." On the other hand, Reproduction Cost, New is defined as "The cost of construction, at current prices, of an exact duplicate, or replica, using the same materials, construction standards, design, layout, and quality of workmanship, and embodying all the deficiencies, super-adequacies, and obsolescence of the subject building."

In estimating the Replacement Cost of the buildings and improvements, we have made reference to the building cost index or other building cost as available in the market or published by a reputable quantity surveyor firm. We have likewise referred to our own database of building construction costs. We do not hold ourselves to be construction cost advisers and a formal estimate can only be given by a specialist construction cost consultant. It is recommended that a professional quantity surveyor or a firm of professional quantity surveyors should be consulted in order to assess an accurate building/improvement replacement cost.

In arriving at our assessment using the Cost Approach for the Equipment, we first developed the Replacement Cost, New ("RCN") of the asset. In developing our RCN, we have obtained current cost information from equipment dealers in the region. We relied on data furnished by equipment manufacturers, dealers and importers, as well as information contained in price catalogues, other published materials including the Internet and inquiries from local suppliers

RCN is the estimated amount of money needed to acquire a similar new item having the nearest equivalent utility as the Property being valued taking into consideration current prices of materials and manufactured equipment, shipping and handling, labour, contractor's overhead, design and supervision, profit and fees, and other attendant costs associated with its acquisition and installation, but without provision for overtime or bonuses for labour and premium for materials.

Having developed the RCN, we then deducted for the various elements of depreciation to arrive at the Depreciated Replacement Cost ("DRC"). DRC includes depreciation allowance or loss of value arising from condition, utility, age, wear and tear, and obsolescence present (physical, functional or economic), taking into consideration past and present maintenance policy and rebuilding history.

General

Where elements are of foreign origin, the assessment process give full consideration to all expenditures normally incurred in importation such as packing and crating charges, inland and ocean freight, insurance, duties and taxes, bank charges and commissions, wharfage, brokerage and handling

In estimating the depreciation of the assets, we have utilized the age-life method tempered with our observed condition of the assets. The remaining lease period was likewise considered in arriving at the value of the leasehold improvements.

Appendix **9** contains the Schedule of Assets describing in detail these assets.

Income Approach

Income Approach 4.14 The Income Approach is applicable to the valuation of income producing properties, business enterprise as well as the valuation of intangible assets. This approach measures the current value of an asset by calculating the present value of its future economic benefits by discounting expected cash flows at a rate of return that compensates the risks associated with the particular investment.

Discounted Cash Flow Analysis 4.15 The discounted cash flows, or DCF valuation is the most popular fundamental approach in valuing the future economic benefits of a projected income stream. DCF measures actual yield rather than paper income for the asset/business owner and the analysis of DCF is widespread and mandatory in the various fields of business making DCF-based valuation ideal.

4.16 The valuation process, briefly stated, consists of the following:

- Estimation of the revenues generated;
- Estimation of the costs and expenses related to the operations of the development;
- Estimation of an appropriate discount rate;
- Discounting process using an appropriate discount rate to arrive at an indicative market value

Discount Rate

4.17 The discount rate was computed using the build-up method - calculated by adding together the different variables. The basic formula for the traditional build-up model is:

Discount Rate = Rf + P + MR + LR

Where	Variable	Proxy Statistic
Rf	Risk Free Rate	PDEX Risk Free Rate
P	Equity Risk Premium	Country Risk
MR	Management Risk	
LR	Liquidity Risk	

The variables that were used to generate the Discount Rate are exhibited in the table below, along with the sources and/or dates as at or nearest the 30 June 2021 valuation date.

Risk Free Rate (18.68Y)	4.83%	As of 30 June 2021, BVAL PDEX
Equity Risk Premium	3.25%	As of 25 June 2021, OECD
Management Risk	0.80%	
Liquidity Risk	0.90%	

4.18 The following assumptions were used to arrive at the Discount Rate using the Build-Up Method.

Risk Free Rate

4.19 For purposes of this valuation, we have adopted, as risk-free rate, the 18.68-year T-bond rate from PDEx which was arrived at by interpolating the 10 and 20-year rates. The Philippine Dealing & Exchange (PDEx) system appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEx. The PHP BVAL Reference Rate dated 30 June 2021 was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

Equity Risk Premium

4.20 We used an equity risk premium of 3.25%. We adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3% plus an additional 0.25% risk premium for unidentifiable risk factors. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors. Shown below is an excerpt of said table.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits
Valid as of: **25 June 2021**

nb	Country Code ISO Alpha 3	Country Name [1]	Classification Previous	Classification Current Prevailing	Notes
138	PLW	Palau	-	-	(5)
139	PAN	Panama	4	4	(8)
140	PNG	Papua New Guinea	6	6	
141	PRY	Paraguay	5	5	
142	PER	Peru	3	3	
143	PHL	Philippines	3	3	
144	POL	Poland	-	-	(6)
145	PRT	Portugal	-	-	(6) (7)

Management & Liquidity Risk

4.21 The Management Risk refers to the estimated premium to compensate for the burden of management, while the Liquidity Risk refers to the ease (or the difficulty) with which an investment can be sold or made. A review was done and we have arrived at the following: Management Risk was classified into four categories, with the corresponding rates: Poor – 1.2; Average – 1.0; Above Average - 0.90 and Excellent - 0.80 while Liquidity Risk has three (3) categories: Poor –1.2; Average – 1.0; and Good – 0.90. After the said review, we deemed it appropriate to use 0.80% for Management Risk and 0.90% for Liquidity Risk.

Resulting Discount Rate

4.22 Resulting Discount Rate used for this valuation is 9.78%, or say, 10.0%.

Key Financial Assumptions

4.23 We relied on the historical and projected assumptions brought about by our research and as provided by the Client. These financials were analysed to ensure reasonableness by comparing projected revenue growth rates and other operating expenses based on historical performance. Based on interviews with the representatives of the company, projections were prepared to reflect the current and expected future market conditions.

a. **Revenues**

Cashflow projection starts in 2021 for a period of 18.68 years.

The revenues come from the rental of retail units, office units and parking slots. In estimating the annual rents of the subject units/slots, we have adopted the contract rents as appearing in the copy of the rent roll provided to us by the Client for the occupied units/leased parking slots. After the expiration of lease, lease rates then are aligned with market rates and are assumed to have an average of 4-year lease contracts. Aside from the monthly rentals from leasable areas, revenues likewise include Management and Aircon Dues which are likewise charged to the tenants monthly on a per sq.m. basis. Management dues are for common and/ or shared utilities, facilities and services. These are inclusive of air-conditioning equipment rental during office hours (but exclusive of power consumption).

It would be important to note that as the building administrators, they collect the said dues as a cost recovery mechanism for all expenses related to the day-to-day operations of the building and its common areas.

Occupancy assumptions were based on the actual performance of the Property as well as the prevailing trend in the subject area taking into consideration the forecasted effect of the global pandemic in the office market. Occupancy of the Property as of valuation date is at 100% while the historical average performance of the Property for the last two years is at 100%. Occupancy rate includes committed occupancy. For this valuation exercise, we are assuming an average vacancy allowance of 4%. This assumed vacancy allowance for the whole cashflow period is used to account for unanticipated vacancies brought about by early terminations and non-renewals, and rental concession requests from tenants.

We used actual escalation rates indicated in the rent roll for all existing leases up until their lease expires. After which, an average escalation of 5% was then be applied year on year until the end of the cash flow.

b. **Cost & Expenses**

Operating Expenses which would include administrative and utility expenses are normally charged against the Common Use Service Area (CUSA) Fees or Association Dues being collected monthly to the individual tenants. However, there are instances when CUSA funds are insufficient to pay off all common charges. If and when this happens, the owners/administrators would have to pay off these expenses and this has been taken into consideration in the projections.

Operating Costs and Expenses are assumed to be an average of approximately 13% of the Total Net Revenues. Operating costs and expenses included are basically divided in to two – real estate expense and Real Estate expenses and general and administrative expenses are as follows: contracted services, repairs & maintenance, management fee and loss from CUSA and miscellaneous expenses. While under General Administrative Expense are – salaries & wages, taxes and licenses, advertising & promotions, commission, insurance, communication, rent expense, supplies, travel & transportation, and representation & entertainment expenses.

These expenses are projected either as a percentage of the rental revenues or the total net revenues. These percentage allocations were from the historical and projected performance of the Property.

Annual Capital Expenditures (CAPEX) for the entire cashflow period, on the other hand, was assumed to be 1.5% of the Net Leasing Revenues. This assumption is based on benchmarking and analysis of current market practice in allocating CAPEX reserve.

This allocation would help ensure that the Property would operate efficiently and maintain its good and sound condition

Resulting Market Value 4.24

a. Earnings Before Income Tax, Depreciation and Amortization (EBITDA) for the whole duration of the cashflow shall be discounted at the derived Discount Rate of 10.00%.
b. The sum of discounted cashflows of the Property represents the Market Value of the Property.

The Discounted Cashflow showing the estimated Market Value of the subject property is attached as Appendix **6**.

Valuation basis

Market Value 4.25 Market Value is defined in the 2019 **International Valuation Standards** as: "The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

Valuation date

Valuation date 4.26 The valuation date is **30 June 2021**.

General Assumptions

Assumptions 4.27 Our valuation is necessarily based on a number of assumptions which have been drawn to your attention in our General Terms of Business, Letter of Engagement and within this report.

Key Assumptions	4.28	Whilst we have not provided a summary of all these assumptions here, we would in particular draw your attention to a key assumption that we relied on a very considerable extent on the information provided by the Client and have assumed that documents provided to us such as contract of lease, gross floor area tabulation, floor plans, building tenancies and other relevant matters are factual. We were also advised by the Client that no material facts have been omitted from the information provided.
	4.29	We have assumed that the title of the Property is clean and free of any liens and encumbrances.
Special Assumption	4.30	We were instructed to re-value the Property without a re-inspection. We have, thus, considered changes to the physical attributes and/or characteristics of the Property which have occurred between the valuation date and the date of our previous valuation as confirmed by the Client. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.
	4.31	We have adopted the floor area tabulation provided to us by the Client and have assumed this to be accurate.
	4.32	Based on the Contract of Lease, the Lessee is Altus San Nicolas Corporation. We are not made aware of the relationship between Robinsons Land Corporation and the Lessee. For purposes of this valuation, we have assumed that Robinsons Land Corporation holds the leasehold rights for both the subject land and the improvements.
	4.33	We have assumed that the subject land has already been reclassified to Commercial and it is assumed that all applicable zoning and use regulations have been complied with for its current use.
	4.34	Our valuation of Machinery & Equipment has also undertaken the following special assumptions: We have not carried out a full mechanical survey, or structural test, nor have inspected the machinery and equipment, which are covered, unexposed or inaccessible. Our assessment is based on the premised that the items are in a condition commensurate with age and usage. Machinery & Equipment associated with the supply of services to the building such as Elevators, Air Conditioning Systems are valued on the assumption that they are permanently installed or attached to the building.
	4.35	In applying Income Approach to value, we have considerably relied on the information provided to us by the Client which includes the following: lease contracts, revenue and expense projections, historical and projected occupancies. Upon expiration of contracts, we estimated the lease rates based on the acceptable escalations in the market.

Valuation Results

Using Cost Approach

4.36 Using the **Cost Approach,** the Market Value of the Property, may be summarized as under:

Land (Leasehold Value)	**PhP949,000,000**
Leasehold Improvements	**1,724,000,000**
Building Machinery & Equipment	**480,327,000**

GRAND TOTAL	**PhP3,153,327,000**

ROUNDED TO	**PhP3,153,000,000**
	==============

4.37 The Market Value of the Property is estimated at **PhP3,153,000,000 (THREE BILLION, ONE HUNDRED FIFTY-THREE MILLION PHILIPPINE PESOS)**

Using Income Approach

4.38 Using the **Income Approach** on the other hand, the Market Value of the Property is estimated as follows:

DCF Analysis	**PhP5,823,000,000**

Calculation

4.39 We attach a copy of our valuation calculations for the Income Approach at Appendix **6**.

Comments

4.40 The value arrived at using the Income Approach is noted to be higher than the value arrived at using the Cost Approach. This is because, unlike the Income Approach, the Cost Approach does not capture the income potential of the Property.

4.41 For purposes of this valuation, we deemed it appropriate to adopt the results arrived at by the Income Approach – DCF Analysis, since this method is usually used to determine the value of an income-generating property, as it also captures the Property's future economic benefits, giving a better representation of the Property's Market Value at an acceptable rate of return that would compensate for the risks associated with the particular investment.

We did not find it appropriate to use the Direct Capitalization Method because the current lease term only has 18.68 years remaining. In the Direct Capitalization Method, one has to assume that property would be held in perpetuity or could be likened to perpetuity if the lease term would outlive the useful life of the building. In the Property's case, remaining lease term is only 18.68 years and although it can be renewed for another 25 years, the lease contract states that the lease renewal would not only include the land but the building as well. By the time the lease is renewed for another 25 years, ownership of the building is relinquished to the land owner.

Conclusion of Value 4.42 In conclusion, we are of the opinion that the Market Value of the Property, reckoned as of **30 June 2021**, is:

PhP5,823,000,000 (FIVE BILLION, EIGHT HUNDRED TWENTY-THREE MILLION PHILIPPINE PESOS).

***Note**: The outbreak of the Novel Coronavirus (COVID-19), declared by the World Health Organization as a "Global Pandemic" on 11th March 2020, has impacted global financial markets. Travel restrictions have been implemented by many countries. In the Philippines, market activity is being impacted in all sectors. As at the valuation date, we consider that we can attach less weight to previous market evidence for comparison purposes, to inform opinions of value. Indeed, the current response to COVID-19 means that we are faced with an unprecedented set of circumstances on which to base a judgement. Our valuation is therefore reported on the basis of "material valuation uncertainty" per IVS 103 of the International Valuation Standards. Consequently, less certainty – and a higher degree of caution – should be attached to our valuation than would normally be the case. Given the unknown future impact that COVID-19 might have on the real estate market, we recommend that you keep the valuation of this property under frequent review.*

Appendix 1 - Assumptions, Limiting Conditions and Disclaimers

Basis of Value	Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion." In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property. It is further assumed that title to the property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable. The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.
Property Rights appraised	The rights appraised in this report are the property rights in fee simple, free and clear. "Fee simple" is defined as absolute ownership, without limitations to any particular class of heirs or restrictions, but subject to the limitations of eminent domain, escheat, police power and taxation. We assume that the fee simple interest is marketable and in compliance with the applicable laws of the Philippines.
Fractional Interests:	When the study contains a valuation relating to an estate in land that is less than the whole fee simple estate, the value reported for such estate relates to a fractional interest only in the real estate involved, and the value of this fractional interest plus the value of all other fractional interests may or may not equal the value of the entire fee simple estate which is considered the whole. When the valuation report contains an allocation of the total valuation between land and building improvements, such allocation applies only under the existing program of utilization. The separate valuations for land and building cannot be used in conjunction with any other valuation/appraisal and will be invalid if so used.
Assumptions:	The valuation is based on the condition of the economy and the purchasing power of the Philippine Peso as of the effective date of valuation. We have assumed that the floor areas provided us have been calculated in accordance with engineering standards, and assumed herein to be true and correct. Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.
Information Supplied By Others	Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser. Information provided by informed local sources, such as government agencies, financial institutions, Realtors, buyers, seller and others, was weighed in the light in which it was supplied and checked by secondary means; however, no responsibility is assumed for possible misinformation.
Legal Issues:	This valuation assumes no responsibility for the validity of legal matters affecting the property. The ownership history reported in this valuation is based on the appraiser's research of public records, which are assumed to be accurate and complete. It is not the intent of the valuation to offer a legal opinion of title. It is further assumed that the property has good title, responsible ownership and competent management. Any liens or encumbrances which may now exist have been disregarded. The appraiser is not required to give testimony or attendance in court by reason of this valuation, with reference to the property in question, unless arrangements have been previously made.
Liability:	The liability of Santos Knight Frank, Inc. and its directors and employees is limited to the addressee of this report only. No accountability, obligation or liability to any third party is accepted. In the event we are subject to any liability in connection with this engagement, regardless of legal theory advanced, such liability will be limited to the amount of fees we received for this engagement.
Environmental Conditions:	It is assumed that there is full compliance with all applicable Philippine environmental regulations and laws unless non-compliance is stated, defined, and considered in this appraisal report.
Town Planning:	It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.
Condition of Improvements:	We have inspected the improvements and structures. However we have not carried out a structural survey nor tested any of the services or facilities, nor have we inspected unexposed or inaccessible portions of the building, and are therefore unable to state that these are free from defect, rot, infestation, asbestos or other hazardous material. We have therefore, viewed the general state of repair of the property and advise that we did not notice any obvious signs of structural defect or dilapidations. Furthermore, the property appears to be in reasonable condition having regard to its age and use and unless otherwise stated. We also assume that the building complies with all relevant statutory requirements in respect of matters such as sanitary, building and fire safety regulations and standards.
Valuation Methodology:	In estimating Fair Value for financial reporting purposes, we still adopted the same Valuation techniques by using any one or the combination of the three (3) Approaches to Value, namely: Market Data (or Direct Sales Comparison) Approach, Cost Approach, and the Income Approach. Briefly described, the Market Data (or Sales Comparison) Approach considers prices recently paid and/or offered for similar items of property with adjustments made to the indicated market prices to reflect the condition and utility of the appraised property relative to market comparatives. The Cost Approach considers the cost to reproduce or replace the property appraised with new assets of like kind, and from this amount an allowance is deducted for depreciation arising from physical deterioration or obsolescence, whether from functional or external causes. In the Income Approach, an estimate is made of the prospective economic benefits of ownership into the future and these benefits are discounted to its present worth or capitalized into an indication of value.
Others:	This report and valuation shall be used only in its entirety and no part shall be used without the whole report. It may not be used for any purpose other than the intended purpose mentioned herein. Possession of this report or any copy thereof does not carry with it the right of copying or publication. All copies will originate from Santos Knight Frank, Inc. and will be signed and dated as such. Neither the whole nor any part of the report or any reference to our name, our valuation and our report may be included in any document, circular or statement nor published without our prior written consent to the form and context in which it may appear. The delivery and acceptance of this report completes this assignment.

ADB Avenue corner Poveda Street
Ortigas Center, Pasig City

Attention: **MR. FREDERICK D. GO**
President and Chief Executive Officer

Subject: **Terms of Engagement for Valuation Services**

Dear Mr. Go:

Thank you for your interest in our Valuation Services. We refer to your invitation of 03 August 2020 requesting Santos Knight Frank, Inc. ("SKF") to submit a proposal for valuation (the "Valuation") in respect of the properties detailed below (the "Properties").

This proposal, together with our General Terms of Business for Valuation Services ("General Terms"), sets out our terms of engagement for carrying out this instruction. Once agreed and signed, this proposal shall constitute our Letter of Engagement ("Letter"). This Letter and the General Terms (together, the "Agreement") exclude any other terms which are not specifically agreed to us in writing. To the extent that there is any inconsistency between the Letter and the General Terms, this Letter shall take precedence.

1. **Client**
   Our Client for this Valuation is Robinsons Land Corporation (the "Client", "you" or "your").

2. **Purpose of Valuation**
   The Valuation is provided solely the purpose of transferring some of the Client's assets to the REIT Company and its application for a Tax-Free Exchange Ruling with the Bureau of Internal Revenue and listing of the REIT Company in the Philippine Stock Exchange (the "Transaction"). Specifically, the Valuation will be used for the Client's Financial Statements to be attached to the Offering Circular as required by the Securities and Exchange Commission (SEC) and will be attached as an appendix to the Client's REIT Plan. In accordance with clause 4.1 of our General Terms, the Valuation may not be used for any other purpose without our express written consent. The Valuation will be made accessible in the public domain as part of the regulatory requirements of the Transaction.

3. **Term & Termination**
   This appointment will commence upon signing of this Agreement and shall continue to be in effect for a period of two (2) years. Any extension of the Term of this Agreement shall be mutually agreed upon by the parties in writing.

23. Electronic Communication

During the engagement, both parties may wish to communicate electronically with each other. However, electronic transmission of information cannot be guaranteed to be secure or virus-or error-free and information could be intercepted, corrupted, lost or destroyed, arrive late or incomplete, or otherwise be adversely affected or unsafe to use. Both parties agree to accept these risks and so each party will be responsible for protecting its own systems and interests in relation to electronic communications. Neither party will have any liability to the other party on any basis for any loss or damage arising from or in connection with the electronic communication of information between both parties or their reliance on such information.

24. Acceptance

Please sign and return a copy of this Letter signifying your acceptance of the terms of the Agreement. We reserve the right to withhold any Valuation and / or refrain from discussing it with you until this Letter has been countersigned and returned.

Your attention is drawn to the "Important Notice" in the General Terms. If you have any questions regarding this Letter and / or the terms of the Agreement, please let us know before signing this Letter.

Thank you for choosing Santos Knight Frank, Inc. and we look forward to working with you on this important engagement.

Sincerely,
SANTOS KNIGHT FRANK, INC.

Attention: **MR. FREDERICK D. GO**
President and Chief Executive Officer

Subject: **Amendment to Terms of Engagement and General Terms of Business for Valuation Services Dated 03 August 2020 ("Amendment")**

Dear Mr. Go:

We refer to subject Letter of Engagement and General Terms of Business for Valuation Services (together, the "Agreement") between Robinsons Land Corporation (the "Client", "you" or "your") and Santos Knight Frank, Inc. ("SKF") for the valuation of fourteen (14) office buildings (the "Covered Properties").

For this purpose, the Agreement is amended as follows:

The first, second, and third and fourth paragraphs shall now read:

For the Valuation

I. Valuation for Asset Transfer to REIT Company and its application for a Tax-Free Exchange Ruling:

For Valuation Update

II. Valuation of Properties for REIT listing to PSE:
Our Valuation of 14 Properties will be as follows:
1. Valuation for 4 Properties
2. Periodic Update of 14 Properties Under REIT Company (Quarterly basis – optional)
3. Valuation Update of 14 Properties under REIT Company

Except as amended hereby, all the provisions of the Agreement which are not inconsistent herewith are incorporated herein by way of reference and from date hereof, the Agreement and this Amendment shall be read as one integrated document.

Kindly affix your signature on the conforme portion below and return one (1) original signed copy to us.

Sincerely, **SANTOS KNIGHT FRANK, INC.**	Approved and agreed to by: **ROBINSONS LAND CORPORATION**

Proposal for Valuation Service: **ROBINSONS LAND CORPORATION**

Appendix 3 - General Terms of Business

General Terms of Business for Valuation Services

These General Terms of Business (the "**General Terms**") and our Letter of Engagement (the "**Letter**"), together form the agreement between you and us (the "**Agreement**"). References to "**you**", "**your**" etc. are to persons or entities who are our client and, without prejudice to clauses 3 and 4 below, to any persons purporting to rely on our Valuation.

Unless **the** context otherwise requires, all other terms and expressions used but not defined herein shall have the meaning ascribed to them in the Letter.

When used herein or in the Letter, the term "**Valuation**" shall mean any valuation report, advance report, supplementary report or subsequent/update report, produced pursuant to our engagement and any other replies or information we produce in respect of any such report and/or any relevant property. Any words following the terms "**including**", "**in particular**" or any similar expression shall be construed as illustrative and shall not limit the sense of the words preceding those terms.

All of the terms set out in these General Terms shall survive termination of the Agreement.

1. Santos Knight Frank, Inc.

1.1. Santos Knight Frank, Inc. ("**Santos Knight Frank**", "**our**", "**us**", "**we**") is a Philippine corporation with Securities and Exchange Commission (SEC) Registration Number A199818549.

1.2. Our registered office is at 10/F Ayala Tower & Exchange Plaza, Ayala Avenue, Makati City where a list of members may be inspected.

1.3. Any representative of Santos Knight Frank, Inc. described as *Director* is either a member or an employee of Santos Knight Frank, Inc. and is not a member of the Board of Directors. The term *Director* has been retained because it is an accepted way of referring to senior professionals. The term "**Santos Knight Frank Person**" shall, when used herein, mean any member, employee, or consultant of Santos Knight Frank, Inc.

1.4. Our Tax Identification Number (TIN) is 201-626-570-000.

1.5. The details of our professional indemnity insurance will be provided to you on request.

1.6. Santos Knight Frank, Inc., being a corporation, is regulated by the Philippine Securities and Exchange Commission (SEC). It is also an SEC-accredited asset valuer. In accordance with reportorial filings with the SEC, it may be necessary to disclose valuation files to them. By instructing us, you give us your permission to do so. Where possible we will give you prior notice before making any such disclosure, although, this may not always be possible. We will use reasonable endeavours to limit the scope of any such disclosure and to ensure any disclosed documents are kept confidential.

1.7. Valuations will be carried out in accordance with the 2019 edition of the International Valuation Standards (IVS) by valuers who conform to its requirements and with regard to relevant statutes or regulations. Our senior valuers are Real Estate Appraisers licensed and regulated by the Philippine Professional Regulation Commission (PRC).

2. Governing law and jurisdiction

2.1. The Agreement and any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with it or its subject matter or formation or any Valuation shall be governed by and construed in accordance with Philippine laws.

2.2. Philippine courts shall have exclusive jurisdiction to settle any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with this Agreement or its subject matter or formation or any Valuation. This will apply wherever the relevant property or the client, or any relevant third party, is located or the service is provided.

3. Limitations on liability

3.1. Subject to clause 3.7, our maximum total liability in connection with or arising out of this Agreement and/or its subject matter and/or the Valuation is limited to our total service fees as set out in the Letter.

3.2. Subject to clause 3.7, we will not be liable for any loss of profits or for indirect or consequential loss or damages.

3.3. Subject to clause 3.7, any limitation on our liability will apply however such liability is or would otherwise have been incurred, whether in contract, tort (including negligence), for breach of statutory duty, or otherwise.

3.4. Except as set out in clauses 3.5 and 4.7 and 4.8 below, no third party shall have any right to enforce any of the terms of this Agreement.

3.5. No claim arising out of or in connection with this Agreement may be brought against any Santos Knight Frank Person. Those individuals will not have a personal duty of care to you or any other person and any such claim for losses must be brought against Santos Knight Frank, Inc. Any Santos Knight Frank Person may enforce this clause but the terms of this Agreement may be varied by agreement between the client and Santos Knight Frank, Inc. at any time without the need for any Santos Knight Frank Person to consent.

3.6. No claim, action or proceedings arising out of or in connection with the Agreement and/or any Valuation shall be commenced against us after the expiry of the earlier of (a) two years from the Valuation Date (as set out in the relevant Valuation) or (b) any limitation period prescribed by law.

3.7. Whether or not specifically qualified by reference to this clause, nothing in the Agreement shall exclude or limit our liability in respect of fraud, or for death or personal injury caused by our negligence or negligence of those for whom we are responsible, or for any other liability to the extent that such liability may not be so excluded or limited as a matter of applicable law.

4. Purpose, reliance and disclosure

4.1. The Valuation is prepared and provided solely for the stated purposes. Unless expressly agreed by us in writing, it cannot be relied upon, and must not be used, for any other purpose and, subject to clause 3.7, we will not be liable for any such use.

4.2. Without prejudice to clause 4.1 above, the Valuation may only be relied on by our Client. Unless expressly agreed by us in writing the Valuation may not be relied on by any third party and we will not be liable for any such purported reliance.

4.3. Subject to clause 4.4 below and for the stated purposes, the Valuation is confidential to our Client and must not be disclosed, in whole or in part, to any third party without our express written consent (to be granted or withheld in our absolute discretion). No liability is accepted to any third party for the whole or any part of any Valuation disclosed in breach of this clause.

4.4. Our appraisers are not required to give testimony or attendance in court by reason of this Valuation with reference to the property in question, unless arrangements have been previously made.

4.5. Except for the stated purposes, neither the whole nor any part of the Valuation and/or any reference thereto may be included in any published document, circular or statement nor published in any way whatsoever whether in hard copy or electronically (including on any website) without our prior written consent and approval of the form and context in which it may appear.

4.6. Where permission is given for the publication of a Valuation, neither the whole nor any part thereof, nor any reference thereto, may be used in any publication or transaction that may have the effect of exposing us to liability for actual or alleged violations of SEC Memorandum Circular No. 2, series of 2014 (Guidelines on Asset Valuations) or Republic Act No. 8799 (Securities Regulation Code), as amended and its Implementing Rules and Regulations.

4.7. You agree that we, and/or any Santos Knight Frank Person, may be irreparably harmed by any breach of the terms of this clause 4 and that damages may not be an adequate remedy. Accordingly, you agree that we and/or any Santos Knight Frank Person may be entitled to the remedies of injunction or specific performance, or any other equitable relief, for any anticipated or actual breach of this clause 4.

4.8. You agree to indemnify and keep fully indemnified us, and each relevant Santos Knight Frank Person, from and against all liabilities, claims, costs (including legal and professional costs), expenses, damages and losses arising from or in connection with any breach of this clause 4 and/or from the actions or omissions of any person to whom you have disclosed (or otherwise caused to be made available) our Valuation otherwise than in accordance with this clause 4.

5. Knight Frank network

5.1. Santos Knight Frank, Inc. is a member of an international network of independent firms which may use the "Knight Frank" name and/or logos as part of their business name and operate in jurisdictions outside the Philippines (each such firm, an "**Associated Knight Frank Entity**").

5.2. Unless specifically agreed otherwise, in writing, between you and us: (i) no Associated Knight Frank Entity is our agent or has authority to enter into any legal relations and/or binding contracts on our behalf; and (ii) we will not supervise, monitor or be liable for any Associated Knight Frank Entity or for the work or actions or omissions of any Associated Knight Frank Entity, irrespective of whether we introduced the Associated Knight Frank Entity to you.

5.3. You are responsible for entering into your own agreement with any relevant Associated Knight Frank Entity.

5.4. This document has been originally prepared in the English language. If this document has been translated and to the extent there is any ambiguity between the English language version of this document and any translation thereof, the English language version as prepared by us shall take precedence.

6. Severance

If any provision of the Agreement is invalid, illegal or unenforceable, the parties shall negotiate in good faith to amend such provision so that, as amended, it is legal, valid and enforceable and, to the greatest extent possible, achieves the intended commercial result of the original provision. If express agreement regarding the modification or meaning or any provision affected by this clause is not reached, the provision shall be deemed modified to the minimum extent necessary to make it valid, legal and enforceable. If such modification is not possible, the relevant provision shall be deemed deleted. Any modification to or deletion of a provision under this clause shall not affect the validity and enforceability of the rest of this Agreement.

7. Entire agreement

7.1. The Agreement, together with any Valuation produced pursuant to it (the Agreement and such documents together, the "**Contractual Documents**") constitute the entire agreement between you and us and supersedes and extinguishes all previous agreements, promises, assurances, warranties, representations and understandings between you and us, whether written or oral, relating to its subject matter.

7.2. Subject to clause 3.7 above, you agree that in entering into the Agreement you do not rely on, and shall have no remedies in respect of, any statement, representation, assurance or warranty (whether made innocently or negligently) that is not expressly set out in the Contractual Documents. You further agree that you shall have no claim for innocent or negligent misrepresentation based on any statement set out in the Contractual Documents.

7.3. The Letter and these General Terms shall apply to and be incorporated in the contract between us and will prevail over any inconsistent terms or conditions contained or referred to in your communications or publications or which would otherwise be implied. Your standard terms and conditions (if any) shall not govern or be incorporated into the contract between us.

7.4. Subject to clause 3.7 and clause 6, no addition to, variation of, exclusion or attempted exclusion of any of the terms of the Contractual Documents will be valid or binding unless recorded in writing and signed by duly authorised representatives on behalf of the parties.

8. Assignment

8.1. You shall not assign, transfer, mortgage, charge, subcontract, declare a trust over or deal in any other manner with any of the rights and obligations under the Agreement without our prior written consent (such consent to be granted or withheld in our absolute discretion).

9. Force majeure

9.1. Neither party shall be in breach of this Agreement nor liable for delay in performing, or failure to perform, any of its obligations under this Agreement if such delay or failure results from events, circumstances or causeswhich could not be foreseen, or which, though foreseen, were inevitable.

10. Our fees

10.1. Without prejudice to clause 10.3 below, you become liable to pay our fees upon issuance of the Valuation. For the avoidance of doubt, unless expressly agreed otherwise in writing, the payment of our fees is not conditional on any other events or conditions precedent.

10.2. If any invoice remains unpaid after 30 days of the date on which it is presented, we reserve the right to charge interest, calculated daily, from the date when payment was due until payment is made at 3%

10.3. If we should find it necessary to use legal representatives or collection agents to recover monies due, you will be required to pay all costs and disbursements so incurred.

10.4. If an appraisal analysis is ordered and the assignment is cancelled before completion, we reserve the right to receive compensation, by way of damages, in an amount equal to 70% of the total fee for the assignment.

10.5. If you delay the instruction by more than 30 days or materially alter the instruction so that additional work is required at any stage or if we are instructed to carry out additional work that we consider (in our reasonable opinion) to be either beyond the scope of providing the Valuation or to have been requested after we have finalised our Valuation (including, but not limited to, commenting on reports on title), we will charge additional fees for this work. Such additional fees will be calculated on the basis of a proportion of the total fee by reference to reasonable time and expenses incurred.

10.6. Where we agree to accept payment of our fees from a third party, such fees remain due from you until payment is received by us.

11. Anti-bribery and corruption and Anti-Money Laundering
We agree that throughout the term of our appointment we shall:

(a) comply with all applicable laws, statutes, regulations, and codes relating to anti-bribery and corruption and Anti-Money Laundering laws (the "**Relevant Requirements**");

(b) not engage in any activity, practice or conduct which would constitute an offense;

(c) maintain anti-bribery, anti-corruption, and anti-money laundering policies to comply with the Relevant Requirements and any best practice relating thereto; and

(d) promptly report to you any request or demand for any undue financial or other advantage of any kind in connection with the performance of our services to you.

12. Portfolios
Properties comprising a portfolio, unless specifically agreed with you otherwise, will be valued separately and upon the assumption that the properties have been marketed individually and in an orderly manner.

13. Land Register inspection and searches
We are not required to undertake searches, validations or inspections of any kind for title or price paid information in any publicly available land registry.

14. Title and burdens
We will assume, unless specifically informed and stated otherwise, that each property has good and marketable title and that all documentation is satisfactorily drawn and that there are no unusual outgoings, planning proposals, onerous restrictions or local authority intentions which affect the property, nor any material litigation pending.

15. Disposal costs and liabilities
No allowance is made in our Valuation for expenses of realisation or for taxation which may arise in the event of a disposal and our Valuation is expressed as exclusive of any VAT that may become chargeable. Properties are valued disregarding any mortgages or other charges, including commissions.

16. Sources of information
We rely upon the information provided to us by you, as to details of tenure and tenancies, planning consents and other relevant matters, as summarised in our Valuations. Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser.

17. Identity of property to be valued
We will exercise reasonable care and skill (but will not have an absolute obligation to you) to ensure that the property, identified by the property address in your instructions, is the property inspected by us and contained within our valuation report. If there is ambiguity as to the property address, or the extent of the property to be valued, this should be drawn to our attention in your instructions or immediately upon receipt of our report.

18. Boundaries
Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.

19. Planning, highway and other statutory regulations
19.1. Enquiries of the relevant planning and highways authorities in respect to matters affecting properties, where considered appropriate, are normally only obtained from the corresponding government agency. We can only state whatever current conditions may be. We recommend that formal written enquiries should be undertaken by your lawyers who should also confirm the position with regard to any legal matters referred to in our Valuations.

19.2. It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative, regulatory, or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.

19.3. We assume that the premises comply with all relevant statutory requirements including environmental, building, fire, and sanitation regulations.

20. Property insurance
Our Valuation assumes that each property would, in all respects, be insurable against all identifiable risks.

21. Building areas and age
Where so instructed, areas provided from a quoted source will be relied upon. Any dimensions and areas measured on location or from plan/s are calculated and are quoted to a reasonable approximation, with reference to their source. Where the age of the building is estimated, this is for guidance only.

22. Structural condition
Building, structural and ground condition surveys are detailed investigations of the building, the structure, technical services and ground and soil conditions undertaken by specialist building surveyors or engineers and fall outside the normal scope of a valuation. Since we will not have carried out any of these investigations, we are unable to report that any property is free of any structural fault, rot, infestation or defects of any other nature, including inherent weaknesses due to the use in construction of deleterious materials. We do reflect the contents of any building survey report provided to us in advance, or any defects or items of disrepair of which we are advised or which we note during the course of our ocular inspections but otherwise assume properties to be free from defect.

23. Ground conditions
Unless informed otherwise in writing, we assume there to be no adverse ground or soil conditions and that the load bearing qualities of the sites of each property are sufficient to support the building constructed or to be constructed thereon.

24. Environmental issues
24.1. Investigations into environmental matters by suitably qualified environmental specialists would usually be commissioned by most responsible purchasers or chargees of higher value properties or where there was any reason to suspect contamination or a potential future liability. Furthermore, such investigation would be pursued to the point at which any inherent risk was identified and quantified before a purchase proceeded. Where we are provided with the

conclusive results of such investigations, on which we are instructed to rely, these will be reflected in our Valuations with reference to the source and nature of the enquiries. We would endeavour to point out any obvious indications or occurrences known to us of harmful contamination encountered during the course of our valuation enquiries.

24.2. However, we are not environmental specialists and therefore we do not carry out any scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination or any other environmental searches. If we are not provided with the results of appropriate investigations as outlined above and where there is no obvious indication of harmful contamination, our Valuation will be provided on the assumption that the relevant property is unaffected. Where we are informed that contamination is suspected or confirmed, but adequate investigation has not been carried out and made available to us, then the Valuation will be qualified only by reference to it.

25. Minerals, timber, airspace etc.

Unless specifically agreed otherwise in writing and so stated within the main body of the relevant Valuation, we do not value or attempt to value or take into account any potential income stream or other beneficial or detrimental effect or other factor relating to undiscovered or unquantified mineral deposits, timber, airspace, sub-ground space or any other matter which would not be openly known in the market and considered to have value.

26. Legal advice

26.1. We are appointed to provide valuation opinion(s) in accordance with our professional duties as Appraisers. The scope of our service is limited accordingly. The valuation assumes no responsibility for the validity of legal matters affecting the property. It is not the intent of the valuation to offer a legal opinion of title. Any liens or encumbrances which may now exist have been disregarded. We are not qualified legal practitioners and we do not provide legal advice and any statements made by us, or advice given, in a legal context should be construed accordingly.

26.2. Where appropriate we will liaise with your legal advisors. However, we accept no responsibility for any work carried out by them and we will not be liable for anything contained in legal documentation prepared by them.

26.3. Where we consider it is necessary for the provision of the Valuation and/or specifically agree to do so, and any additional fees we require for this work are agreed, we will read legal documents (including leases, licences etc.), however, (save for any comment concerning the impact of our interpretation of such documents on value) our interpretation of such documents cannot be relied upon to be legally correct. Where we do interpret legal documents, we will, for the purposes of providing our Valuation, assume our interpretation to be correct.

27. Loan security

Where instructed to comment on the suitability of property as a loan security we are only able to comment on any inherent property risk. Determination of the degree and adequacy of capital and income cover for loans is the responsibility of the lender having regard to the terms of the loan.

28. Build cost information

In the provision of valuation services we do not hold ourselves out to have expertise in assessing build costs. Where our instruction requires us to have regard to build cost information, for example in the valuation of properties with development potential, we strongly recommend that you supply us with build cost and other relevant information prepared by a suitably qualified construction cost professional, such as a quantity surveyor. The Valuation will be stated to have been arrived at in reliance upon the build cost information supplied to us by you. In the absence of any build cost information supplied to us, we may have regard to published build cost information. Build costs produced using this approach must be assumed to be unreliable or inaccurate; any reliance which can be placed upon our Valuation in these circumstances is severely restricted. Specialist professional advice on the build costs should be sought by you. If you subsequently obtain specialist build cost advice, we recommend that we are instructed to review our Valuation.

29. Reinstatement assessments

A reinstatement assessment for insurance purposes is a specialist service and we recommend that separate instructions are issued for this specific purpose. If an indication is required as a check against the adequacy of existing cover this should be requested and will be so stated in the body of the relevant Valuation. Any indication given is provided for guidance only and must not be relied upon as the basis for insurance cover. In any event, our reinstatement assessment should be compared with the owner's and if there is a material difference, then a full reinstatement valuation should be reconsidered.

30. Comparable evidence

Where comparable evidence information is included in our Valuation, this information is often based upon our oral enquiries and its accuracy cannot always be assured, or may be subject to undertakings as to confidentiality. However, such information would only be referred to where we had reason to believe it or where it was in accordance with our expectation. In addition, we have not inspected comparable properties.

31. Valuation bases

Valuations are carried out on a basis appropriate to the purpose for which they are intended and in accordance with the relevant definitions, commentary and assumptions. The basis of valuation will be agreed with you and specified in the Letter and in the relevant Valuation.

Important Notice

If you have any queries relating to this Agreement please let us know as soon as possible, and in any event before signing the Letter and/or giving us instructions to proceed.

Your instructions to proceed, preferably signing on the space provided for under the Letter, will constitute your acceptance to use our services on the terms of the Agreement.

Accordingly, our commencement of work pursuant to your instructions shall constitute acceptance of your offer and as such establish the contract between us on the terms of the Agreement.

LEASEHOLD IMPROVEMENTS	
Description	**Market Value (PhP)**
Robinsons Cyber Sigma - As seen during our inspection for the previous valuation done, Robinsons Cyber Sigma is a twenty-one (21)-storey, PEZA-registered, reinforced concrete-framed office building with roofdeck. Construction of the building was reportedly completed sometime in August 2017. The building is divided into two (2) zones; the Low Zone (7th to 14th Floors) and the High Zone (14th to 21st Floors). The ground floor houses the main lobby and some retail areas occupied by Ministop, 24/7 Customer Philippines and Tim Hortons. Lower Ground and 2nd to 6th Floors are mainly used as parking areas while the rest of the upper floors are utilized mainly as offices. Part of the Lower Ground is also occupied by BDO, Union Bank and Robinsons Bank. Tenants at the upper floors, meanwhile, include EY GDS (CS) Philippines Inc., and KMC. Architectural details and/or finishes of the building consist of reinforced concrete footings and foundations, reinforced concrete floor slabs at all levels, reinforced concrete columns, girders and beams construction. External finishes consist of mainly aluminum panels with curtain wall of clear and solar reflective glass, and steel louver on parking levels. Interior finishes comprise natural stone walls, granite and ceramic tiles finishes for the main and elevator lobbies. Typical standard office floors have plastered cement finish walls and columns, plasterboard and painted walls. Individual tenancy fit-outs are generally the responsibility of the tenants according to their particular requirements. Fit-outs introduced typically comprise of a combination of raised flooring, wall-to-wall carpet, ceramic or vinyl tile coverings, suspended tile or plasterboard lined ceilings with recessed fluorescent lighting. Since these were reportedly shouldered by the tenants, we have excluded them in this report. The building is provided with mechanical and electrical services such as elevators, air conditioning and ventilating system, electrical power and distribution system, domestic water supply system, fire fighting system, and security monitoring described in detail and valued in the equipment section of this report. The building is painted and provided with complete electrical lighting and plumbing facilities. Based on the floor area tabulation provided to us by the client, the building has a total gross floor area of about 73,522.08 sq.m.	**1,724,000,000** ============

BUILDING MACHINERY & EQUIPMENT

Description	Market Value (PhP)
Elevators	
8-Passenger Elevators (7th to 21st Floor) - Mitsubishi, 15 landings, 24 persons capacity, 1600 kgs. total load, complete with electric drive motor, governor, elevator controller, railings, electrical wirings, limit switches and other standard accessories	95,570,000
Service Elevator (LG to 21st Floor) - Mitsubishi, 21 landings, 24 persons capacity, 1600 kgs. total load, complete with electric drive motor, governor, elevator controller, railings, electrical wirings, limit switches and other standard accessories	15,354,000
2-Parking Elevators (LG to 6th Floor) - Mitsubishi, 7 landings, 21 persons capacity, 1600 kgs. total load, complete with electric drive motor, governor, elevator controller, railings, electrical wirings, limit switches and other standard accessories	11,150,000
Total for Elevators -	**122,074,000**

Air Conditioning and Ventilating System

Lot-Centralized Air Conditioning System-
Trane, 180 tons total refrigeration capacity, consisting of:

3-Air Cooled Chillers-
Smart DT, Model AD028.1BH06.F4A, package type, 2017 year manufactured, each 60 tons of refrigeration capacity, driven by 54.6 kw electric, complete with controls and other standard accessories

3-Chilled Water Pumps (Primary)-
Us Motors, Model ETN 65-200, centrifugal type, each driven by 3.8kW kw electric motor, baseplate mounted on concrete foundation, complete with piping connections, valve and fittings, controls and standard accessories

4-Chilled Water Pumps (Secondary)-
Us Motors, Model ETN 50-250, centrifugal type, each driven by 5.625kW kw electric motor, baseplate mounted on concrete foundation, complete with piping connections, valve and fittings, controls and standard accessories

Air Handling Unit-
Trane, Model BDHA20, horizontal cabinet vertical discharge draw type, 5 tons of refrigeration capacity, blower belt driven by electric motor

9-Air Handling Units-

Trane, Model BDHA34, horizontal cabinet vertical discharge draw type, 7.5 tons of refrigeration capacity, blower belt driven by electric motor

9-Air Handling Units-

Trane, Model BDHA40, horizontal cabinet vertical discharge draw type, 10 tons of refrigeration capacity, blower belt driven by electric motor

Air Handling Unit-

Trane, Model BDCB60, horizontal cabinet vertical discharge draw type, 15 tons of refrigeration capacity, blower belt driven by electric motor

2-Air Handling Units-

Trane, Model CLCP AHU - E, horizontal cabinet vertical discharge draw type, 20 tons of refrigeration capacity, blower belt driven by electric motor

Fan Coil Unit-

Trane, Model HCFC08L405200CA02A, ceiling concealed ducted type, 2 tons capacity, fan driven by electric motor

2-Fan Coil Units-

Trane, Model HCFC12L405200CA02A, ceiling concealed ducted type, 2 tons capacity, fan driven by electric motor

3-Fan Coil Units-

Dunham Bush, split type AC inverter, 2 tons capacity, fan driven by electric motor

System complete with BMS controller, piping and connections and other standard accessories

Note: only servicing LG & GF

11,457,000

Lot-Air Conditioning System-

Mitsubishi Electric Citi Multi, Variable Refrigerant Flow (VRF) System, modular type, system comprsing of:

28 - ACCU Outdoor Units (ACCU A1-A2)-

Mitsubishi, Model PUCY-P1100YSKA, VRF type, 414,600 btu/hr, 34.5 tons of refrigeration capacity, driven by 35.2kW electric motor

22 - ACCU Outdoor Units (ACCU B1-B2)-

Mitsubishi, Model PUCY-P800YSKA, VRF type, 300,300 btu/hr, 25 tons of refrigeration capacity, driven by 25.4kW electric motor

28 - ACCU Outdoor Units (ACCU C1-C2)-

Mitsubishi, Model PUCY-P650YSKA, VRF type, 245,700 btu/hr, 20.4 tons of refrigeration capacity, driven by 19.6kW electric motor

28 - ACCU Outdoor Units (ACCU D1-D2)-

Mitsubishi, Model PUCY-P650YSKA, VRF type, 245,700 btu/hr, 20.4 tons of refrigeration capacity, driven by 19.6kW electric motor

6 - ACCU Outdoor Units (ACCU BA-BB)-

Mitsubishi, Model PUCY-P900YSKA, VRF type, 327,600 btu/hr, 27.3 tons of refrigeration capacity, driven by 31.4kW electric motor

616 - ACCU Indoor Units (FCU) -

Ceiling mounted, 2.5 TR cooling capacity

12 - ACCU Indoor Units (FCU) -

Ceiling mounted, 2 TR cooling capacity

392 - ACCU Indoor Units (FCU) -
Ceiling concealed ducted type, 2.5 TR cooling capacity
112 - ACCU indoor (FCU) -
Ceiling mounted, 2.5 TR cooling capacity
5 - ACCU Indoor Units (FCU) -
Ceiling mounted, 3 TR cooling capacity
System complete with piping connections, electrical and controls system, valve and fittings, and other standard accessories
Note: Installed in various locations

203,098,000

Lot-Air Ventilation and Exhaust System-
Consisting of:
6-Exhaust Fans (EF-1)-

Niagara, Model NIA- 160, 255 cmh, driven by 0.048 kw electric motor, complete with controls and ductings
14-Exhaust Fans (EF-2)-
Niagara, Model NIA- 24, mild steel casing with filter screen, 9350 cmh, driven by 0.75 kw electric motor, complete with controls and ductings

Exhaust Fan (EF-3)-
Niagara, Model 15CWTH, mild steel casing with filter screen, 3570 cmh, driven by 1.5 kw electric motor, complete with controls and ductings
Exhaust Fan (EF-4)-
Niagara, Model 15CWTH, mild steel casing with filter screen, 3570 cmh, driven by 1.5 kw electric motor, complete with controls and ductings
Exhaust Fan (EF-5)-
Niagara, Model 24CWTH, mild steel casing with filter screen, 9520 cmh, driven by 3.75 kw electric motor, complete with controls and ductings
Exhaust Fan (EF-6)-
Niagara, Model 30CWTH, mild steel casing with filter screen, 14280 cmh, driven by 5.625 kw electric motor, complete with controls and ductings
2-Exhaust Fans (EF-7 & 8)-
Niagara, Model 30CWTH, mild steel casing with filter screen, 14280 cmh, driven by 5.625 kw electric motor, complete with controls and ductings
Exhaust Fan (EF-9)-
Niagara, Model 22CWTH, mild steel casing with filter screen, 10200 cmh, driven by 3.75 kw electric motor, complete with controls and ductings
4-Fresh Air Fans (FAF-A to D)-
Niagara, Model 30CWTH, mild steel casing with filter screen, 14280 cmh, driven by 5.625 kw electric motor, complete with controls and ductings
Fresh Air Fan (FAF-1)-
Niagara, Model 189S, mild steel casing with filter screen, 510 cmh, driven by 1.5 kw electric motor, complete with controls and ductings
3- Pressurization Fans (PF-1 to 3)-

Niagara, Model 30CWTH, mild steel casing with filter screen, 17000 cmh, driven by 5.625 kw electric motor, complete with controls and ductings

Pressurization Fan (PF-4)-

Niagara, Model 36CWTH, mild steel casing with filter screen, 25500 cmh, driven by 5.625 kw electric motor, complete with controls and ductings

Smoke Evacuation Fan (SEF-1)-

Niagara, Model 36CWTH, mild steel casing with filter screen, 27200 cmh, driven by 7.5 kw electric motor, complete with controls and ductings

System complete with ductings installations, electrical and controls system and other standard accessories

Note: Installed in various locations

	2,310,000

Total for Air Conditioning and Ventilating System -	**216,865,000**

Lot-Standby Power Supply and Electrical Power Distribution System-
Consisting of:
2-Standby AC Electric Generators -
Leroy Somer, Model MG-L51S58, 2125 kva/1700 kw rated capacity, 0.80 power factor, powered by:
16-Cylinder Diesel Engine-
Mitsubishi, Model MGS1500B, turbo-charged diesel engine, radiator-cooled, 1800 rpm, 60 hz., complete with batteries, skid mounted on concrete foundation
2-Standby AC Electric Generators -
Leroy Somer, Model MG-L50V18, 1750 kva/1420 kw rated capacity, 0.80 power factor, powered by:
16-Cylinder Diesel Engine-
Mitsubishi, Model MGS1400B, turbo-charged diesel engine, radiator-cooled, 1800 rpm, 60 hz., complete with batteries, skid mounted on concrete foundation
Synchronization Panel
Metal clad casement, free standing, complete ATS, main and sub-breakers, magnetic contactors, relays, wattmeters, volmeters, pilot lights, on/off swithes, push button switches, and other standard accessories
Main Fuel Storage Tank
Mild steel plate of welded construction, cylindrical type, horizontally mounted with steel support, 76,000 liters capacity, equipped with:
Fuel Transfer Pump-
Rotary gear type, driven by .75 kw electric motor
Storage Tank
Mild steel plate of welded construction, cylindrical type, horizontally mounted with steel support, 14,900 liters capacity, equipped with:
Fuel Transfer Pump-
Rotary gear type, driven by .75 kw electric motor
Storage Tank
2- Power Transformers
Cooper, Model 0001YA66XYLA, 2500 kva capacity, 34,500 volts primary, 460 volts secondary voltages, oil immersed, equipped with cooling units and other accessories

2- Vacuum Fault Interrupters-
Cooper, Model VFI-5, 35kv capacity, oil immersed,pad mounted switchgear
Low Voltage Switchgear (LVSG1) -
Metal clad casement, free standing with 9 vertical sections, complete with main breakers, sub-breakers, magnetic contactors, relays, timers, on/off switches, pushbutton switches, pilot lights automatic transfer switch and standard accessories
Low Voltage Switchgear (LVSG2) -
Metal clad casement, free standing with 9 vertical sections, complete with main breakers, sub-breakers, magnetic contactors, relays, timers, on/off switches, pushbutton switches, pilot lights automatic transfer switch and standard accessories
3- Manual Transfer Switches-
Metal clad casement, free standing with 1 vertical section, 4,000 amperes rating
System complete with wirings, panel boards, mechanical and electrical installation and accessories **111,626,000**

Lot-Automatic Fire Fighting, Fire Protection and Alarm System -
Consisting of:
Diesel Fire Pump-
Fairbanks, Model NIJHUIS/ 12M-7000FF, vertical turbine, 750 gpm GPM rated capacity, power driven by:
6-Cylinder Diesel Engine-
Model JU6H-UFM2, rated 200 Hp/150 kw, complete with valves, piping and fitting connections, fie pump controller and other standard accessories
Electric Fire Pump-
Fairbanks, Model NIJHUIS/ 12M-7000FF, vertical turbine, 750 gpm GPM rated capacity,driven by 112kW Eaton electric motor, complete with valves, piping and fitting connections, fire pump controller and other standard accessories
Jockey Pump-
Pentair, Model L50P4LH, sybmersible type, 40 GPM, driven by 10 hp/7.5 kw electric motor complete with jockey pump controller
2-Fire Pump Controllers-
Eaton
Jockey Pump Controller-
Eaton
Fire Tank-
mild steel construction, 45,000 liter capacity
132-Fire Hose Cabinets-
30 m x 1 1/2 " hose, with nozzle
25-Fire Extinguishers-
HFC-123 type, 10 lbs capacity
68-Fire Extinguishers-
ABC Dry chemical type, 10 lbs capacity
13-Fire Extinguishers-
AFFF wheel type, 50 lbs capacity
4-Fire Extinguishers-
HCFC wheel type, 50 lbs capacity
37-Fire Extinguishers-
FSS, 10 lbs capacity
546-Sprinkler heads
817-Smoke Detectors

6- Heat Detectors
72 - Manual Push Stations
68 - Strobe Speakers
FDAS
Notifier, Model NFS2-3030 onyx series
System complete with electrical and piping installations, valves, fittings and other standard accessories **13,761,000**

Lot-Water Supply and Sewerage System-
Consisting of:
2-Booster Pumps-
Paco, Model 1270-9, 120 GPM, driven by 10.0 kw electric motor, complete with valves, pipings, fittings, controls and other standard accessories
2-Transfer Pumps-
Fairbanks, Model 7M-7000, 250 GPM, driven by 37.0 kw electric motor, complete with valves, pipings, fittings, controls and other standard accessories
Bladder Tank-
Mild steel plate of welded construction, 1500 liters capacity
2- Elevated Water Tanks-
Stainless steel construction, 15,000 liters capacity, horizontally mounted with steel support
Rain Water Tank
Mild steel plate of welded construction, 15,000 liters capacity, horizontally mounted with steel support
System complete with electrical and piping installations, valves, fittings, controls and other standard accessories **3,024,000**

Lot-Sewage Treatment Plant -
Approximately at an average of 70 cubic meters per day effluent working capacity, complete with 2-11 kw sbr air blowers, 1-asd air blower, 2-2.2 kw influent pumps, 2-3.7 kw effluent pumps,2-0.37 kw sludge pumps, exhaust/intake fans, carbon filters, air diffusers, valves, fittings, piping installations, equalization tank, sbr basin, chlorine contact chamber, sludge digester, electrical , piping installations, controls and other standard accessories **5,386,000**

Lot-CCTV Security Montoring System -
Consisting of:
45-CCTV Cameras-
Dome type
61-CCTV Cameras-
Bullet type
6-LCD TV Monitors-
Samsung, 50in
CPU Monitor
samsung, 19in
CPU
HP, I5
2-DVR
3-UPS
System complete with wiring connections and other standard accessories **3,069,000**

Others

Walkthrough Metal Detector-	171,000
Gondola MHE Demag, Model Chameleon I-1600/SW500, 500 kgs capacity, complete with cage, winch, weights, drive motor and other standard accessories	3,702,000
Lot-Parking Equipment - consisting of: 4- Traffic Barriers- JSST, Model JSDZ020103-R, straight arm type 2- Traffic Barriers- JSST, Model JSDZ020103-R, articulated arm type 12- Traffic Lanterns- Beninca, Model VE.TL 12- Loop Hole Detectors- Beninca, Model VE.KM1HN 12- Car Ramp Controllers- Beninca, Model VE.CS system complete with connection, wirings and other standard accessories	649,000

Total for Others -	**4,522,000**

Total for Building Machinery & Equipment -	**480,327,000**

Contents

Appendices

1 Instructions

Engagement of Santos Knight Frank

Instructions	1.1	We refer to our Letter of Engagement dated 21 September 2020 and Amendment dated 01 June 2021, to provide a Valuation Report on the opinion of **Market Value** using Cost and Income Approaches of that certain Property consisting of leasehold of land, building, other land improvements, and building machinery & equipment of a site identified as **Cyberscape Alpha** located at **Sapphire and Garnet Road, within Barangay San Antonio (Oranbo) Pasig City, Metropolitan Manila** ("the Property"). A copy of that document is attached herein as Appendix **2**.
	1.2	This valuation has been carried out by Santos Knight Frank, Inc. ("Santos Knight Frank" or "SKF"), in accordance with our General Terms of Business for Valuations ("General Terms of Business"), as attached as Appendix **3**.
Client	1.3	Our client for this instruction is **Robinsons Land Corporation** ("the Client").
Valuation standards	1.4	This valuation has been undertaken in accordance with the International Valuation Standards, as well as other local standards.
Purpose of valuation	1.5	You have confirmed that this valuation is for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
Conflict of interest	1.6	We confirm that we do have a material connection or involvement giving rise to a potential conflict of interest, as set out below: We have conducted the valuation of the same Property for you as of 30 September 2020 for purposes of: i) the tax-free exchange of assets to a REIT Company, and (ii) for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
	1.7	You have confirmed this Engagement notwithstanding this matter, you are content for us to proceed with this instruction. We are providing an objective and unbiased valuation.
	1.8	We are acting as external and independent valuers in this engagement.
Responsibility to third parties	1.9	Our valuation report is only for the use of our Client and for the purposes for which are stated herein, and no liability is accepted to any third party for the whole or any part of its contents.
Disclosure & publication	1.10	Except for the purposes which are stated herein, neither the whole nor any part of this valuation nor any reference thereto may be included in any published

document, circular or statement nor published in any way without our prior written approval of the form or context in which it may appear.

Limitations on liability 1.11 No claim arising out of or in connection with this valuation report may be brought against any member, employee, partner, director or consultant of Santos Knight Frank, Inc. Those individuals will not have a personal duty of care to any party and any claim for losses must be brought against Santos Knight Frank, Inc.

1.12 Santos Knight Frank, Inc.'s total liability for any direct loss or damage caused by negligence or breach of contract in relation to this instruction and valuation report is limited to the amount of the level of our fee, specified in the Letter of Engagement, a copy of which is attached as Appendix **2**. We do not accept liability for any indirect or consequential loss (such as loss of profits).

1.13 The above provisions shall not exclude or limit our liability in respect of fraud or for death or personal injury caused by our negligence or for any other liability to the extent that such liability may not be excluded or limited as a matter of law.

Expertise 1.14 The valuation process was performed by **Raymond F. Dechavez**, under the supervision of **Jacqueline T. Guerta** and **Jesus Constance M. Castro**, both licensed Real Estate Appraisers. The Principal Signatory on behalf of Santos Knight Frank, Inc. and who also reviewed the Valuation Report, is **Mr. Wenceslao D. Fuentes, Jr.**, also a licensed Real Estate Appraiser. We confirm that the above-named Licensed Real Estate Appraisers are registered with the Professional Regulation Commission ("the PRC"), having sufficient current knowledge of the particular market and the skills and understanding to undertake the valuation competently.

Vetting 1.15 This report has been vetted as part of Knight Frank global standards.

Scope of enquiries & investigations

Inspection 1.16 In accordance with your instructions, due to the limited timeframe to complete the Engagement, we have not conducted a current inspection. The Property has been previously inspected. Valuation rendered is a result of a revaluation of a property that has previously been inspected.

1.17 The Client has provided us with information regarding the changes to the physical attributes and/or characteristics of the Property; current or anticipated changes in rental income from the Property; and material changes to the non-physical attributes of each property, such as other lease terms, planning consents, statutory notices and other relevant information which have occurred between the valuation date and the date of our previous valuation. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.

Investigations 1.18 The extent of enquiries/investigations made is set out in our General Terms of Business. In carrying out this instruction we have undertaken verbal / internet-

based enquiries referred to in the relevant sections of this report. We have relied upon this information as being accurate and complete.

Information provided 1.19 In this report, we have been provided with information/documents by the Client for the previous valuation done as well as for the current engagement. We have relied upon this information as being materially correct in all aspects. In particular, we detail the following:

- floor plans
- floor area tabulation
- lot area allocation
- rent roll
- financial statements
- projections
- historical and current occupancy

Valuation bases

1.20 In accordance with your instructions, we have provided an opinion of value on the basis of **Market Value**.

Market Value (MV) 1.21 Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property.

It is further assumed that title to the Property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable.

The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.

Valuation date 1.22 The valuation date is **30 June 2021.**

2 The Property

Location

Address 2.1 The Property, identified as Cyberscape Alpha, is a twenty-five (25)-storey office building located along the southwest side of Sapphire Road extending south-westward to Garnet Road, midway between ADB Avenue and F. Ortigas Road, within Ortigas Center, Barangay San Antonio (formerly Oranbo), Pasig City, Metropolitan Manila.

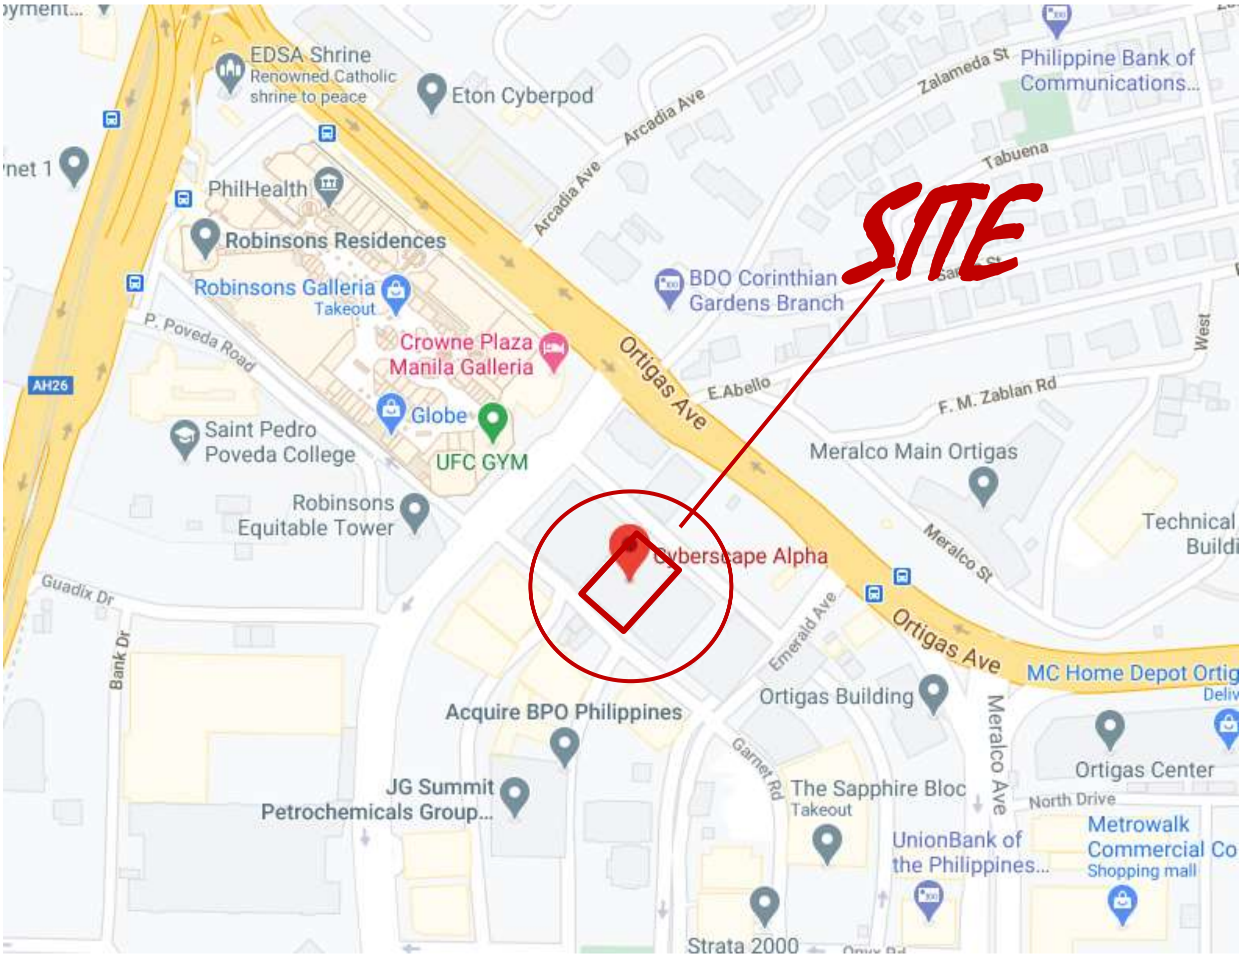
The site is right across Greenhills Christian Fellowship Church, about 190 meters southeast from Robinsons Galleria, 220 meters southeast from St. Pedro Poveda College, 410 meters northwest from Metrowalk Complex, 490 meters southeast from Epifanio Delos Santos Avenue (EDSA), or about 770 meters northeast from SM Megamall.

The bounding roads have width ranging from 12 to 14 meters, concrete-paved, with concrete curbs and gutters, and underground drainage system.

Below is a satellite image courtesy of Google Maps while on the next page is a vicinity map, both showing the Property and its relation to the immediate vicinity.

Note: Image courtesy of Google Maps.

2.2 The street plan below shows the location of the Property.



Neighborhood

2.3 Land development in the area is generally for commercial purposes, interspersed with several residential, office/commercial condominium developments. Some notable developments in the vicinity of the Property include Greenhills Christian Fellowship Church, Robinsons Galleria, Philippine Overseas Employment Administration Building (POEA), Crowne Plaza Galleria Manila, St. Pedro Poveda College, AIC Burgundy Empire Tower, and SM Megamall, among others.

Accessibility

2.4 Taxicabs, jeepneys and shuttle UV express are easily available throughout the day along the major thoroughfares in the area such as Meralco Avenue and Ortigas Avenue Extension which connects to other sections of Pasig City and other sections of the metropolis.

Other community centers like post office, churches, hospitals, and public and private schools are likewise accessible from the Property.

Land Details

Certificates of Title

2.5 Based on document furnished us by the Client, the land consists of a lot technically identified as **Lot 2-B, Psd-00-036193** having an area of **2,500 sq.m.**, more or less. It is covered by Transfer Certificate of Title No. **011-2011001006** issued in favor of **the Client** on 16 May 2011 by the Registry of Deeds for the City of Pasig.

The land is bounded by the following properties:

Northeast	-	Road Lot 13 – Sapphire Road
Southeast	-	Lot 2-C
Southwest	-	Road Lot 12 – Garner Road
Northwest	-	Lot 2-A

2.6 In our valuation, we have assumed a good and marketable title and that all documentation is satisfactorily drawn.

Draft Contract of Lease

2.7 We were provided by the Client a copy of a Draft Contract of Lease with ROBINSONS LAND CORPORATION, as the Lessor, and RL COMMERCIAL REIT, INC. (formerly Robinsons Realty and Management Corporation)[1], as the Lessee.

Based on the same document, the lease contract stated that it will cover the land being occupied by Robinsons Cyberscape Alpha with an area of 2,500 sq.m. Lease term would be for a period of 99 years. It likewise specified that the monthly lease payments would be 7% of the monthly rental income gained from Robinsons Cyberscape Alpha which is owned by the Lessee (plus VAT, as appliable).

2.8 The management of RLC disclosed that actual lease commencement shall be the date of the Certificate of Approval of the Increase in Authorized Capital Stock of RCR issued by the SEC. However, for valuation purposes, lease commencement shall be assumed on October 1, 2021.

In the absence of a signed contract, we used the foregoing details to establish the leasehold value of the land.

Tenure

2.9 For purposes of this engagement, ownership rights to the land are treated as **leasehold.**

Terrain

2.10 The terrain of the land is flat. Its finished elevation is slightly higher than the existing grade of the fronting roads.

Description of Improvements and Machinery & Equipment

Improvements and Machinery & Equipment

2.11 The land is presently improved with an office building identified as Cyberscape Alpha, a PEZA registered, Grade A office building, construction of which was completed sometime in May 2014. Also included in this appraisal are the appurtenant building machinery & equipment. These are all described in detail in the Schedule of Assets (Appendix **10**).

Tenure

2.12 We were advised that the Client owns the improvements described above. As stated, the land would be covered by a long-term Lease Agreement. We have, however, treated the improvements as freehold.

---

[1] As of the date of this Valuation Report, application for the change in name from "Robinsons Realty and Management Corporation" to "RL Commercial REIT, Inc." is pending the approval of the Philippine SEC.

Accommodation

Measurement

2.13 Based on the information furnished us, total gross floor area of the building is about **68,088.95 sq.m.**

2.14 The Gross Floor Area is tabulated as follows:

Condition

Scope of Inspection

2.15 As stated earlier, we have previously inspected the Property.

2.16 As stated in the General Terms of Business, during our previous inspection, we have not undertaken a building or site survey of the Property, as it is beyond the normal scope of appraisal.

2.17 We have carried out visual inspection only without any structural investigation or building survey. During our limited inspection, we did not inspect any inaccessible area/s. We are unable to confirm whether the Property is free from urgent or significant defects or items of disrepair.

2.18 Unless otherwise stated, we have not been able to carry detailed on-site measurement to verify the site and gross floor areas of the Property and we have no reason to doubt the truthfulness of the areas shown on the documents provided us.

2.19 Moreover, due to the nature of the machinery, we have not carried out mechanical inspection, and our assessment was based on the premise that the machinery is in a condition commensurate with age and normal usage.

2.20 In the Schedule of Assets or Asset Inventory, machinery and/or equipment were listed as complete units i.e., machinery and/or equipment are meant to include all parts and accessories normally comprising the unit.

Comments

2.21 Apart from the matters specifically referred to below, we have assumed that the Property is in sound order and free from structural faults, rot, infestation or other defects, and that the services are in a satisfactory condition.

2.22 The buildings and structures, including the machinery & equipment, were assumed to be in a generally good condition commensurate with their age and use. It was also assumed that there are no urgent or significant defects or items of disrepair which would be likely to give rise to substantial expenditure in the foreseeable future or which fall outside the scope of the normal annual maintenance programme.

Ground conditions

2.23 We have not been provided with a copy of a ground condition report for the site. We have assumed that there is no adverse ground or soil conditions and that the load bearing qualities of the site are sufficient to support the building (to be constructed) thereon.

Services

2.24 It would appear from our previous inspection that main supplies of electricity and water are provided to the Property. Telephone communication facilities are likewise available. Sewer and drainage are believed to be discharged to the building's sewerage system.

Tenancies

Tenancy Information

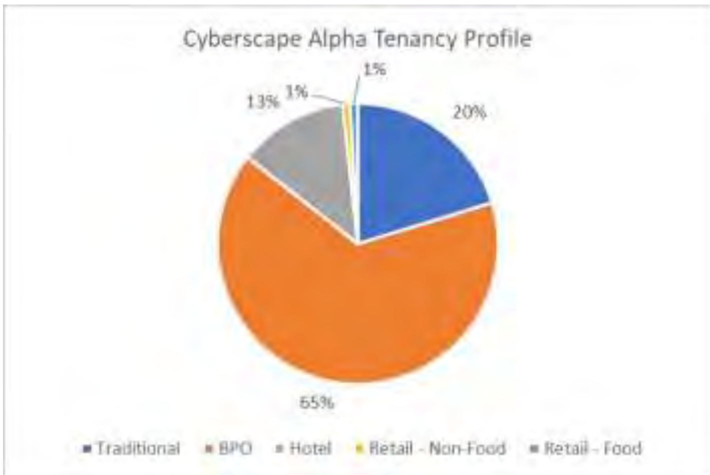
2.25 We have been provided with copy of some of the rent roll including some of the lease contracts by the Client and have relied on that information as being correct. No additional verification has been undertaken.

2.26 A summary of the Property tenancies is presented below.

TENANT	LEASED AREA (GROSS, in sq.m.)	Lease Contract Start	End
Tenant 1	160.76	01-Mar-14	30-Apr-24
Tenant 2	288.16	01-Mar-14	30-Apr-24
Tenant 3	159.12	02-Jan-20	01-Apr-25
Tenant 4	129.24	01-Dec-14	31-Jan-25
Tenant 5	131.48	02-May-16	01-Aug-24
Tenant 6	1,540.90	26-Jan-15	10-Apr-23
Tenant 7	493.04	01-Nov-19	31-Dec-24
	2,033.94	15-May-18	30-Jun-23
Tenant 8	2,033.94	27-Nov-14	31-Dec-25
	2,033.94	27-Nov-14	31-Dec-25
Tenant 9	2,033.94	01-Oct-14	30-Nov-24
	1,007.37	02-May-20	31-May-25
Tenant 10	2,033.94	15-Mar-15	31-May-25
	2,033.94	15-Mar-15	31-May-25
Tenant 11	2,033.94	02-May-20	31-Aug-27
Tenant 12	508.90	15-Aug-14	14-Oct-24
	2,033.94	15-Aug-14	14-Oct-24
Tenant 13	10,169.70	01-Oct-13	30-Jun-24
Tenant 14	1,056.91	01-Sep-14	30-Nov-24
	2,033.94	01-Sep-14	30-Nov-24
Tenant 15	2,891.42	01-Jan-21	31-Dec-40
	1,111.72	01-Jan-21	31-Dec-40
	1,620.21	01-Jan-21	31-Dec-40
	603.24	01-Jan-21	31-Dec-40
	1,569.36	01-Jan-21	31-Dec-40
	6,320.22	01-Jan-21	31-Dec-40
	254.24	01-Jan-21	31-Dec-40
	1,580.27	01-Jan-21	31-Dec-40

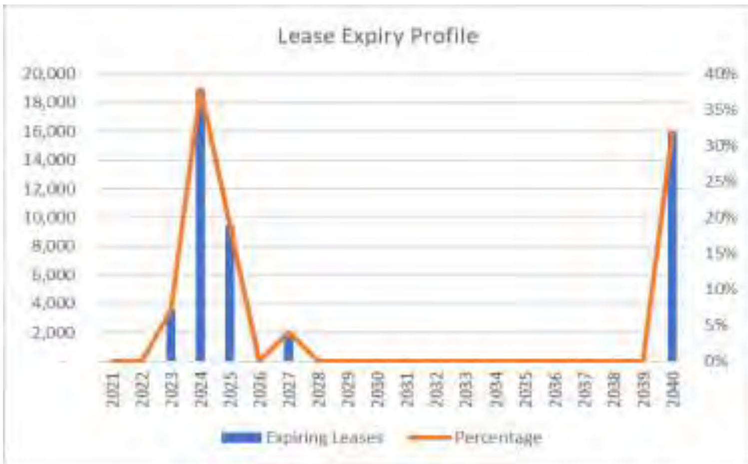
2.27 Based on the rent roll provided, total leasable area is **49,901.72** sq.m. with **405** parking slots are available for lease.

2.28 The Property currently has a mix of traditional offices, Business Process Outsourcing (BPO) companies, seat leasing, hotel and some retail tenants. Based on the figure below which summarizes the tenancy profile of the Property, BPOs currently take up 65% of the Property's leasable area followed by traditional offices at 20% and the hotel takes up around 13% of leased area.



Source: SKF/ RLC

2.29 As of 30 June 2021, the Property is 100% occupied with a Weighted Average Lease Expiry (WALE) of 8.61 years. Earliest period with an expiring lease is 2023 with 7% of total leased area, followed by 2024 with 38% of the leased area with expiring leases. Next period with a sizeable expiring lease would be in 2040 with 32% of leased area.



Source: SKF/ RLC

2.30 Below are some of the provisions as stated in the Lease Contract.

a. **Care of the Leased Premises**

The LESSEE shall at its expense, maintain the Leased Premises in a clean and sanitary condition, free from noxious odors, disturbing noises or other nuisances and, upon the expiration of the lease, shall return the premises and fixtures in as good condition as that in which they were actually found at the beginning of the lease, ordinary wear and tear excepted. The LESSEE shall not drive nails, screws, hooks or other abutments on or into the wall's frames or other portions of the premises or in any manner deface or damage any part thereof. Any damage caused by the LESSEE may be repaired by the LESSOR for the account of the LESSEE. The LESSOR shall have the right to require the LESSEE to remove any display or promotional matter, or any displayed merchandise which LESSOR reasonably and in good faith considers to be improper or inappropriate for the general appearance or presentation of the premises.

The LESSOR shall be responsible for major repairs which are limited to those which affect the structure of the Leased Premises or the building. The LESSEE shall allow access to the LESSOR on the Leased Premises for purposes of repair or remodelling or such other works as may be necessary for the preservation, conservation, improvement or decoration of the building or any part thereof. No compensation or claims shall be allowed against the LESSOR by reason of any inconvenience or annoyance to the LESSEE that may arise by reason thereof.

The LESSEE shall promptly repair, at its own expense, any damage to the Leased Premises or any other improvements within the building caused by bringing into the Leased Premises of any property for the LESSEE's use, or by the installation or removal of such property, regardless of who is at fault or who caused such damage. unless such was clearly caused by the LESSOR, or its agents or employees. In default of such repairs by the LESSEE, the LESSOR may affect the repairs and the LESSEE agrees to promptly pay the LESSOR the cost of such repairs. The LESSEE shall be responsible for the maintenance and repair of the Leased Premises including plumbing and electrical fixtures within the premises or those serving the same.

The LESSEE must notify the LESSOR immediately of any damage to the Leased Premises, their appurtenances as well as any occupation, usurpation or untoward act being committed, or threatened to be committed, within the Leased Premises.

No machinery, furniture, effect, equipment and other properties found within the Leased Premises, whether or not owned by the LESSEE, may be brought into or out of the building without the prior written approval of the LESSOR. Furthermore, in case the LESSEE has any outstanding/unsettled rent, dues or other charges, the LESSOR reserves the right to withhold approval of any request for bringing in or out of any machinery, furniture, effects or other properties found within Leased Premises, whether or not owned by the LESSEE, until such outstanding amounts have been duly settled by the LESSEE. This is without prejudice to such other rights and remedies available to the LESSOR under prevailing laws or the Contract. including these General Terms and Conditions.

The immediately preceding paragraph shall also apply in the event of transfer of machinery, furniture, effects or other properties found within the Leased Premises from one unit to another unit in the building being leased by the LESSEE whether or not the latter unit is owned by the LESSOR. In the event that the unit where the properties to be transferred is not owned by the LESSOR, the written consent of the unit owner shall also be required.

The LESSEE shall further maintain the Leased Premises in a clean condition by utilizing plastic bags for the disposal of both dry and wet garbage. Unless garbage is contained in plastic bags, it will not be allowed to be deposited in the authorized depository for collections.

b. **Sublease, Transfer of Rights**

The LESSEE shall not assign or transfer its rights in the Contract nor sublease or sublet all or any part of the Leased Premises, without the prior written consent of the LESSOR and no rights, title or interest thereto or therein shall be conferred on or vested to anyone other than the LESSEE without such prior written consent. Otherwise, subleasing the leased Premises without the prior written consent of the LESSOR shall be deemed a breach of the contract by the LESSEE and shall be subject to the rights and remedies available to the LESSOR under prevailing laws and Contract, including these General Terms and Conditions. In the event of sublease with or without the prior written consent of the LESSOR, the LESSEE shall remain principally liable. However, the LESSOR shall have the right to exercise such remedies embodied in the Contract, the General Terms and Conditions and under prevailing laws, as against the sublessee in order to protect its right and interests.

Only the LESSEE has the right to use the Leased Premises as its official address to be registered with any government entities for the issuance of necessary permits and licenses for its business operations.

Should the LESSOR give the LESSEE its consent to sublease the Leased Premises, the LESSEE cannot sublease the Leased Premises for the period longer that the Contract of Lease between the LESSOR and the LESSEE.

It is expressly understood that the LESSEE has no goodwill or patronage rights over the Leased Premises; that such rights belong exclusively to the LESSOR, being the owner of the Leased Premises, which forms part of the building; and that the LESSEE may not sell or dispose of said goodwill or patronage rights to any person.

c. **Assignment of Rights/Mortgage/Encumbrance**

The LESSOR reserves the right to assign and convey or mortgage or otherwise encumber its rights to this lease in favor of any affiliate or subsidiary or to any party. In the event of any assignment, conveyance, mortgage, or encumbrance of the Leased Premises, the LESSOR binds itself to require the assignee or mortgage or beneficiary of the encumbrance to respect and abide by all the terms and conditions of the Contract, as well as these General Terms and Conditions.

Roadways and Access

Roadways

2.31 The bounding roads have width ranging from 12 to 14 meters, concrete-paved, with concrete curbs and gutters, and underground drainage system.

2.32 Our informal enquiries with the Cyberscape Alpha Administration Office confirmed that the subject property enjoys frontage along the bounding streets.

Access 2.33 In reporting our opinion of value, we have assumed that there are no third-party interests between the boundary of the subject property and the adopted highways and that accordingly the Property has unfettered vehicular and pedestrian access.

Environmental Considerations

Flooding 2.34 From our enquiries with the City Planning Office, we have ascertained that the subject building is not within an indicative floodplain and that there is therefore a negligible risk of flooding.

Contamination 2.35 As stated in the General Terms of Business, investigations into environmental matters would usually be commissioned from suitably qualified environmental specialists. Santos Knight Frank, Inc. is not qualified to undertake scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination.

2.36 Subject to the above, while carrying out our valuation inspection, we have not been made aware of any uses conducted at the subject property that would give cause for concern as to possible environmental contamination. Our valuation is provided on the assumption that the Property is unaffected.

Highest and Best Use

2.37 "*Highest and Best Use*" is defined as the most profitable likely use to which a property can be put. The opinion of such use may be based on the highest and most profitable continuous use to which the Property is adapted and needed, or that use of land which may reasonably be expected to produce the greatest net return to land over a given period of time. Alternatively, it is that use, from among reasonably probable and legal alternative uses, found to be physically possible, appropriately supported, financially feasible, and which results in highest land value.

2.38 Considering the Property's size, shape, topography, current zoning classification and the prevailing land uses and development in the area, we are of the opinion that the **existing commercial development** would represent the highest and best use of the Property.

3 Market Analysis

Philippine Market Commentary

3.1 Shown below is SKF's latest **Metro Manila Office Market Update**.

Source of Information

3.2 Our market analysis has been undertaken using market knowledge within Santos Knight Frank, Inc., enquiries of other agents, searches of Property databases, as appropriate and any information provided to us.

OFFICE RENT ROLLBACKS CUSHION INCREASING VACANCIES

General Overview

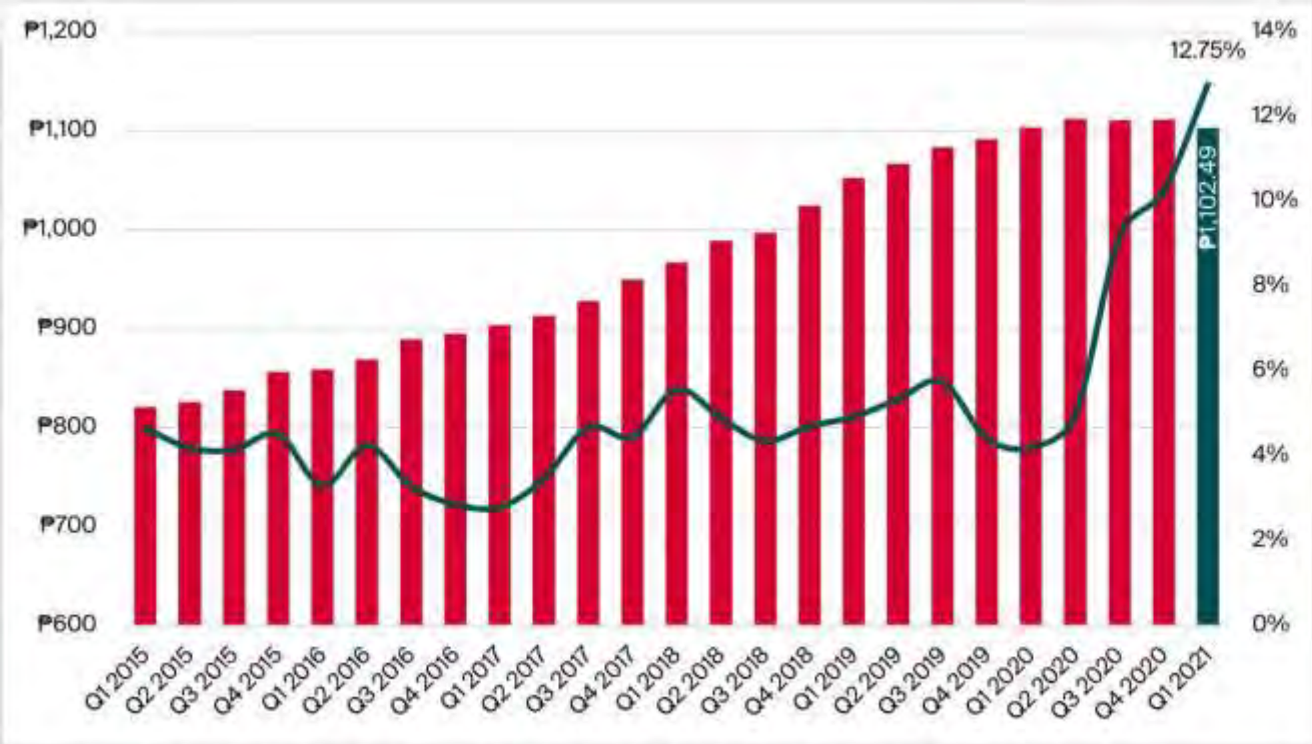
The Metro Manila office market displayed modest market movement at the start of 2021 owing to the sluggish demand driven by the market uncertainties caused by changing lockdown scenarios in Metro Manila. Landlords were challenged to remain relevant as potential occupiers continued to take a cautious approach caused by the growing COVID-19 cases and slow vaccine roll-outs.

Still, new office spaces were introduced during the quarter as developers capitalized on the relaxed quarantine measures to resume their halted construction activities. The local office market supply grew by 163,136 sqm of Grade A office space that mostly catered to IT-BPO companies. Several buildings were completed in Fort Bonifacio, Bay Area, and Quezon City, resulting in an overall office supply in Metro Manila of about 6.9 million sqm.

Consequently, supply growth resulted in an increase in vacancies throughout the metropolis. Office vacancy rates in Metro Manila further spiked to 12.75%, the highest since 2009. Current and potential occupiers remained vigilant towards the health situation of the country. Numerous companies continued to implement Work-From-Home and skeletal workforce arrangements. Office take-up contracted by 28,696 sqm as locators reassessed their need for spaces amid their bid to reduce operational costs.

Monthly average lease rates in Metro Manila further dipped to PHP 1,102.49 per sqm, declining by 0.78% quarter-on-quarter (q-o-q) and 0.07% year-on-year (y-o-y). The downward trend of rents was caused by the landlords' bid to provide more competitive packages to appeal to prospective tenants.

Figure 1. Metro Manila Historical Lease & Vacancy Rates



Source: Santos Knight Frank Research

Makati

The adverse effects of the pandemic and the prolonged lockdowns remained evident in the most prominent business district in the country. Vacancy rates spiked to 11.17%, considered to be the highest in the past ten years. Moreover, the expensive rents in Makati CBD were detrimental to the retention of office occupiers. Locators looking to minimize their expenses opted to discontinue their lease, resulting in about 25,557 sqm of office space vacated during the quarter.

Sluggish leasing activity persisted in the area as existing and upcoming locators in Makati were less willing to take up spaces due to the financial distress brought about by the global pandemic. The average monthly rents recorded in Makati went down to PHP 1,348.19 per sqm, contracting by 0.93% q-o-q and 6.05% y-o-y. Despite this, rates in Makati remained the highest in the metropolis.

Several property players are still looking forward to the materialization of their projects in the pipeline. More than 447,552 sqm of Prime and Grade A office supply are anticipated to come online in the next three years, with approximately 164,000 sqm being operational by the end of 2021. The massive influx of upcoming office developments in Makati comes from the backlogs and spillovers from 2019 up to the latter part of 2020.

Taguig

Slow demand in Taguig was also evident as vacancy levels continuously increased to 8.37% from 7.74% in Q4 2020. Despite having the largest supply share in Metro Manila of more than 2 million sqm, the downsized space requirements were seen as the factor in the rising vacancies as locators looked to lessen their operational cost. Moreover, average monthly rental rates in Fort Bonifacio also went down to PHP 1,289.75, translating to a contraction of 0.89% q-o-q.

The ease in quarantine measures allowed private and public projects to resume construction. Office supply in Fort Bonifacio further grew by 28,000 sqm through the completion of BGC Corporate Center 2. Despite the growing vacancy levels, potential developers still have bright prospects in Taguig as it was seen as the youngest but fastest growing business district in Metro Manila. In line with this, upcoming office supply is seen to be augmented by about 864,100 sqm of office space within the next five years. About 344,000 sqm of this will be coming from Arca South which is poised to become a new business district in the south.

Bay Area

The POGO industry exodus has significantly contributed to the spiking vacancy levels in the Bay Area during Q1 2021, recorded at 12.82%. Slower demand from the sector is seen in the coming periods as more firms have started to postpone their lease contracts. This occurrence implied challenges in the recently fast-moving office market of the Bay Area.

The upsurge in vacancy was also attributed to the completion of Four E-com during the quarter with an additional 89,132 sqm of Grade A office space. Priced above its competitors, this building has helped in pushing the average rents in the area to PHP 1,083.41 per sqm, increasing by 1.66% q-o-q.

The Bay Area is still foreseeing a huge amount of upcoming office supply in the coming years. Developers still recognize the opportunity to invest in the area due to its accessibility and availability of developable land. Approximately, 578,800 sqm of office developments are anticipated to be introduced in the market for the next five years, while 258,000 sqm are expected to become operational by the end of 2021.

Ortigas Center

Vacancy levels in Ortigas Center gradually eased to 12.75% in contrast to 12.88% of the preceding quarter. Despite this, pre-terminated contracts and non-renewals were still observed, as most of the companies are still on a wait-and-see approach towards the office market. Meanwhile, the slow-moving leasing transaction was also felt in the district as the rental rates went down to PHP 806.29 per sqm, contracting by 1.15% q-o-q and still considered the lowest as compared to other major CBDs in the metropolis.

Moreover, the upcoming office supply in Ortigas Center remained high as more than 671,000 sqm of Prime and Grade A office spaces are slated to introduce in the next five years. In addition, the massive influx of 373,000 sqm of space is scheduled to commence their operations within the year such as Cyber Omega, SM Mega Tower, and Jollibee Tower. This includes the spillover from 2019 up to the remaining quarters of 2020 that has been halted due to subsequent lockdowns.

Quezon City

Vacancy rates in Quezon City spiked up to 20.64% as opposed to 16.21% of the preceding quarter, indicating the highest level across all of Metro Manila. Approximately 13,690 sqm of office spaces were freed up in the city during the quarter. Occupiers in the area were more sensitive to the health crisis as compared to locators in other districts The lack of recognized established business districts and limited connectivity of certain townships contributed to the slow demand in the area. Furthermore, the upsurge in vacancy levels was also driven by the opening of SM North Towers 1 and 2 that added more than 45,200 sqm in the massive office supply in Quezon City, and are yet to lease out the majority of their spaces.

Office landlords are trying to alleviate this downtrend and are still vying to mitigate lease terminations. To this end, average headline rates contracted to PHP 925.55 per sqm, translating to a 1.81% decline from the preceding quarter.

Albeit the fast-growing vacancy levels, Quezon City is still expecting a large office supply boost in the coming years. Approximately, 333,700 sqm is anticipated to be introduced in the market in the next five years, in which more than 149,000 sqm will be coming from SM Prime Holdings.

Alabang

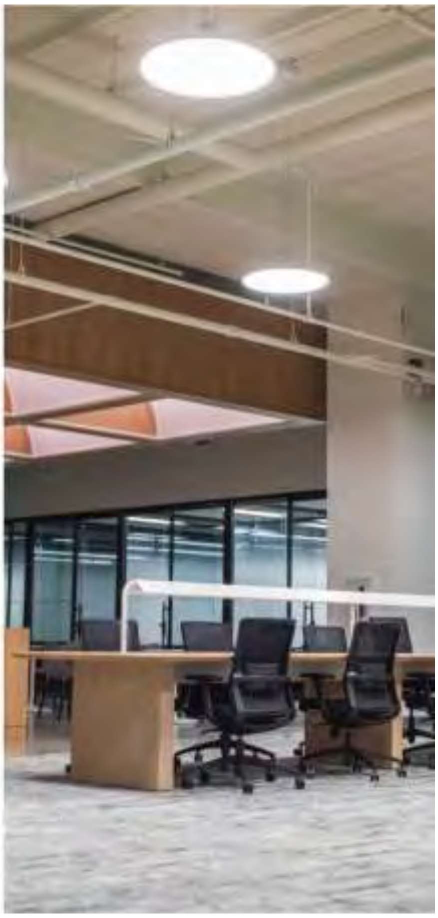
Similarly, Alabang CBD experienced rising vacancy levels in Q1 2021 at 16.07% from 14.53% in the preceding quarter. As a result, increased pressures on office landlords in the district were felt as they remain responsive to the slow movement in the office market. This caused rental rates to gradually contract to PHP 846.76 per sqm.

Alabang still holds on to the possibility of becoming one of the major investment hubs in the metropolis due to its vast developable land. Approximately 209,900 sqm of upcoming Grade A office space is anticipated to be operational in the next five years, while 13,800 sqm is slated to become operational by 2021.

Figure 2. Metro Manila Lease & Vacancy Rates per CBD

Source: Santos Knight Frank Research

Office Outlook



The easing quarantine measures that started in the second half of 2020 allowed the developers to restart their impeded construction activities. Developers remain bullish in expanding their office footprint in Metro Manila with more than 3 million sqm of office space are slated to operate in the next five years. The nation's economic center is also set to have an additional supply of 1.1 million sqm of Prime and Grade A office space by the end of 2021. This massive influx still stems from the construction backlogs from the developers in 2020.

The robust expansion of office supply in Metro Manila is seen to further propel the vacancy rates in the local office market in the coming quarters. Along with the stagnant office demand, downward pressure on office rents still expected. Office landlords will be forced to implement more flexible payment terms to existing and potential tenants to market their spaces and continue cash flow from their buildings.

The recovery of the office market is also dependent on the pace of vaccine roll-outs in the country. The slow pace in inoculations is seen to weigh down on the recovery of the market. Attaining herd immunity as soon as possible can reinvigorate the interest in the office market.

In the medium- to long-term Green Buildings are seen to gain a competitive edge compared to ordinary office buildings. Buildings accredited by the US Green Building Council (LEED) and the Philippine Green Building Council (BERDE) will be more sought-after for potential office locators. The efficient design that provides better air circulation, ventilation and filtration, and increased open space, will be more appealing to the market as it puts a premium on the health and well-being of its tenants.

4 Valuation

Methodology

Valuation Rationale

4.1 The purpose of this appraisal is to estimate the Market Value of the Property. In any given valuation exercise, fair value can be arrived at using either one or a combination of the three (3) approaches to value, namely: Market (or Direct Sales Comparison) Approach, Income Approach, and the Cost Approach. The determination of the appropriate approach for a given property is based on the quality and quantity of data available, particularly its relevance to the Property under appraisement. If more than one valuation approach is utilized, the resulting values are reconciled to produce a final value conclusion.

4.2 Due to the nature of the Property and the purpose of this appraisal, both the Cost Approach and Income Approach to value are deemed the most appropriate to use and the Market (or Direct Sales Comparison) Approach was not used.

Cost Approach

4.3 The Cost Approach generally involves the following steps:

A. The value of the subject land is normally estimated by the Market or Sales Comparison Approach. In instances where the land is covered by a Lease Agreement, the value of the leased fee or leasehold rights on the subject land, whichever is applicable, is instead estimated.

B. The depreciated cost of the subject improvement is estimated by calculating the direct cost of reproducing or replacing the improvement, deducting accrued depreciation from all sources, and adding the indirect costs attributed to the improvement.

Combining the estimates shown above results in the indicated value of the Property by the Cost Approach.

4.4 **On Land (Leasehold)**

As mentioned, the land subject of this appraisal is covered by a Lease Contract. In estimating the value of the Property covered by a lease, two interests are involved: the interest of the lessee which is the leasehold; and the interest of the lessor which is the leased fee or the lessor's interest. The Client being the lessee, the purpose of this appraisal is to establish the leasehold value of the subject land.

Leasehold Value is the present (discounted) worth of the rent savings (or rental gains) when the contract rent at the time of the appraisal is less than the current market rent. It is estimated by computing the present worth of the rental gains over the remaining term of the lease agreement using an appropriate discount rate.

The valuation process, briefly stated, consists of the following:

- Estimation of the current market rent of the leased property;
- Estimation of the rental gains over the remaining term of the lease agreement, if any. Rental gains projection is pegged at 10 years while the 11th year rental gain is used to estimate the terminal value of the

Leasehold Rights on the Land;
- Estimation of an appropriate discount rate and terminal capitalization rate; and
- Discounting process based on an appropriate discount rate to arrive at an indicated leasehold value.

Market Rent of the Land

4.5 As mentioned earlier, another purpose of this report is to express an opinion of the Market Rent of the Property if it were to be leased out in accordance with its highest and best use. The amount of annual or monthly rental, which the subject property should command might be estimated by any, or a combination of the following:

1. By Market (Comparison) Approach, in which rentals of similar properties are used a benchmark; and
2. By Income Approach, in which the value of the Property is first established, and the proper capitalization rate is applied to obtain its rental value.

On the other hand, Market Rent is defined under IVS 2019 as "the estimated amount for which an interest in real property should be leased on the valuation date between a willing lessor and a willing lessee on appropriate lease terms in an arm's length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

It is the rental income that the Property would most likely command in an open market. It is also defined as being the amount at which a willing lessee would pay and a willing Lessor would receive for the use of certain property, neither being under compulsion to transact, and both having reasonable knowledge of all relevant facts.

Market Approach

4.6 We have made a survey of existing ground leases of similar lands in the vicinity of the Property and found scarcity of rental data that may be used for direct comparison purposes.

Income Approach

4.7 In the absence of any comparable rental data, we have estimated the **Market Rent** of the Property by a variation of the Income Approach on the basis of what prudent real estate investors or landowners would be warranted in leasing it in order to realize a fair return on their investment or property, for that matter. Under this approach, the market value of the Property is first established, and the proper capitalization rate is applied to obtain its rental value.

Market Value of the Land

4.8 In valuing the land, we made use of the Market Approach which is the most common technique for valuing land, and is the most preferred method when comparable sales are available. With this method, sales of similar property or parcels of land are analysed, compared, and adjusted to provide a value indication for the Property being appraised. The comparison process is based on an analysis of the similarity or dissimilarity of the comparables.

4.9 The appraiser gathers data on actual sales as well as listings and identifies the similarities and differences in the data; ranks the data according to their relevance; adjusts the prices of the comparables to account for the dissimilarities with the land being appraised; and forms a conclusion as to the most reasonable and probable market value of the subject property.

4.10 The elements of comparison include property rights, financing terms, conditions of sale (motivation), market conditions (sale date), location, physical characteristics, available utilities, and zoning. The most variable elements of comparison are the site's physical characteristics, which include its size and shape, frontage, topography, location, and view. The units of comparison applied may be hectares or sq.m., or any other unit used in the market.

Evidence of comparable properties

4.11 **Analysis of Comparable Properties Offered for Sale**

In the course of our investigation, we looked at current market listings of comparable properties in the area. The comparable properties selected share the same or similar characteristics as the subject. Whatever information or data we came up with was then analysed, and comparison made for such factors as size, characteristics of the lot, location, quality, and prospective use. In the Philippines however, property transactions are not officially disclosed, and quite often, actual transaction price is masked by other undisclosed arrangements and different from the figure shown on the sale and purchase agreement. We have therefore made reference to the following data, made our market judgment, and adjusted for the above-mentioned factors:

1. A 3,000-sq.m. commercial lot located along Meralco Avenue corners of Dona Julia Vargas and Sapphire Roads, within Ortigas Center, Pasig City, is currently offered for sale at an asking price of PhP500,000 per sq.m.
   Source: Daniel Olvina Ballo-Allo – (0977)831-7678

2. A 1,710-sq.m. commercial lot located at the corners of Emerald Avenue and Sapphire Road, beside Eton Emerald Lofts, within Ortigas Center, Pasig City, is currently offered for sale at an asking price of PhP350,000 per sq.m.
   Source: Daniel Olvina Ballo-Allo – (0977)831-7678

3. An 1,838-sq.m. commercial lot located along Exchange Road corners of Pearl Drive and Amethyst Street, within Ortigas Center, Pasig City, is currently offered for sale at an asking price of PhP6000,000 per sq.m.
   Source: Daniel Olvina Ballo-Allo – (0977)831-7678

Summary of Adjustments

The Data Comparison Grid shown on Appendix **9** shows a summary of the aforementioned adjustments, which provides an indication as to the degree of adjustment made to the different elements in comparison. A numeric indicator indicates the level of adjustments, in terms of percentage when compared with the subject property. The use of (-) indicates a negative adjustment and a + indicates a positive adjustment. A downward adjustment (-) used is made to reflect superior characteristics of the comparable sale/listing, while an upward adjustment + reflects inferior characteristics of the comparable sale/listing. Finally, a 0 is used to confirm similarity between the comparable sales/listings and the subject or is used when market information is unavailable or does not support an adjustment for any particular element of comparison.

Value of the Land 4.12 As reflected in the said Comparison Grid, the value of the land is estimated at **PhP371,000 per sq.m.**, or a total of **PhP928,000,000** for a land area of **2,500 sq.m.**

Rate of Return 4.13 The value of the land having been established, its rental value may now be estimated considering the prevailing rate of return prudent investors or landowners would expect in ground leases, normally in the range of 4% to 7%. We based this range of rate of return from interviews with land owners and brokers, as well as our analysis of the relationship between prevailing capital values and rental rates and it is believed to be the current yield in the commercial land lease market.

Considering the most recent pandemic and the effect it had on the economy and the leasing market, we have not adopted the average rate of return, and have instead adopted a conservative interest rate (return on investment) of 4%.

In light of the foregoing, our estimate of the Market Rent of the Property is as follows:

Land Value	PhP	928,000,000	
Interest on Land Value			
PhP928,000,000 @ 4%	PhP	37,120,000	

Total	**PhP**	**37,120,000**	**per year**
		========	
Or	**PhP**	**3,093,330**	**per month**
		=======	

Market Rent of the Land 4.14 On the basis of the foregoing, the Market Rent of the land is estimated at **PhP1,237.33 per sq. m. per month**, or a total of **PhP3,093,330 per month**, or say, **PhP37,120,000 per annum** for the subject land area of **2,500 sq. m.**

Rental Gain 4.15 Rental Gain is reckoned as the difference between the Market Rent and the Contract Rent.

Discount Rate 4.16 The discount rate was computed using the build-up method. The discount rate is calculated by adding together different variables. The variables that were used to generate it consist of a risk-free rate and a reasonable risk premium. Based on the foregoing, discount rate is estimated at 7.1665%, or say, 7.20% (10-year T-bond rate at about 3.9165% (from Philippine Dealing & Exchange Corporation (PDEx) as of 30 June 2021) plus 3% equity risk premium from OECD and

additional 0.25% risk premium for unidentifiable risk factors which include the uncertainty brought about by the Covid-19 global pandemic.).

For purposes of this valuation, we have adopted, as risk-free rate, the 10-year T-bond rate from PDEx. The Philippine Dealing & Exchange (PDEx) system appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEx. The PHP BVAL Reference Rate dated 30 June 2021 was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

4.17 We have adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3%. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits
Valid as of: **25 June 2021**

nb	Country Code ISO Alpha 3	Country Name [10]	Classification: Previous	Classification: Current Prevailing	Notes

144	POL	Poland	-	-	(6)
145	PRT	Portugal	-	-	(6) (7)

Capitalization Rate 4.18 Capitalization rate adopted to arrive at the terminal value is 4.2% (Discount Rate less Projected Long-term Growth Rate (3.0%). The long-term growth rate is based on a growth forecast of the prevailing commercial market over the forecast period. This is based on what the Property is perceived to achieve in the long-term considering the present situation of the market.

Remaining Life of the Lease 4.19 Remaining life of the lease as of the date of valuation is 99 years.

Summary of Leasehold Assumptions 4.20 In summary, below are the assumptions/statistics used in determining the leasehold value of the subject land.

CYBERSCAPE ALPHA			
Lease Details			
Lot Area	:	2,500	sq.m.
Term of Lease	:	99	years
Assumed Commencement Date	:	01-Oct-21	
Lease Rate	:	7%	of net leasing revenue
Market Rent (in PhP)			
Monthly Rent	:	1,237.33	/sq.m./ month
Annual Rent	:	37,120,000	
Annual Escalation	:	3%	starting Y2
Discount Rate			
Risk Free Rate		3.92	as of June 30, 2021 (BVAL PDEX)
Risk Premium		3.00	as of June 25, 2021 (OECD)
Additional Risk		0.25	risk premium for unidentifiable risk factors
		7.17	
Resulting Discount Rate, say		7.20%	
Terminal Capitalization Rate		4.20%	

Leasehold Value 4.21 On the basis of the foregoing, the leasehold value of the subject land may reasonably be estimated at **PhP165,000,000**.

We attach a copy of our valuation calculations at Appendix **6**.

4.22 **On Leasehold Improvements and Machinery & Equipment**

The estimate of the leasehold improvements can be either replacement or reproduction cost, new. Replacement Cost, New is defined as "The cost of construction, at current prices, of a building having utility equivalent to the building being appraised but built with modern materials and according to current standards, design, and layout." On the other hand, Reproduction Cost, New is defined as "The cost of construction, at current prices, of an exact duplicate, or replica, using the same materials, construction standards, design, layout, and quality of workmanship, and embodying all the deficiencies, super-adequacies, and obsolescence of the subject building."

In estimating the Replacement Cost of the buildings and improvements, we have made reference to the building cost index or other building cost as available in the market or published by a reputable quantity surveyor firm. We have likewise referred to our own database of building construction costs. We do not hold ourselves to be construction cost advisers and a formal estimate can only be given by a specialist construction cost consultant. It is recommended that a professional quantity surveyor or a firm of professional quantity surveyors should be consulted in order to assess an accurate building/improvement replacement cost.

In arriving at our assessment using the Cost Approach for the Equipment, we first developed the Replacement Cost, New ("RCN") of the asset. In developing our RCN, we have obtained current cost information from equipment dealers in the region. We relied on data furnished by equipment manufacturers, dealers and importers, as well as information contained in price catalogues, other published materials including the Internet and inquiries from local suppliers

RCN is the estimated amount of money needed to acquire a similar new item having the nearest equivalent utility as the Property being valued taking into consideration current prices of materials and manufactured equipment, shipping and handling, labour, contractor's overhead, design and supervision, profit and fees, and other attendant costs associated with its acquisition and installation, but without provision for overtime or bonuses for labour and premium for materials.

Having developed the RCN, we then deducted for the various elements of depreciation to arrive at the Depreciated Replacement Cost ("DRC"). DRC includes depreciation allowance or loss of value arising from condition, utility, age, wear and tear, and obsolescence present (physical, functional or economic), taking into consideration past and present maintenance policy and rebuilding history.

General
Where elements are of foreign origin, the assessment process give full consideration to all expenditures normally incurred in importation such as packing and crating charges, inland and ocean freight, insurance, duties and taxes, bank charges and commissions, wharfage, brokerage and handling

In estimating the depreciation of the assets, we have utilized the age-life method tempered with our observed condition of the assets. The remaining lease period was likewise considered in arriving at the value of the leasehold improvements.

Appendix **10** contains the Schedule of Assets describing in detail these assets.

Income Approach

Definition 4.23 The Income Approach is applicable to the valuation of income producing properties, business enterprise as well as the valuation of intangible assets. This approach measures the current value of an asset by calculating the present value of its future economic benefits by discounting expected cash flows at a rate of return that compensates the risks associated with the particular investment.

For this particular engagement, we have applied both the Discounted Cash Flow Analysis and the Direct Capitalization Method.

Discounted Cash Flow Analysis

4.24 The discounted cash flows, or DCF valuation is the most popular fundamental approach in valuing the future economic benefits of a projected income stream. DCF measures actual yield rather than paper income for the asset/business owner and the analysis of DCF is widespread and mandatory in the various fields of business making DCF-based valuation ideal.

4.25 The valuation process, briefly stated, consists of the following:

- Estimation of the revenues generated;
- Estimation of the costs and expenses related to the operations of the development;
- Estimation of an appropriate discount rate;
- Discounting process using an appropriate discount rate to arrive at an indicative market value; and
- Estimation of the Terminal Value of the Property.

Discount Rate

4.26 The discount rate was computed using the build-up method – calculated by adding together the different variables. The basic formula for the traditional build-up model is:

Discount Rate = Rf + P + MR + LR

Where	Variable	Proxy Statistic
Rf	Risk Free Rate	PDEX Risk Free Rate
P	Equity Risk Premium	Country Risk
MR	Management Risk	
LR	Liquidity Risk	

The variables that were used to generate the Discount Rate are exhibited in the table below, along with the sources and/or dates as at or nearest the 30 June 2021 valuation date.

Risk Free Rate (10Y)	3.92%	As of 30 June 2021, BVAL PDEX
Equity Risk Premium	3.25%	As of 25 June 2021, OECD
Management Risk	0.80%	
Liquidity Risk	0.90%	

4.27 The following assumptions were used to arrive at the Discount Rate using the Build-Up Method.

Risk Free Rate

4.28 For the purposes of this valuation, we adopted the 10-year bond rate sourced from Philippine Dealing & Exchange Corporation (PDEX) as of 30 June 2021 - the valuation date (image shown below). The Philippine Dealing Exchange (PDEx) system has recently appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEX. The PHP BVAL Reference Rate was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

Equity Risk Premium

4.29 We used an equity risk premium of 3.25%. We adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3% plus an additional 0.25% risk premium for unidentifiable risk factors. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors. Shown below is an excerpt of said table.

Country Risk Classifications

Management & Liquidity Risk

The Management Risk refers to the estimated premium to compensate for the burden of management, while the Liquidity Risk refers to the ease (or the difficulty) with which an investment can be sold or made. A review was done and we have arrived at the following: Management Risk was classified into four categories, with the corresponding rates: Poor – 1.2; Average – 1.0; Above Average - 0.90 and Excellent - 0.80 while Liquidity Risk has three (3) categories: Poor –1.2; Average – 1.0; and Good – 0.90. After the said review, we deemed it appropriate to use 0.80% for Management Risk and 0.90% for Liquidity Risk.

Resulting Discount Rate 4.30 Resulting Discount Rate used for this valuation is 8.87%, or say, 9.0%.

Capitalization Rate 4.31 A discount rate is used to calculate the present value of future projections of a benefit stream when growth varies from year to year. However, if growth is estimated to remain level throughout the life of the investment, a capitalization rate is often used. In its most basic form, the relationship between discount rate and a capitalization rate can be summarized as follows:

Capitalization Rate = Discount Rate – Growth

For purposes of this valuation, a long-term growth rate of 4.5% has been assumed. This is based on what the Property is perceived to achieve in the long-term considering the present situation of the market. Using this assumption, resulting Capitalization Rate would be 4.5%.

Key Financial Assumptions 4.32 We relied on the historical and projected assumptions brought about by our research and as provided by the Client. These financials were analysed to ensure reasonableness by comparing projected revenue growth rates and other operating expenses based on historical performance. Based on interviews with the representatives of the company, projections were prepared to reflect the current and expected future market conditions.

a. **Revenues**

i. Cashflow projection starts in 01 July 2021 and would run for a period of 10 years.

ii. The revenues come from the rental of retail units, office units and parking slots. In estimating the annual rents of the subject units/slots, we have adopted the contract rents as appearing in the copy of the rent roll provided to us by the Client for the occupied units/leased parking slots. After the expiration of lease, lease rates then are aligned with market rates and are assumed to have an average of 4-year lease contracts. Aside from the monthly rentals from leasable areas, revenues likewise include Management and Aircon Dues which are likewise charged to the tenants monthly on a per sq.m. basis. Management dues are for common and/ or shared utilities, facilities and services. These are inclusive of air-conditioning equipment rental during office hours (but exclusive of power consumption).

iii. It would be important to note that as the building administrators, they collect the said dues as a cost recovery mechanism for all expenses related to the day-to-day operations of the building and its common areas.

iv. Occupancy assumptions were based on the actual performance of the Property as well as the prevailing trend in the subject area taking into consideration the forecasted effect of the global pandemic in the office market. Occupancy of the Property as of valuation date is at 100% while the historical average performance of the Property for the last two years is at 100%. This occupancy rate includes committed leases. For this valuation exercise, we are assuming an average vacancy allowance of 9%. This assumed vacancy allowance for the whole cashflow period is used to account for unanticipated vacancies brought about by early terminations and non-renewals, and rental concession requests from tenants.

v. We used actual escalation rates indicated in the rent roll for all existing leases up until their lease expires. After which, an average escalation of 5% was then be applied year on year until the end of the cash flow.

b. **Cost & Expenses**

i. Operating Expenses which would include administrative and utility expenses are normally charged against the Common Use Service Area (CUSA) Fees or Association Dues being collected monthly to the individual tenants. However, there are instances when CUSA funds are insufficient to pay off all common charges. If and when this happens, the owners/administrators would have to pay off these expenses and this has been taken into consideration in the projections.

ii. Operating Costs and Expenses are assumed to be an average of approximately 17% of the Total Net Revenues. Operating costs and expenses included are basically divided in to two – real estate expense and general administrative expenses. Real Estate expenses are as follows: contracted services, repairs & maintenance, management fee and loss from CUSA and miscellaneous expenses. While under General Administrative Expense are – salaries & wages, taxes and licenses, advertising & promotions, commission, insurance, communication, rent expense, supplies, travel & transportation, and representation & entertainment expenses.

These expenses are projected either as a percentage of the rental revenues or the total net revenues. These percentage allocations were from the historical and projected performance of the Property.

iii. Annual Capital Expenditures (CAPEX) for the entire cashflow period, on the other hand, was assumed to be 1.5% of the Net Leasing Revenues. This assumption is based on benchmarking and analysis of current market practice in allocating CAPEX reserve.

This allocation would help ensure that the Property would operate efficiently and maintain its good and sound condition.

Resulting Market Value

a. Earnings Before Income Tax, Depreciation and Amortization (EBITDA) for the whole duration of the cashflow shall be discounted at the derived Discount Rate of 9.00%.

b. The sum of discounted cashflows including the Terminal Value of the Property represents the Market Value of the Property.

The Terminal Value of the Property is the value of the property beyond the explicit forecast period. It is assumed that the property or business will continue to generate cashflows in perpetuity. As mentioned earlier, Terminal Capitalization Rate used is 4.5%.

The Discounted Cashflow showing the estimated Market Value of the subject property is attached as Appendix **7**.

Direct Capitalization Method 4.31 The Direct Capitalization Method is a real estate valuation method that helps convert a single year's income into value by dividing the Net Operating Income with an appropriate Capitalization Rate. This method assumes that the Property has a stabilized net operating income. All parameters of a typical investor return expectations are represented either explicitly or implicitly in either income forecast or the capitalization rate. The direct capitalization rate, as the ratio of income to value, serves as a proxy for investor return assumptions.

Resulting Market Value 4.32 We made use of the single year's cashflow projection (2022) to derive the Market Value using the Direct Capitalization Method. Capitalization rate adopted to arrive at the Property Market Value is 4.5%.

Valuation basis

Market Value 4.33 Market Value is defined in the 2019 **International Valuation Standards** as:
"The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

Valuation date

Valuation date 4.34 The valuation date is **30 June 2021.**

General Assumptions

Assumptions 4.35 Our valuation is necessarily based on a number of assumptions which have been drawn to your attention in our General Terms of Business, Letter of Engagement and within this report.

Key Assumptions 4.36 Whilst we have not provided a summary of all these assumptions here, we would in particular draw your attention to a key assumption that we relied on a very considerable extent on the information provided by the Client and have assumed that documents provided to us such as gross floor area tabulation, floor plans, lot area allocation, building tenancies and other relevant matters are factual. We were also advised by the Client that no material facts have been omitted from the information provided.

Special Assumption 4.37 We were instructed to re-value the Property without a re-inspection. We have, thus, considered changes to the physical attributes and/or characteristics of the Property which have occurred between the valuation date and the date of our previous valuation as confirmed by the Client. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.

4.38 We have adopted the floor area details provided to us by the Client and have assumed these to be accurate.

4.39 Our valuation of Machinery & Equipment has also undertaken the following special assumptions:

We have not carried out a full mechanical survey, or structural test, nor have inspected the machinery and equipment, which are covered, unexposed or inaccessible. Our assessment is based on the premised that the items are in a condition commensurate with age and usage.

Machinery & Equipment associated with the supply of services to the building such as Elevators, Air Conditioning Systems are valued on the assumption that they are permanently installed or attached to the building.

4.40 In applying Income Approach to value, we have considerably relied on the information provided to us by the Client which includes the following: lease contracts, revenue and expense projections, historical and projected occupancies. Upon expiration of contracts, we estimated the lease rates based on the acceptable escalations in the market.

4.41 Given the 99-year leasehold, we assumed that the Property is comparable to a freehold property given the duration of the leasehold interest on the land. Thus, a terminal value of the Property was computed at the end of the cashflow.

Valuation Results

Using Cost Approach

4.42 Using the **Cost Approach,** the Market Value of the Property, may be summarized as under

Land (Leasehold Value)	**PhP165,000,000**
Building	**1,851,000,000**
Building Machinery & Equipment	**331,073,000**

TOTAL	**PhP2,347,073,000**
	==============
ROUNDED TO	**PhP2,347,000,000**
	==============

4.43 The Market Value of the Property is estimated at **PhP2,347,000,000 (TWO BILLION, THREE HUNDRED FORTY-SEVEN MILLION PHILIPPINE PESOS).**

Using Income Approach

4.44 Using the **Income Approach** on the other hand, the Market Value of the Property is estimated as follows:

DCF Analysis	**PhP8,545,000,000**
Direct Capitalization Method	**PhP9,452,000,000**

Calculation 4.45 We attach a copy of our valuation calculations for the Income Approach at Appendix **7 & 8**.

Comments 4.46 The values arrived at using the Income Approach are noted to be higher than the value arrived at using the Cost Approach. This is because, unlike the Income Approach, the Cost Approach does not capture the income potential of the Property.

4.47 For purposes of this valuation, we deemed it appropriate to adopt the results arrived at by the Income Approach – DCF Analysis, since this method is usually used to determine the value of an income-generating property, as it also captures the Property's future economic benefits, giving a better representation of the Property's Market Value at an acceptable rate of return that would compensate for the risks associated with the particular investment. It likewise takes into consideration market cycles that Direct Capitalization Method cannot capture.

Conclusion of Value 4.48 In conclusion, we are of the opinion that the Market Value of the Property, reckoned as of **30 June 2021**, is:

PhP8,545,000,000 (EIGHT BILLION, FIVE HUNDRED FORTY-FIVE MILLION PHILIPPINE PESOS).

***Note**: The outbreak of the Novel Coronavirus (COVID-19), declared by the World Health Organization as a "Global Pandemic" on 11th March 2020, has impacted global financial markets. Travel restrictions have been implemented by many countries. In the Philippines, market activity is being impacted in all sectors. As at the valuation date, we consider that we can attach less weight to previous market evidence for comparison purposes, to inform opinions of value. Indeed, the current response to COVID-19 means that we are faced with an unprecedented set of circumstances on which to base a judgement. Our valuation is therefore reported on the basis of "material valuation uncertainty" per IVS 103 of the International Valuation Standards. Consequently, less certainty – and a higher degree of caution – should be attached to our valuation than would normally be the case. Given the unknown future impact that COVID-19 might have on the real estate market, we recommend that you keep the valuation of this property under frequent review.*

Value forwarded PhP8,545,000,000

Appendix 1 - Assumptions, Limiting Conditions and Disclaimers

Basis of Value	Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion." In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property. It is further assumed that title to the property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable. The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.
Property Rights appraised	The rights appraised in this report are the property rights in fee simple, free and clear. "Fee simple" is defined as absolute ownership, without limitations to any particular class of heirs or restrictions, but subject to the limitations of eminent domain, escheat, police power and taxation. We assume that the fee simple interest is marketable and in compliance with the applicable laws of the Philippines.
Fractional Interests:	When the study contains a valuation relating to an estate in land that is less than the whole fee simple estate, the value reported for such estate relates to a fractional interest only in the real estate involved, and the value of this fractional interest plus the value of all other fractional interests may or may not equal the value of the entire fee simple estate which is considered the whole. When the valuation report contains an allocation of the total valuation between land and building improvements, such allocation applies only under the existing program of utilization. The separate valuations for land and building cannot be used in conjunction with any other valuation/appraisal and will be invalid if so used.
Assumptions:	The valuation is based on the condition of the economy and the purchasing power of the Philippine Peso as of the effective date of valuation. We have assumed that the floor areas provided us have been calculated in accordance with engineering standards, and assumed herein to be true and correct. Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.
Information Supplied By Others	Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser. Information provided by informed local sources, such as government agencies, financial institutions, Realtors, buyers, seller and others, was weighed in the light in which it was supplied and checked by secondary means; however, no responsibility is assumed for possible misinformation.
Legal Issues:	This valuation assumes no responsibility for the validity of legal matters affecting the property. The ownership history reported in this valuation is based on the appraiser's research of public records, which are assumed to be accurate and complete. It is not the intent of the valuation to offer a legal opinion of title. It is further assumed that the property has good title, responsible ownership and competent management. Any liens or encumbrances which may now exist have been disregarded. The appraiser is not required to give testimony or attendance in court by reason of this valuation, with reference to the property in question, unless arrangements have been previously made.
Liability:	The liability of Santos Knight Frank, Inc. and its directors and employees is limited to the addressee of this report only. No accountability, obligation or liability to any third party is accepted. In the event we are subject to any liability in connection with this engagement, regardless of legal theory advanced, such liability will be limited to the amount of fees we received for this engagement.
Environmental Conditions:	It is assumed that there is full compliance with all applicable Philippine environmental regulations and laws unless non-compliance is stated, defined, and considered in this appraisal report.
Town Planning:	It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.
Condition of Improvements:	We have inspected the improvements and structures. However we have not carried out a structural survey nor tested any of the services or facilities, nor have we inspected unexposed or inaccessible portions of the building, and are therefore unable to state that these are free from defect, rot, infestation, asbestos or other hazardous material. We have therefore, viewed the general state of repair of the property and advise that we did not notice any obvious signs of structural defect or dilapidations. Furthermore, the property appears to be in reasonable condition having regard to its age and use and unless otherwise stated. We also assume that the building complies with all relevant statutory requirements in respect of matters such as sanitary, building and fire safety regulations and standards.
Valuation Methodology:	Santos Knight Frank uses any one or a combination of the Market Data Approach, the Cost Approach, and the Income Capitalization Approach. Each methodology begins with a set of assumptions. The result is the best estimate of value Santos Knight Frank can produce, but it is an estimate and not a prediction or guarantee and it is fully dependent upon the accuracy of the assumptions as to income, expense and market conditions. These primary methodologies use market derived assumptions, including rents, yields and discount rates, obtained from analysed transactions. We do not represent ourselves as experts for data, such as economic, demographic or construction costs, which has been obtained from external sources.
Others:	This report and valuation shall be used only in its entirety and no part shall be used without the whole report. It may not be used for any purpose other than the intended purpose mentioned herein. Possession of this report or any copy thereof does not carry with it the right of copying or publication. All copies will originate from Santos Knight Frank, Inc. and will be signed and dated as such. Neither the whole nor any part of the report or any reference to our name, our valuation and our report may be included in any document, circular or statement nor published without our prior written consent to the form and context in which it may appear. The delivery and acceptance of this report completes this assignment.

ROBINSONS LAND CORPORATION
43rd Floor, Robinsons Equitable Tower
ADB Avenue corner Poveda Street
Ortigas Center, Pasig City

Attention: **MR. FREDERICK D. GO**
President and Chief Executive Officer

Subject: **Terms of Engagement for Valuation Services**

Dear Mr. Go:

Thank you for your interest in our Valuation Services. We refer to your invitation of 03 August 2020 requesting Santos Knight Frank, Inc. ("SKF") to submit a proposal for valuation (the "Valuation") in respect of the properties detailed below (the "Properties").

This proposal, together with our General Terms of Business for Valuation Services ("General Terms"), sets out our terms of engagement for carrying out this instruction. Once agreed and signed, this proposal shall constitute our Letter of Engagement ("Letter"). This Letter and the General Terms (together, the "Agreement") exclude any other terms which are not specifically agreed to us in writing. To the extent that there is any inconsistency between the Letter and the General Terms, this Letter shall take precedence.

1. **Client**
Our Client for this Valuation is Robinsons Land Corporation (the "Client", "you" or "your").

2. **Purpose of Valuation**
The Valuation is provided solely the purpose of transferring some of the Client's assets to the REIT Company and its application for a Tax-Free Exchange Ruling with the Bureau of Internal Revenue and listing of the REIT Company in the Philippine Stock Exchange (the "Transaction"). Specifically, the Valuation will be used for the Client's Financial Statements to be attached to the Offering Circular as required by the Securities and Exchange Commission (SEC) and will be attached as an appendix to the Client's REIT Plan. In accordance with clause 4.1 of our General Terms, the Valuation may not be used for any other purpose without our express written consent. The Valuation will be made accessible in the public domain as part of the regulatory requirements of the Transaction.

3. **Term & Termination**
This appointment will commence upon signing of this Agreement and shall continue to be in effect for a period of two (2) years. Any extension of the Term of this Agreement shall be mutually agreed upon by the parties in writing.

23. Electronic Communication

During the engagement, both parties may wish to communicate electronically with each other. However, electronic transmission of information cannot be guaranteed to be secure or virus-or error-free and information could be intercepted, corrupted, lost or destroyed, arrive late or incomplete, or otherwise be adversely affected or unsafe to use. Both parties agree to accept these risks and so each party will be responsible for protecting its own systems and interests in relation to electronic communications. Neither party will have any liability to the other party on any basis for any loss or damage arising from or in connection with the electronic communication of information between both parties or their reliance on such information.

24. Acceptance

Please sign and return a copy of this Letter signifying your acceptance of the terms of the Agreement. We reserve the right to withhold any Valuation and / or refrain from discussing it with you until this Letter has been countersigned and returned.

Your attention is drawn to the "Important Notice" in the General Terms. If you have any questions regarding this Letter and / or the terms of the Agreement, please let us know before signing this Letter.

Thank you for choosing Santos Knight Frank, Inc. and we look forward to working with you on this important engagement.

Sincerely,
SANTOS KNIGHT FRANK, INC.

Attention: **MR. FREDERICK D. GO**
President and Chief Executive Officer

Subject: **Amendment to Terms of Engagement and General Terms of Business for Valuation Services Dated 03 August 2020 ("Amendment")**

Dear Mr. Go:

We refer to subject Letter of Engagement and General Terms of Business for Valuation Services (together, the "Agreement") between Robinsons Land Corporation (the "Client", "you" or "your") and Santos Knight Frank, Inc. ("SKF") for the valuation of fourteen (14) office buildings (the "Covered Properties").

For this purpose, the Agreement is amended as follows:

The first, second, and third and fourth paragraphs shall now read:

For the Valuation

I. Valuation for Asset Transfer to REIT Company and its application for a Tax-Free Exchange Ruling:

For Valuation Update

II. Valuation of Properties for REIT listing to PSE:
   Our Valuation of 14 Properties will be as follows:
   1. Valuation for 4 Properties
   2. Periodic Update of 14 Properties Under REIT Company (Quarterly basis – optional)
   3. Valuation Update of 14 Properties under REIT Company

Except as amended hereby, all the provisions of the Agreement which are not inconsistent herewith are incorporated herein by way of reference and from date hereof, the Agreement and this Amendment shall be read as one integrated document.

Kindly affix your signature on the conforme portion below and return one (1) original signed copy to us.

Sincerely,
SANTOS KNIGHT FRANK, INC.

Proposal for Valuation Services **ROBINSONS LAND CORPORATION**

Appendix 3 - General Terms of Business

General Terms of Business for Valuation Services

These General Terms of Business (the "**General Terms**") and our Letter of Engagement (the "**Letter**"), together form the agreement between you and us (the "**Agreement**"). References to "**you**", "**your**" etc. are to persons or entities who are our client and, without prejudice to clauses 3 and 4 below, to any persons purporting to rely on our Valuation.

Unless **the** context otherwise requires, all other terms and expressions used but not defined herein shall have the meaning ascribed to them in the Letter.

When used herein or in the Letter, the term "**Valuation**" shall mean any valuation report, advance report, supplementary report or subsequent/update report, produced pursuant to our engagement and any other replies or information we produce in respect of any such report and/or any relevant property. Any words following the terms "**including**", "**in particular**" or any similar expression shall be construed as illustrative and shall not limit the sense of the words preceding those terms.

All of the terms set out in these General Terms shall survive termination of the Agreement.

1. Santos Knight Frank, Inc.

1.1. Santos Knight Frank, Inc. ("**Santos Knight Frank**", "**our**", "**us**", "**we**") is a long-term franchise partnership, with Securities and Exchange Commission (SEC) Registration Number A199818549.

1.2. Our registered office is at 10/F Ayala Tower & Exchange Plaza, Ayala Avenue, Makati City where a list of members may be inspected.

1.3. Any representative of Santos Knight Frank, Inc. described as *Director* is either a member or an employee of Santos Knight Frank, Inc. and is not a member of the Board of Directors. The term *Director* has been retained because it is an accepted way of referring to senior professionals. The term "**Santos Knight Frank Person**" shall, when used herein, mean any member, employee, or consultant of Santos Knight Frank, Inc.

1.4. Our Tax Identification Number (TIN) is 201-626-570-000.

1.5. The details of our Professional Indemnity Insurance may be provided upon receipt of request..

1.6. Santos Knight Frank, Inc., being a corporate entity, is regulated by the Securities and Exchange Commission (SEC), and in accordance with our reportorial requirements with them, it may be necessary to disclose valuation files to them. By instructing us, you give us your permission to do so. Where possible we will give you prior notice before making any such disclosure, although, this may not always be possible. We will use reasonable endeavours to limit the scope of any such disclosure and to ensure any disclosed documents are kept confidential.

1.7. Valuations will be carried out in accordance with the 2019 edition of the International Valuation Standards (IVS) by valuers who conform to its requirements and with regard to relevant statutes or regulations. Our senior valuers are Real Estate Appraisers licensed and regulated by the Philippine Professional Regulation Commission (PRC).

2. Governing law and jurisdiction

2.1. The Agreement and any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with it or its subject matter or formation or any Valuation shall be governed by and construed in accordance with law.

2.2. Philippine courts shall have exclusive jurisdiction to settle any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with this Agreement or its subject matter or formation or any Valuation. This will apply wherever the relevant property or the client, or any relevant third party, is located or the service is provided.

3. Limitations on liability

3.1. Subject to clause 3.7, our maximum total liability in connection with or arising out of this Agreement and/or its subject matter and/or the Valuation is limited to the level of our fee as set out in the Letter.

3.2. Subject to clause 3.7, we will not be liable for any loss of profits or for indirect or consequential loss.

3.3. Subject to clause 3.7, any limitation on our liability will apply however such liability is or would otherwise have been incurred, whether in contract, tort (including negligence), for breach of statutory duty, or otherwise.

3.4. Except as set out in clauses 3.5 and 4.7 and 4.8 below no third party shall have any right to enforce any of the terms of this Agreement.

3.5. No claim arising out of or in connection with this Agreement may be brought against any Santos Knight Frank Person. Those individuals will not have a personal duty of care to you or any other person and any such claim for losses must be brought against Santos Knight Frank, Inc. Any Santos Knight Frank Person may enforce this clause but the terms of this Agreement may be varied by agreement between the client and Santos Knight Frank, Inc. at any time without the need for any Santos Knight Frank Person to consent.

3.6. No claim, action or proceedings arising out of or in connection with the Agreement and/or any Valuation shall be commenced against us after the expiry of the earlier of (a) two years from the Valuation Date (as set-out in the relevant Valuation) or (b) any limitation period prescribed by law.

3.7. Whether or not specifically qualified by reference to this clause, nothing in the Agreement shall exclude or limit our liability in respect of fraud, or for death or personal injury caused by our negligence or negligence of those for whom we are responsible, or for any other liability to the extent that such liability may not be so excluded or limited as a matter of applicable law.

4. Purpose, reliance and disclosure

4.1. The Valuation is prepared and provided solely for the stated purposes. Unless expressly agreed by us in writing, it cannot be relied upon, and must not be used, for any other purpose and, subject to clause 3.7, we will not be liable for any such use.

4.2. Without prejudice to clause 4.1 above, the Valuation may only be relied on by our Client. Unless expressly agreed by us in writing the Valuation may not be relied on by any third party and we will not be liable for any such purported reliance.

4.3. Subject to clause 4.4 below and for the stated purposes, the Valuation is confidential to our Client and must not be disclosed, in whole or in part, to any third party without our express written consent (to be granted or withheld in our absolute discretion). No liability is accepted to any third party for the whole or any part of any Valuation disclosed in breach of this clause.

4.4. The appraiser is not required to give testimony or attendance in court by reason of this valuation, with reference to the property in question, unless arrangements have been previously made.

4.5. Except for the stated purposes, neither the whole nor any part of the Valuation and/or any reference thereto may be included in any published document, circular or statement nor published in any way whatsoever whether in hard copy or electronically (including on any website) without our prior written consent and approval of the form and context in which it may appear

4.6. Where permission is given for the publication of a Valuation neither the whole nor any part thereof, nor any reference thereto, may be used in any publication or transaction that may have the effect of exposing us to liability for actual or alleged violations of SEC Memorandum Circular No. 2, series of 2014.

4.7. You agree that we, and/or any Santos Knight Frank Person, may be irreparably harmed by any breach of the terms of this clause 4 and that damages may not be an adequate remedy. Accordingly, you agree that we and/or any Santos Knight Frank Person may be entitled to the remedies of injunction or specific performance, or any other equitable relief, for any anticipated or actual breach of this clause.

4.8. You agree to indemnify and keep fully indemnified us, and each relevant Santos Knight Frank Person, from and against all liabilities, claims, costs (including legal and professional costs), expenses, damages and losses arising from or in connection with any breach of this clause 4 and/or from the actions or omissions of any person to whom you have disclosed (or otherwise caused to be made available) our Valuation otherwise than in accordance with this clause 4.

5. Knight Frank network

5.1. Santos Knight Frank, Inc. is a member of an international network of independent firms which may use the "Knight Frank" name and/or logos as part of their business name and operate in jurisdictions outside the United Kingdom and the Philippines (each such firm, an "**Associated Knight Frank Entity**").

5.2. Unless specifically agreed otherwise, in writing, between you and us: (i) no Associated Knight Frank Entity is our agent or has authority to enter into any legal relations and/or binding contracts on our behalf; and (ii) we will not supervise, monitor or be liable for any Associated Knight Frank Entity or for the work or actions or omissions of any Associated Knight Frank Entity, irrespective of whether we introduced the Associated Knight Frank Entity to you.

5.3. You are responsible for entering into your own agreement with any relevant Associated Knight Frank Entity.

5.4. This document has been originally prepared in the English language. If this document has been translated and to the extent there is any ambiguity between the English language version of this document and any translation thereof, the English language version as prepared by us shall take precedence.

6. Severance

If any provision of the Agreement is invalid, illegal or unenforceable, the parties shall negotiate in good faith to amend such provision so that, as amended, it is legal, valid and enforceable and, to the greatest extent possible, achieves the intended commercial result of the original provision. If express agreement regarding the modification or meaning or any provision affected by this clause is not reached, the provision shall be deemed modified to the minimum extent necessary to make it valid, legal and enforceable. If such modification is not possible, the relevant provision shall be deemed deleted. Any modification to or deletion of a provision under this clause shall not affect the validity and enforceability of the rest of this Agreement.

7. Entire agreement

7.1. The Agreement, together with any Valuation produced pursuant to it (the Agreement and such documents together, the "**Contractual Documents**") constitute the entire agreement between you and us and supersedes and extinguishes all previous agreements, promises, assurances, warranties, representations and understandings between you and us, whether written or oral, relating to its subject matter.

7.2. Subject to clause 3.7 above, you agree that in entering into the Agreement you do not rely on, and shall have no remedies in respect of, any statement, representation, assurance or warranty (whether made innocently or negligently) that is not expressly set out in the Contractual Documents. You further agree that you shall have no claim for innocent or negligent misrepresentation based on any statement set out in the Contractual Documents.

7.3. The Letter and these General Terms shall apply to and be incorporated in the contract between us and will prevail over any inconsistent terms or conditions contained or referred to in your communications or publications or which would otherwise be implied. Your standard terms and conditions (if any) shall not govern or be incorporated into the contract between us.

7.4. Subject to clause 3.7 and clause 6, no addition to, variation of, exclusion or attempted exclusion of any of the terms of the Contractual Documents will be valid or binding unless recorded in writing and signed by duly authorised representatives on behalf of the parties.

8. Assignment

8.1. You shall not assign, transfer, mortgage, charge, subcontract, declare a trust over or deal in any other manner with any of the rights and obligations under the Agreement without our prior written consent (such consent to be granted or withheld in our absolute discretion).

9. Force majeure

9.1. Neither party shall be in breach of this Agreement nor liable for delay in performing, or failure to perform, any of its obligations under this Agreement if such delay or failure results from events, circumstances or causes beyond its reasonable control.

10. Our fees

10.1. Without prejudice to clause 10.3 below, you become liable to pay our fees upon issuance of the Valuation. For the avoidance of doubt, unless expressly agreed otherwise in writing, the payment of our fees is not conditional on any other events or conditions precedent.

10.2. If any invoice remains unpaid after 30 days of the date on which it is presented, we reserve the right to charge interest, calculated daily, from the date when payment was due until payment is made at 4%, subject to modification by our Accounting Department.

10.3. If we should find it necessary to use legal representatives or collection agents to recover monies due, you will be required to pay all costs and disbursements so incurred.

10.4. If an appraisal analysis is ordered and the assignment is cancelled before completion, we reserve the right to receive compensation, by way of damages, in an amount equal to 70% of the total fee for the assignment.

10.5. If you delay the instruction by more than 30 days or materially alter the instruction so that additional work is required at any stage or if

we are instructed to carry out additional work that we consider (in our reasonable opinion) to be either beyond the scope of providing the Valuation or to have been requested after we have finalised our Valuation (including, but not limited to, commenting on reports on title), we will charge additional fees for this work. Such additional fees will be calculated on the basis of a proportion of the total fee by reference to reasonable time and expenses incurred.

10.6. Where we agree to accept payment of our fees from a third party, such fees remain due from you until payment is received by us.

11. Anti-bribery and corruption and Anti-Money Laundering
We agree that throughout the term of our appointment we shall:

(a) comply with all applicable laws, statutes, regulations, and codes relating to anti-bribery and corruption and Anti-Money Laundering laws (the "**Relevant Requirements**");

(b) not engage in any activity, practice or conduct which would constitute an offense;

(c) maintain anti-bribery, anti-corruption, and anti-money laundering policies to comply with the Relevant Requirements and any best practice relating thereto; and

(d) promptly report to you any request or demand for any undue financial or other advantage of any kind in connection with the performance of our services to you.

12. Portfolios
Properties comprising a portfolio, unless specifically agreed with you otherwise, will be valued separately and upon the assumption that the properties have been marketed individually and in an orderly manner.

13. Land Register inspection and searches
We are not required to undertake searches, validations or inspections of any kind for title or price paid information in any publicly available land registry.

14. Title and burdens
We will assume, unless specifically informed and stated otherwise, that each property has good and marketable title and that all documentation is satisfactorily drawn and that there are no unusual outgoings, planning proposals, onerous restrictions or local authority intentions which affect the property, nor any material litigation pending.

15. Disposal costs and liabilities
No allowance is made in our Valuation for expenses of realisation or for taxation which may arise in the event of a disposal and our Valuation is expressed as exclusive of any VAT that may become chargeable. Properties are valued disregarding any mortgages or other charges, including commissions.

16. Sources of information
We rely upon the information provided to us by you, as to details of tenure and tenancies, planning consents and other relevant matters, as summarised in our Valuations. Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser.

17. Identity of property to be valued
We will exercise reasonable care and skill (but will not have an absolute obligation to you) to ensure that the property, identified by the property address in your instructions, is the property inspected by us and contained within our valuation report. If there is ambiguity as to the property address, or the extent of the property to be valued, this should be drawn to our attention in your instructions or immediately upon receipt of our report.

18. Boundaries
Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.

19. Planning, highway and other statutory regulations
19.1. Enquiries of the relevant planning and highways authorities in respect to matters affecting properties, where considered appropriate, are normally only obtained from the corresponding government agency. We can only state whatever current conditions may be. We recommend that formal written enquiries should be undertaken by your lawyers who should also confirm the position with regard to any legal matters referred to in our Valuations.

19.2. It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.

19.3. We assume that the premises comply with all relevant statutory requirements including building, fire and sanitary regulations.

20. Property insurance
Our Valuation assumes that each property would, in all respects, be insurable against all identifiable risks.

21. Building areas and age
Where so instructed, areas provided from a quoted source will be relied upon. Any dimensions and areas measured on location or from plan/s are calculated and are quoted to a reasonable approximation, with reference to their source. Where the age of the building is estimated, this is for guidance only.

22. Structural condition
Building, structural and ground condition surveys are detailed investigations of the building, the structure, technical services and ground and soil conditions undertaken by specialist building surveyors or engineers and fall outside the normal scope of a valuation. Since we will not have carried out any of these investigations, we are unable to report that any property is free of any structural fault, rot, infestation or defects of any other nature, including inherent weaknesses due to the use in construction of deleterious materials. We do reflect the contents of any building survey report provided to us in advance, or any defects or items of disrepair of which we are advised or which we note during the course of our ocular inspections but otherwise assume properties to be free from defect.

23. Ground conditions
Unless informed otherwise in writing, we assume there to be no adverse ground or soil conditions and that the load bearing qualities of the sites of each property are sufficient to support the building constructed or to be constructed thereon.

24. **Environmental issues**

24.1. Investigations into environmental matters by suitably qualified environmental specialists would usually be commissioned by most responsible purchasers or chargees of higher value properties or where there was any reason to suspect contamination or a potential future liability. Furthermore, such investigation would be pursued to the point at which any inherent risk was identified and quantified before a purchase proceeded. Where we are provided with the conclusive results of such investigations, on which we are instructed to rely, these will be reflected in our Valuations with reference to the source and nature of the enquiries. We would endeavour to point out any obvious indications or occurrences known to us of harmful contamination encountered during the course of our valuation enquiries.

24.2. However, we are not environmental specialists and therefore we do not carry out any scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination or any other environmental searches. If we are not provided with the results of appropriate investigations as outlined above and where there is no obvious indication of harmful contamination, our Valuation will be provided on the assumption that the relevant property is unaffected. Where we are informed that contamination is suspected or confirmed, but adequate investigation has not been carried out and made available to us, then the Valuation will be qualified only by reference to it.

25. **Minerals, timber, airspace etc.**

Unless specifically agreed otherwise in writing and so stated within the main body of the relevant Valuation, we do not value or attempt to value or take into account any potential income stream or other beneficial or detrimental effect or other factor relating to undiscovered or unquantified mineral deposits, timber, airspace, sub-ground space or any other matter which would not be openly known in the market and considered to have value.

26. **Legal advice**

26.1. We are appointed to provide valuation opinion(s) in accordance with our professional duties as Appraisers. The scope of our service is limited accordingly. The valuation assumes no responsibility for the validity of legal matters affecting the property. It is not the intent of the valuation to offer a legal opinion of title. Any liens or encumbrances which may now exist have been disregarded. We are not qualified legal practitioners and we do not provide legal advice and any statements made by us, or advice given, in a legal context should be construed accordingly.

26.2. Where appropriate we will liaise with your legal advisors. However, we accept no responsibility for any work carried out by them and we will not be liable for anything contained in legal documentation prepared by them.

26.3. Where we consider it is necessary for the provision of the Valuation and/or specifically agree to do so, and any additional fees we require for this work are agreed, we will read legal documents (including leases, licences etc.), however, (save for any comment concerning the impact of our interpretation of such documents on value) our interpretation of such documents cannot be relied upon to be legally correct. Where we do interpret legal documents, we will, for the purposes of providing our Valuation, assume our interpretation to be correct.

27. **Loan security**

Where instructed to comment on the suitability of property as a loan security we are only able to comment on any inherent property risk. Determination of the degree and adequacy of capital and income cover for loans is the responsibility of the lender having regard to the terms of the loan.

28. **Build cost information**

In the provision of valuation services we do not hold ourselves out to have expertise in assessing build costs. Where our instruction requires us to have regard to build cost information, for example in the valuation of properties with development potential, we strongly recommend that you supply us with build cost and other relevant information prepared by a suitably qualified construction cost professional, such as a quantity surveyor. The Valuation will be stated to have been arrived at in reliance upon the build cost information supplied to us by you. In the absence of any build cost information supplied to us, we may have regard to published build cost information. Build costs produced using this approach must be assumed to be unreliable or inaccurate; any reliance which can be placed upon our Valuation in these circumstances is severely restricted. Specialist professional advice on the build costs should be sought by you. If you subsequently obtain specialist build cost advice, we recommend that we are instructed to review our Valuation.

29. **Reinstatement assessments**

A reinstatement assessment for insurance purposes is a specialist service and we recommend that separate instructions are issued for this specific purpose. If an indication is required as a check against the adequacy of existing cover this should be requested and will be so stated in the body of the relevant Valuation. Any indication given is provided for guidance only and must not be relied upon as the basis for insurance cover. In any event, our reinstatement assessment should be compared with the owner's and if there is a material difference, then a full reinstatement valuation should be reconsidered.

30. **Comparable evidence**

Where comparable evidence information is included in our Valuation, this information is often based upon our oral enquiries and its accuracy cannot always be assured, or may be subject to undertakings as to confidentiality. However, such information would only be referred to where we had reason to believe it or where it was in accordance with our expectation. In addition, we have not inspected comparable properties.

31. **Valuation bases**

Valuations are carried out on a basis appropriate to the purpose for which they are intended and in accordance with the relevant definitions, commentary and assumptions. The basis of valuation will be agreed with you and specified in the Letter and in the relevant Valuation.

Important Notice

If you have any queries relating to this Agreement please let us know as soon as possible, and in any event before signing the Letter and/or giving us instructions to proceed.

Your instructions to proceed, preferably signing on the space provided for under the Letter, will constitute your acceptance to use our services on the terms of the Agreement.

Accordingly, our commencement of work pursuant to your instructions shall constitute acceptance of your offer and as such establish the contract between us on the terms of the Agreement.

Appendix 10 - Schedule of Assets

BUILDING	
Description	**Market Value (PhP)**
Cyberscape Alpha - As seen during our inspection for the previous valuation done, this is a twenty-five (25)-storey, reinforced concrete-framed building with seven (7) basement levels and a roof deck. The ground floor is being utilized as lobby and for retail purposes. The second up to fourth floor is currently occupied by Go Hotels while the rest of the upper floors are used as offices with high and low zones. The basement levels, on the other hand, are mainly used as parking areas with some office and equipment rooms, while some equipment rooms can also be found at the roof deck. Construction features include partly granite tiles and mainly plastered cement finish precast concrete exterior walls; concrete slab roofing with waterproofing membrane; mainly ceramic tiles on concrete flooring at lobbies and hallways, and epoxy paint finish concrete flooring on parking areas; granite tiles finish concrete partitions in lobbies; mainly gypsum board ceiling in common areas; frameless glass main entrance doors; and mainly glass on analok frame windows. The office units during handover to the tenants reportedly have plain cement finish concrete flooring, acoustic board on aluminum T-runner ceiling and electrical lighting facilities. The retail units as well as the floors occupied by Go Hotels, meanwhile, have plain cement finish concrete flooring, open ceiling and electrical lighting facilities upon turnover to the tenants. All interior works done on the leased areas were reportedly shouldered by the tenants and were, therefore, excluded in this report. The building is painted and provided with electrical lighting and plumbing facilities, and a concrete cistern at basement 7 with a capacity of about 150,000 gallons. It is also provided with building machinery and equipment such as elevators and air conditioning system, among others, described and valued in the succeeding sections of this report. Construction of the building was reportedly completed sometime in May 2014. Based on information provided to us by the client, total gross floor area of the building is approximately 68,088.95 sq. m.	**1,851,000,000**

4-Passenger Elevators (Low Zone)- Schindler, 1,600 kgs., 22 persons capacity, 10 landings, complete with electric drive motor, governor, control panel, wires, cables and other standard accessories	23,877,000
Service Elevator- Schindler, 1,600 kgs., 22 persons capacity, 33 landings, complete with electric drive motor, governor, control panel, wires, cables and other standard accessories	18,021,000
2-Parking Elevators- Schindler, 800 kgs., 11 persons capacity, 8 landings, machine less room, complete with electric drive motor, control panel, wires, cables and other standard accessories	4,341,000
Total for Elevators -	**71,222,000**
Air Conditioning and Ventilating System	
Lot-Air Conditioning System- Mitsubishi Electric Citi Multi, Variable Refrigerant Flow (VRF) System, modular type, system comprising of: 84 - ACCU Outdoor Units - 45 kw cooling capacity series 84 - ACCU Outdoor Units - 38 kw cooling capacity series 84 - ACCU Outdoor Units -	

33 kw cooling capacity series
168-ERV Units-
958 - ACCU Indoor Units (FCU) -
Ceiling mounted, ranges from 2 to 5 TR cooling capacity
74 - ACCU Indoor Units (FCU) -
Ceiling concealed type, 3.18 TR cooling capacity each
22 - ACCU Outdoor Units -
LG, 7.5 to 11 kw cooling capacity series
22-Distribution Transformers-
Dry type, 18 kva capacity
22 - ACCU Indoor Units (FCU) -
Ceiling concealed type, 3 to 7.5 TR cooling capacity
2-Fan Coil Units-
LG, ceiling concealed type, 5 TR cooling capacity each
Note: Located at Admin and Security Office
3-Fan Coil Units-
LG, ceiling concealed ducted type, 7.5 TR cooling capacity
Note: Located at Ground Floor Lobby
2-Fan Coil Units-
LG, ceiling mounted, 3 TR cooling capacity
Note: Located at Machine Room
2-Fan Coil Units-
LG, ceiling mounted, 5 TR cooling capacity
Note: Located at Machine Room
4-Fan Coil Units-
LG, ceiling mounted, 3 TR cooling capacity
Note: Located at Machine Room, 16th and Service Deck
Fan Coil Unit-
LG, wall mounted, 1.5 TR cooling capacity
Note: Located at Leasing B3
System complete with piping connections, electrical and controls system, valve and fittings, and other standard accessories

Note: Installed in various locations 146,870,000

Lot-Air Ventilation and Exhaust System-
Consisting of:
7-Tubular Exhaust Fans-
Kruger, driven by 15 kw electric motor
Note: Located from Basement 1 to 7

7-Tubular Supply Fans-

Kruger, driven by 15 kw electric motor

Note: Located from Basement 1 to 7

75-Jet Fans-

Kruger, jet type, driven by 255 watts motor

Note: Located from Basement 1 to 7

2-Smoke Evacuation Blowers-

Kruger, centrifugal type, driven by 22 kw electric motor

Note: Located at Roofdeck

2-Pressurization Blowers-

Kruger, centrifugal type, driven by 22/18.5 kw electric motor

Note: Located at Roofdeck

4-ERV Exhaust Blowers-

Kruger, tube axial type, driven by 5.5 kw electric motor

Note: Located at Roofdeck

4-ERV Supply Blowers-

Kruger, tube axial type, driven by 7.5 kw electric motor

Note: Located at Roofdeck

Air Supply Blower-

Kruger, finned tube type, driven by 11 kw electric motor

Note: Located at STP Area

Exhaust Blower-

Kruger, finned tube type, driven by 11 kw electric motor

Note: Located at STP Area

2-Toilet Exhaust Blowers-

Kruger, driven by 5.5 kw electric motor

Note: Located at Roofdeck

FML Pressure Blower-

Kruger, driven by 15 kw electric motor

Note: Located at Roofdeck

5-Exhaust Fans-

Innovate, ceiling mounted, .058 kw motor drive

Note: Located at Comfort Rooms

16-Exhaust Fans-

Kruger, wall mounted, 710 mm fan blade diameter with drive motor

Note: Located at Genset Room

16-Air Supply Fans-

Kruger, wall mounted, 610 mm fan blade diameter with .55 kw drive motor

Note: Located at Genset Room

6-Air Supply Blowers-

Kruger, wall mounted, 610 mm fan blade diameter with .55 kw drive motor

Note: Located at Substation Room

6-Exhaust Fans-

Kruger, wall mounted, 710 mm fan blade diameter with drive motor

Note: Located at Substation Room

10-Exhaust Fans-

Kruger, wall mounted, 610 mm fan blade diameter with .12 kw drive motor

Note: Located at Utility Room/Pump Room

System complete with ductings installations, electrical and controls system and other standard accessories	6,840,000

Total for Air Conditioning and Air Ventilating System -	**153,710,000**

Lot-Building Management System-

System consisting of:

CPU (Air Conditioning System)-

Powerlogic, Core i7 with keyboard and mouse

LCD Monitor-

View Sonic

CPU (Elevator)-

Transformer type console

LCD Monitor-

Claxan

System complete with electrical wiring installations and other standard accessories

Note: System is on standby	**6,547,000**

Lot-Standby Power Supply and Electrical Power Distribution System -

System consisting of:

3-AC Electric Generating Set-

MGS-Stamford, Model MG-73PF, July /012 Mfg Date, Ser Nos. X12G291704, X12G291705, X12G291706 and X12G292709, 2605 kva (2084 kw) design output, 2125 kva (1700 kw) rated capacity, 0.80 power factor, 1800 rpm, 3 phase, 60 hz, powered by:

16 Cylinder Diesel Engine-

Mitsubishi, turbo-charged, direct injection, water cooled, complete with battery, controls and other standard accessories, steel skid base mounted on concrete foundation

4-Heat Exchangers-

Alfa Laval, Type M10-BEM, equipped with;

4-Water Pumps-

Dynaflo, centrifugal type, 4" pipe diameter size, driven by 5.5 kw electric motor

Generator Synchronizing Panel-

Metal clad casement, free standing with 7 vertical sections, complete with main breakers, sub-breakers, magnetic contactors, relays, timers, on/off switches, pushbutton switches, pilot lights automatic transfer switch,and standard accessories

Fuel Day Tank-

Mild steel plate of welded construction, 12,800 liters capacity

Fuel Storage Tank-

Mild steel plate of welded construction, 45,000 liters capacity

Note: Located at Basement 7

2-Fuel Pumps-

No available brand, rotary gear type, driven by 2.2 kw electric motor

Note: Located at Basement 7

2-Power Transformers-

No available brand, 2.5 mva rated capacity, 34.5 kv and 400 volts primary and secondary voltages, oil immersed, pad mounted, 3 phase

Vacuum Fault Interrupter-

G & W Electric Co., metal clad casement, 2 swing-out door panels

Low Voltage Switchgears-

Metal clad casement, free standing with 11 vertical sections, complete with main breakers, sub-breakers, magnetic contactors, relays, timers, on/off switches, pushbutton switches, pilot lights automatic transfer switch and standard accessories

Main Distribution Panel-

Metal clad casement, free standing with 2 vertical sections, 1,000 amperes rating

Main Distribution Panel-

Metal clad casement, free standing with 2 vertical sections, 1,600 amperes rating

2-Capacitor Banks-

Metal clad casement, free standing type, with 2 swing-out door panels, approx. 1,600 kvar capacity

System complete with electrical wiring installations, piping connections, contactors, relays and other standard accessories	**77,753,000**

Lot- Water Supply/ Distribution and Dewatering System-

Consisting of:

2-Water Storage Tanks-

Stainless steel construction, 12,500 gallons capacity

Note: Located at Roof Deck

2-Booster Pumps-

Paco Pumps, centrifugal type, driven by 5.5 kw electric motor, equipped with;

Pressure Tank-

Nema, mild steel construction, 1,500 liters capacity

Note: Unit located near Upper Deck Machine Room

2-Transfer Pumps-

Fairbanks Morse, vertical turbine type, 4" pipe diameter size, driven by 37.3 kw electric motor

Note: Located at Basement 7

3-Sump Pumps-

Submersible type, driven by 4.92 kw electric motor

Note: Located at Basement 7

System complete with piping connections, valves and fittings, controls and other standard accessories	**3,192,000**

Lot-Fire Fighting, Fire Alarm and Fire Detection System -

Consisting of:

Fire Pump-

Fairbanks Morse, vertical multi-stage turbine type, 750 gpm capacity, driven by 149.2 kw electric motor

Fire Pump-

Fairbanks Morse, vertical multi-stage turbine type, 750 gpm capacity, driven by 4 Cylinder Clarke / John Deere Diesel Engine

Jockey Pump-

Submersible type, driven by 7.5 kw electric motor

Automatic Transfer Switch-

Metal clad casement, free standing, 1,200 amperes

2-Fire Pump Controllers-

Eaton

Jockey Pump Controller-

Eaton

66-Fire Hose Cabinets-

Aluminum frame with glass panel door, wall mounted, complete with fire hose, nozzle and 10 lbs dry chemical type fire extinguisher
System complete with automatic sprinkler heads, FDAS, fire extinguishers, smoke and heat detectors, fire alarm bells, burglar alarm, piping connections, valves, fittings, and other standard accessories

Note: Installed in various locations.	**10,693,000**
Lot-Sewage Treatment Plant - Approximately at an average of 100 to 150 m^3 per day effluent working capacity (382 m^3 per day design capacity), complete with 2-18.65 kw air blowers, 2-14.92 kw effluent pumps, 2-3.74 kw influent pumps, air diffusers, valves, fittings, piping installations, collecting chamber tanks, controls and other standard accessories	**3,630,000**
Lot-CCTV Security Monitoring System- Consisting of: 94-CCTV Cameras- Fix dome type; 2-CCTV Cameras- Moving type; 6-LCD Monitors- Samsung, 32" screen size; 6-DVR- GMG Advanced K.264; 2-UPS- Intex, 1500 VA; System complete with controller, electrical and wiring installations, controls and other standard accessories	**2,487,000**
<u>**Others**</u>	
Walkthrough Metal Detector-	171,000
Gondola- MHE Demag, 200 kgs capacity, complete with cage, winch, weights, drive motor and other standard accessories	1,614,000
2-Parking Boom Barriers- Beninca, with 4 meters long tubular barrier *Note: One (1) unit is under repair*	54,000

Total for Others -	**1,839,000**

Total for Building Machinery & Equipment -	**331,073,000**

Appendices

1 Instructions

Engagement of Santos Knight Frank

Instructions	1.1	We refer to our Letter of Engagement dated 21 September 2020 and Amendment dated 01 June 2021, to provide a Valuation Report on the opinion of **Market Value** using Cost and Income Approaches of that certain Property consisting of leasehold of land, building (two (2) designated floors only, the 3rd and 4th floor), and building machinery & equipment of that site identified as Robinsons Galleria Cebu office, located at the corner of Gen. Maxilom Avenue Ext. and Sergio Osmeña Boulevard, within Barangay Cebu Port Center, Cebu City. ("the Property"). A copy of that document is attached herein as Appendix **2**.
	1.2	This valuation has been carried out by Santos Knight Frank, Inc. ("Santos Knight Frank" or "SKF"), in accordance with our General Terms of Business for Valuations ("General Terms of Business"), as attached as Appendix **3**.
Client	1.3	Our client for this instruction is **Robinsons Land Corporation** ("the Client").
Valuation standards	1.4	This valuation has been undertaken in accordance with the International Valuation Standards, as well as other local standards.
Purpose of valuation	1.5	You have confirmed that this valuation is for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
Conflict of interest	1.6	We confirm that we do have a material connection or involvement giving rise to a potential conflict of interest, as set out below: We have conducted the valuation of the same Property for you as of 30 September 2020 for purposes of: i) the tax-free exchange of assets to a REIT Company, and (ii) for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
	1.7	You have confirmed this Engagement notwithstanding this matter, you are content for us to proceed with this instruction. We are providing an objective and unbiased valuation.
	1.8	We are acting as external and independent valuers in this engagement.
Responsibility to third parties	1.9	Our valuation report is only for the use of our Client and for the purposes for which are stated herein, and no liability is accepted to any third party for the whole or any part of its contents.
Disclosure & publication	1.10	Except for the purposes which are stated herein, neither the whole nor any part of this valuation nor any reference thereto may be included in any published

document, circular or statement nor published in any way without our prior written approval of the form or context in which it may appear.

Limitations on liability

1.11 No claim arising out of or in connection with this valuation report may be brought against any member, employee, partner, director or consultant of Santos Knight Frank, Inc. Those individuals will not have a personal duty of care to any party and any claim for losses must be brought against Santos Knight Frank, Inc.

1.12 Santos Knight Frank, Inc.'s total liability for any direct loss or damage caused by negligence or breach of contract in relation to this instruction and valuation report is limited to the amount of the level of our fee, specified in the Letter of Engagement, a copy of which is attached as Appendix 2. We do not accept liability for any indirect or consequential loss (such as loss of profits).

1.13 The above provisions shall not exclude or limit our liability in respect of fraud or for death or personal injury caused by our negligence or for any other liability to the extent that such liability may not be excluded or limited as a matter of law.

Expertise

1.14 The valuation process was performed by **Raymond F. Dechavez** and **Pablo D. Acebo**, under the supervision of **Jacqueline T. Guerta** and **Jesus Constance M. Castro**, both licensed Real Estate Appraisers. The Principal Signatory on behalf of Santos Knight Frank, Inc. and who also reviewed the Valuation Report, is **Wenceslao D. Fuentes, Jr.,** also a licensed Real Estate Appraiser. We confirm that the above-named Licensed Real Estate Appraisers are registered with the Professional Regulation Commission ("the PRC"), having sufficient current knowledge of the particular market and the skills and understanding to undertake the valuation competently.

Vetting

1.15 This report has been vetted as part of Knight Frank global standards.

Scope of enquiries & investigations

Inspection

1.16 In accordance with your instructions, due to the limited timeframe to complete the Engagement, we have not conducted a current inspection. The Property has been previously inspected. Valuation rendered is a result of a revaluation of a property that has previously been inspected.

1.17 The Client has provided us with information regarding the changes to the physical attributes and/or characteristics of the Property; current or anticipated changes in rental income from the Property; and material changes to the non-physical attributes of each property, such as other lease terms, planning consents, statutory notices and other relevant information which have occurred between the valuation date and the date of our previous valuation. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.

Investigations

1.18 The extent of enquiries/investigations made is set out in our General Terms of Business. In carrying out this instruction we have undertaken verbal / internet-

based enquiries referred to in the relevant sections of this report. We have relied upon this information as being accurate and complete.

Information provided

1.19 In this report, we have been provided with information/documents by the Client for the previous valuation done as well as for the current engagement. We have relied upon this information as being materially correct in all aspects. In particular, we detail the following:

- floor plans
- floor area statistics
- lot area allocation
- copy of land title (TCT)
- tax declaration
- equipment list
- rent roll
- financial statements
- projections
- historical and current occupancy

1.20 In cases where we were not provided with documents or information, we did our own enquiries as outlined and stated in the report. Any assumptions in lieu of the lack of information is also set out in the relevant sections of this report.

Valuation basis

1.21 In accordance with your instructions, we have provided an opinion of value on the basis of **Market Value**.

Market Value (MV)

1.22 Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property.

It is further assumed that title to the Property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable.

The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.

Valuation date

1.23 The valuation date is **30 June 2021.**

2 The Property

Location

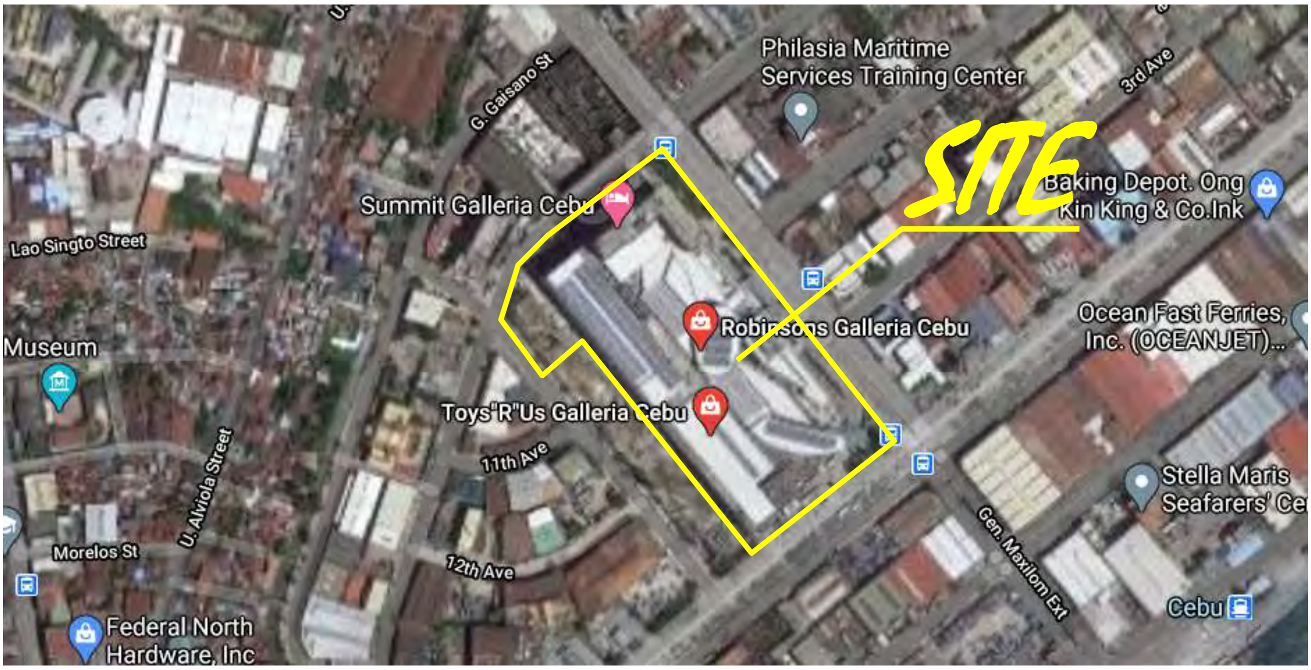
Address

2.1 The Property, identified as Robinsons Galleria Cebu, is located along Gen. Maxilom Avenue Ext. corner Sergio Osmeña Boulevard, within Barangay Cebu Port Center, Cebu City, Philippines. The Property is also bounded by Benedicto Street and 13th Avenue.

The Property is across the old White Gold Department Store Ruins about 80 meters southwest from Hotel Pier Cuatro; around 270 meters northwest from 2GO Travel Passenger Terminal; some 950 meters southwest from SM City Cebu, and about 1.5 kilometers northeast from Cebu City Hall.

General Maxilom Avenue Ext. and Sergio Osmeña Boulevard are both about 30 meters wide, while Benedicto Street and 13th Avenue have widths ranging from 12 to 15 meters. All are concrete-paved, provided with concrete curbs and gutters, and underground drainage system.

Below is a satellite image courtesy of Google Maps showing the Property and its relation to the immediate vicinity.



Note: Image courtesy of Google Maps.

2.2 The street plan below shows the location of

.

Neighborhood 2.3 The area is generally characterized by a mixture of commercial and light industrial developments. Some of the significant developments in the area include Summit Galleria Hotel, Robinsons Residences, Shell Gasoline Station, Bank of the Philippines Island, Hotel Pier Cuatro, Crown Port View Hotel, Cebu Chambers of Commerce and Industry, Genu Phils. Corp., J. Kyle Building, 2GO Transport Terminal, White Gold Club, Carreta Elementary School and Cebu City Health Center, among others.

Accessibility 2.4 Jeepneys and taxicabs are easily available throughout the day along the major thoroughfares such as Sergio Osmeña Boulevard, Gen. Maxilom Avenue and M.J. Cuenco Avenue while ferry boats are also available in the area which connects to other parts of Visayas and Mindanao regions.

Other community centers like post office, churches, hospitals, and public and private schools are likewise accessible from the Property.

Land Details

Certificates of Title 2.5 Based on documents furnished us, the land consists of a lot technically identified as Lot 1, Psd-07-099981, portion of Block 10, Pcs-07-01-000206, containing an area of **39,744 sq.m.**, more or less. It is covered by Transfer Certificate of Title No. 107-2016002823 issued in favor of **the Client** on 04 August 2016 by the Registry of Deeds for Cebu City.

Lot Area Allocation 2.6 Based on information provided to us by the Client, land area allocated for “Robinsons Galleria Cebu” is about **5,053.23 sq. m.**

Draft Contract of Lease

2.7 We were provided by the Client a copy of a Draft Contract of Lease with ROBINSONS LAND CORPORATION, as the Lessor, and RL COMMERCIAL REIT, INC. (formerly Robinsons Realty and Management Corporation)[1], as the Lessee.

Based on the same document, the lease contract stated that it will cover the land being occupied by Robinsons Galleria Cebu with an area of 5,053.23 sq.m. Lease term would be for a period of 99 years. It likewise specified that the monthly lease payments would be 7% of the monthly rental income gained from the office floors of Robinsons Galleria Cebu which are owned by the Lessee (plus VAT, as appliable).

2.8 The management of RLC disclosed that actual lease commencement shall be the date of the Certificate of Approval of the Increase in Authorized Capital Stock of RCR issued by the SEC. However, for valuation purposes, lease commencement shall be assumed on October 1, 2021.

In the absence of a signed contract, we used the foregoing details to establish the leasehold value of the land.

Tenure

2.9 For purposes of this engagement, ownership rights to the land is treated as **leasehold.**

Terrain

2.10 The terrain of the land is flat. Its finished elevation is slightly higher than the existing grade of the fronting roads.

Description of Improvements and Building Machinery & Equipment

Improvements and Machinery & Equipment

2.11 The land is presently improved with a retail/office building identified as Robinsons Galleria Cebu, a PEZA registered, Grade A office building, construction of which was completed sometime in August 2017. Following instructions from the Client, this report covers only two (2) designated office floors, the 3rd and 4th Floor. Also included in this valuation are the appurtenant Machinery & Equipment. These are all described in detail in the Schedule of Assets (Appendix **9**).

Tenure

2.12 We were advised that the Client owns the improvements described above. As stated, the land would be covered by a long-term Lease Agreement. We have, however, treated the improvements as freehold.

Accommodation

Measurement

2.13 Based on the gross floor area tabulation provided to us by the Client, it has a total gross floor area of approximately **8,868.95 sq.m.**

2.14 The Gross Floor Area is tabulated as follows:

Designated Floor	GFA (sq.m.)
3rd Floor	4,102.04

[1] As of the date of this Valuation Report, application for the change in name from “Robinsons Realty and Management Corporation” to “RL Commercial REIT, Inc.” is pending the approval of the Philippine SEC.

4th Floor	4,766.91

Total	**8,868.95**

Condition

Scope of Inspection

2.15 As stated earlier, we have previously inspected the Property.

2.16 As stated in the General Terms of Business, during our previous inspection, we have not undertaken a building or site survey of the Property, as it is beyond the normal scope of appraisal.

2.17 We have carried out visual inspection only without any structural investigation or building survey. During our limited inspection, we did not inspect any inaccessible area/s. We are unable to confirm whether the Property is free from urgent or significant defects or items of disrepair.

2.18 Unless otherwise stated, we have not been able to carry detailed on-site measurement to verify the site and gross floor areas of the Property and we have no reason to doubt the truthfulness of the areas shown on the documents provided us.

2.19 Moreover, due to the nature of the machinery, we have not carried out mechanical inspection, and our assessment was based on the premise that the machinery is in a condition commensurate with age and normal usage.

2.20 In the Schedule of Assets or Asset Inventory, machinery and/or equipment were listed as complete units i.e., machinery and/or equipment are meant to include all parts and accessories normally comprising the unit.

Comments

2.21 Apart from the matters specifically referred to below, we have assumed that the Property is in sound order and free from structural faults, rot, infestation or other defects, and that the services are in a satisfactory condition.

2.22 The buildings and structures, including the machinery & equipment, were assumed to be in a generally good condition commensurate with their age and use. It was also assumed that there are no urgent or significant defects or items of disrepair which would be likely to give rise to substantial expenditure in the foreseeable future or which fall outside the scope of the normal annual maintenance programme.

Ground conditions

2.23 We have not been provided with a copy of a ground condition report for the site. We have assumed that there is no adverse ground or soil conditions and that the load bearing qualities of the site are sufficient to support the building.

Services

2.24 It would appear from our previous inspection that main supplies of electricity and water are provided to the Property. Telephone communication facilities are likewise available. Sewer and drainage are believed to be discharged to the building's sewerage treatment plant.

Tenancies

Tenancy Information

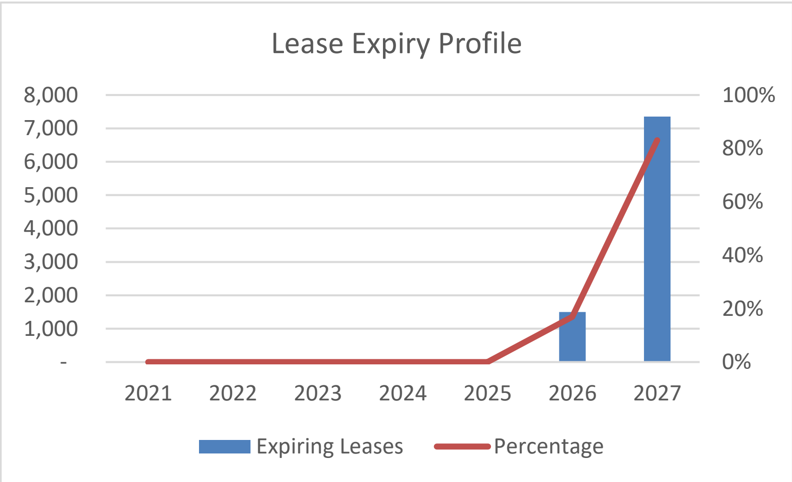
2.25 We have been provided with copy of some of the rent roll including some of the lease contracts by the Client and have relied on that information as being correct. No additional verification has been undertaken.

2.26 A summary of the Property tenancies is presented below.

TENANT	LEASED AREA (GROSS, in sq.m.))	Lease Contract	
		Start	End
Tenant 1	2,595.30	01-Jul-19	23-Jul-27
	4,757.66	24-Apr-17	23-Jul-27
Tenant 2	1,498.22	16-Jan-17	09-Mar-26

2.27 Based on the rent roll provided, total leasable area is **8,851.18** sq.m. with **48** parking slots are available for lease. Said parking slots are owned by the mall. However, an arrangement was made between the mall and the Property wherein, the Property shall receive parking revenues pertaining to the 48 slots and the Property in turn would remit payment for parking related expenses. Currently, the Property is being occupied by two tenants involved in the BPO industry.

2.28 As of 30 June 2021, the Property is 100% occupied with a Weighted Average Lease Expiry (WALE) of 5.83 years. Earliest period with an expiring lease is 2026 with 17% of total leased area, followed by 2027 with 83% of leased area expiring.



Source: SKF, RLC

2.29 Below are some of the provisions as stated in the Lease Contract.

a. **Care of the Leased Premises**

The LESSEE shall at its expense, maintain the Leased Premises in a clean and sanitary condition, free from noxious odors, disturbing noises or other nuisances and, upon the expiration of the lease, shall return the premises and fixtures in as good condition as that in which they were actually found at the beginning of the lease, ordinary wear and tear excepted. The LESSEE shall not drive nails, screws, hooks or other abutments on or into the wall's frames or other portions of the premises or in any manner deface or damage any part thereof. Any damage caused by the LESSEE may be repaired by the LESSOR for the account of the LESSEE. The LESSOR shall have the right to require the LESSEE to remove any display or promotional matter, or any displayed merchandise which LESSOR reasonably and in good faith considers to be improper or inappropriate for the general appearance or presentation of the premises.

The LESSOR shall be responsible for major repairs which are limited to those which affect the structure of the Leased Premises or the building. The LESSEE shall allow access to the LESSOR on the Leased Premises for purposes of repair or remodelling or such other works as may be necessary for the preservation, conservation, improvement or decoration of the building or any part thereof. No compensation or claims shall be allowed against the LESSOR by reason of any inconvenience or annoyance to the LESSEE that may arise by reason thereof.

The LESSEE shall promptly repair, at its own expense, any damage to the Leased Premises or any other improvements within the building caused by bringing into the Leased Premises of any property for the LESSEE's use, or by the installation or removal of such property, regardless of who is at fault or who caused such damage. unless such was clearly caused by the LESSOR, or its agents or employees. In default of such repairs by the LESSEE, the LESSOR may affect the repairs and the LESSEE agrees to promptly pay the LESSOR the cost of such repairs. The LESSEE shall be responsible for the maintenance and repair of the Leased Premises including plumbing and electrical fixtures within the premises or those serving the same.

The LESSEE must notify the LESSOR immediately of any damage to the Leased Premises, their appurtenances as well as any occupation, usurpation or untoward act being committed, or threatened to be committed, within the Leased Premises.

No machinery, furniture, effect, equipment and other properties found within the Leased Premises, whether or not owned by the LESSEE, may be brought into or out of the building without the prior written approval of the LESSOR. Furthermore, in case the LESSEE has any outstanding/unsettled rent, dues or other charges, the LESSOR reserves the right to withhold approval of any request for bringing in or out of any machinery, furniture, effects or other properties found within Leased Premises, whether or not owned by the LESSEE, until such outstanding amounts have been duly settled by the LESSEE. This is without prejudice to such other rights and remedies available to the LESSOR under

prevailing laws or the Contract. including these General Terms and Conditions.

The immediately preceding paragraph shall also apply in the event of transfer of machinery, furniture, effects or other properties found within the Leased Premises from one unit to another unit in the building being leased by the LESSEE whether or not the latter unit is owned by the LESSOR. In the event that the unit where the properties to be transferred is not owned by the LESSOR, the written consent of the unit owner shall also be required.

The LESSEE shall further maintain the Leased Premises in a clean condition by utilizing plastic bags for the disposal of both dry and wet garbage. Unless garbage is contained in plastic bags, it will not be allowed to be deposited in the authorized depository for collections.

b. **Sublease, Transfer of Rights**

The LESSEE shall not assign or transfer its rights in the Contract nor sublease or sublet all or any part of the Leased Premises, without the prior written consent of the LESSOR and no rights, title or interest thereto or therein shall be conferred on or vested to anyone other than the LESSEE without such prior written consent. Otherwise, subleasing the leased Premises without the prior written consent of the LESSOR shall be deemed a breach of the contract by the LESSEE and shall be subject to the rights and remedies available to the LESSOR under prevailing laws and Contract, including these General Terms and Conditions. In the event of sublease with or without the prior written consent of the LESSOR, the LESSEE shall remain principally liable. However, the LESSOR shall have the right to exercise such remedies embodied in the Contract, the General Terms and Conditions and under prevailing laws, as against the sublessee in order to protect its right and interests.

Only the LESSEE has the right to use the Leased Premises as its official address to be registered with any government entities for the issuance of necessary permits and licenses for its business operations.

Should the LESSOR give the LESSEE its consent to sublease the Leased Premises, the LESSEE cannot sublease the Leased Premises for the period longer that the Contract of Lease between the LESSOR and the LESSEE.

It is expressly understood that the LESSEE has no goodwill or patronage rights over the Leased Premises; that such rights belong exclusively to the LESSOR, being the owner of the Leased Premises, which forms part of the building; and that the LESSEE may not sell or dispose of said goodwill or patronage rights to any person.

c. **Assignment of Rights/Mortgage/Encumbrance**

The LESSOR reserves the right to assign and convey or mortgage or otherwise encumber its rights to this lease in favor of any affiliate or subsidiary or to any party. In the event of any assignment, conveyance, mortgage, or encumbrance of the Leased Premises, the LESSOR binds itself to require the assignee or mortgage or beneficiary of the encumbrance to respect and abide by all the terms and conditions of the Contract, as well as these General Terms and Conditions.

Roadways and Access

Roadways

2.30 General Maxilom Avenue Ext. and Sergio Osmeña Boulevard are main thoroughfare, it is about 30 meters wide respectively, while Benedicto Street is about 12 meters wide, concrete-paved provided with concrete curbs and gutters, and underground drainage system.

2.31 Our informal enquiries with the City Assessor's Office – Tax Mapping Division confirmed that the Property enjoys frontages along Gen. Maxilom Avenue Ext. on the northeast; on the southeast by Sergio Osmeña Boulevard and on the northwest by Benedicto Street.

Access

2.32 In reporting our opinion of value, we have assumed that there are no third-party interests between the boundary of the Property and the abutting roads and that accordingly the Property has unfettered vehicular and pedestrian access.

Environmental Considerations

Flooding

2.33 From our enquiries with the city traffic enforcers and some establishments in the area, we have ascertained that the Property is within an indicative floodplain and that there is therefore a low flood risk.

Contamination

2.34 As stated in the General Terms of Business, investigations into environmental matters would usually be commissioned from suitably qualified environmental specialists. Santos Knight Frank, Inc. is not qualified to undertake scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination.

2.35 Subject to the above, while carrying out our valuation inspection, we have not been made aware of any uses conducted at the Property that would give cause for concern as to possible environmental contamination. Our valuation is provided on the assumption that the Property is unaffected.

Highest and Best Use

2.36 "*Highest and Best Use*" is defined as the most profitable likely use to which a property can be put. The opinion of such use may be based on the highest and most profitable continuous use to which the property is adapted and needed, or that use of land which may reasonably be expected to produce the greatest net return to land over a given period of time. Alternatively, it is that use, from among reasonably probable and legal alternative uses, found to be physically possible, appropriately supported, financially feasible, and which results in highest land value.

2.37 Considering the Property's size, shape, topography, current zoning classification and the prevailing land uses and development in the area, we are of the opinion that the **existing commercial development** would represent the highest and best use of the Property.

3 Market Analysis

Philippine Market Commentary

3.1 Shown on the next pages is SKF's latest Cebu Office **Market Update.**

Source of Information

3.2 Our market analysis has been undertaken using market knowledge within Santos Knight Frank, Inc., enquiries of other agents, searches of property databases, as appropriate and any information provided to us.

CEBU OFFICE MARKET: THE CHANGING LANDSCAPE AMID COVID-19

Outside Luzon sits the Philippines' next biggest urban area – Metro Cebu. Home to almost a million square meters (sq.m.) of office space and thousands of companies, the metropolis, along with the region of Central Visayas, is among the highest contributors to the Philippine economy and is considered to be among the country's primary office markets. In 2018 alone it had contributed around 6.5% to the Philippine GDP, valued close to PhP600 Billion. This was a growth of 7.6% year-on-year (y-o-y) of its own Gross Regional Domestic Product.

The office market in Cebu posted an occupancy rating of 90% for the 2H of 2019 and more than 260,000 sq.m. of upcoming office space for the rest of 2020. With two prominent business districts and more upcoming mixed-use township developments such as the Gatewalk Central, Mandani Bay, City di Mare and the growing Mactan Newtown, Cebu's office market is poised to expand further.

Recognizing its economic importance, the national government has initiated several key infrastructure projects in the area to further bolster its growth while providing another option, other than Manila, for investors and companies to invest and expand unto. The second Terminal Building of the Mactan-Cebu International Airport as well as the recently renovated Terminal Building 1 are among those projects. Still, more are in the pipeline such as the Metro Cebu Expressway and the Cebu Bus Rapid Transit.

Metro Cebu was caught off-guard, however, when the COVID-19 pandemic struck and started to spread among the Philippine islands. Following the declaration of the State of Public Health Emergency and State of Calamity for the entire country as well as a number of presumptive positive cases within its borders, the city of Cebu has declared the State of Enhanced Community Quarantine (ECQ) in a bid to arrest the spread of the virus.

Cebu under ECQ

Executive Order No. 64 Series of 2020 formally imposed the city of Cebu under an ECQ for a month starting from the 28th of March. A closure of businesses other than those deemed providing "essential goods" was also ordered prompting companies and large businesses to implement work-from-home (WFH) schemes. This in turn rendered office buildings empty except for a few skeletal personnel. In a matter of 2 days from the signing of EO 64, the streets of Cebu turned from having lanes of unending headlights to one devoid of life.

A significant drop in economic transactions soon followed and grappled the metropolis; and its aggregate damage still cannot be quantified. However, what is clear is that the longer the ECQ is imposed, the greater the dame figures will be. Companies are faced with financial pressure to continue operations for the continuity of their businesses. As the theory of evolution overstates

Note: Excerpts from the Santos Knight Frank May 2020 Cebu Office Market Update the "survival of the fittest", so too is the implication of the business climate amid the COVID-19 crisis.

With some of their tenants finding it hard to continue operations and/or maintain their current office take-up, landlords are faced with the possibility of increased vacancy. Unfortunately, with the anticipated drop in economic transactions for the rest of the year, the economic outlook for 2020 is dismal. The world institutions such as the International Monetary Fund (IMF) and the World Bank as well as the country's National Economic Development Authority (NEDA) and the Bangko Sentral ng Pilipinas (BSP) all concur. This being said, the prospect of finding new tenants looks slim, Developers of upcoming developments, to be operational within the year, are seemingly troubled apparently from the expected low office occupancy levels of their projects.

Global Trend of Office Landlords showing Flexibility

As a way of avoiding vacancy surges, landlords have found it better to provide rent relief measures to their tenants as it would be easier to keep them than look for new ones. Rent relief measures may come in the form of rent abatements, deferments and/or discounts. At a time when companies are finding it hard to generate revenues as mush as the previous years, rent relief measures help lessen the financial pressure of tenants, thereby prolonging their capacity to operate amid the ECQ.

With the rent relief measures in place, it is expected that headline office space lease rates in Cebu would freeze by the 1H 2020 with a possibility of contracting in the future months should the ECQ be continually imposed and/or market conditions continue to worsen. Gradually, these relief measures would also shift the market to one more favorable to tenants. As such, for some companies with excess amounts of cash, this may be the time to do value-shopping and look for the best deals for office space in the market.

Improving Business Continuity Plans (BCPs) & the Use of Tech

The effects of COVID-19 crisis on the economies around the world has been one of the most economically damaging and it is not likely to be the last one. At a time when most of the world is interconnected and global markets are heavily reliant on one another, external shocks between economies are bound to happen. With the threat of the next crisis just lurking in the corner, improving business continuity plans should be a priority for companies to ensure safeguards are in place in times of uncertainty.

The use of technology to sustain operations have been practiced by most companies even before the implementation of ECQ. Most notable among them is the use of communication applications (apps) that allow instant messaging and video conferencing between employees and clients. With the imposition of ECQ still ongoing, several companies have begun to use these apps as a means to reach the public and boost their online presence either through webinars or online press conferences. The use of these apps was also what WFH schemes possible in the first place.

The Effects of COVID-19 Crisis Post ECQ
Securing facilities and property management services is expected to be a priority for landlords after the implementation of ECQ. Aside from the overall management and cleanup services, they provide a sense of security for the tenants that their offices are well maintained and they act as "frontliners" in keeping the threat of COVID-19 off from the building premises.

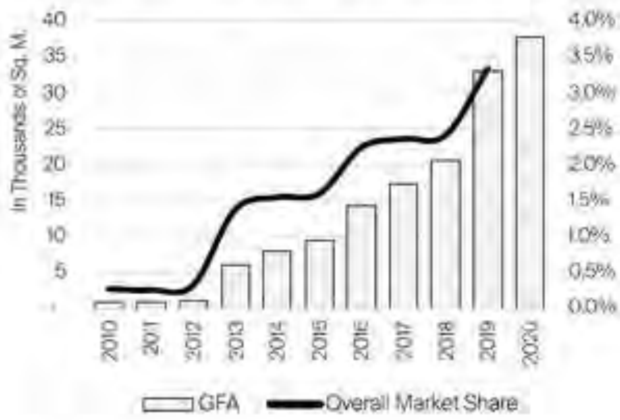
Developers may also pursue LEED, WELL and BERDE certifications for their existing and upcoming office spaces as future tenants may require certified office spaces for health and employee well-being purposes.

The implementation of ECQ has also caused delays in the upcoming office supply in Cebu. Originally at 260,000 sq.m., only 96,000 sq.m. of office space is seen viable to be operational within the year.

Even when the vaccine for COVID-19 is developed, physical distancing will continue to be practiced and become the new norm. As such, some companies may opt to continue implementing partial WFH scheme to limit the number of employees in their offices while others may find the WFH scheme to be effective in their business. Still, there may be other companies who will continue to fully implement WFH schemes and have their offices be filled only by a skeletal workforce. These arrangements may cause tenants to be more efficient in their office space utilization prompting them to lower their space requirements. As such, there is a possibility that the Cebu office market may have temporary surges in vacancy levels.

Companies who found WFH schemes to be ineffective for their businesses, however, would need additional office spaces capable of providing all the necessary office equipment at the soonest possible time to comply with the physical distancing mandate. This is where flexible and serviced offices can take advantage of as these spaces come with private rooms and, with few modifications, provide enough space allocation for every employee. Additionally, cautious tenants, in a bid to mitigate risks in these times of uncertainty, could find shelter in flexible and/or serviced offices.

FIGURE 2
Co-Working, Flexible & Serviced Office Space's Growth and their Overall Cebu Office Market Share



*2020 Figures cover only the months of January to March
Source: Santos Knight Frank Research

Although Co-Working office spaces would suffer from low occupancy levels due to its emphasis on "collaboration", which is not allowed under the physical distancing mandate, these spaces may still be converted to flexible and/or serviced offices to generate more revenues. Other services, like the provision of virtual address for tenants, may be bolstered to secure more revenue streams.

Currently, there is an estimated gross floor area of around 38,000 sq.m. for Co-Working, Flexible and Serviced Offices in Metro Cebu. This figure has continuously been increasing and in 2019 recorded a 60.27% y-o-y growth. However, with the COVID-19 virus looming, it is likely that this growth would contract as businesses try to survive and adapt to the new normal.

The Opportunities in Outsourcing Business
Similar as to what happened after the 2008 Global Financial Crisis, the Philippines may come out to be a top viable investment option for BPO companies. The pandemic has caused huge economic damages to other countries as well. Similarly, some major cities have also implemented their own versions of ECQ to curb the spread of COVID-19. With such damages, these companies may look to cut costs by outsourcing some of their businesses here. As the metropolis already offers affordable office spaces and a high quality of talent pool proven by the

sizeable BPO workforce residing here, Cebu has already proven that it has the necessary manpower and infrastructure to cater to such businesses.

Coping with the Changing Landscape

Santos Knight Frank recommends to both the landlords and the tenants to open a line of communication to come up with a "win-win" situation for both parties in reviewing their lease agreements and terms. The symbiotic relationship between the two should be fostered and both should work closely to accommodate each other's needs.

With a possible gradual increase in vacancy levels after the lifting of ECQ, landlords should actively seek out to retain their largest tenants as these companies would be crucial in keeping their properties financially afloat. As some companies may find WFH schemes effective in their business, landlords would have to be creative enough in either providing rent relief measures and/or proposing the idea of flexible work spaces to keep tenants from moving out of their properties or lowering their space requirements.

BCPs are necessary for companies for them to navigate their businesses through the times of uncertainty. The experiences of companies from the past crises should be incorporated into consideration to improve BCPs. Utilizing technology to bolster company efficiency and employee productivity should also be continually enhanced.

The value of having facilities and property management services in office buildings can no longer be discounted. Their presence alone already radiates to tenants and other stakeholders that the property is well maintained. This should prove crucial now and in the coming months as companies would probably prefer well-kept office spaces for health and employee well-being reasons.

In these times of uncertainty, everyone is affected. Businesses, both tenants and landlords, will have to adapt to a new normal and do so quickly or face extinction. The COVID-19 pandemic has revealed to everyone just how vulnerable our industries are to external shocks. Nevertheless, this is not the first time the country has faced similar catastrophes nor will it be the last. The resiliency of the Philippine market will always prevail as it has done so in the past. We are all in this together and we will all get through it.

4 Valuation Methodology

Valuation Rationale

4.1 The purpose of this appraisal is to estimate the Market Value of the Property. In any given valuation exercise, fair value can be arrived at using either one or a combination of the three (3) approaches to value, namely: Market (or Direct Sales Comparison) Approach, Income Approach, and the Cost Approach. The determination of the appropriate approach for a given property is based on the quality and quantity of data available, particularly its relevance to the Property under appraisement. If more than one valuation approach is utilized, the resulting values are reconciled to produce a final value conclusion.

4.2 Due to the nature of the Property and the purpose of this appraisal, both the Cost Approach and Income Approach to value are deemed the most appropriate to use and the Market (or Direct Sales Comparison) Approach was not used.

Cost Approach

4.3 The Cost Approach generally involves the following steps:

A. The value of the subject land is normally estimated by the Market or Sales Comparison Approach. In instances where the land is covered by a Lease Agreement, the value of the leased fee or leasehold rights on the subject land, whichever is applicable, is instead estimated.

B. The depreciated cost of the subject improvement is estimated by calculating the direct cost of reproducing or replacing the improvement, deducting accrued depreciation from all sources, and adding the indirect costs attributed to the improvement.

Combining the estimates shown above results in the indicated value of the Property by the Cost Approach.

4.4 **On Land (Leasehold)**

As mentioned, the land subject of this appraisal is covered by a Lease Contract. In estimating the value of the Property covered by a lease, two interests are involved: the interest of the lessee which is the leasehold; and the interest of the lessor which is the leased fee or the lessor's interest. The Client being the lessee, the purpose of this appraisal is to establish the leasehold value of the subject land.

Leasehold Value is the present (discounted) worth of the rent savings (or rental gains) when the contract rent at the time of the appraisal is less than the current market rent. It is estimated by computing the present worth of the rental gains over the remaining term of the lease agreement using an appropriate discount rate.

The valuation process, briefly stated, consists of the following:

- Estimation of the current market rent of the leased property;

- Estimation of the rental gains over the remaining term of the lease agreement, if any. Rental gains projection is pegged at 10 years while the 11th year rental gain is used to estimate the terminal value of the Leasehold Rights on the Land;
- Estimation of an appropriate discount rate and terminal capitalization rate; and
- Discounting process based on an appropriate discount rate to arrive at an indicated leasehold value.

Market Rent of the Land

4.5 As mentioned earlier, another purpose of this report is to express an opinion of the Market Rent of the Property if it were to be leased out in accordance with its highest and best use. The amount of annual or monthly rental, which the subject property should command might be estimated by any, or a combination of the following:

1. By Market (Comparison) Approach, in which rentals of similar properties are used a benchmark; and
2. By Income Approach, in which the value of the Property is first established, and the proper capitalization rate is applied to obtain its rental value.

On the other hand, Market Rent is defined under IVS 2019 as “the estimated amount for which an interest in real property should be leased on the valuation date between a willing lessor and a willing lessee on appropriate lease terms in an arm’s length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion.”

It is the rental income that the Property would most likely command in an open market. It is also defined as being the amount at which a willing lessee would pay and a willing Lessor would receive for the use of certain property, neither being under compulsion to transact, and both having reasonable knowledge of all relevant facts.

Market Approach

4.6 We have made a survey of existing ground leases of similar lands in the vicinity of the Property and found scarcity of rental data that may be used for direct comparison purposes.

Income Approach

4.7 In the absence of any comparable rental data, we have estimated the **Market Rent** of the Property by a variation of the Income Approach on the basis of what prudent real estate investors or landowners would be warranted in leasing it in order to realize a fair return on their investment or property, for that matter. Under this approach, the market value of the Property is first established, and the proper capitalization rate is applied to obtain its rental value.

Market Value of the Land

4.8 In valuing the land, we made use of the Market Approach which is the most common technique for valuing land, and is the most preferred method when comparable sales are available. With this method, sales of similar property or parcels of land are analysed, compared, and adjusted to provide a value

indication for the Property being appraised. The comparison process is based on an analysis of the similarity or dissimilarity of the comparables.

4.9 The appraiser gathers data on actual sales as well as listings and identifies the similarities and differences in the data; ranks the data according to their relevance; adjusts the prices of the comparables to account for the dissimilarities with the land being appraised; and forms a conclusion as to the most reasonable and probable market value of the subject property.

4.10 The elements of comparison include property rights, financing terms, conditions of sale (motivation), market conditions (sale date), location, physical characteristics, available utilities, and zoning. The most variable elements of comparison are the site's physical characteristics, which include its size and shape, frontage, topography, location, and view. The units of comparison applied may be hectares or sq.m., or any other unit used in the market.

Evidence of comparable properties

4.11 **Analysis of Comparable Properties Offered for Sale**

In the course of our investigation, we looked at current market listings of comparable properties in the area. The comparable properties selected share the same or similar characteristics as the subject. Whatever information or data we came up with was then analysed, and comparison made for such factors as size, characteristics of the lot, location, quality, and prospective use. In the Philippines however, property transactions are not officially disclosed, and quite often, actual transaction price is masked by other undisclosed arrangements and different from the figure shown on the sale and purchase agreement. We have therefore made reference to the following data, made our market judgment, and adjusted for the above-mentioned factors:

1. A vacant commercial lot located at the corner Sergio Osmena Boulevard and T. Padilla Street, within Barangay Tejero, Cebu City, about 200 meters southwest from Robinsons Galleria Cebu, having an area of 2,444 sq.m. is being offered for sale at an asking price of PhP366,600,000 or about PhP150,000 per sq.m.
   Source: Filmore Amancia - 0917-335-0788

2. A vacant commercial lot located along 3rd Avenue, within Barangay Carreta, Cebu City, near Robinsons Galleria, having an area of 789 sq.m. is being offered for sale at an asking price of PhP130,000 per sq.m.
   Source: Filmore Amancia - 0917-335-0788

3. A commercial lot located along Quano Avenue, within Barangay Subangdaku, Mandaue City, near SM City Cebu, having an area of 5,329 sq.m. is being offered for sale at an asking price of PhP135,000 per sq.m.
   Source: Arbin Yamson - (0927) 884-2290

Summary of Adjustments

The Data Comparison Grid shown on Appendix **8** shows a summary of the aforementioned adjustments, which provides an indication as to the degree of adjustment made to the different elements in comparison. A numeric indicator indicates the level of adjustments, in terms of percentage when compared with the subject property. The use of (-) indicates a negative adjustment and a + indicates a positive adjustment. A downward adjustment (-) used is made to reflect superior characteristics of the comparable sale/listing, while an upward adjustment + reflects inferior characteristics of the comparable sale/listing. Finally, a 0 is used to confirm similarity between the comparable sales/listings and the subject or is used when market information is unavailable or does not support an adjustment for any particular element of comparison.

Value of the Land 4.12 As reflected in the said Comparison Grid, the value of the land is estimated at **PhP116,000 per sq.m.**, or a total of **PhP586,000,000** for a land area of **5,053.23 sq.m.**

Rate of Return 4.13 The value of the land having been established, its rental value may now be estimated considering the prevailing rate of return prudent investors or landowners would expect in ground leases, normally in the range of 4% to 7%. We based this range of rate of return from interviews with land owners and brokers, as well as our analysis of the relationship between prevailing capital values and rental rates and it is believed to be the current yield in the commercial land lease market.

Considering the most recent pandemic and the effect it had on the economy and the leasing market, we have not adopted the average rate of return, and have instead adopted a conservative interest rate (return on investment) of 4%.

In light of the foregoing, our estimate of the Market Rent of the Property is as follows:

Land Value	PhP	586,000,000	
Interest on Land Value			
PhP586,000,000 @ 4%	PhP	23,440,000	

Total	**PhP**	**23,440,000**	**per year**
		=========	
Or	**PhP**	**1,953,330**	**per month**
		=======	

Market Rent of the Land 4.14 On the basis of the foregoing, the Market Rent of the land is estimated at **PhP386.55 per sq. m. per month**, or a total of **PhP1,953,330 per month**, or say, **PhP23,440,000 per annum** for the subject land area of **5,053.23 sq. m.**

Rental Gain 4.15 Rental Gain is reckoned as the difference between the Market Rent and the Contract Rent.

Discount Rate 4.16 The discount rate was computed using the build-up method. The discount rate is calculated by adding together different variables. The variables that were used to generate it consist of a risk-free rate and a reasonable risk premium. Based on the foregoing, discount rate is estimated at 7.1665%, or say, 7.20% (10-year T-bond rate at about 3.9165% (from Philippine Dealing & Exchange Corporation

(PDEx) as of 30 June 2021) plus 3% equity risk premium from OECD and additional 0.25% risk premium for unidentifiable risk factors which include the uncertainty brought about by the Covid-19 global pandemic.).

For purposes of this valuation, we have adopted, as risk-free rate, the 10-year T-bond rate from PDEx. The Philippine Dealing & Exchange (PDEx) system appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEx. The PHP BVAL Reference Rate dated 30 June 2021 was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

4.17 We have adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3%. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits
Valid as of: **25 June 2021**

145	PRT	Portugal	-	-	(6) (7)

Capitalization Rate 4.18 Capitalization rate adopted to arrive at the terminal value is 4.2% (Discount Rate less Projected Long-term Growth Rate (3.0%). The long-term growth rate is based on a growth forecast of the prevailing commercial market over the forecast

period. This is based on what the Property is perceived to achieve in the long-term considering the present situation of the market.

Remaining Life of the Lease 4.19 Remaining life of the lease as of the date of valuation is 99 years.

Summary of Leasehold Assumptions 4.20 In summary, below are the assumptions/statistics used in determining the leasehold value of the subject land.

ROBINSONS GALLERIA CEBU			
Lease Details			
Lot Area	:	5,053.23	sq.m.
Term of Lease	:	99	years
Assumed Commencement Date	:	01-Oct-21	
Lease Rate	:	7%	of net leasing revenue
Market Rent (in PhP)			
Monthly Rent	:	386.55	/sq.m./ month
Annual Rent	:	23,440,000	
Annual Escalation	:	3%	starting Y2
Discount Rate			
Risk Free Rate		3.92	as of June 30, 2021 (BVAL PDEX)
Risk Premium		3.00	as of June 25, 2021 (OECD)
Additional Risk		0.25	risk premium for unidentifiable risk factors
		7.17	
Resulting Discount Rate, say		7.20%	
Terminal Capitalization Rate		4.20%	

Leasehold Value 4.21 On the basis of the foregoing, the leasehold value of the subject land may reasonably be estimated at **PhP494,000,000**.

We attach a copy of our valuation calculations at Appendix **5**.

4.22 **On Leasehold Improvements and Machinery & Equipment**

The estimate of the leasehold improvements can be either replacement or reproduction cost, new. Replacement Cost, New is defined as "The cost of construction, at current prices, of a building having utility equivalent to the building being appraised but built with modern materials and according to current standards, design, and layout." On the other hand, Reproduction Cost, New is defined as "The cost of construction, at current prices, of an exact duplicate, or replica, using the same materials, construction standards, design, layout, and quality of workmanship, and embodying all the deficiencies, super-adequacies, and obsolescence of the subject building."

In estimating the Replacement Cost of the buildings and improvements, we have made reference to the building cost index or other building cost as available in the market or published by a reputable quantity surveyor firm. We have likewise referred to our own database of building construction costs. We do not hold ourselves to be construction cost advisers and a formal estimate can only be given by a specialist construction cost consultant. It is recommended that a professional quantity surveyor or a firm of professional quantity surveyors should be consulted in order to assess an accurate building/improvement replacement cost.

In arriving at our assessment using the Cost Approach for the Equipment, we first developed the Replacement Cost, New ("RCN") of the asset. In developing our RCN, we have obtained current cost information from equipment dealers in the region. We relied on data furnished by equipment manufacturers, dealers and importers, as well as information contained in price catalogues, other published materials including the Internet and inquiries from local suppliers

RCN is the estimated amount of money needed to acquire a similar new item having the nearest equivalent utility as the Property being valued taking into consideration current prices of materials and manufactured equipment, shipping and handling, labour, contractor's overhead, design and supervision, profit and fees, and other attendant costs associated with its acquisition and installation, but without provision for overtime or bonuses for labour and premium for materials.

Having developed the RCN, we then deducted for the various elements of depreciation to arrive at the Depreciated Replacement Cost ("DRC"). DRC includes depreciation allowance or loss of value arising from condition, utility, age, wear and tear, and obsolescence present (physical, functional or economic), taking into consideration past and present maintenance policy and rebuilding history.

General
Where elements are of foreign origin, the assessment process give full consideration to all expenditures normally incurred in importation such as packing and crating charges, inland and ocean freight, insurance, duties and taxes, bank charges and commissions, wharfage, brokerage and handling

In estimating the depreciation of the assets, we have utilized the age-life method tempered with our observed condition of the assets. The remaining lease period was likewise considered in arriving at the value of the leasehold improvements.

Appendix **9** contains the Schedule of Assets describing in detail these assets.

Income Approach

Definition 4.23 The Income Approach is applicable to the valuation of income producing properties, business enterprise as well as the valuation of intangible assets. This approach measures the current value of an asset by calculating the present value of its future economic benefits by discounting expected cash

flows at a rate of return that compensates the risks associated with the particular investment.

For this particular engagement, we have applied both the Discounted Cash Flow Analysis and the Direct Capitalization Method.

Discounted Cash Flow Analysis

4.24 The discounted cash flows, or DCF valuation is the most popular fundamental approach in valuing the future economic benefits of a projected income stream. DCF measures actual yield rather than paper income for the asset/business owner and the analysis of DCF is widespread and mandatory in the various fields of business making DCF-based valuation ideal.

4.25 The valuation process, briefly stated, consists of the following:

- Estimation of the revenues generated;
- Estimation of the costs and expenses related to the operations of the development;
- Estimation of an appropriate discount rate;
- Discounting process using an appropriate discount rate to arrive at an indicative market value; and
- Estimation of the Terminal Value of the Property.

Discount Rate

4.26 The discount rate was computed using the build-up method - calculated by adding together the different variables. The basic formula for the traditional build-up model is:

Discount Rate = Rf + P + MR + LR

Where	Variable	Proxy Statistic
Rf	Risk Free Rate	PDEX Risk Free Rate
P	Equity Risk Premium	Country Risk
MR	Management Risk	
LR	Liquidity Risk	

The variables that were used to generate the Discount Rate are exhibited in the table below, along with the sources and/or dates as at or nearest the 30 June 2021 valuation date.

Risk Free Rate (10Y)	3.92%	As of 30 June 2021, BVAL PDEX
Equity Risk Premium	3.25%	As of 25 June 2021, OECD
Management Risk	0.80%	
Liquidity Risk	0.90%	

4.27 The following assumptions were used to arrive at the Discount Rate using the Build-Up Method.

Risk Free Rate

4.28 For the purposes of this valuation, we adopted the 10-year bond rate sourced from Philippine Dealing & Exchange Corporation (PDEX) as of 30 June 2021 - the valuation date (image shown below). The Philippine Dealing Exchange

(PDEx) system has recently appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEX. The PHP BVAL Reference Rate was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

Equity Risk Premium

4.29 We used an equity risk premium of 3.25%. We adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3% plus an additional 0.25% risk premium for unidentifiable risk factors. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors. Shown below is an excerpt of said table.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits
Valid as of: 25 June 2021

Management & Liquidity Risk

The Management Risk refers to the estimated premium to compensate for the burden of management, while the Liquidity Risk refers to the ease (or the difficulty) with which an investment can be sold or made. A review was done and we have arrived at the following: Management Risk was classified into four categories, with the corresponding rates: Poor – 1.2; Average – 1.0; Above Average - 0.90 and Excellent - 0.80 while Liquidity Risk has three (3) categories: Poor –1.2; Average – 1.0; and Good – 0.90. After the said review, we deemed it appropriate to use 0.80% for Management Risk and 0.90% for Liquidity Risk.

Resulting Discount Rate 4.30 Resulting Discount Rate used for this valuation is 8.87%, or say, 9.0%.

Capitalization Rate 4.31 A discount rate is used to calculate the present value of future projections of a benefit stream when growth varies from year to year. However, if growth is estimated to remain level throughout the life of the investment, a capitalization rate is often used. In its most basic form, the relationship between discount rate and a capitalization rate can be summarized as follows:

Capitalization Rate = Discount Rate – Growth

For purposes of this valuation, a long-term growth rate of 4.5% has been assumed. This is based on what the Property is perceived to achieve in the long-term considering the present situation of the market. Using this assumption, resulting Capitalization Rate would be 4.5%.

Key Financial Assumptions 4.32 We relied on the historical and projected assumptions brought about by our research and as provided by the Client. These financials were analysed to ensure reasonableness by comparing projected revenue growth rates and other operating expenses based on historical performance. Based on interviews with the representatives of the company, projections were prepared to reflect the current and expected future market conditions.

a. **Revenues**

i. Cashflow projection starts in 01 July 2021 and runs for a period of 10 years.

ii. The revenues come from the rental of retail units, office units and parking slots. In estimating the annual rents of the subject units/slots, we have adopted the contract rents as appearing in the copy of the rent roll provided to us by the Client for the occupied units/leased parking slots. After the expiration of lease, lease rates then are aligned with market rates and are assumed to have an average of 4-year lease contracts. Aside from the monthly rentals from leasable areas, revenues likewise include Management and Aircon Dues which are likewise charged to the tenants monthly on a per sq.m. basis. Management dues are for common and/ or shared utilities, facilities and services. These are inclusive of air-conditioning equipment rental during office hours (but exclusive of power consumption).

iii. It would be important to note that as the building administrators, they collect the said dues as a cost recovery mechanism for all expenses related to the day-to-day operations of the building and its common areas.

iv. Occupancy assumptions were based on the actual performance of the Property as well as the prevailing trend in the subject area taking into consideration the forecasted effect of the global pandemic in the office market Occupancy of the Property as of valuation date is at 100% while the historical average performance of the Property for the last two years is at 100%. For this valuation exercise, we are assuming an average overall vacancy allowance of 1%. This assumed vacancy allowance for the whole cashflow period is used to account for unanticipated vacancies brought about by early terminations and non-renewals, and rental concession requests from tenants.

v. We used actual escalation rates indicated in the rent roll for all existing leases up until their lease expires. After which, an average escalation of 5% was then be applied year on year until the end of the cash flow.

b. **Cost & Expenses**

i. Operating Expenses which would include administrative and utility expenses are normally charged against the Common Use Service Area (CUSA) Fees or Association Dues being collected monthly to the individual tenants. However, there are instances when CUSA funds are insufficient to pay off all common charges. If and when this happens, the owners/administrators would have to pay off these expenses and this has been taken into consideration in the projections.

ii. Operating Costs and Expenses are assumed to be an average of approximately 20% of the Total Net Revenues. Operating costs and expenses included are basically divided in to two – real estate expense and general administrative expenses. Real Estate expenses are as follows: contracted services, repairs & maintenance, management fee and loss from CUSA and miscellaneous expenses. While under General Administrative Expense are – salaries & wages, taxes and licenses, advertising & promotions, commission, insurance, communication, rent expense, supplies, travel & transportation, and representation & entertainment expenses.

These expenses are projected either as a percentage of the rental revenues or the total net revenues. These percentage allocations were from the historical and projected performance of the Property.

iii. Annual Capital Expenditures (CAPEX) for the entire cashflow period, on the other hand, was assumed to be 1.5% of the Net Leasing Revenues. This assumption is based on benchmarking and analysis of current market practice in allocating CAPEX reserve.

This allocation would help ensure that the Property would operate efficiently and maintain its good and sound condition.

Resulting Market Value

a. Earnings Before Income Tax, Depreciation and Amortization (EBITDA) for the whole duration of the cashflow shall be discounted at the derived Discount Rate of 9.00%.

b. The sum of discounted cashflows including the Terminal Value of the Property represents the Market Value of the Property.

The Terminal Value of the Property is the value of the property beyond the explicit forecast period. It is assumed that the property or business will continue to generate cashflows in perpetuity. As mentioned earlier, Terminal Capitalization Rate used is 4.5%.

The Discounted Cashflow showing the estimated Market Value of the subject property is attached as Appendix **7**.

Direct Capitalization Method 4.33 The Direct Capitalization Method is a real estate valuation method that helps convert a single year's income into value by dividing the Net Operating Income with an appropriate Capitalization Rate. This method assumes that the Property has a stabilized net operating income. All parameters of a typical investor return expectations are represented either explicitly or implicitly in either income forecast or the capitalization rate. The direct capitalization rate, as the ratio of income to value, serves as a proxy for investor return assumptions.

Resulting Market Value 4.34 We made use of the single year's cashflow projection (2022) to derive the Market Value using the Direct Capitalization Method. Capitalization rate adopted to arrive at the Property Market Value is 4.5%.

Valuation basis

Market Value 4.35 Market Value is defined in the 2019 **International Valuation Standards** as:

"The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

Valuation date

Valuation date 4.36 The valuation date is **30 June 2021**.

General Assumptions

Assumptions 4.37 Our valuation is necessarily based on a number of assumptions which have been drawn to your attention in our General Terms of Business, Letter of Engagement and within this report.

Key Assumptions 4.38 Whilst we have not provided a summary of all these assumptions here, we would in particular draw your attention to a key assumption that we relied on a very considerable extent on the information provided by the Client and have assumed that documents provided to us such as gross floor area tabulation, floor plans, lot area allocation, building tenancies and other relevant matters are factual. We were also advised by the Client that no material facts have been omitted from the information provided.

Special Assumption 4.39 We were instructed to re-value the Property without a re-inspection. We have, thus, considered changes to the physical attributes and/or characteristics of the

Property which have occurred between the valuation date and the date of our previous valuation as confirmed by the Client. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.

4.40 We have adopted the floor area details provided to us by the Client and have assumed these to be accurate.

4.41 We were not likewise provided with a Lot Plan where Robinsons Galleria Cebu is erected. For purposes of this valuation, the land is assumed to be rectangular in shape.

4.42 The value of the improvement using cost approach is just an allocation as the subject 3rd and 4th floors cannot technically be separated from the rest of the building.

4.43 Our valuation of Machinery & Equipment has also undertaken the following special assumptions:

We have not carried out a full mechanical survey, or structural test, nor have inspected the machinery and equipment, which are covered, unexposed or inaccessible. Our assessment is based on the premised that the items are in a condition commensurate with age and usage.

Machinery & Equipment associated with the supply of services to the building such as Elevators, Air Conditioning Systems are valued on the assumption that they are permanently installed or attached to the building.

4.44 In applying Income Approach to value, we have considerably relied on the information provided to us by the Client which includes the following: lease contracts, revenue and expense projections, historical and projected occupancies. Upon expiration of contracts, we estimated the lease rates based on the acceptable escalations in the market.

4.45 Given the 99-year leasehold, we assumed that the Property is comparable to a freehold property given the duration of the leasehold interest on the land. Thus, a terminal value of the Property was computed at the end of the cashflow.

Valuation Results

Using Cost Approach

4.46 Using the **Cost Approach,** the Market Value of the Property, may be summarized as under:

Land (Leasehold Value)	**PhP494,000,000**
Designated Building Floor (3rd and 4th)	**234,400,000**
Building Machinery & Equipment	**159,032,000**

T O T A L	**PhP887,432,000**
	============
R O U N D E D T O	**PhP887,000,000**
	============

4.47 The Market Value of the Property is estimated at **PhP887,000,000 (EIGHT HUNDRED EIGHTY-SEVEN MILLION PHILIPPINE PESOS).**

Using Income Approach

4.48 Using the **Income Approach** on the other hand, the Market Value of the Property is estimated as follows:

DCF Analysis	**PhP943,000,000**
Direct Capitalization Method	**PhP1,094,000,000**

Calculation

4.49 We attach a copy of our valuation calculations for the Income Approach at Appendix **6 & 7**.

Comments

4.50 The values arrived at using the Income Approach are noted to be higher than the value arrived at using the Cost Approach. This is because, unlike the Income Approach, the Cost Approach does not capture the income potential of the Property.

4.51 For purposes of this valuation, we deemed it appropriate to adopt the results arrived at by the Income Approach – DCF Analysis, since this method is usually used to determine the value of an income-generating property, as it also captures the Property's future economic benefits, giving a better representation of the Property's Market Value at an acceptable rate of return that would compensate for the risks associated with the particular investment. It likewise takes into consideration market cycles that Direct Capitalization Method cannot capture.

Conclusion of Value

4.52 In conclusion, we are of the opinion that the Market Value of the Property, reckoned as of **30 June 2021**, is:

PhP943,000,000 (NINE HUNDRED FORTY-THREE MILLION PHILIPPINE PESOS).

***Note**: The outbreak of the Novel Coronavirus (COVID-19), declared by the World Health Organization as a "Global Pandemic" on 11th March 2020, has impacted global financial markets. Travel restrictions have been implemented by many countries. In the Philippines, market activity is being impacted in all sectors. As at the valuation date, we consider that we can attach less weight to previous market evidence for comparison purposes, to inform opinions of value. Indeed, the current response to COVID-19 means that we are faced with an unprecedented set of circumstances on which to base a judgement. Our valuation is therefore reported on the basis of "material valuation uncertainty" per IVS 103 of the International Valuation Standards. Consequently, less certainty – and a higher degree of caution – should be attached to our valuation than would normally be the case. Given the unknown future impact that COVID-19 might have on the real estate market, we recommend that you keep the valuation of this property under frequent review.*

Appendix 1 - Assumptions, Limiting Conditions and Disclaimers

Basis of Value	Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion." In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property. It is further assumed that title to the property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable. The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.
Property Rights appraised	The rights appraised in this report are the property rights in fee simple, free and clear. "Fee simple" is defined as absolute ownership, without limitations to any particular class of heirs or restrictions, but subject to the limitations of eminent domain, escheat, police power and taxation. We assume that the fee simple interest is marketable and in compliance with the applicable laws of the Philippines.
Fractional Interests:	When the study contains a valuation relating to an estate in land that is less than the whole fee simple estate, the value reported for such estate relates to a fractional interest only in the real estate involved, and the value of this fractional interest plus the value of all other fractional interests may or may not equal the value of the entire fee simple estate which is considered the whole. When the valuation report contains an allocation of the total valuation between land and building improvements, such allocation applies only under the existing program of utilization. The separate valuations for land and building cannot be used in conjunction with any other valuation/appraisal and will be invalid if so used.
Assumptions:	The valuation is based on the condition of the economy and the purchasing power of the Philippine Peso as of the effective date of valuation. We have assumed that the floor areas provided us have been calculated in accordance with engineering standards, and assumed herein to be true and correct. Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.
Information Supplied By Others	Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser. Information provided by informed local sources, such as government agencies, financial institutions, Realtors, buyers, seller and others, was weighed in the light in which it was supplied and checked by secondary means; however, no responsibility is assumed for possible misinformation.
Legal Issues:	This valuation assumes no responsibility for the validity of legal matters affecting the property. The ownership history reported in this valuation is based on the appraiser's research of public records, which are assumed to be accurate and complete. It is not the intent of the valuation to offer a legal opinion of title. It is further assumed that the property has good title, responsible ownership and competent management. Any liens or encumbrances which may now exist have been disregarded. The appraiser is not required to give testimony or attendance in court by reason of this valuation, with reference to the property in question, unless arrangements have been previously made.
Liability:	The liability of Santos Knight Frank, Inc. and its directors and employees is limited to the addressee of this report only. No accountability, obligation or liability to any third party is accepted. In the event we are subject to any liability in connection with this engagement, regardless of legal theory advanced, such liability will be limited to the amount of fees we received for this engagement.
Environmental Conditions:	It is assumed that there is full compliance with all applicable Philippine environmental regulations and laws unless non-compliance is stated, defined, and considered in this appraisal report.
Town Planning:	It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.
Condition of Improvements:	We have inspected the improvements and structures. However, we have not carried out a structural survey nor tested any of the services or facilities, nor have we inspected unexposed or inaccessible portions of the building, and are therefore unable to state that these are free from defect, rot, infestation, asbestos or other hazardous material. We have therefore, viewed the general state of repair of the property and advise that we did not notice any obvious signs of structural defect or dilapidations. Furthermore, the property appears to be in reasonable condition having regard to its age and use and unless otherwise stated. We also assume that the building complies with all relevant statutory requirements in respect of matters such as sanitary, building and fire safety regulations and standards.
Valuation Methodology:	Santos Knight Frank uses any one or a combination of the Market Data Approach, the Cost Approach, and the Income Capitalization Approach. Each methodology begins with a set of assumptions. The result is the best estimate of value Santos Knight Frank can produce, but it is an estimate and not a prediction or guarantee and it is fully dependent upon the accuracy of the assumptions as to income, expense and market conditions. These primary methodologies use market derived assumptions, including rents, yields and discount rates, obtained from analysed transactions. We do not represent ourselves as experts for data, such as economic, demographic or construction costs, which has been obtained from external sources.
Others:	This report and valuation shall be used only in its entirety and no part shall be used without the whole report. It may not be used for any purpose other than the intended purpose mentioned herein. Possession of this report or any copy thereof does not carry with it the right of copying or publication. All copies will originate from Santos Knight Frank, Inc. and will be signed and dated as such. Neither the whole nor any part of the report or any reference to our name, our valuation and our report may be included in any document, circular or statement nor published without our prior written consent to the form and context in which it may appear. The delivery and acceptance of this report completes this assignment.

Attention: **MR. FREDERICK D. GO**
President and Chief Executive Officer

Subject: **Terms of Engagement for Valuation Services**

Dear Mr. Go:

Thank you for your interest in our Valuation Services. We refer to your invitation of 03 August 2020 requesting Santos Knight Frank, Inc. ("SKF") to submit a proposal for valuation (the "Valuation") in respect of the properties detailed below (the "Properties").

This proposal, together with our General Terms of Business for Valuation Services ("General Terms"), sets out our terms of engagement for carrying out this instruction. Once agreed and signed, this proposal shall constitute our Letter of Engagement ("Letter"). This Letter and the General Terms (together, the "Agreement") exclude any other terms which are not specifically agreed to us in writing. To the extent that there is any inconsistency between the Letter and the General Terms, this Letter shall take precedence.

1. **Client**
Our Client for this Valuation is Robinsons Land Corporation (the "Client", "you" or "your").

2. **Purpose of Valuation**
The Valuation is provided solely the purpose of transferring some of the Client's assets to the REIT Company and its application for a Tax-Free Exchange Ruling with the Bureau of Internal Revenue and listing of the REIT Company in the Philippine Stock Exchange (the "Transaction"). Specifically, the Valuation will be used for the Client's Financial Statements to be attached to the Offering Circular as required by the Securities and Exchange Commission (SEC) and will be attached as an appendix to the Client's REIT Plan. In accordance with clause 4.1 of our General Terms, the Valuation may not be used for any other purpose without our express written consent. The Valuation will be made accessible in the public domain as part of the regulatory requirements of the Transaction.

3. **Term & Termination**
This appointment will commence upon signing of this Agreement and shall continue to be in effect for a period of two (2) years. Any extension of the Term of this Agreement shall be mutually agreed upon by the parties in writing.

Santos Knight Frank

Santos Knight Frank

23. Electronic Communication

During the engagement, both parties may wish to communicate electronically with each other. However, electronic transmission of information cannot be guaranteed to be secure or virus-or error-free and information could be intercepted, corrupted, lost or destroyed, arrive late or incomplete, or otherwise be adversely affected or unsafe to use. Both parties agree to accept these risks and so each party will be responsible for protecting its own systems and interests in relation to electronic communications. Neither party will have any liability to the other party on any basis for any loss or damage arising from or in connection with the electronic communication of information between both parties or their reliance on such information.

24. Acceptance

Please sign and return a copy of this Letter signifying your acceptance of the terms of the Agreement. We reserve the right to withhold any Valuation and / or refrain from discussing it with you until this Letter has been countersigned and returned.

Your attention is drawn to the "Important Notice" in the General Terms. If you have any questions regarding this Letter and / or the terms of the Agreement, please let us know before signing this Letter.

Thank you for choosing Santos Knight Frank, Inc. and we look forward to working with you on this important engagement.

Sincerely,
SANTOS KNIGHT FRANK, INC.

Subject: **Amendment to Terms of Engagement and General Terms of Business for Valuation Services Dated 03 August 2020 ("Amendment")**

Dear Mr. Go:

We refer to subject Letter of Engagement and General Terms of Business for Valuation Services (together, the "Agreement") between Robinsons Land Corporation (the "Client", "you" or "your") and Santos Knight Frank, Inc. ("SKF") for the valuation of fourteen (14) office buildings (the "Covered Properties").

For this purpose, the Agreement is amended as follows:

The first, second, and third and fourth paragraphs shall now read:

For the Valuation

I. Valuation for Asset Transfer to REIT Company and its application for a Tax-Free Exchange Ruling:

For Valuation Update

II. Valuation of Properties for REIT listing to PSE:
Our Valuation of 14 Properties will be as follows:
   1. Valuation for 4 Properties
   2. Periodic Update of 14 Properties
      Under REIT Company (Quarterly basis – optional)
   3. Valuation Update of 14 Properties under REIT Company

Except as amended hereby, all the provisions of the Agreement which are not inconsistent herewith are incorporated herein by way of reference and from date hereof, the Agreement and this Amendment shall be read as one integrated document.

Kindly affix your signature on the conforme portion below and return one (1) original signed copy to us.

Sincerely, **SANTOS KNIGHT FRANK, INC.**	Approved and agreed to by: **ROBINSONS LAND CORPORATION**

Appendix 3 - General Terms of Business

General Terms of Business for Valuation Services

These General Terms of Business (the "**General Terms**") and our Letter of Engagement (the "**Letter**"), together form the agreement between you and us (the "**Agreement**"). References to "**you**", "**your**" etc. are to persons or entities who are our client and, without prejudice to clauses 3 and 4 below, to any persons purporting to rely on our Valuation.

Unless **the** context otherwise requires, all other terms and expressions used but not defined herein shall have the meaning ascribed to them in the Letter.

When used herein or in the Letter, the term "**Valuation**" shall mean any valuation report, advance report, supplementary report or subsequent/update report, produced pursuant to our engagement and any other replies or information we produce in respect of any such report and/or any relevant property. Any words following the terms "**including**", "**in particular**" or any similar expression shall be construed as illustrative and shall not limit the sense of the words preceding those terms.

All of the terms set out in these General Terms shall survive termination of the Agreement.

1. Santos Knight Frank, Inc.

1.1. Santos Knight Frank, Inc. ("**Santos Knight Frank**", "**our**", "**us**", "**we**") is a Philippine corporation with Securities and Exchange Commission (SEC) Registration Number A199818549.

1.2. Our registered office is at 10/F Ayala Tower & Exchange Plaza, Ayala Avenue, Makati City where a list of members may be inspected.

1.3. Any representative of Santos Knight Frank, Inc. described as *Director* is either a member or an employee of Santos Knight Frank, Inc. and is not a member of the Board of Directors. The term *Director* has been retained because it is an accepted way of referring to senior professionals. The term "**Santos Knight Frank Person**" shall, when used herein, mean any member, employee, or consultant of Santos Knight Frank, Inc.

1.4. Our Tax Identification Number (TIN) is 201-626-570-000.

1.5. The details of our professional indemnity insurance will be provided to you on request.

1.6. Santos Knight Frank, Inc., being a corporation, is regulated by the Philippine Securities and Exchange Commission (SEC). It is also an SEC-accredited asset valuer. In accordance with reportorial filings with the SEC, it may be necessary to disclose valuation files to them. By instructing us, you give us your permission to do so. Where possible we will give you prior notice before making any such disclosure, although, this may not always be possible. We will use reasonable endeavours to limit the scope of any such disclosure and to ensure any disclosed documents are kept confidential.

1.7. Valuations will be carried out in accordance with the 2019 edition of the International Valuation Standards (IVS) by valuers who conform to its requirements and with regard to relevant statutes or regulations. Our senior valuers are Real Estate Appraisers licensed and regulated by the Philippine Professional Regulation Commission (PRC).

2. Governing law and jurisdiction

2.1. The Agreement and any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with it or its subject matter or formation or any Valuation shall be governed by and construed in accordance with Philippine laws.

2.2. Philippine courts shall have exclusive jurisdiction to settle any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with this Agreement or its subject matter or formation or any Valuation. This will apply wherever the relevant property or the client, or any relevant third party, is located or the service is provided.

3. Limitations on liability

3.1. Subject to clause 3.7, our maximum total liability in connection with or arising out of this Agreement and/or its subject matter and/or the Valuation is limited to our total service fees as set out in the Letter.

3.2. Subject to clause 3.7, we will not be liable for any loss of profits or for indirect or consequential loss or damages.

3.3. Subject to clause 3.7, any limitation on our liability will apply however such liability is or would otherwise have been incurred, whether in contract, tort (including negligence), for breach of statutory duty, or otherwise.

3.4. Except as set out in clauses 3.5 and 4.7 and 4.8 below, no third party shall have any right to enforce any of the terms of this Agreement.

3.5. No claim arising out of or in connection with this Agreement may be brought against any Santos Knight Frank Person. Those individuals will not have a personal duty of care to you or any other person and any such claim for losses must be brought against Santos Knight Frank, Inc. Any Santos Knight Frank Person may enforce this clause but the terms of this Agreement may be varied by agreement between the client and Santos Knight Frank, Inc. at any time without the need for any Santos Knight Frank Person to consent.

3.6. No claim, action or proceedings arising out of or in connection with the Agreement and/or any Valuation shall be commenced against us after the expiry of the earlier of (a) two years from the Valuation Date (as set out in the relevant Valuation) or (b) any limitation period prescribed by law.

3.7. Whether or not specifically qualified by reference to this clause, nothing in the Agreement shall exclude or limit our liability in respect of fraud, or for death or personal injury caused by our negligence or negligence of those for whom we are responsible, or for any other liability to the extent that such liability may not be so excluded or limited as a matter of applicable law.

4. Purpose, reliance and disclosure

4.1. The Valuation is prepared and provided solely for the stated purposes. Unless expressly agreed by us in writing, it cannot be relied upon, and must not be used, for any other purpose and, subject to clause 3.7, we will not be liable for any such use.

4.2. Without prejudice to clause 4.1 above, the Valuation may only be relied on by our Client. Unless expressly agreed by us in writing the Valuation may not be relied on by any third party and we will not be liable for any such purported reliance.

4.3. Subject to clause 4.4 below and for the stated purposes, the Valuation is confidential to our Client and must not be disclosed, in whole or in part, to any third party without our express written consent (to be granted or withheld in our absolute discretion). No liability is accepted to any third party for the whole or any part of any Valuation disclosed in breach of this clause.

4.4. Our appraisers are not required to give testimony or attendance in court by reason of this Valuation with reference to the property in question, unless arrangements have been previously made.

4.5. Except for the stated purposes, neither the whole nor any part of the Valuation and/or any reference thereto may be included in any published document, circular or statement nor published in any way whatsoever whether in hard copy or electronically (including on any website) without our prior written consent and approval of the form and context in which it may appear

4.6. Where permission is given for the publication of a Valuation, neither the whole nor any part thereof, nor any reference thereto, may be used in any publication or transaction that may have the effect of exposing us to liability for actual or alleged violations of SEC Memorandum Circular No. 2, series of 2014 (Guidelines on Asset Valuations) or Republic Act No. 8799 (Securities Regulation Code), as amended and its Implementing Rules and Regulations.

4.7. You agree that we, and/or any Santos Knight Frank Person, may be irreparably harmed by any breach of the terms of this clause 4 and that damages may not be an adequate remedy. Accordingly, you agree that we and/or any Santos Knight Frank Person may be entitled to the remedies of injunction or specific performance, or any other equitable relief, for any anticipated or actual breach of this clause 4.

4.8. You agree to indemnify and keep fully indemnified us, and each relevant Santos Knight Frank Person, from and against all liabilities, claims, costs (including legal and professional costs), expenses, damages and losses arising from or in connection with any breach of this clause 4 and/or from the actions or omissions of any person to whom you have disclosed (or otherwise caused to be made available) our Valuation otherwise than in accordance with this clause 4.

5. Knight Frank network

5.1. Santos Knight Frank, Inc. is a member of an international network of independent firms which may use the "Knight Frank" name and/or logos as part of their business name and operate in jurisdictions outside the Philippines (each such firm, an "**Associated Knight Frank Entity**").

5.2. Unless specifically agreed otherwise, in writing, between you and us: (i) no Associated Knight Frank Entity is our agent or has authority to enter into any legal relations and/or binding contracts on our behalf; and (ii) we will not supervise, monitor or be liable for any Associated Knight Frank Entity or for the work or actions or omissions of any Associated Knight Frank Entity, irrespective of whether we introduced the Associated Knight Frank Entity to you.

5.3. You are responsible for entering into your own agreement with any relevant Associated Knight Frank Entity.

5.4. This document has been originally prepared in the English language. If this document has been translated and to the extent there is any ambiguity between the English language version of this document and any translation thereof, the English language version as prepared by us shall take precedence.

6. Severance

If any provision of the Agreement is invalid, illegal or unenforceable, the parties shall negotiate in good faith to amend such provision so that, as amended, it is legal, valid and enforceable and, to the greatest extent possible, achieves the intended commercial result of the original provision. If express agreement regarding the modification or meaning or any provision affected by this clause is not reached, the provision shall be deemed modified to the minimum extent necessary to make it valid, legal and enforceable. If such modification is not possible, the relevant provision shall be deemed deleted. Any modification to or deletion of a provision under this clause shall not affect the validity and enforceability of the rest of this Agreement.

7. Entire agreement

7.1. The Agreement, together with any Valuation produced pursuant to it (the Agreement and such documents together, the "**Contractual Documents**") constitute the entire agreement between you and us and supersedes and extinguishes all previous agreements, promises, assurances, warranties, representations and understandings between you and us, whether written or oral, relating to its subject matter.

7.2. Subject to clause 3.7 above, you agree that in entering into the Agreement you do not rely on, and shall have no remedies in respect of, any statement, representation, assurance or warranty (whether made innocently or negligently) that is not expressly set out in the Contractual Documents. You further agree that you shall have no claim for innocent or negligent misrepresentation based on any statement set out in the Contractual Documents.

7.3. The Letter and these General Terms shall apply to and be incorporated in the contract between us and will prevail over any inconsistent terms or conditions contained or referred to in your communications or publications or which would otherwise be implied. Your standard terms and conditions (if any) shall not govern or be incorporated into the contract between us.

7.4. Subject to clause 3.7 and clause 6, no addition to, variation of, exclusion or attempted exclusion of any of the terms of the Contractual Documents will be valid or binding unless recorded in writing and signed by duly authorised representatives on behalf of the parties.

8. Assignment

8.1. You shall not assign, transfer, mortgage, charge, subcontract, declare a trust over or deal in any other manner with any of the rights and obligations under the Agreement without our prior written consent (such consent to be granted or withheld in our absolute discretion).

9. Force majeure

9.1. Neither party shall be in breach of this Agreement nor liable for delay in performing, or failure to perform, any of its obligations under this Agreement if such delay or failure results from events, circumstances or causeswhich could not be foreseen, or which, though foreseen, were inevitable.

10. Our fees

10.1. Without prejudice to clause 10.3 below, you become liable to pay our fees upon issuance of the Valuation. For the avoidance of doubt, unless expressly agreed otherwise in writing, the payment of our fees is not conditional on any other events or conditions precedent.

10.2. If any invoice remains unpaid after 30 days of the date on which it is presented, we reserve the right to charge interest, calculated daily, from the date when payment was due until payment is made at 3%

10.3. If we should find it necessary to use legal representatives or collection agents to recover monies due, you will be required to pay all costs and disbursements so incurred.

10.4. If an appraisal analysis is ordered and the assignment is cancelled before completion, we reserve the right to receive compensation, by way of damages, in an amount equal to 70% of the total fee for the assignment.

10.5. If you delay the instruction by more than 30 days or materially alter the instruction so that additional work is required at any stage or if

we are instructed to carry out additional work that we consider (in our reasonable opinion) to be either beyond the scope of providing the Valuation or to have been requested after we have finalised our Valuation (including, but not limited to, commenting on reports on title), we will charge additional fees for this work. Such additional fees will be calculated on the basis of a proportion of the total fee by reference to reasonable time and expenses incurred.

10.6. Where we agree to accept payment of our fees from a third party, such fees remain due from you until payment is received by us.

11. Anti-bribery and corruption and Anti-Money Laundering
We agree that throughout the term of our appointment we shall:

(a) comply with all applicable laws, statutes, regulations, and codes relating to anti-bribery and corruption and Anti-Money Laundering laws (the "**Relevant Requirements**");

(b) not engage in any activity, practice or conduct which would constitute an offense;

(c) maintain anti-bribery, anti-corruption, and anti-money laundering policies to comply with the Relevant Requirements and any best practice relating thereto; and

(d) promptly report to you any request or demand for any undue financial or other advantage of any kind in connection with the performance of our services to you.

12. Portfolios
Properties comprising a portfolio, unless specifically agreed with you otherwise, will be valued separately and upon the assumption that the properties have been marketed individually and in an orderly manner.

13. Land Register inspection and searches
We are not required to undertake searches, validations or inspections of any kind for title or price paid information in any publicly available land registry.

14. Title and burdens
We will assume, unless specifically informed and stated otherwise, that each property has good and marketable title and that all documentation is satisfactorily drawn and that there are no unusual outgoings, planning proposals, onerous restrictions or local authority intentions which affect the property, nor any material litigation pending.

15. Disposal costs and liabilities
No allowance is made in our Valuation for expenses of realisation or for taxation which may arise in the event of a disposal and our Valuation is expressed as exclusive of any VAT that may become chargeable. Properties are valued disregarding any mortgages or other charges, including commissions.

16. Sources of information
We rely upon the information provided to us by you, as to details of tenure and tenancies, planning consents and other relevant matters, as summarised in our Valuations. Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser.

17. Identity of property to be valued
We will exercise reasonable care and skill (but will not have an absolute obligation to you) to ensure that the property, identified by the property address in your instructions, is the property inspected by us and contained within our valuation report. If there is ambiguity as to the property address, or the extent of the property to be valued, this should be drawn to our attention in your instructions or immediately upon receipt of our report.

18. Boundaries
Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.

19. Planning, highway and other statutory regulations
19.1. Enquiries of the relevant planning and highways authorities in respect to matters affecting properties, where considered appropriate, are normally only obtained from the corresponding government agency. We can only state whatever current conditions may be. We recommend that formal written enquiries should be undertaken by your lawyers who should also confirm the position with regard to any legal matters referred to in our Valuations.

19.2. It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative, regulatory, or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.

19.3. We assume that the premises comply with all relevant statutory requirements including environmental, building, fire, and sanitation regulations.

20. Property insurance
Our Valuation assumes that each property would, in all respects, be insurable against all identifiable risks.

21. Building areas and age
Where so instructed, areas provided from a quoted source will be relied upon. Any dimensions and areas measured on location or from plan/s are calculated and are quoted to a reasonable approximation, with reference to their source. Where the age of the building is estimated, this is for guidance only.

22. Structural condition
Building, structural and ground condition surveys are detailed investigations of the building, the structure, technical services and ground and soil conditions undertaken by specialist building surveyors or engineers and fall outside the normal scope of a valuation. Since we will not have carried out any of these investigations, we are unable to report that any property is free of any structural fault, rot, infestation or defects of any other nature, including inherent weaknesses due to the use in construction of deleterious materials. We do reflect the contents of any building survey report provided to us in advance, or any defects or items of disrepair of which we are advised or which we note during the course of our ocular inspections but otherwise assume properties to be free from defect.

23. Ground conditions
Unless informed otherwise in writing, we assume there to be no adverse ground or soil conditions and that the load bearing qualities of the sites of each property are sufficient to support the building constructed or to be constructed thereon.

24. Environmental issues

24.1. Investigations into environmental matters by suitably qualified environmental specialists would usually be commissioned by most responsible purchasers or chargees of higher value properties or where there was any reason to suspect contamination or a potential future liability. Furthermore, such investigation would be pursued to the point at which any inherent risk was identified and quantified before a purchase proceeded. Where we are provided with the conclusive results of such investigations, on which we are instructed to rely, these will be reflected in our Valuations with reference to the source and nature of the enquiries. We would endeavour to point out any obvious indications or occurrences known to us of harmful contamination encountered during the course of our valuation enquiries.

24.2. However, we are not environmental specialists and therefore we do not carry out any scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination or any other environmental searches. If we are not provided with the results of appropriate investigations as outlined above and where there is no obvious indication of harmful contamination, our Valuation will be provided on the assumption that the relevant property is unaffected. Where we are informed that contamination is suspected or confirmed, but adequate investigation has not been carried out and made available to us, then the Valuation will be qualified only by reference to it.

25. Minerals, timber, airspace etc.

Unless specifically agreed otherwise in writing and so stated within the main body of the relevant Valuation, we do not value or attempt to value or take into account any potential income stream or other beneficial or detrimental effect or other factor relating to undiscovered or unquantified mineral deposits, timber, airspace, sub-ground space or any other matter which would not be openly known in the market and considered to have value.

26. Legal advice

26.1. We are appointed to provide valuation opinion(s) in accordance with our professional duties as Appraisers. The scope of our service is limited accordingly. The valuation assumes no responsibility for the validity of legal matters affecting the property. It is not the intent of the valuation to offer a legal opinion of title. Any liens or encumbrances which may now exist have been disregarded. We are not qualified legal practitioners and we do not provide legal advice and any statements made by us, or advice given, in a legal context should be construed accordingly.

26.2. Where appropriate we will liaise with your legal advisors. However, we accept no responsibility for any work carried out by them and we will not be liable for anything contained in legal documentation prepared by them.

26.3. Where we consider it is necessary for the provision of the Valuation and/or specifically agree to do so, and any additional fees we require for this work are agreed, we will read legal documents (including leases, licences etc.), however, (save for any comment concerning the impact of our interpretation of such documents on value) our interpretation of such documents cannot be relied upon to be legally correct. Where we do interpret legal documents, we will, for the purposes of providing our Valuation, assume our interpretation to be correct.

27. Loan security

Where instructed to comment on the suitability of property as a loan security we are only able to comment on any inherent property risk. Determination of the degree and adequacy of capital and income cover for loans is the responsibility of the lender having regard to the terms of the loan.

28. Build cost information

In the provision of valuation services we do not hold ourselves out to have expertise in assessing build costs. Where our instruction requires us to have regard to build cost information, for example in the valuation of properties with development potential, we strongly recommend that you supply us with build cost and other relevant information prepared by a suitably qualified construction cost professional, such as a quantity surveyor. The Valuation will be stated to have been arrived at in reliance upon the build cost information supplied to us by you. In the absence of any build cost information supplied to us, we may have regard to published build cost information. Build costs produced using this approach must be assumed to be unreliable or inaccurate; any reliance which can be placed upon our Valuation in these circumstances is severely restricted. Specialist professional advice on the build costs should be sought by you. If you subsequently obtain specialist build cost advice, we recommend that we are instructed to review our Valuation.

29. Reinstatement assessments

A reinstatement assessment for insurance purposes is a specialist service and we recommend that separate instructions are issued for this specific purpose. If an indication is required as a check against the adequacy of existing cover this should be requested and will be so stated in the body of the relevant Valuation. Any indication given is provided for guidance only and must not be relied upon as the basis for insurance cover. In any event, our reinstatement assessment should be compared with the owner's and if there is a material difference, then a full reinstatement valuation should be reconsidered.

30. Comparable evidence

Where comparable evidence information is included in our Valuation, this information is often based upon our oral enquiries and its accuracy cannot always be assured, or may be subject to undertakings as to confidentiality. However, such information would only be referred to where we had reason to believe it or where it was in accordance with our expectation. In addition, we have not inspected comparable properties.

31. Valuation bases

Valuations are carried out on a basis appropriate to the purpose for which they are intended and in accordance with the relevant definitions, commentary and assumptions. The basis of valuation will be agreed with you and specified in the Letter and in the relevant Valuation.

Important Notice

If you have any queries relating to this Agreement please let us know as soon as possible, and in any event before signing the Letter and/or giving us instructions to proceed.

Your instructions to proceed, preferably signing on the space provided for under the Letter, will constitute your acceptance to use our services on the terms of the Agreement.

Accordingly, our commencement of work pursuant to your instructions shall constitute acceptance of your offer and as such establish the contract between us on the terms of the Agreement.

Appendix 9 - Schedule of Assets

BUILDING	
Description	**Market Value (PhP)**
ROBINSONS GALLERIA CEBU (3rd and 4th Floor) -	
As seen during our inspection for the previous valuation done, Robinsons Galleria Cebu is a four (4) - storey with two (2) - basement and roof deck, reinforced concrete framed building with glass curtain and concrete hollow block walls supplemented ACP cladding, glass panel windows and tempered glass entrance doors. Its interior finishes consist of homogeneous ceramic tiles flooring in hallways and common areas and plain cement and epoxy paint finish in basement parking levels and machine rooms; gypsum board with partly recess panel and acoustic ceiling; and hollow core, glass panel, steel louver and flush type doors. Reportedly, the building was completed sometime in August 2017.	
Following instructions from the client, this valuation covers only the 3rd to 4th floor. These floors house the Lingkod Pinoy, PRC, Chicken Delli, Chop Stop, Classic Savory, Jollibee, South Shores, Outland, Onesimus, The Shirt Bar, RRJ, Karat World, Sarabia Optical, Movie World Amusement, Foor Gallery and partly designated also as offices currently occupied by Sykes and PMax Global at the 3rd floor and the whole 4th floor by Sykes, both are BPO companies. The entire building is provided with electrical lighting and plumbing facilities. Total gross floor area of the 3rd and 4th floor is about 8,868.95 sq. m.	**234,400,000** ==========
Note: The value indicated is just an allocation as the subject 3rd and 4th floors cannot technically be separated from the rest of the building.	

BUILDING MACHINERY & EQUIPMENT

Description	Market Value (PhP)
<u>Elevators</u>	
2-Passenger Elevators (B2 - 4th Floor)-	
Hitachi, 19 persons capacity, 1600 kgs., 6 stops, complete with electric drive motor, governor, elevator cage, cablings, control and other standard accessories	7,715,000
Service/Freight Elevator (B2 - 4th Floor)-	
Hitachi, 24 persons capacity, 1600 kgs., 6 stops, complete with electric drive motor, governor, elevator cage, cablings, control and other standard accessories	3,087,000

Total for Elevators -	**10,802,000**

<u>Air Conditioning and Air Ventilating System</u>	
Lot-Air Conditioning System-	
Mitsubishi Electric, Variable Refrigerant Flow (VRF) System, modular type, system comprising of outdoor ACCU units and indoor fan coil units, and other accessories	
Lot-Air Ventilation and Exhaust System -	
Consisting of:	
Exhaust Blower -	
Niagara, centrifugal type, driven by 3.7 kW (5 hp) electric motor	
128-Jet Air Fans -	
Niagara, tubular, 0.45 kW motor rating	
System complete with insulated air ductings, ventilation air ductings, piping connections, controls and other standard accessories	**70,732,000**
Lot-Standby Power Supply and Electrical Power Distribution System-	
Consisting of:	
2-AC Electric Generating Sets -	

Mitsubishi, Model MGS, 2375 kVA (1900 kW) rated capacity, 0.8 power factor, 60 hz, 3 phase, each powered by:

16-Cylinder Diesel Engine -

Mitsubishi, v-type, 1800 rpm, turbo charged, complete with batteries, synchronizing controls and other standard accessories, steel skid mounted on concrete foundation

6-Fuel Transfer Pumps -

gear type, 149 kW drive motor

2-Power Transformers -
Elektrim, dry resin type, 2.25 MVA rated capacity, 23 kV primary voltage, 3-phase, 60hz, pad mounted with enclosure cabinet

Medium Voltage Switchgear -

Metal clad enclosure, free standing, 6 feeders vertical casements, 24 kv rating, 1250A
2-Load Break Switch -

Italweber, metal clad enclosure, free standing, 2.25 MVA rating

2-Main Distribution Panels -

Mitasol, metal clad enclosure, free standing, 12 vertical casements, 5000 A main breaker, 400VAC/230V, 3 phase, 60hz

2-Low Voltage Switchgear -

Fujihaya, 5000 AT rating

System complete with electrical and wiring installations, automatic transfer switches, manual switch, meters, pilot lamps, controls and other standard accessories **58,927,000**

Lot-Water Supply and Sewerage System-

Consisting of:

3-Booster Water Pumps (Potable)-

WEG, centrifugal, 11.2 kW drive motor

3-Booster Water Pumps (Non-potable)-

WEG, centrifugal, 11.2 kW drive motor

20-Sump Pumps -
Submersible, 7.4 kW drive motor

Appendices

1 Instructions

Engagement of Santos Knight Frank

Instructions	1.1	We refer to our Letter of Engagement dated 21 September 2020 and Amendment dated 01 June 2021, to provide a Valuation Report on the opinion of **Market Value** using Cost and Income Approaches of that certain Property consisting of leasehold of land, building (three (3)-designated floors only, 5th, 6th and 7th floor) and building machinery & equipment of that site identified as Robinsons Cybergate Cebu, located along **Don Gil Garcia Street,** within **Capitol Site, Cebu City, Philippines**, ("the Property"). A copy of that document is attached herein as Appendix **2**.
	1.2	This valuation has been carried out by Santos Knight Frank, Inc. ("Santos Knight Frank" or "SKF"), in accordance with our General Terms of Business for Valuations ("General Terms of Business"), as attached as Appendix **3**.
Client	1.3	Our client for this instruction is **Robinsons Land Corporation** ("the Client").
Valuation standards	1.4	This valuation has been undertaken in accordance with the International Valuation Standards, as well as other local standards.
Purpose of valuation	1.5	You have confirmed that this valuation is for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
Conflict of interest	1.6	We confirm that we do have a material connection or involvement giving rise to a potential conflict of interest, as set out below: We have conducted the valuation of the same Property for you as of 30 September 2020 for purposes of: i) the tax-free exchange of assets to a REIT Company, and (ii) for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
	1.7	You have confirmed this Engagement notwithstanding this matter, you are content for us to proceed with this instruction. We are providing an objective and unbiased valuation.
	1.8	We are acting as external and independent valuers in this engagement.
Responsibility to third parties	1.9	Our valuation report is only for the use of our Client and for the purposes for which are stated herein, and no liability is accepted to any third party for the whole or any part of its contents.
Disclosure & publication	1.10	Except for the purposes which are stated herein, neither the whole nor any part of this valuation nor any reference thereto may be included in any published

document, circular or statement nor published in any way without our prior written approval of the form or context in which it may appear.

Limitations on liability 1.11 No claim arising out of or in connection with this valuation report may be brought against any member, employee, partner, director or consultant of Santos Knight Frank, Inc. Those individuals will not have a personal duty of care to any party and any claim for losses must be brought against Santos Knight Frank, Inc.

1.12 Santos Knight Frank, Inc.'s total liability for any direct loss or damage caused by negligence or breach of contract in relation to this instruction and valuation report is limited to the amount of the level of our fee, specified in the Letter of Engagement, a copy of which is attached as Appendix **2**. We do not accept liability for any indirect or consequential loss (such as loss of profits).

1.13 The above provisions shall not exclude or limit our liability in respect of fraud or for death or personal injury caused by our negligence or for any other liability to the extent that such liability may not be excluded or limited as a matter of law.

Expertise 1.14 The valuation process was performed by **Raymond F. Dechavez** and **Pablo D. Acebo**, under the supervision of **Jacqueline T. Guerta** and **Jesus Constance M. Castro**, both licensed Real Estate Appraisers. The Principal Signatory on behalf of Santos Knight Frank, Inc. and who also reviewed the Valuation Report, is **Wenceslao D. Fuentes, Jr.,** also a licensed Real Estate Appraiser. We confirm that the above-named Licensed Real Estate Appraisers are registered with the Professional Regulation Commission ("the PRC"), having sufficient current knowledge of the particular market and the skills and understanding to undertake the valuation competently.

Vetting 1.15 This report has been vetted as part of Knight Frank global standards.

Scope of enquiries & investigations

Inspection 1.16 In accordance with your instructions, due to the limited timeframe to complete the Engagement, we have not conducted a current inspection. The Property has been previously inspected. Valuation rendered is a result of a revaluation of a property that has previously been inspected.

1.17 The Client has provided us with information regarding the changes to the physical attributes and/or characteristics of the Property; current or anticipated changes in rental income from the Property; and material changes to the non-physical attributes of each property, such as other lease terms, planning consents, statutory notices and other relevant information which have occurred between the valuation date and the date of our previous valuation. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.

Investigations 1.18 The extent of enquiries/investigations made is set out in our General Terms of Business. In carrying out this instruction, we have undertaken verbal / internet-

based enquiries referred to in the relevant sections of this report. We have relied upon this information as being accurate and complete.

Information provided

1.19 In this report, we have been provided with information/documents by the Client for the previous valuation done as well as for the current engagement. We have relied upon this information as being materially correct in all aspects. In particular, we detail the following:

- floor area tabulation (3-floors)
- site development plan
- copy of land title (TCT)
- rent roll
- financial statements
- projections
- historical and current occupancy

1.20 In cases where we were not provided with documents or information, we did our own enquiries as outlined and stated in the report. Any assumptions in lieu of the lack of information is also set out in the relevant sections of this report.

Valuation basis

1.21 In accordance with your instructions, we have provided an opinion of value on the basis of **Market Value**.

Market Value (MV)

1.22 Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property.

It is further assumed that title to the Property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable.

The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.

Valuation date

1.23 The valuation date is **30 June 2021.**

2 The Property

Location

Address 2.1 The Property consists of three (3) designated floors identified as 5th, 6th and 7th floors of Robinsons Cybergate Cebu - a mixed-use office and retail building, located on a block bounded by Don Gil Garcia Street on the northeast, by an unnamed road on the southeast, by Don Mariano Cui Street on the southwest, and by Don Julio Llorente Street on the northwest, within Barangay Capitol Site, Cebu City.

The block is diagonally across Fuente Osmeña Circle. It is located about 900 meters south from Provincial Capitol and approximately 1.6 kilometers northwest from Colon District, the old commercial district of Cebu. In In addition, it is also about 2.6 kilometers southwest from Ayala Center Cebu.

Below is a satellite image courtesy of Google Maps showing the Property and its relation to the immediate vicinity.

2.2 The street plan below shows the location of the Property.

Neighborhood 2.3 The site lies on the northwest periphery of Fuente Osmeña Circle, a famous landmark of Cebu City. The circle is surrounded by commercial establishments like hotels, restaurants, banks, convenience stores, offices and shopping centers. There are also bars, food park and hospitals nearby.

Considered as some of the notable establishments in the area are: Robinsons Department Store, Metrobank Plaza, Crown Regency Hotel, Banco de Oro, Summit Circle Hotel, Coast Pacific Business Plaza, Rajah Park Hotel, Raintree Mall, Holiday Plaza Hotel, Elegant Circle Inn, Grepalife Tower, and Chong Hua Hospital, amongst others.

Accessibility 2.4 Public transportation is mainly available throughout the day along the nearby Fuente Osmeña Circle and the intersecting Osmeña Boulevard and Maxilom Avenue, both main thoroughfares providing easy access to various important section of Cebu City.

Land Details

Certificates of Title 2.5 Based on documents furnished us, the land where Robinsons Cybergate Cebu is erected, is identified as Lot 1, Pcs-07-002145 containing an area of 4,772 sq.m**.,** covered by Transfer Certificate of Title No. 155238 issued in favor of **the Client** on March 21, 2000 by the Registry of Deeds for Cebu City.

Land Area Allocation 2.6 Based on information provided to us by the Client, the land area allocated for the office floors is approximately 2,308.42 square meters.

Draft Contract of Lease	2.7	We were provided by the Client a copy of a Draft Contract of Lease with ROBINSONS LAND CORPORATION, as the Lessor, and RL COMMERCIAL REIT, INC. (formerly Robinsons Realty and Management Corporation)[1], as the Lessee.
		Based on the same document, the lease contract stated that it will cover the land being occupied by Robinsons Cybergate Cebu with an area of 2,308.42 sq.m. Lease term would be for a period of 98 years. It likewise specified that the monthly lease payments would be 7% of the monthly rental income gained from the floors of Robinsons Cybergate Cebu which is owned by the Lessee (plus VAT, as appliable).
	2.8	The management of RLC disclosed that actual lease commencement shall be the date of the Certificate of Approval of the Increase in Authorized Capital Stock of RCR issued by the SEC. However, for valuation purposes, lease commencement shall be assumed on October 1, 2021.
		In the absence of a signed contract, we used the foregoing details to establish the leasehold value of the land.
Tenure	2.9	For purposes of this engagement, ownership rights to the land is treated as **leasehold**.
Terrain	2.10	The terrain of the land is flat. Its finished elevation is slightly higher than the existing grade of the fronting roads.

Description of Improvements and Machinery & Equipment

Improvements and Machinery & Equipment	2.11	The land is presently improved with a retail/office building identified as Robinsons Cybergate Cebu, a PEZA registered, Grade B office building, construction of which was completed sometime in June 2011. Following instructions from the Client, this report covers only three (3) designated office floors, the 5th, 6th and 7th Floors. Also included in this valuation are the appurtenant Machinery & Equipment. These are all described in detail in the Schedule of Assets (Appendix **9**).
Tenure	2.12	We were advised that the Client owns the improvements described above. As stated, the land would be covered by a long-term Lease Agreement. We have, however, treated the improvements as freehold.

Accommodation

Measurement	2.13	Based on the gross floor area tabulation provided to us by the Client, the designated three (3) – floors has a total gross floor area of approximately **6,921.84** sq. m.
	2.14	The Gross Floor Area (GFA) is tabulated as follows:

Floor	GFA
5F	2,307.28

[1] As of the date of this Valuation Report, application for the change in name from "Robinsons Realty and Management Corporation" to "RL Commercial REIT, Inc." is pending the approval of the Philippine SEC.

6F	2,307.28
7F	2,307.28

Total	6,921.84

Condition

Scope of Inspection

2.15 As stated earlier, we have previously inspected the Property.

2.16 As stated in the General Terms of Business, during our previous inspection, we have not undertaken a building or site survey of the Property, as it is beyond the normal scope of appraisal.

2.17 We have carried out visual inspection only without any structural investigation or building survey. During our limited inspection, we did not inspect any inaccessible area/s infact, we were not allowed to enter to the designated floors of the subject property, as these are occupied by tenants. We are unable to confirm whether the Property is free from urgent or significant defects or items of disrepair.

2.18 Unless otherwise stated, we have not been able to carry detailed on-site measurement to verify the site and gross floor areas of the Property and we have no reason to doubt the truthfulness of the areas shown on the documents provided to us.

2.19 Moreover, due to the nature of the machinery, we have not carried out mechanical inspection, and our assessment was based on the premise that the machinery is in a condition commensurate with age and normal usage.

2.20 In the Schedule of Assets or Asset Inventory, machinery and/or equipment were listed as complete units i.e., machinery and/or equipment are meant to include all parts and accessories normally comprising the unit.

Comments

2.21 Apart from the matters specifically referred to below, we have assumed that the Property is in sound order and free from structural faults, rot, infestation or other defects, and that the services are in a satisfactory condition.

2.22 The buildings and structures, including the machinery & equipment, were assumed to be in a generally good condition commensurate with their age and use. It was also assumed that there are no urgent or significant defects or items of disrepair which would be likely to give rise to substantial expenditure in the foreseeable future or which fall outside the scope of the normal annual maintenance programme.

Ground conditions

2.23 We have not been provided with a copy of a ground condition report for the site. We have assumed that there is no adverse ground or soil conditions and that the load bearing qualities of the site are sufficient to support the building.

Services

2.24 It would appear from our previous inspection that main supplies of electricity and water are provided to the Property. Telephone communication facilities are likewise available. Sewer and drainage are believed to be discharged to the building's sewerage treatment plant.

Tenancies

Tenancy Information

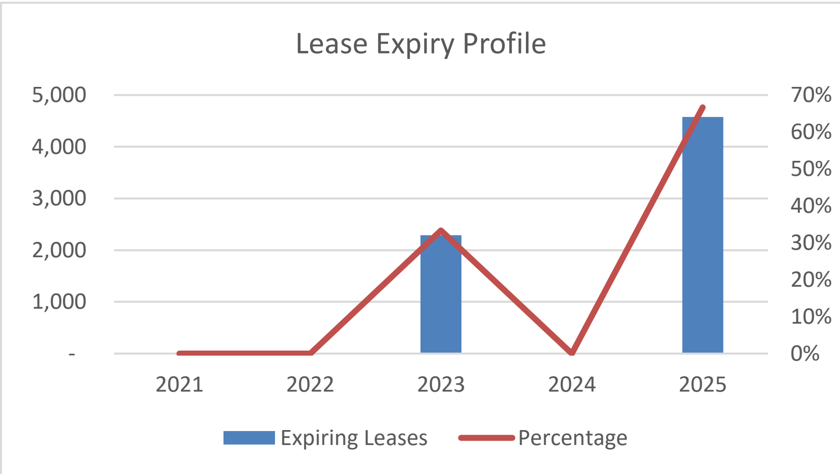
2.25 We have been provided with copy of some of the rent roll including some of the lease contracts by the Client and have relied on that information as being correct. No additional verification has been undertaken.

2.26 A summary of the Property tenancies is presented below.

TENANT	LEASED AREA (GROSS, in sq.m.)	Lease Contract Start	Lease Contract End
Tenant 1	4,577.52	27-Sep-10	26-Dec-25
Tenant 2	2,288.76	01-Jul-18	30-Jun-23

2.27 Based on the rent roll provided, total leasable area is **6,866.28** sq. m. with 4 parking slots. Said parking slots are owned by the mall. However, an arrangement was made between the mall and the Property wherein, the Property shall receive parking revenues pertaining to the 4 slots and the Property in turn would remit payment for parking related expenses. Currently, the Property is being occupied by two tenants involved in the BPO industry.

2.28 As of 30 June 2021, the Property is 100% occupied with a Weighted Average Lease Expiry (WALE) of 3.66 years. The earliest period with an expiring lease is 2023 with 33% of total leased area, while the remaining area (67%) will be expiring in 2025.



Source: SKF/ RLC

2.29 Below are some of the provisions as stated in the Lease Contract.

a. **Care of the Leased Premises**

The LESSEE shall at its expense, maintain the Leased Premises in a clean and sanitary condition, free from noxious odors, disturbing noises or other nuisances and, upon the expiration of the lease, shall return the premises and fixtures in as good condition as that in which they were actually found at the beginning of the lease, ordinary wear and tear excepted. The LESSEE shall not drive nails, screws, hooks or other abutments on or into the walls frames or other portions of the premises or in any manner deface or damage any part thereof. Any damage caused by the LESSEE may be repaired by the LESSOR for the account of the LESSEE. The LESSOR shall have the right to require the LESSEE to remove any display or promotional matter, or any displayed merchandise which LESSOR reasonably and in good faith considers to be improper or inappropriate for the general appearance or presentation of the premises.

The LESSOR shall be responsible for major repairs which are limited to those which affect the structure of the Leased Premises or the building. The LESSEE shall allow access to the LESSOR on the Leased Premises for purposes of repair or remodelling or such other works as may be necessary for the preservation, conservation, improvement or decoration of the building or any part thereof. No compensation or claims shall be allowed against the LESSOR by reason of any inconvenience or annoyance to the LESSEE that may arise by reason thereof.

The LESSEE shall promptly repair, at its own expense, any damage to the Leased Premises or any other improvements within the building caused by bringing into the Leased Premises of any property for the LESSEE's use, or by the installation or removal of such property, regardless of who is at fault or who caused such damage. unless such was clearly caused by the LESSOR, or its agents or employees. In default of such repairs by the LESSEE, the LESSOR may effect the repairs and the LESSEE agrees to promptly pay the LESSOR the cost of such repairs. The LESSEE shall be responsible for the maintenance and repair of the Leased Premises including plumbing and electrical fixtures within the premises or those serving the same.

The LESSEE must notify the LESSOR immediately of any damage to the Leased Premises, their appurtenances as well as any occupation, usurpation or untoward act being committed, or threatened to be committed, within the Leased Premises.

No machinery, furniture, effect, equipment and other properties found within the Leased Premises, whether or not owned by the LESSEE, may be brought into or out of the building without the prior written approval of the LESSOR. Furthermore, in case the LESSEE has any outstanding/unsettled rent, dues or other charges, the LESSOR reserves the right to withhold approval of any request for bringing in or out of any machinery, furniture, effects or other properties found within Leased Premises, whether or not owned by the LESSEE, until such outstanding amounts have been duly settled by the LESSEE. This is without prejudice to such other rights and remedies available to the LESSOR under prevailing laws or the Contract. including these General Terms and Conditions.

The immediately preceding paragraph shall also apply in the event of transfer of machinery, furniture, effects or other properties found within the Leased Premises from one unit to another unit in the building being leased by the LESSEE whether or not the latter unit is owned by the LESSOR. In the event that the unit where the properties to be transferred is not owned by the LESSOR, the written consent of the unit owner shall also be required.

The LESSEE shall further maintain the Leased Premises in a clean condition by utilizing plastic bags for the disposal of both dry and wet garbage. Unless garbage is contained in plastic bags, it will not be allowed to be deposited in the authorized depository for collections.

b. **Sublease, Transfer of Rights**

The LESSEE shall not assign or transfer its rights in the Contract nor sublease or sublet all or any part of the Leased Premises, without the prior written consent of the LESSOR and no rights, title or interest thereto or therein shall be conferred on or vested to anyone other than the LESSEE without such prior written consent. Otherwise, subleasing the leased Premises without the prior written consent of the LESSOR shall be deemed a breach of the contract by the LESSEE and shall be subject to the rights and remedies available to the LESSOR under prevailing laws and Contract, including these General Terms and Conditions. In the event of sublease with or without the prior written consent of the LESSOR, the LESSEE shall remain principally liable. However, the LESSOR shall have the right to exercise such remedies embodied in the Contract, the General Terms and Conditions and under prevailing laws, as against the sublessee in order to protect its right and interests.

Only the LESSEE has the right to use the Leased Premises as its official address to be registered with any government entities for the issuance of necessary permits and licenses for its business operations.

Should the LESSOR give the LESSEE its consent to sublease the Leased Premises, the LESSEE cannot sublease the Leased Premises for the period longer that the Contract of Lease between the LESSOR and the LESSEE.

It is expressly understood that the LESSEE has no goodwill or patronage rights over the Leased Premises; that such rights belong exclusively to the LESSOR, being the owner of the Leased Premises which forms part of the building; and that the LESSEE may not sell or dispose of said goodwill or patronage rights to any person.

c. **Assignment of Rights/Mortgage/Encumbrance**

The LESSOR reserves the right to assign and convey or mortgage or otherwise encumber its rights to this lease in favor of any affiliate or subsidiary or to any party. In the event of any assignment, conveyance, mortgage, or encumbrance of the Leased Premises, the LESSOR binds itself to require the assignee or mortgage or beneficiary of the encumbrance to respect and abide by all the terms and conditions of the Contract, as well as these General Terms and Conditions.

Roadways and Access

Roadways

2.30 The road networks in the area can accommodate light to moderate pedestrian and vehicular traffic loads. The roads range from 10 to 15 meters wide, mostly are concrete-paved and some have asphalt overlay, provided with cemented sidewalks, curbs and gutters, and underground drainage system.

2.31 Our informal enquiries with the City Assessor's Office – Tax Mapping Division confirmed that the site enjoys frontages along four (4) roadways.

Access

2.32 In reporting our opinion of value, we have assumed that there are no third-party interests between the boundary of the Property and the abutting roads and that accordingly the Property has unfettered vehicular and pedestrian access.

Environmental Considerations

Flooding

2.33 From our enquiries with the City Planning Office, we have ascertained that the Property is not within an indicative floodplain and that there is therefore a minimal risk of flooding.

Contamination

2.34 As stated in the General Terms of Business, investigations into environmental matters would usually be commissioned from suitably qualified environmental specialists. Santos Knight Frank, Inc. is not qualified to undertake scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination.

2.35 Subject to the above, while carrying out our valuation inspection, we have not been made aware of any uses conducted at the Property that would give cause for concern as to possible environmental contamination. Our valuation is provided on the assumption that the Property is unaffected.

Highest and Best Use

2.36 "*Highest and Best Use*" is defined as the most profitable likely use to which a property can be put. The opinion of such use may be based on the highest and most profitable continuous use to which the Property is adapted and needed, or that use of land which may reasonably be expected to produce the greatest net return to land over a given period of time. Alternatively, it is that use, from among reasonably probable and legal alternative uses, found to be physically possible,

appropriately supported, financially feasible, and which results in highest land value.

2.37 Considering the Property's size, shape, topography, current zoning classification and the prevailing land uses and development in the area, we are of the opinion that the **existing commercial development** would represent the highest and best use of the Property.

Photographs

(SKF File Photos)

Restrictions

2.38 Taking pictures of the subject floors were not allowed during inspection. Photographs attached herein are limited only to the common/public areas and exterior views of the building.

2.39 Other photographs of the Property are attached at Appendix **4**.

3 Market Analysis

Philippine Market Commentary

3.1 Shown on the next pages is Santos Knight Franks' latest **Cebu Office Market Update**.

Source of Information

3.2 Our market analysis has been undertaken using market knowledge within Santos Knight Frank, Inc., enquiries of other agents, searches of Property databases, as appropriate and any information provided to us.

CEBU OFFICE MARKET: THE CHANGING LANDSCAPE AMID COVID-19

Outside Luzon sits the Philippines' next biggest urban area – Metro Cebu. Home to almost a million square meters (sq.m.) of office space and thousands of companies, the metropolis, along with the region of Central Visayas, is among the highest contributors to the Philippine economy and is considered to be among the country's primary office markets. In 2018 alone it had contributed around 6.5% to the Philippine GDP, valued close to PhP600 Billion. This was a growth of 7.6% year-on-year (y-o-y) of its own Gross Regional Domestic Product.

The office market in Cebu posted an occupancy rating of 90% for the 2H of 2019 and more than 260,000 sq.m. of upcoming office space for the rest of 2020. With two prominent business districts and more upcoming mixed-use township developments such as the Gatewalk Central, Mandani Bay, City di Mare and the growing Mactan Newtown, Cebu's office market is poised to expand further.

Recognizing its economic importance, the national government has initiated several key infrastructure projects in the area to further bolster its growth while providing another option, other than Manila, for investors and companies to invest and expand unto. The second Terminal Building of the Mactan-Cebu International Airport as well as the recently renovated Terminal Building 1 are among those projects. Still, more are in the pipeline such as the Metro Cebu Expressway and the Cebu Bus Rapid Transit.

Metro Cebu was caught off-guard, however, when the COVID-19 pandemic struck and started to spread among the Philippine islands. Following the declaration of the State of Public Health Emergency and State of Calamity for the entire country as well as a number of presumptive positive cases within its borders, the city of Cebu has declared the State of Enhanced Community Quarantine (ECQ) in a bid to arrest the spread of the virus.

Cebu under ECQ

Executive Order No. 64 Series of 2020 formally imposed the city of Cebu under an ECQ for a month starting from the 28th of March. A closure of businesses other than those deemed providing "essential goods" was also ordered prompting companies and large businesses to implement work-from-home (WFH) schemes. This in turn rendered office buildings empty except for a few skeletal personnel. In a matter of 2 days from the signing of EO 64, the streets of Cebu turned from having lanes of unending headlights to one devoid of life.

A significant drop in economic transactions soon followed and grappled the metropolis; and its aggregate damage still cannot be quantified. However, what is clear is that the longer the ECQ is imposed, the greater the dame figures will be. Companies are faced with financial pressure to continue operations for the continuity of their businesses. As the theory of evolution overstates

Note: Excerpts from the Santos Knight Frank May 2020 Cebu Office Market Update the “survival of the fittest”, so too is the implication of the business climate amid the COVID-19 crisis.

With some of their tenants finding it hard to continue operations and/or maintain their current office take-up, landlords are faced with the possibility of increased vacancy. Unfortunately, with the anticipated drop in economic transactions for the rest of the year, the economic outlook for 2020 is dismal. The world institutions such as the International Monetary Fund (IMF) and the World Bank as well as the country’s National Economic Development Authority (NEDA) and the Bangko Sentral ng Pilipinas (BSP) all concur. This being said, the prospect of finding new tenants looks slim, Developers of upcoming developments, to be operational within the year, are seemingly troubled apparently from the expected low office occupancy levels of their projects.

Global Trend of Office Landlords showing Flexibility

As a way of avoiding vacancy surges, landlords have found it better to provide rent relief measures to their tenants as it would be easier to keep them than look for new ones. Rent relief measures may come in the form of rent abatements, deferments and/or discounts. At a time when companies are finding it hard to generate revenues as mush as the previous years, rent relief measures help lessen the financial pressure of tenants, thereby prolonging their capacity to operate amid the ECQ.

With the rent relief measures in place, it is expected that headline office space lease rates in Cebu would freeze by the 1H 2020 with a possibility of contracting in the future months should the ECQ be continually imposed and/or market conditions continue to worsen. Gradually, these relief measures would also shift the market to one more favorable to tenants. As such, for some companies with excess amounts of cash, this may be the time to do value-shopping and look for the best deals for office space in the market.

Improving Business Continuity Plans (BCPs) & the Use of Tech

The effects of COVID-19 crisis on the economies around the world has been one of the most economically damaging and it is not likely to be the last one. At a time when most of the world is interconnected and global markets are heavily reliant on one another, external shocks between economies are bound to happen. With the threat of the next crisis just lurking in the corner, improving business continuity plans should be a priority for companies to ensure safeguards are in place in times of uncertainty.

The use of technology to sustain operations have been practiced by most companies even before the implementation of ECQ. Most notable among them is the use of communication applications (apps) that allow instant messaging and video conferencing between employees and clients. With the imposition of ECQ still ongoing, several companies have begun to use these apps as a means to reach the public and boost their online presence either through webinars or online press conferences. The use of these apps was also what WFH schemes possible in the first place.

The Effects of COVID-19 Crisis Post ECQ

Securing facilities and property management services is expected to be a priority for landlords after the implementation of ECQ. Aside from the overall management and cleanup services, they provide a sense of security for the tenants that their offices are well maintained and they act as “frontliners” in keeping the threat of COVID-19 off from the building premises.

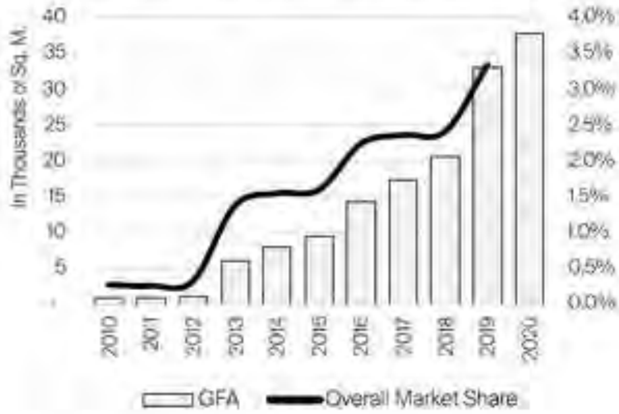
Developers may also pursue LEED, WELL and BERDE certifications for their existing and upcoming office spaces as future tenants may require certified office spaces for health and employee well-being purposes.

The implementation of ECQ has also caused delays in the upcoming office supply in Cebu. Originally at 260,000 sq.m., only 96,000 sq.m. of office space is seen viable to be operational within the year.

Even when the vaccine for COVID-19 is developed, physical distancing will continue to be practiced and become the new norm. As such, some companies may opt to continue implementing partial WFH scheme to limit the number of employees in their offices while others may find the WFH scheme to be effective in their business. Still, there may be other companies who will continue to fully implement WFH schemes and have their offices be filled only by a skeletal workforce. These arrangements may cause tenants to be more efficient in their office space utilization prompting them to lower their space requirements. As such, there is a possibility that the Cebu office market may have temporary surges in vacancy levels.

Companies who found WFH schemes to be ineffective for their businesses, however, would need additional office spaces capable of providing all the necessary office equipment at the soonest possible time to comply with the physical distancing mandate. This is where flexible and serviced offices can take advantage of as these spaces come with private rooms and, with few modifications, provide enough space allocation for every employee. Additionally, cautious tenants, in a bid to mitigate risks in these times of uncertainty, could find shelter in flexible and/or serviced offices.

FIGURE 2
Co-Working, Flexible & Serviced Office Space's Growth and their Overall Cebu Office Market Share



*2020 Figures cover only the months of January to March
Source: Santos Knight Frank Research

Although Co-Working office spaces would suffer from low occupancy levels due to its emphasis on “collaboration”, which is not allowed under the physical distancing mandate, these spaces may still be converted to flexible and/or serviced offices to generate more revenues. Other services, like the provision of virtual address for tenants, may be bolstered to secure more revenue streams.

Currently, there is an estimated gross floor area of around 38,000 sq.m. for Co-Working, Flexible and Serviced Offices in Metro Cebu. This figure has continuously been increasing and in 2019 recorded a 60.27% y-o-y growth. However, with the COVID-19 virus looming, it is likely that this growth would contract as businesses try to survive and adapt to the new normal.

The Opportunities in Outsourcing Business

Similar as to what happened after the 2008 Global Financial Crisis, the Philippines may come out to be a top viable investment option for BPO companies. The pandemic has caused huge economic damages to other countries as well. Similarly, some major cities have also implemented their own versions of ECQ to curb the spread of COVID-19. With such damages, these companies may look to cut costs by outsourcing some of their businesses here. As the metropolis already offers affordable office spaces and a high quality of talent pool proven by the sizeable BPO workforce residing here, Cebu has already proven that it has the necessary manpower and infrastructure to cater to such businesses.

Coping with the Changing Landscape

Santos Knight Frank recommends to both the landlords and the tenants to open a line of communication to come up with a “win-win” situation for both parties in reviewing their lease agreements and terms. The symbiotic relationship between the two should be fostered and both should work closely to accommodate each other’s needs.

With a possible gradual increase in vacancy levels after the lifting of ECQ, landlords should actively seek out to retain their largest tenants as these companies would be crucial in keeping their properties financially afloat. As some companies may find WFH schemes effective in their business, landlords would have to be creative enough in either providing rent relief measures and/or proposing the idea of flexible work spaces to keep tenants from moving out of their properties or lowering their space requirements.

BCPs are necessary for companies for them to navigate their businesses through the times of uncertainty. The experiences of companies from the past crises should be incorporated into consideration to improve BCPs. Utilizing technology to bolster company efficiency and employee productivity should also be continually enhanced.

The value of having facilities and property management services in office buildings can no longer be discounted. Their presence alone already radiates to tenants and other stakeholders that the property is well maintained. This should prove crucial now and in the coming months as companies would probably prefer well-kept office spaces for health and employee well-being reasons.

In these times of uncertainty, everyone is affected. Businesses, both tenants and landlords, will have to adapt to a new normal and do so quickly or face extinction. The COVID-19 pandemic has revealed to everyone just how vulnerable our industries are to external shocks. Nevertheless, this is not the first time the country has faced similar catastrophes nor will it be the last. The resiliency of the Philippine market will always prevail as it has done so in the past. We are all in this together and we will all get through it.

4 Valuation

Methodology

Valuation Rationale

4.1 The purpose of this appraisal is to estimate the Market Value of the Property. In any given valuation exercise, fair value can be arrived at using either one or a combination of the three (3) approaches to value, namely: Market (or Direct Sales Comparison) Approach, Income Approach, and the Cost Approach. The determination of the appropriate approach for a given property is based on the quality and quantity of data available, particularly its relevance to the Property under appraisement. If more than one valuation approach is utilized, the resulting values are reconciled to produce a final value conclusion.

4.2 Due to the nature of the Property and the purpose of this appraisal, both the Cost Approach and Income Approach to value are deemed the most appropriate to use and the Market (or Direct Sales Comparison) Approach was not used.

Cost Approach

4.3 The Cost Approach generally involves the following steps:

A. The value of the subject land is normally estimated by the Market or Sales Comparison Approach. In instances where the land is covered by a Lease Agreement, the value of the leased fee or leasehold rights on the subject land, whichever is applicable, is instead estimated.

B. The depreciated cost of the subject improvement is estimated by calculating the direct cost of reproducing or replacing the improvement, deducting accrued depreciation from all sources, and adding the indirect costs attributed to the improvement.

Combining the estimates shown above results in the indicated value of the Property by the Cost Approach.

4.4 **On Land (Leasehold)**

As mentioned, the land subject of this appraisal is covered by a Lease Contract. In estimating the value of the Property covered by a lease, two interests are involved: the interest of the lessee which is the leasehold; and the interest of the lessor which is the leased fee or the lessor's interest. The client being the lessee, the purpose of this appraisal is to establish the leasehold value of the subject land.

Leasehold Value is the present (discounted) worth of the rent savings (or rental gains) when the contract rent at the time of the appraisal is less than the current market rent. It is estimated by computing the present worth of the rental gains over the remaining term of the lease agreement using an appropriate discount rate.

The valuation process, briefly stated, consists of the following:

- Estimation of the current market rent of the leased property;

- Estimation of the rental gains over the remaining term of the lease agreement, if any. Rental gains projection is pegged at 10 years while the 11th year rental gain is used to estimate the terminal value of the Leasehold Rights on the Land;
- Estimation of an appropriate discount rate and terminal capitalization rate; and
- Discounting process based on an appropriate discount rate to arrive at an indicated leasehold value.

Market Rent of the Land

4.5 As mentioned earlier, another purpose of this report is to express an opinion of the Market Rent of the Property if it were to be leased out in accordance with its highest and best use. The amount of annual or monthly rental, which the subject property should command might be estimated by any, or a combination of the following:

1. By Market (Comparison) Approach, in which rentals of similar properties are used a benchmarks; and
2. By Income Approach, in which the value of the Property is first established, and the proper capitalization rate is applied to obtain its rental value.

On the other hand, Market Rent is defined under IVS 2019 as "the estimated amount for which an interest in real property should be leased on the valuation date between a willing lessor and a willing lessee on appropriate lease terms in an arm's length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

It is the rental income that the Property would most likely command in an open market. It is also defined as being the amount at which a willing lessee would pay and a willing Lessor would receive for the use of certain property, neither being under compulsion to transact, and both having reasonable knowledge of all relevant facts.

Market Approach

4.6 We have made a survey of existing ground leases of similar lands in the vicinity of the Property and found scarcity of rental data that may be used for direct comparison purposes.

Income Approach

4.7 In the absence of any comparable rental data, we have estimated the **Market Rent** of the Property by a variation of the Income Approach on the basis of what prudent real estate investors or landowners would be warranted in leasing it in order to realize a fair return on their investment or property, for that matter. Under this approach, the market value of the Property is first established, and the proper capitalization rate is applied to obtain its rental value.

Market Value of the Land

4.8 In valuing the land, we made use of the Market Approach which is the most common technique for valuing land, and is the most preferred method when comparable sales are available. With this method, sales of similar property or parcels of land are analyzed, compared, and adjusted to provide a value

indication for the Property being appraised. The comparison process is based on an analysis of the similarity or dissimilarity of the comparables.

4.9 The appraiser gathers data on actual sales as well as listings and identifies the similarities and differences in the data; ranks the data according to their relevance; adjusts the prices of the comparables to account for the dissimilarities with the land being appraised; and forms a conclusion as to the most reasonable and probable market value of the subject property.

4.10 The elements of comparison include property rights, financing terms, conditions of sale (motivation), market conditions (sale date), location, physical characteristics, available utilities, and zoning. The most variable elements of comparison are the site's physical characteristics, which include its size and shape, frontage, topography, location, and view. The units of comparison applied may be hectares or sq.m., or any other unit used in the market.

Evidence of comparable properties

4.11 **Analysis of Comparable Properties Offered for Sale**
In the course of our investigation, we looked at current market listings of comparable properties in the area. The comparable properties selected share the same or similar characteristics as the subject. Whatever information or data we came up with was then analyzed, and comparison made for such factors as size, characteristics of the lot, location, quality, and prospective use. In the Philippines however, property transactions are not officially disclosed, and quite often, actual transaction price is masked by other undisclosed arrangements and different from the figure shown on the sale and purchase agreement. We have therefore made reference to the following data, made our market judgment, and adjusted for the above-mentioned factors:

1. A commercial lot containing an area of 1,500 sq. m., more or less, located along Osmeña Boulevard, within Barangay Capitol Site, Cebu City, is currently being offered for sale at an asking price of PhP225,000,000 or about PhP150,000 per sq. m.
   Source: Filmore Amancia 0917-3350788
2. A commercial lot containing an area of 1,100 sq. m., more or less, located along Osmeña Boulevard near Cebu Doctors Hospital, within Barangay Capitol Site, Cebu City, is currently being offered for sale at an asking price of PhP176,000,000 or about PhP160,000 per sq. m.
   Source: Filmore Amancia 0917-3350788
3. A prime commercial lot containing an area of 1,100 sq. m., more or less, located along Osmeña Boulevard, beside Shell Service Station/ near JY Square Mall, within Barangay Sta. Cruz, Cebu City, is currently being offered for sale at an asking price of PhP187,000,000 or about PhP170,000 per sq.m.
   Source: Evelyn Loyzaga 0917-7065277

Summary of Adjustments

The Data Comparison Grid shown on Appendix **8** shows a summary of the aforementioned adjustments, which provides an indication as to the degree of adjustment made to the different elements in comparison. A numeric indicator indicates the level of adjustments, in terms of percentage when compared with the subject property. The use of (-) indicates a negative adjustment and a + indicates a positive adjustment. A downward adjustment (-) used is made to reflect superior characteristics of the comparable sale/listing, while an upward adjustment + reflects inferior characteristics of the comparable sale/listing. Finally, a 0 is used to confirm similarity between the comparable sales/listings and the subject or is used when market information is unavailable or does not support an adjustment for any particular element of comparison.

Value of the Land 4.12 As reflected in the said Comparison Grid, the value of the land is estimated at **PhP109,000 per sq.m.**, or a total of **PhP252,000,000** for a land area of **2,308.42 sq. m.**

Rate of Return 4.13 The value of the land having been established, its rental value may now be estimated considering the prevailing rate of return prudent investors or landowners would expect in ground leases, normally in the range of 4% to 7%. We based this range of rate of return from interviews with land owners and brokers, as well as our analysis of the relationship between prevailing capital values and rental rates and it is believed to be the current yield in the commercial land lease market.

Considering the most recent pandemic and the effect it had on the economy and the leasing market, we have not adopted the average rate of return, and have instead adopted a conservative interest rate (return on investment) of 4%.

In light of the foregoing, our estimate of the Market Rent of the Property is as follows:

Land Value	PhP	252,000,000	
Interest on Land Value			
PhP252,000,000 @ 4%	PhP	10,080,000	

Total	**PhP**	**10,080,000**	**per year**
		=========	
Or	**PhP**	**840,000**	**per month**
		=======	

Market Rent of the Land 4.14 On the basis of the foregoing, the Market Rent of the land is estimated at **PhP363.89 per sq. m. per month**, or a total of **PhP840,000 per month**, or say, **PhP10,080,000 per annum** for the subject land area of **2,308.42 sq. m.**

Rental Gain 4.15 Rental Gain is reckoned as the difference between the Market Rent and the Contract Rent.

Discount Rate

4.16 The discount rate was computed using the build-up method. The discount rate is calculated by adding together different variables. The variables that were used to generate it consist of a risk-free rate and a reasonable risk premium. Based on the foregoing, discount rate is estimated at 7.1665%, or say, 7.20% (10-year T-bond rate at about 3.9165% (from Philippine Dealing & Exchange Corporation (PDEx) as of 30 June 2021) plus 3% equity risk premium from OECD and additional 0.25% risk premium for unidentifiable risk factors which include the uncertainty brought about by the Covid-19 global pandemic.).

For purposes of this valuation, we have adopted, as risk-free rate, the 10-year T-bond rate from PDEx. The Philippine Dealing & Exchange (PDEx) system appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEx. The PHP BVAL Reference Rate dated 30 June 2021 was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

4.17 We have adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3%. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits
Valid as of: **25 June 2021**

nb	Country Code ISO Alpha 3	Country Name [10]	Classification Previous	Classification Current Prevailing	Notes
138	PLW	Palau	-	-	(5)
139	PAN	Panama	4	4	(8)
140	PNG	Papua New Guinea	6	6	
141	PRY	Paraguay	5	5	
142	PER	Peru	3	3	
143	PHL	Philippines	3	3	
144	POL	Poland	-	-	(6)
145	PRT	Portugal	-	-	(6) (7)

Capitalization Rate 4.18 Capitalization rate adopted to arrive at the terminal value is 4.2% (Discount Rate less Projected Long-term Growth Rate (3.0%). The long-term growth rate is based on a growth forecast of the prevailing commercial market over the forecast period. This is based on what the Property is perceived to achieve in the long-term considering the present situation of the market.

Remaining Life of the Lease 4.19 Remaining life of the lease as of the date of valuation is 98 years.

Summary of Leasehold Assumptions 4.20 In summary, below are the assumptions/statistics used in determining the leasehold value of the subject land.

ROBINSONS CYBERSCAPE CEBU			
Lease Details			
Lot Area	:	2,308.42	sq.m.
Term of Lease	:	98	years
Assumed Commencement Date	:	01-Oct-21	
Lease Rate	:	7%	of net leasing revenue
Market Rent (in PhP)			
Monthly Rent	:	363.89	/sq.m./ month
Annual Rent	:	10,080,000	
Annual Escalation	:	3%	starting Y2
Discount Rate			
Risk Free Rate		3.92	as of June 30, 2021 (BVAL PDEX)
Risk Premium		3.00	as of June 25, 2021 (OECD)
Additional Risk		0.25	risk premium for unidentifiable risk factors
		7.17	
Resulting Discount Rate, say		7.20%	
Terminal Capitalization Rate		4.20%	

Leasehold Value 4.21 On the basis of the foregoing, the leasehold value of the subject land may reasonably be estimated at **PhP195,000,000**.

We attach a copy of our valuation calculations at Appendix **5**.

4.22 **On Leasehold Improvements and Machinery & Equipment**

The estimate of the leasehold improvements can be either replacement or reproduction cost, new. Replacement Cost, New is defined as "The cost of construction, at current prices, of a building having utility equivalent to the building being appraised but built with modern materials and according to current standards, design, and layout." On the other hand, Reproduction Cost, New is defined as "The cost of construction, at current prices, of an exact duplicate, or replica, using the same materials, construction standards, design, layout, and quality of workmanship, and embodying all the deficiencies, super-adequacies, and obsolescence of the subject building."

In estimating the Replacement Cost of the buildings and improvements, we have made reference to the building cost index or other building cost as available in the market or published by a reputable quantity surveyor firm. We have likewise referred to our own database of building construction costs. We do not hold ourselves to be construction cost advisers and a formal estimate can only be given by a specialist construction cost consultant. It is recommended that a professional quantity surveyor or a firm of professional quantity surveyors should be consulted in order to assess an accurate building/improvement replacement cost.

In arriving at our assessment using the Cost Approach for the Equipment, we first developed the Replacement Cost, New ("RCN") of the asset. In developing our RCN, we have obtained current cost information from equipment dealers in the region. We relied on data furnished by equipment manufacturers, dealers and importers, as well as information contained in price catalogues, other published materials including the Internet and inquiries from local suppliers

RCN is the estimated amount of money needed to acquire a similar new item having the nearest equivalent utility as the Property being valued taking into consideration current prices of materials and manufactured equipment, shipping and handling, labour, contractor's overhead, design and supervision, profit and fees, and other attendant costs associated with its acquisition and installation, but without provision for overtime or bonuses for labour and premium for materials.

Having developed the RCN, we then deducted for the various elements of depreciation to arrive at the Depreciated Replacement Cost ("DRC"). DRC includes depreciation allowance or loss of value arising from condition, utility, age, wear and tear, and obsolescence present (physical, functional or economic), taking into consideration past and present maintenance policy and rebuilding history.

General
Where elements are of foreign origin, the assessment process give full consideration to all expenditures normally incurred in importation such as packing and crating charges, inland and ocean freight, insurance, duties and taxes, bank charges and commissions, wharfage, brokerage and handling

In estimating the depreciation of the assets, we have utilized the age-life method tempered with our observed condition of the assets. The remaining lease period was likewise considered in arriving at the value of the leasehold improvements.

Appendix **9** contains the Schedule of Assets describing in detail these assets.

Income Approach

Definition 4.23 The Income Approach is applicable to the valuation of income producing properties, business enterprise as well as the valuation of intangible assets.

This approach measures the current value of an asset by calculating the present value of its future economic benefits by discounting expected cash flows at a rate of return that compensates the risks associated with the particular investment.

For this particular engagement, we have applied both the Discounted Cash Flow Analysis and the Direct Capitalization Method.

Discounted Cash Flow Analysis

4.24 The discounted cash flows, or DCF valuation is the most popular fundamental approach in valuing the future economic benefits of a projected income stream. DCF measures actual yield rather than paper income for the asset/business owner and the analysis of DCF is widespread and mandatory in the various fields of business making DCF-based valuation ideal.

4.25 The valuation process, briefly stated, consists of the following:

- Estimation of the revenues generated;
- Estimation of the costs and expenses related to the operations of the development;
- Estimation of an appropriate discount rate;
- Discounting process using an appropriate discount rate to arrive at an indicative market value; and
- Estimation of the Terminal Value of the Property.

Discount Rate

4.26 The discount rate was computed using the build-up method - calculated by adding together the different variables. The basic formula for the traditional build-up model is:

Discount Rate = Rf + P + MR + LR

Where	Variable	Proxy Statistic
Rf	Risk Free Rate	PDEX Risk Free Rate
P	Equity Risk Premium	Country Risk
MR	Management Risk	
LR	Liquidity Risk	

The variables that were used to generate the Discount Rate are exhibited in the table below, along with the sources and/or dates as at or nearest the 30 June 2021 valuation date.

Risk Free Rate (10Y)	3.92%	As of 30 June 2021, BVAL PDEX
Equity Risk Premium	3.25%	As of 25 June 2021, OECD
Management Risk	0.80%	
Liquidity Risk	0.90%	

4.27 The following assumptions were used to arrive at the Discount Rate using the Build-Up Method.

Risk Free Rate 4.28 For the purposes of this valuation, we adopted the 10-year bond rate sourced from Philippine Dealing & Exchange Corporation (PDEX) as of 30 June 2021 - the valuation date (image shown below). The Philippine Dealing Exchange (PDEx) system has recently appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEX. The PHP BVAL Reference Rate was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

Equity Risk Premium 4.29 We used an equity risk premium of 3.25%. We adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3% plus an additional 0.25% risk premium for unidentifiable risk factors. The Country Risk Classification Method measure the country credit risk and is based on two components: The Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors. Shown below is an excerpt of said table.

Management & Liquidity Risk The Management Risk refers to the estimated premium to compensate for the burden of management, while the Liquidity Risk refers to the ease (or the difficulty) with which an investment can be sold or made. A review was done and we have arrived at the following: Management Risk was classified into four categories, with the corresponding rates: Poor – 1.2; Average – 1.0; Above Average - 0.90 and Excellent - 0.80 while Liquidity Risk has three (3) categories: Poor –1.2; Average – 1.0; and Good – 0.90. After the said review, we deemed it appropriate to use 0.80% for Management Risk and 0.90% for Liquidity Risk.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits
Valid as of: **25 June 2021**

nb	Country Code ISO Alpha 3	Country Name [1]	Classification Previous	Classification Current Prevailing	Notes

145	PRT	Portugal	-	-	(6) (7)

Resulting Discount Rate

4.30 Resulting Discount Rate used for this valuation is 8.87%, or say, 9.0%.

Capitalization Rate

4.31 A discount rate is used to calculate the present value of future projections of a benefit stream when growth varies from year to year. However, if growth is estimated to remain level throughout the life of the investment, a capitalization rate is often used. In its most basic form, the relationship between discount rate and a capitalization rate can be summarized as follows:

Capitalization Rate = Discount Rate – Growth

For purposes of this valuation, a long-term growth rate of 4.5% has been assumed. This is based on what the Property is perceived to achieve in the long-term considering the present situation of the market. Using this assumption, resulting Capitalization Rate would be 4.5%.

Key Financial Assumptions

4.32 We relied on the historical and projected assumptions brought about by our research and as provided by the Client. These financials were analyzed to ensure reasonableness by comparing projected revenue growth rates and other operating expenses based on historical performance. Based on interviews with the representatives of the company, projections were prepared to reflect the current and expected future market conditions.

a. **Revenues**

i. Cashflow projection starts in 01 July 2021 and runs for a period of 10 years.

ii. The revenues come from the rental of retail units, office units and parking slots. In estimating the annual rents of the subject units/slots, we have adopted the contract rents as appearing in the copy of the rent roll provided to us by the Client for the occupied units/leased parking slots. After the expiration of lease, lease rates then are aligned with market rates and are assumed to have an average of 4-year lease contracts. Aside from the monthly rentals from leasable areas, revenues likewise include Management and Aircon Dues which are likewise charged to the tenants monthly on a per sq.m. basis. Management dues are for common and/ or shared utilities, facilities and

services. These are inclusive of air-conditioning equipment rental during office hours (but exclusive of power consumption).

iii. It would be important to note that as the building administrators, they collect the said dues as a cost recovery mechanism for all expenses related to the day-to-day operations of the building and its common areas.

iv. Occupancy assumptions were based on the actual performance of the Property as well as the prevailing trend in the subject area taking into consideration the forecasted effect of the global pandemic in the office market. Occupancy of the Property as of valuation date is at 100% while the historical average performance of the Property for the last two years is at 100%. For this valuation exercise, we are assuming an average vacancy allowance of 1%. This assumed vacancy allowance for the whole cashflow period is used to account for unanticipated vacancies brought about by early terminations and non-renewals, and rental concession requests from tenants.

v. We used actual escalation rates indicated in the rent roll for all existing leases up until their lease expires. After which, an average escalation of 5% was then be applied year on year until the end of the cash flow.

b. **Cost & Expenses**

i. Operating Expenses which would include administrative and utility expenses are normally charged against the Common Use Service Area (CUSA) Fees or Association Dues being collected monthly to the individual tenants. However, there are instances when CUSA funds are insufficient to pay off all common charges. If and when this happens, the owners/administrators would have to pay off these expenses and this has been taken into consideration in the projections.

ii. Operating Costs and Expenses are assumed to be an average of approximately 17% of the Total Net Revenues. Operating costs and expenses included are basically divided in to two – real estate expense and general administrative expenses. Real Estate expenses are as follows: contracted services, repairs & maintenance, management fee and loss from CUSA and miscellaneous expenses. While under General Administrative Expense are – salaries & wages, taxes and licenses, advertising & promotions, commission, insurance, communication, rent expense, supplies, travel & transportation, and representation & entertainment expenses.

These expenses are projected either as a percentage of the rental revenues or the total net revenues. These percentage allocations were from the historical and projected performance of the Property.

iii. Annual Capital Expenditures (CAPEX) for the entire cashflow period, on the other hand, was assumed to be 1.5% of the Net Leasing

Revenues. This assumption is based on benchmarking and analysis of current market practice in allocating CAPEX reserve.

This allocation would help ensure that the Property would operate efficiently and maintain its good and sound condition.

Resulting Market Value

a. Earnings Before Income Tax, Depreciation and Amortization (EBITDA) for the whole duration of the cashflow shall be discounted at the derived Discount Rate of 9.00%.

b. The sum of discounted cashflows including the Terminal Value of the Property represents the Market Value of the Property.

The Terminal Value of the Property is the value of the property beyond the explicit forecast period. It is assumed that the property or business will continue to generate cashflows in perpetuity. As mentioned earlier, Terminal Capitalization Rate used is 4.5%.

The Discounted Cashflow showing the estimated Market Value of the subject property is attached as Appendix **6 & 7**.

Direct Capitalization Method

4.33 The Direct Capitalization Method is a real estate valuation method that helps convert a single year's income into value by dividing the Net Operating Income with an appropriate Capitalization Rate. This method assumes that the Property has a stabilized net operating income. All parameters of a typical investor return expectations are represented either explicitly or implicitly in either income forecast or the capitalization rate. The direct capitalization rate, as the ratio of income to value, serves as a proxy for investor return assumptions.

Resulting Market Value

4.34 Using a single year's cashflow we estimated the Market Value of the Property using the Direct Capitalization Method. While we used the same 2022 projected cashflow from the DCF Analysis, CAPEX was not taken into consideration.

Valuation basis

Market Value

4.35 Market Value is defined in the 2019 **International Valuation Standards** as: "The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

Valuation date

Valuation date

4.36 The valuation date is **30 June 2021**.

General Assumptions

Assumptions

4.37 Our valuation is necessarily based on a number of assumptions which have been drawn to your attention in our General Terms of Business, Letter of Engagement and within this report.

Key Assumptions 4.38 Whilst we have not provided a summary of all these assumptions here, we would in particular draw your attention to a key assumption that we relied on a very considerable extent on the information provided by the Client and have assumed that documents provided to us such as gross floor area tabulation, floor plans, building tenancies and other relevant matters are factual. We were also advised by the Client that no material facts have been omitted from the information provided.

Special Assumption 4.39 We were instructed to re-value the Property without a re-inspection. We have, thus, considered changes to the physical attributes and/or characteristics of the Property which have occurred between the valuation date and the date of our previous valuation as confirmed by the Client. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.

4.40 We have adopted the gross floor area tabulation provided to us by the Client and have assumed this to be accurate.

4.41 We were not provided with a Lot Plan where Cybergate Cebu is erected. For purposes of this valuation, the land is assumed to be rectangular in shape.

4.42 The value of the improvement using cost approach is just an allocation of values as the subject 5th to 7th floors cannot technically be separated from the rest of the building.

4.43 Our valuation of Machinery & Equipment has also undertaken the following special assumptions:

We have not carried out a full mechanical survey, or structural test, nor have inspected the machinery and equipment, which are covered, unexposed or inaccessible. Our assessment is based on the premised that the items are in a condition commensurate with age and usage.

Machinery & Equipment associated with the supply of services to the building such as Elevators, Air Conditioning Systems are valued on the assumption that they are permanently installed or attached to the building.

4.44 In applying Income Approach to value, we have considerably relied on the information provided to us by the Client which includes the following: lease contracts, revenue and expense projections, historical and projected occupancies. Upon expiration of contracts, we estimated the lease rates based on the acceptable escalations in the market.

4.45 Given the 98-year leasehold, we assumed that the Property is comparable to a freehold property given the duration of the leasehold interest on the land. Thus, a terminal value of the Property was computed at the end of the cashflow.

Valuation Results

Using Cost Approach	4.46	Using the **Cost Approach,** the Market Value of the Property, may be summarized as under.

Land (Leasehold Value)	PhP195,000,000
Designated Building Floors (5th to 7th)	156,000,000
Building Machinery & Equipment	90,741,000

TOTAL	**PhP441,741,000**
	============
ROUNDED TO	**PhP442,000,000**
	============

4.47 The Market Value of the Property is estimated at **PhP442,000,000 (FOUR HUNDRED FORTY-TWO MILLION PHILIPPINE PESOS).**

4.48 Using the **Income Approach** on the other hand, the Market Value of the Property is estimated as follows:

DCF Analysis	**PhP672,000,000**
Direct Capitalization Method	**PhP771,000,000**

Calculation 4.49 We attach a copy of our valuation calculations for the Income Approach at Appendix **6** and **7**.

Comments 4.50 The values arrived at using the Income Approach are noted to be higher than the value arrived at using the Cost Approach. This is because, unlike the Income Approach, the Cost Approach does not capture the income potential of the Property.

4.51 For purposes of this valuation, we deemed it appropriate to adopt the results arrived at by the Income Approach – DCF Analysis, since this method is usually used to determine the value of an income-generating property, as it also captures the Property's future economic benefits, giving a better representation of the Property's Market Value at an acceptable rate of return that would compensate for the risks associated with the particular investment. It likewise takes into consideration market cycles that Direct Capitalization Method cannot capture.

Conclusion of Value 4.52 In conclusion, we are of the opinion that the Market Value of the Property, reckoned as of **30 June 2021**, is:

PhP672,000,000 (SIX HUNDRED SEVENTY-TWO MILLION PHILIPPINE PESOS).

Note*: The outbreak of the Novel Coronavirus (COVID-19), declared by the World Health Organization as a "Global Pandemic" on 11th March 2020, has impacted global financial markets. Travel restrictions have been implemented by many countries. In the Philippines, market activity is being impacted in all sectors. As at the valuation date, we consider that we can attach less weight to previous market evidence for comparison purposes, to inform opinions of value. Indeed, the current response to*

COVID-19 means that we are faced with an unprecedented set of circumstances on which to base a judgement. Our valuation is therefore reported on the basis of "material valuation uncertainty" per IVS 103 of the International Valuation Standards. Consequently, less certainty – and a higher degree of caution – should be attached to our valuation than would normally be the case. Given the unknown future impact that COVID-19 might have on the real estate market, we recommend that you keep the valuation of this property under frequent review.

Value forwarded ……………………………….. PhP672,000,000

Appendix 1 - Assumptions, Limiting Conditions and Disclaimers

Basis of Value	Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion." In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property. It is further assumed that title to the property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable. The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.
Property Rights appraised	The rights appraised in this report are the property rights in fee simple, free and clear. "Fee simple" is defined as absolute ownership, without limitations to any particular class of heirs or restrictions, but subject to the limitations of eminent domain, escheat, police power and taxation. We assume that the fee simple interest is marketable and in compliance with the applicable laws of the Philippines.
Fractional Interests:	When the study contains a valuation relating to an estate in land that is less than the whole fee simple estate, the value reported for such estate relates to a fractional interest only in the real estate involved, and the value of this fractional interest plus the value of all other fractional interests may or may not equal the value of the entire fee simple estate which is considered the whole. When the valuation report contains an allocation of the total valuation between land and building improvements, such allocation applies only under the existing program of utilization. The separate valuations for land and building cannot be used in conjunction with any other valuation/appraisal and will be invalid if so used.
Assumptions:	The valuation is based on the condition of the economy and the purchasing power of the Philippine Peso as of the effective date of valuation. We have assumed that the floor areas provided us have been calculated in accordance with engineering standards, and assumed herein to be true and correct. Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.
Information Supplied By Others	Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser. Information provided by informed local sources, such as government agencies, financial institutions, Realtors, buyers, seller and others, was weighed in the light in which it was supplied and checked by secondary means; however, no responsibility is assumed for possible misinformation.
Legal Issues:	This valuation assumes no responsibility for the validity of legal matters affecting the property. The ownership history reported in this valuation is based on the appraiser's research of public records, which are assumed to be accurate and complete. It is not the intent of the valuation to offer a legal opinion of title. It is further assumed that the property has good title, responsible ownership and competent management. Any liens or encumbrances which may now exist have been disregarded. The appraiser is not required to give testimony or attendance in court by reason of this valuation, with reference to the property in question, unless arrangements have been previously made.
Liability:	The liability of Santos Knight Frank, Inc. and its directors and employees is limited to the addressee of this report only. No accountability, obligation or liability to any third party is accepted. In the event we are subject to any liability in connection with this engagement, regardless of legal theory advanced, such liability will be limited to the amount of fees we received for this engagement.
Environmental Conditions:	It is assumed that there is full compliance with all applicable Philippine environmental regulations and laws unless non-compliance is stated, defined, and considered in this appraisal report.
Town Planning:	It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.
Condition of Improvements:	We have inspected the improvements and structures. However we have not carried out a structural survey nor tested any of the services or facilities, nor have we inspected unexposed or inaccessible portions of the building, and are therefore unable to state that these are free from defect, rot, infestation, asbestos or other hazardous material. We have therefore, viewed the general state of repair of the property and advise that we did not notice any obvious signs of structural defect or dilapidations. Furthermore, the property appears to be in reasonable condition having regard to its age and use and unless otherwise stated. We also assume that the building complies with all relevant statutory requirements in respect of matters such as sanitary, building and fire safety regulations and standards.
Valuation Methodology:	In estimating Fair Value for financial reporting purposes, we still adopted the same Valuation techniques by using any one or the combination of the three (3) Approaches to Value, namely: Market Data (or Direct Sales Comparison) Approach, Cost Approach, and the Income Approach. Briefly described, the Market Data (or Sales Comparison) Approach considers prices recently paid and/or offered for similar items of property with adjustments made to the indicated market prices to reflect the condition and utility of the appraised property relative to market comparatives. The Cost Approach considers the cost to reproduce or replace the property appraised with new assets of like kind, and from this amount an allowance is deducted for depreciation arising from physical deterioration or obsolescence, whether from functional or external causes. In the Income Approach, an estimate is made of the prospective economic benefits of ownership into the future and these benefits are discounted to its present worth or capitalized into an indication of value.
Others:	This report and valuation shall be used only in its entirety and no part shall be used without the whole report. It may not be used for any purpose other than the intended purpose mentioned herein. Possession of this report or any copy thereof does not carry with it the right of copying or publication. All copies will originate from Santos Knight Frank, Inc. and will be signed and dated as such. Neither the whole nor any part of the report or any reference to our name, our valuation and our report may be included in any document, circular or statement nor published without our prior written consent to the form and context in which it may appear. The delivery and acceptance of this report completes this assignment.

Attention: **MR. FREDERICK D. GO**
President and Chief Executive Officer

Subject: **Terms of Engagement for Valuation Services**

Dear Mr. Go:

Thank you for your interest in our Valuation Services. We refer to your invitation of 03 August 2020 requesting Santos Knight Frank, Inc. ("SKF") to submit a proposal for valuation (the "Valuation") in respect of the properties detailed below (the "Properties").

This proposal, together with our General Terms of Business for Valuation Services ("General Terms"), sets out our terms of engagement for carrying out this instruction. Once agreed and signed, this proposal shall constitute our Letter of Engagement ("Letter"). This Letter and the General Terms (together, the "Agreement") exclude any other terms which are not specifically agreed to us in writing. To the extent that there is any inconsistency between the Letter and the General Terms, this Letter shall take precedence.

1. **Client**
Our Client for this Valuation is Robinsons Land Corporation (the "Client", "you" or "your").

2. **Purpose of Valuation**
The Valuation is provided solely the purpose of transferring some of the Client's assets to the REIT Company and its application for a Tax-Free Exchange Ruling with the Bureau of Internal Revenue and listing of the REIT Company in the Philippine Stock Exchange (the "Transaction"). Specifically, the Valuation will be used for the Client's Financial Statements to be attached to the Offering Circular as required by the Securities and Exchange Commission (SEC) and will be attached as an appendix to the Client's REIT Plan. In accordance with clause 4.1 of our General Terms, the Valuation may not be used for any other purpose without our express written consent. The Valuation will be made accessible in the public domain as part of the regulatory requirements of the Transaction.

3. **Term & Termination**
This appointment will commence upon signing of this Agreement and shall continue to be in effect for a period of two (2) years. Any extension of the Term of this Agreement shall be mutually agreed upon by the parties in writing.

23. Electronic Communication

During the engagement, both parties may wish to communicate electronically with each other. However, electronic transmission of information cannot be guaranteed to be secure or virus-or error-free and information could be intercepted, corrupted, lost or destroyed, arrive late or incomplete, or otherwise be adversely affected or unsafe to use. Both parties agree to accept these risks and so each party will be responsible for protecting its own systems and interests in relation to electronic communications. Neither party will have any liability to the other party on any basis for any loss or damage arising from or in connection with the electronic communication of information between both parties or their reliance on such information.

24. Acceptance

Please sign and return a copy of this Letter signifying your acceptance of the terms of the Agreement. We reserve the right to withhold any Valuation and / or refrain from discussing it with you until this Letter has been countersigned and returned.

Your attention is drawn to the "Important Notice" in the General Terms. If you have any questions regarding this Letter and / or the terms of the Agreement, please let us know before signing this Letter.

Thank you for choosing Santos Knight Frank, Inc. and we look forward to working with you on this important engagement.

Sincerely,
SANTOS KNIGHT FRANK, INC.

Subject: **Amendment to Terms of Engagement and General Terms of Business for Valuation Services Dated 03 August 2020 ("Amendment")**

Dear Mr. Go:

We refer to subject Letter of Engagement and General Terms of Business for Valuation Services (together, the "Agreement") between Robinsons Land Corporation (the "Client", "you" or "your") and Santos Knight Frank, Inc. ("SKF") for the valuation of fourteen (14) office buildings (the "Covered Properties").

For this purpose, the Agreement is amended as follows:

The first, second, and third and fourth paragraphs shall now read:

For the Valuation

I. Valuation for Asset Transfer to REIT Company and its application for a Tax-Free Exchange Ruling:

For Valuation Update

II. Valuation of Properties for REIT listing to PSE:
Our Valuation of 14 Properties will be as follows:
1. Valuation for 4 Properties
2. Periodic Update of 14 Properties
Under REIT Company (Quarterly basis – optional)
3. Valuation Update of 14 Properties under REIT Company

Except as amended hereby, all the provisions of the Agreement which are not inconsistent herewith are incorporated herein by way of reference and from date hereof, the Agreement and this Amendment shall be read as one integrated document.

Kindly affix your signature on the conforme portion below and return one (1) original signed copy to us.

Sincerely,
SANTOS KNIGHT FRANK, INC.

Appendix 3 - General Terms of Business

General Terms of Business for Valuation Services

These General Terms of Business (the "**General Terms**") and our Letter of Engagement (the "**Letter**"), together form the agreement between you and us (the "**Agreement**"). References to "**you**", "**your**" etc. are to persons or entities who are our client and, without prejudice to clauses 3 and 4 below, to any persons purporting to rely on our Valuation.

Unless **the** context otherwise requires, all other terms and expressions used but not defined herein shall have the meaning ascribed to them in the Letter.

When used herein or in the Letter, the term "**Valuation**" shall mean any valuation report, advance report, supplementary report or subsequent/update report, produced pursuant to our engagement and any other replies or information we produce in respect of any such report and/or any relevant property. Any words following the terms "**including**", "**in particular**" or any similar expression shall be construed as illustrative and shall not limit the sense of the words preceding those terms.

All of the terms set out in these General Terms shall survive termination of the Agreement.

1. Santos Knight Frank, Inc.

1.1. Santos Knight Frank, Inc. ("**Santos Knight Frank**", "**our**", "**us**", "**we**") is a Philippine corporation with Securities and Exchange Commission (SEC) Registration Number A199818549.

1.2. Our registered office is at 10/F Ayala Tower & Exchange Plaza, Ayala Avenue, Makati City where a list of members may be inspected.

1.3. Any representative of Santos Knight Frank, Inc. described as *Director* is either a member or an employee of Santos Knight Frank, Inc. and is not a member of the Board of Directors. The term *Director* has been retained because it is an accepted way of referring to senior professionals. The term "**Santos Knight Frank Person**" shall, when used herein, mean any member, employee, or consultant of Santos Knight Frank, Inc.

1.4. Our Tax Identification Number (TIN) is 201-626-570-000.

1.5. The details of our professional indemnity insurance will be provided to you on request.

1.6. Santos Knight Frank, Inc., being a corporation, is regulated by the Philippine Securities and Exchange Commission (SEC). It is also an SEC-accredited asset valuer. In accordance with reportorial filings with the SEC, it may be necessary to disclose valuation files to them. By instructing us, you give us your permission to do so. Where possible we will give you prior notice before making any such disclosure, although, this may not always be possible. We will use reasonable endeavours to limit the scope of any such disclosure and to ensure any disclosed documents are kept confidential.

1.7. Valuations will be carried out in accordance with the 2019 edition of the International Valuation Standards (IVS) by valuers who conform to its requirements and with regard to relevant statutes or regulations. Our senior valuers are Real Estate Appraisers licensed and regulated by the Philippine Professional Regulation Commission (PRC).

2. Governing law and jurisdiction

2.1. The Agreement and any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with it or its subject matter or formation or any Valuation shall be governed by and construed in accordance with Philippine laws.

2.2. Philippine courts shall have exclusive jurisdiction to settle any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with this Agreement or its subject matter or formation or any Valuation. This will apply wherever the relevant property or the client, or any relevant third party, is located or the service is provided.

3. Limitations on liability

3.1. Subject to clause 3.7, our maximum total liability in connection with or arising out of this Agreement and/or its subject matter and/or the Valuation is limited to our total service fees as set out in the Letter.

3.2. Subject to clause 3.7, we will not be liable for any loss of profits or for indirect or consequential loss or damages.

3.3. Subject to clause 3.7, any limitation on our liability will apply however such liability is or would otherwise have been incurred, whether in contract, tort (including negligence), for breach of statutory duty, or otherwise.

3.4. Except as set out in clauses 3.5 and 4.7 and 4.8 below, no third party shall have any right to enforce any of the terms of this Agreement.

3.5. No claim arising out of or in connection with this Agreement may be brought against any Santos Knight Frank Person. Those individuals will not have a personal duty of care to you or any other person and any such claim for losses must be brought against Santos Knight Frank, Inc. Any Santos Knight Frank Person may enforce this clause but the terms of this Agreement may be varied by agreement between the client and Santos Knight Frank, Inc. at any time without the need for any Santos Knight Frank Person to consent.

3.6. No claim, action or proceedings arising out of or in connection with the Agreement and/or any Valuation shall be commenced against us after the expiry of the earlier of (a) two years from the Valuation Date (as set out in the relevant Valuation) or (b) any limitation period prescribed by law.

3.7. Whether or not specifically qualified by reference to this clause, nothing in the Agreement shall exclude or limit our liability in respect of fraud, or for death or personal injury caused by our negligence or negligence of those for whom we are responsible, or for any other liability to the extent that such liability may not be so excluded or limited as a matter of applicable law.

4. Purpose, reliance and disclosure

4.1. The Valuation is prepared and provided solely for the stated purposes. Unless expressly agreed by us in writing, it cannot be relied upon, and must not be used, for any other purpose and, subject to clause 3.7, we will not be liable for any such use.

4.2. Without prejudice to clause 4.1 above, the Valuation may only be relied on by our Client. Unless expressly agreed by us in writing the Valuation may not be relied on by any third party and we will not be liable for any such purported reliance.

4.3. Subject to clause 4.4 below and for the stated purposes, the Valuation is confidential to our Client and must not be disclosed, in whole or in part, to any third party without our express written consent (to be granted or withheld in our absolute discretion). No liability is accepted to any third party for the whole or any part of any Valuation disclosed in breach of this clause.

4.4. Our appraisers are not required to give testimony or attendance in court by reason of this Valuation with reference to the property in question, unless arrangements have been previously made.

4.5. Except for the stated purposes, neither the whole nor any part of the Valuation and/or any reference thereto may be included in any published document, circular or statement nor published in any way whatsoever whether in hard copy or electronically (including on any website) without our prior written consent and approval of the form and context in which it may appear.

4.6. Where permission is given for the publication of a Valuation, neither the whole nor any part thereof, nor any reference thereto, may be used in any publication or transaction that may have the effect of exposing us to liability for actual or alleged violations of SEC Memorandum Circular No. 2, series of 2014 (Guidelines on Asset Valuations) or Republic Act No. 8799 (Securities Regulation Code), as amended and its Implementing Rules and Regulations.

4.7. You agree that we, and/or any Santos Knight Frank Person, may be irreparably harmed by any breach of the terms of this clause 4 and that damages may not be an adequate remedy. Accordingly, you agree that we and/or any Santos Knight Frank Person may be entitled to the remedies of injunction or specific performance, or any other equitable relief, for any anticipated or actual breach of this clause 4.

4.8. You agree to indemnify and keep fully indemnified us, and each relevant Santos Knight Frank Person, from and against all liabilities, claims, costs (including legal and professional costs), expenses, damages and losses arising from or in connection with any breach of this clause 4 and/or from the actions or omissions of any person to whom you have disclosed (or otherwise caused to be made available) our Valuation otherwise than in accordance with this clause 4.

5. Knight Frank network

5.1. Santos Knight Frank, Inc. is a member of an international network of independent firms which may use the "Knight Frank" name and/or logos as part of their business name and operate in jurisdictions outside the Philippines (each such firm, an "**Associated Knight Frank Entity**").

5.2. Unless specifically agreed otherwise, in writing, between you and us: (i) no Associated Knight Frank Entity is our agent or has authority to enter into any legal relations and/or binding contracts on our behalf; and (ii) we will not supervise, monitor or be liable for any Associated Knight Frank Entity or for the work or actions or omissions of any Associated Knight Frank Entity, irrespective of whether we introduced the Associated Knight Frank Entity to you.

5.3. You are responsible for entering into your own agreement with any relevant Associated Knight Frank Entity.

5.4. This document has been originally prepared in the English language. If this document has been translated and to the extent there is any ambiguity between the English language version of this document and any translation thereof, the English language version as prepared by us shall take precedence.

6. Severance

If any provision of the Agreement is invalid, illegal or unenforceable, the parties shall negotiate in good faith to amend such provision so that, as amended, it is legal, valid and enforceable and, to the greatest extent possible, achieves the intended commercial result of the original provision. If express agreement regarding the modification or meaning or any provision affected by this clause is not reached, the provision shall be deemed modified to the minimum extent necessary to make it valid, legal and enforceable. If such modification is not possible, the relevant provision shall be deemed deleted. Any modification to or deletion of a provision under this clause shall not affect the validity and enforceability of the rest of this Agreement.

7. Entire agreement

7.1. The Agreement, together with any Valuation produced pursuant to it (the Agreement and such documents together, the "**Contractual Documents**") constitute the entire agreement between you and us and supersedes and extinguishes all previous agreements, promises, assurances, warranties, representations and understandings between you and us, whether written or oral, relating to its subject matter.

7.2. Subject to clause 3.7 above, you agree that in entering into the Agreement you do not rely on, and shall have no remedies in respect of, any statement, representation, assurance or warranty (whether made innocently or negligently) that is not expressly set out in the Contractual Documents. You further agree that you shall have no claim for innocent or negligent misrepresentation based on any statement set out in the Contractual Documents.

7.3. The Letter and these General Terms shall apply to and be incorporated in the contract between us and will prevail over any inconsistent terms or conditions contained or referred to in your communications or publications or which would otherwise be implied. Your standard terms and conditions (if any) shall not govern or be incorporated into the contract between us.

7.4. Subject to clause 3.7 and clause 6, no addition to, variation of, exclusion or attempted exclusion of any of the terms of the Contractual Documents will be valid or binding unless recorded in writing and signed by duly authorised representatives on behalf of the parties.

8. Assignment

8.1. You shall not assign, transfer, mortgage, charge, subcontract, declare a trust over or deal in any other manner with any of the rights and obligations under the Agreement without our prior written consent (such consent to be granted or withheld in our absolute discretion).

9. Force majeure

9.1. Neither party shall be in breach of this Agreement nor liable for delay in performing, or failure to perform, any of its obligations under this Agreement if such delay or failure results from events, circumstances or causeswhich could not be foreseen, or which, though foreseen, were inevitable.

10. Our fees

10.1. Without prejudice to clause 10.3 below, you become liable to pay our fees upon issuance of the Valuation. For the avoidance of doubt, unless expressly agreed otherwise in writing, the payment of our fees is not conditional on any other events or conditions precedent.

10.2. If any invoice remains unpaid after 30 days of the date on which it is presented, we reserve the right to charge interest, calculated daily, from the date when payment was due until payment is made at 3%

10.3. If we should find it necessary to use legal representatives or collection agents to recover monies due, you will be required to pay all costs and disbursements so incurred.

10.4. If an appraisal analysis is ordered and the assignment is cancelled before completion, we reserve the right to receive compensation, by way of damages, in an amount equal to 70% of the total fee for the assignment.

10.5. If you delay the instruction by more than 30 days or materially alter the instruction so that additional work is required at any stage or if

we are instructed to carry out additional work that we consider (in our reasonable opinion) to be either beyond the scope of providing the Valuation or to have been requested after we have finalised our Valuation (including, but not limited to, commenting on reports on title), we will charge additional fees for this work. Such additional fees will be calculated on the basis of a proportion of the total fee by reference to reasonable time and expenses incurred.

10.6. Where we agree to accept payment of our fees from a third party, such fees remain due from you until payment is received by us.

11. Anti-bribery and corruption and Anti-Money Laundering
We agree that throughout the term of our appointment we shall:

(a) comply with all applicable laws, statutes, regulations, and codes relating to anti-bribery and corruption and Anti-Money Laundering laws (the "**Relevant Requirements**");

(b) not engage in any activity, practice or conduct which would constitute an offense;

(c) maintain anti-bribery, anti-corruption, and anti-money laundering policies to comply with the Relevant Requirements and any best practice relating thereto; and

(d) promptly report to you any request or demand for any undue financial or other advantage of any kind in connection with the performance of our services to you.

12. Portfolios
Properties comprising a portfolio, unless specifically agreed with you otherwise, will be valued separately and upon the assumption that the properties have been marketed individually and in an orderly manner.

13. Land Register inspection and searches
We are not required to undertake searches, validations or inspections of any kind for title or price paid information in any publicly available land registry.

14. Title and burdens
We will assume, unless specifically informed and stated otherwise, that each property has good and marketable title and that all documentation is satisfactorily drawn and that there are no unusual outgoings, planning proposals, onerous restrictions or local authority intentions which affect the property, nor any material litigation pending.

15. Disposal costs and liabilities
No allowance is made in our Valuation for expenses of realisation or for taxation which may arise in the event of a disposal and our Valuation is expressed as exclusive of any VAT that may become chargeable. Properties are valued disregarding any mortgages or other charges, including commissions.

16. Sources of information
We rely upon the information provided to us by you, as to details of tenure and tenancies, planning consents and other relevant matters, as summarised in our Valuations. Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser.

17. Identity of property to be valued
We will exercise reasonable care and skill (but will not have an absolute obligation to you) to ensure that the property, identified by the property address in your instructions, is the property inspected by us and contained within our valuation report. If there is ambiguity as to the property address, or the extent of the property to be valued, this should be drawn to our attention in your instructions or immediately upon receipt of our report.

18. Boundaries
Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.

19. Planning, highway and other statutory regulations
19.1. Enquiries of the relevant planning and highways authorities in respect to matters affecting properties, where considered appropriate, are normally only obtained from the corresponding government agency. We can only state whatever current conditions may be. We recommend that formal written enquiries should be undertaken by your lawyers who should also confirm the position with regard to any legal matters referred to in our Valuations.

19.2. It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative, regulatory, or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.

19.3. We assume that the premises comply with all relevant statutory requirements including environmental, building, fire, and sanitation regulations.

20. Property insurance
Our Valuation assumes that each property would, in all respects, be insurable against all identifiable risks.

21. Building areas and age
Where so instructed, areas provided from a quoted source will be relied upon. Any dimensions and areas measured on location or from plan/s are calculated and are quoted to a reasonable approximation, with reference to their source. Where the age of the building is estimated, this is for guidance only.

22. Structural condition
Building, structural and ground condition surveys are detailed investigations of the building, the structure, technical services and ground and soil conditions undertaken by specialist building surveyors or engineers and fall outside the normal scope of a valuation. Since we will not have carried out any of these investigations, we are unable to report that any property is free of any structural fault, rot, infestation or defects of any other nature, including inherent weaknesses due to the use in construction of deleterious materials. We do reflect the contents of any building survey report provided to us in advance, or any defects or items of disrepair of which we are advised or which we note during the course of our ocular inspections but otherwise assume properties to be free from defect.

23. Ground conditions
Unless informed otherwise in writing, we assume there to be no adverse ground or soil conditions and that the load bearing qualities of the sites of each property are sufficient to support the building constructed or to be constructed thereon.

24. **Environmental issues**

24.1. Investigations into environmental matters by suitably qualified environmental specialists would usually be commissioned by most responsible purchasers or chargees of higher value properties or where there was any reason to suspect contamination or a potential future liability. Furthermore, such investigation would be pursued to the point at which any inherent risk was identified and quantified before a purchase proceeded. Where we are provided with the conclusive results of such investigations, on which we are instructed to rely, these will be reflected in our Valuations with reference to the source and nature of the enquiries. We would endeavour to point out any obvious indications or occurrences known to us of harmful contamination encountered during the course of our valuation enquiries.

24.2. However, we are not environmental specialists and therefore we do not carry out any scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination or any other environmental searches. If we are not provided with the results of appropriate investigations as outlined above and where there is no obvious indication of harmful contamination, our Valuation will be provided on the assumption that the relevant property is unaffected. Where we are informed that contamination is suspected or confirmed, but adequate investigation has not been carried out and made available to us, then the Valuation will be qualified only by reference to it.

25. **Minerals, timber, airspace etc.**

Unless specifically agreed otherwise in writing and so stated within the main body of the relevant Valuation, we do not value or attempt to value or take into account any potential income stream or other beneficial or detrimental effect or other factor relating to undiscovered or unquantified mineral deposits, timber, airspace, sub-ground space or any other matter which would not be openly known in the market and considered to have value.

26. **Legal advice**

26.1. We are appointed to provide valuation opinion(s) in accordance with our professional duties as Appraisers. The scope of our service is limited accordingly. The valuation assumes no responsibility for the validity of legal matters affecting the property. It is not the intent of the valuation to offer a legal opinion of title. Any liens or encumbrances which may now exist have been disregarded. We are not qualified legal practitioners and we do not provide legal advice and any statements made by us, or advice given, in a legal context should be construed accordingly.

26.2. Where appropriate we will liaise with your legal advisors. However, we accept no responsibility for any work carried out by them and we will not be liable for anything contained in legal documentation prepared by them.

26.3. Where we consider it is necessary for the provision of the Valuation and/or specifically agree to do so, and any additional fees we require for this work are agreed, we will read legal documents (including leases, licences etc.), however, (save for any comment concerning the impact of our interpretation of such documents on value) our interpretation of such documents cannot be relied upon to be legally correct. Where we do interpret legal documents, we will, for the purposes of providing our Valuation, assume our interpretation to be correct.

27. **Loan security**

Where instructed to comment on the suitability of property as a loan security we are only able to comment on any inherent property risk. Determination of the degree and adequacy of capital and income cover for loans is the responsibility of the lender having regard to the terms of the loan.

28. **Build cost information**

In the provision of valuation services we do not hold ourselves out to have expertise in assessing build costs. Where our instruction requires us to have regard to build cost information, for example in the valuation of properties with development potential, we strongly recommend that you supply us with build cost and other relevant information prepared by a suitably qualified construction cost professional, such as a quantity surveyor. The Valuation will be stated to have been arrived at in reliance upon the build cost information supplied to us by you. In the absence of any build cost information supplied to us, we may have regard to published build cost information. Build costs produced using this approach must be assumed to be unreliable or inaccurate; any reliance which can be placed upon our Valuation in these circumstances is severely restricted. Specialist professional advice on the build costs should be sought by you. If you subsequently obtain specialist build cost advice, we recommend that we are instructed to review our Valuation.

29. **Reinstatement assessments**

A reinstatement assessment for insurance purposes is a specialist service and we recommend that separate instructions are issued for this specific purpose. If an indication is required as a check against the adequacy of existing cover this should be requested and will be so stated in the body of the relevant Valuation. Any indication given is provided for guidance only and must not be relied upon as the basis for insurance cover. In any event, our reinstatement assessment should be compared with the owner's and if there is a material difference, then a full reinstatement valuation should be reconsidered.

30. **Comparable evidence**

Where comparable evidence information is included in our Valuation, this information is often based upon our oral enquiries and its accuracy cannot always be assured, or may be subject to undertakings as to confidentiality. However, such information would only be referred to where we had reason to believe it or where it was in accordance with our expectation. In addition, we have not inspected comparable properties.

31. **Valuation bases**

Valuations are carried out on a basis appropriate to the purpose for which they are intended and in accordance with the relevant definitions, commentary and assumptions. The basis of valuation will be agreed with you and specified in the Letter and in the relevant Valuation.

Important Notice

If you have any queries relating to this Agreement please let us know as soon as possible, and in any event before signing the Letter and/or giving us instructions to proceed.

Your instructions to proceed, preferably signing on the space provided for under the Letter, will constitute your acceptance to use our services on the terms of the Agreement.

Accordingly, our commencement of work pursuant to your instructions shall constitute acceptance of your offer and as such establish the contract between us on the terms of the Agreement.

Appendix 9 - Schedule of Assets

BUILDING	
Description	**Market Value (PhP)**
Robinsons Cybergate Cebu (5th to 7th Floors) - As seen during our inspection for the previous valuation done, Robinsons Cybergate Cebu is a seven (7) - storey with three (3) basement levels and roof deck, reinforced concrete-framed building with glass curtain and concrete hollow block walls supplemented with ACP cladding, glass panel windows and tempered glass entrance doors. Its interior finishes consist of homogeneous ceramic and granite tiles flooring in hallways and common areas and plain cement and epoxy paint finish in basement parking levels and machine rooms; gypsum board with partly recess panel and acoustic ceiling; and hollow core, glass panel, steel louver and flush type doors. Reportedly, the building was completed sometime in June 2011. The first two floors are dedicated as mall/retail, while 3rd to 4th floor are clinics and wellness center. Following instructions from the client, these floors are excluded in this valuation. 5th to 7th floor, which is the subject of this valuation, are designated as offices and these are currently occupied by Accenture and Fusion, both are BPO companies. The entire building is provided with electrical lighting and plumbing facilities. Total gross floor area of the 5th to 7th floors is about 6,921.84 sq. m.	
	156,000,000 ---------------------
Note: The value indicated is just an allocation as the subject 5th to 7th floors cannot technically be separated from the rest of the building.	

BUILDING MACHINERY & EQUIPMENT

Description	Market Value (PhP)
Elevators and Elevators	
Passenger Elevator No. 1-	
Hyundai Elevators, 7-stops, 1350 kgs capacity, 1.75 m/sec speed, complete drive motor, 220 volts, 3-phase, 60 hz, elevator controller, elevator cage, electrical wirings, limit switches and other standard accessories *Note:Unit used also as Service Elevator, and serving: B1; G; Levels 3, 4, 5, 6 and 7*	2,408,000
Passenger Elevator No. 2-	
Hyundai Elevators, 6-stops, 1350 kgs capacity, 1.75 m/sec speed, complete drive motor, 220 volts, 3-phase, 60 hz, elevator controller, elevator cage, electrical wirings, limit switches and other standard accessories *Note:Unit Serving temporarily: B1; B2; Levels, 5, 6 and 7)*	2,065,000
Passenger Elevator No. 3-	
Hyundai Elevators, 8-stops, 1350 kgs capacity, 1.75 m/sec speed, complete drive motor, 220 volts, 3-phase, 60 hz, elevator controller, elevator cage, electrical wirings, limit switches and other standard accessories *Note: Unit Serving temporarily: B1; B2; Levels, 5, 6 and 7)*	2,753,000
2-Passenger Elevators (Nos. 4 & 5)-	
Hyundai Elevators, 6-stops, 900 kgs capacity, 1.75 m/sec speed, complete drive motor, 220 volts, 3-phase, 60 hz, elevator controller, elevator cage, electrical wirings, limit switches and other standard accessories *Note: Unit Serving: B2; B1; G; Levels, 2, 3 and 4*	2,753,000
Passenger Elevator No.6-	
Hyundai Elevators, 6-stops, 900 kgs capacity, 1.75 m/sec speed, complete drive motor, 220 volts, 3-phase, 60 hz, elevator controller, elevator cage, electrical wirings, limit switches and other standard accessories	

Note: Unit Serving: B2; B1; Grd; Levels, 2, 3 and 4	1,376,000

Freight/Service Elevator-

Hyundai Elevators, 3-stops, 800 kgs, 20 persons capacity, 1.75 m/sec speed, complete drive motor, 220 volts, 3-phase, 60 hz, with governor, elevator controller, elevator cage, electrical wirings, limit switches and other standard accessories	612,000

2-Escalators-

Hyundai, Type W-1200, approx.1014 mm. Step width, 30 meters /min speed, 9000 persons/hr, driven by a necessary electric gear motor, 3-phase, 208-600v, 60 hz., complete with standard mechanical and electrical installation and accessories	2,699,000

Total for Elevators and Escalators -	**14,666,000**

Lot-Centralized Air Conditioning and Ventilating System -
consisting of:

Package Water Chiller System-

Approximately 250 TR total capacity consisting of:

2-Water Chillers-

ChongQing Midea, Model LSBLG 460/M1, Product Nos. C012094188260001 & C012094188260002, 125 TR capacity each, screw water chiller type, driven by 472 kw, 380 volts, 3 phase, 60hz, complete with other standard accessories

2-Chilled Water Pumps -

Ajax-Elite Pumps, centrifugal type, 1180.92 LPM capacity, driven by 11.2 kw electric motor, mounted on concrete foundation

2-Conderser Water Pump -

Ajax-Elite Pumps, centrifugal type, 1476.15 LPM capacity, driven by 11.2 kw electric motor, mounted on concrete foundation

2-Cooling Towers -

No available brand, 1476.15 LPM, 893,126 KCAL/HR,induced draft cross flow type, single cell, multi-bladed fan driven by electric motor, complete controls and other associated attachment, mounted on concrete basin

2-Air Handling Units-

Siukonda, finned tube horizontal draw blast cabinet type, 50 TR capacity with blower driven by electric motor, complete with controls and standard accessories

Air Handling Unit-

Siukonda, finned tube horizontal draw blast cabinet type, 40 TR capacity with blower driven by electric motor, complete with controls and standard accessories

Air Handling Unit-

Siukonda, finned tube horizontal draw blast cabinet type, 30 TR capacity with blower driven by electric motor, complete with controls and standard accessories

Air Handling Unit-

Siukonda, finned tube horizontal draw blast cabinet type, 25 TR capacity with blower driven by electric motor, complete with controls and standard accessories

Air Handling Unit-

Siukonda, finned tube horizontal draw blast cabinet type, 20 TR capacity with blower driven by electric motor, complete with controls and standard accessories

Fan Coil Unit-

Ceiling concealed free blow type, 36 TR cooling capacity, condenser fan driven by electric motor, complete with other standard accessories

2-Fan Coil Units-

Ceiling concealed free blow type, 7.5 TR cooling capacity, condenser fan driven by electric motor, complete with other standard accessories

Fan Coil Unit-

Ceiling concealed free blow type, 4.5 TR cooling capacity, condenser fan driven by electric motor, complete with other standard accessories

Fan Coil Unit-

Ceiling concealed free blow type, 2.5 TR cooling capacity, condenser fan driven by electric motor, complete with other standard accessories

Fan Coil Unit-

Ceiling concealed free blow type, 2 TR cooling capacity, condenser fan driven by electric motor, complete with other standard accessories

Fan Coil Unit-

Ceiling concealed free blow type, 1.5 TR cooling capacity, condenser fan driven by electric motor, complete with other standard accessories

Varriable Refrigerant Flow System(VRF)-

Serves 3rd to 7th floor, consisting of:

26-Aircooled Condinsing Units(ACCU)-

Multi -split type, each 77, 400 Kcal/hr cooling capacity

26-77,400 kcal/hr capacity

105-Fan Coil Units-

Cassette type, 4-way, 10,000 Kcal/hr cooling capacity, condenser fan driven by electric motor, complete with other standard accessories

120-Fan Coil Units-

Cassette type, 4-way, 6,300 Kcal/hr cooling capacity, condenser fan driven by electric motor, complete with other standard accessories

5-Fan Coil Units-

Cassette type, 4-way, 5,000 Kcal/hr cooling capacity, condenser fan driven by electric motor, complete with other standard accessories

Air Ventilation and Exhaust System-

Consisting of:

6-Basement Exhaust Fan (BEF-1)-

41,650 CMH capacity, 1050 mm propeller dia., with suction filter, galvanized steel construction housing, driven by electric motor, complete with controls and air ducting

6-Basement Supply Fan (BSF-1)-

41,650 CMH capacity, 1050 mm propeller dia., with suction filter, galvanized steel construction housing, driven by electric motor, complete with controls and air ducting

4-Air Supply Fan (SF-1)-

7,650 CMH capacity, 550 mm propeller dia., with suction filter, galvanized steel construction housing, driven by electric motor, complete with controls and air ducting

2-Air Exshaust Fan (EF-1)-

15,350 CMH capacity, with suction filter, galvanized steel construction housing, driven by electric motor, complete with controls and air ducting

Air Exshaust Fan (EF-2)-

8,500 CMH capacity, with suction filter, galvanized steel construction housing, driven by electric motor, complete with controls and air ducting

Other Ventillating Fans-

consisting of:-

7-TEF-1 &1A-

2,210 CMH capacity, centrifugal type with suction filter, galvanized steel construction housing, driven by electric motor, complete with controls and air ducting

2- PF-1-

25,500 CMH capacity, centrifugal type with suction filter, galvanized steel construction housing, driven by electric motor, complete with controls and air ducting

24-TF-1-

2,000 CMH capacity, box type triple jet nozzle, driven by electric motor, complete with controls and air ducting

2-KSF-1-

40,800 CMH capacity, centrifugal type with suction filter, 927 mm dia casing, galvanized steel construction housing, driven by electric motor, complete with controls and air ducting

KSF-2-

27,200 CMH capacity, centrifugal type with suction filter, 762 mm dia casing, galvanized steel construction housing, driven by electric motor, complete with controls and air ducting

2-KSF-3-

20,400 CMH capacity, centrifugal type with suction filter, 622 mm dia casing, galvanized steel construction housing, driven by electric motor, complete with controls and air ducting

KSF-4-

47,600 CMH capacity, centrifugal type with suction filter, 927 mm dia casing, galvanized steel construction housing, driven by electric motor, complete with controls and air ducting

KEF-1-

20,400 CMH capacity, centrifugal type with suction filter, 838 mm dia casing, galvanized steel construction housing, driven by electric motor, complete with controls and air ducting

KEF-2-

27,200 CMH capacity, centrifugal type with suction filter, 1016 mm dia casing, galvanized steel construction housing, driven by electric motor, complete with controls and air ducting

KEF-3-

47,600 CMH capacity, centrifugal type with suction filter, 1376 mm dia casing, galvanized steel construction housing, driven by electric motor, complete with controls and air ducting

2-KEF-4-

40,800 CMH capacity, centrifugal type with suction filter, 1376 mm dia casing, galvanized steel construction housing, driven by electric motor, complete with controls and air ducting

GEF-1-

2,040 CMH capacity, centrifugal cabinet type with suction filter, galvanized steel construction housing, driven by electric motor, complete with controls and air ducting

2-Pressurization Blowers- (PF-1 & PF-2)

Niagara, 25,500 CMH capacity, driven by 7.5 kw electric motor, complete with ductings

System complete with insulated ductings, air ductings, electrical installations, piping connections, controls and other standard accessories **47,618,000**

Lot-Standby Power Supply and Electrical Distribution System-

Consisting of:

2-Standby AC Electric Generator Sets -

Stamford-Baifa Power, 1000 kva(800 kw) rated capacity each, 0.80 power factor, powered by:

12 Cylinder Diesel Engine -

Cummins, 'V'type, radiator-cooled, skid mounted with battery, mounted on concrete foundation

Control Panel -

Metal clad casement, free standing, multiple vertical sections, complete manual transfer switches, main and sub-breakers, magnetic contactors, relays, wattmeters, volmeters, pilot lights, on/off swithes, push button switches, and other standard accessories

Generating sets complete with 2-1,500 L day tanks, 1-18,000 L mother fuel tank and 2-1.12 kw fuel transfer pumps and other standard attachements

2-Power Transformers -

SGB, 1 MVA capacity each, 3 phase, 60 hz, equipped with cooling units and other accessories

Low Voltage Switchgear-

Fuji-Haya Electric, Dry type, Metal clad enclosure, free standing, 440 volts primary/230 volts secondary, 3 phase, 4W, 60h, complete with main and sub-breakers,system complete with on/off switches, magnetic relays. pilot lights, push button switches, wiring installations and other standard accessories

Medium Voltage Switchgear-

Fuji Haya Electric, dry type, Metal clad enclosure, free standing, 24kv, 3 phase, 4W, 60h, complete with main and sub-breakers,system complete with on/off switches, magnetic relays. pilot lights, push button switches, wiring installations and other standard accessories

System complete with radiator motor, wirings, panel boards, mechanical and electrical installation and associated other equipment and accessories.	**16,095,000**
Rooftop Array Photovoltaic (PV) Solar Panel System- Grid Type, comprising of:	
(180) PV Modules- No available brand, 320 watts per panel, poly silver frame panel, 57.6 KW total installed DC capacity, fixed array type on building rooftop, on steel frame mounting screwed and bolted, complete with 2 PV Inverters, 2-DC Combiners, Communication Box, 1-PV ACDB Panel, wiring installations and other standard accessories	**3,396,000**
Lot-Fire Fighting and Fire Protection and Alarm System - Consisting of: Fire Pump (FP-1) -	
Fairbanks Morse, Type 1822CP, 1000 gpm capacity, centrifugal horizontal split case type, multi stage, driven by 112 kw electric motor, 3560 rpm, complete with fire pump cotroller and piping connections Jockey Pump (JP-1) -	
Centrifugal horizontal split case type, 40 GPM capacity, driven by 7.5 kw electric motor, 440 volts, 3 phase, complete with jockey pump controller and piping connections 38-Fire Hose Cabinets- Aluminum frame witg swing-out glass door, complete with hose and nozzles	
88-Fire Extinguishers- Of various types and capacities 1,218-Automatic Sprinkler Heads - Upright, side and pendant types,	
Complete with FDAS, fire alarm control panel, fire suit, pair of boots and helmets, piping installations and other acccessories	**4,815,000**
Lot-Potable Water Supply and Sewerage Evacuation System - Consisting of: Transfer Pump Set-	
Triplex type, 100 gpm capacity, constant pressure pump, horizontal split case equipped with 3 - 11.2 kw drive motors, controls and other standard accessories Transfer Pump Set-	

Duplex type, 165 gpm capacity, pheripheral end suction equipped with 2 - 7.5 kw drive motors, controls and other standard accessories	
Booster Pumps-

Appendices

1 Instructions

Engagement of Santos Knight Frank

Instructions	1.1	We refer to our Letter of Engagement dated 21 September 2020 and Amendment dated 01 June 2021, to provide a Valuation Report on the opinion of **Market Value** using Cost and Income Approaches of that certain Property consisting of leasehold of land, building (portion of the ground and 3rd floor, and 4th and 5th floors only), and building machinery & equipment of a site identified as "Cybergate Naga", **within Robinsons Place Naga, Barangay Triangulo, Naga City, Camarines Sur, Philippines**, ("the Property"). A copy of that document is attached herein as Appendix **2**.
	1.2	This valuation has been carried out by Santos Knight Frank, Inc. ("Santos Knight Frank" or "SKF"), in accordance with our General Terms of Business for Valuations ("General Terms of Business"), as attached as Appendix 3.
Client	1.3	Our client for this instruction is **Robinsons Land Corporation** ("the Client").
Valuation standards	1.4	This valuation has been undertaken in accordance with the International Valuation Standards, as well as other local standards.
Purpose of valuation	1.5	You have confirmed that this valuation is for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
Conflict of interest	1.6	We confirm that we do have a material connection or involvement giving rise to a potential conflict of interest, as set out below: We have conducted the valuation of the same Property for you as of 30 September 2020 for purposes of: i) the tax-free exchange of assets to a REIT Company, and (ii) for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
	1.7	You have confirmed this Engagement notwithstanding this matter, you are content for us to proceed with this instruction. We are providing an objective and unbiased valuation.
	1.8	We are acting as external and independent valuers in this engagement.
Responsibility to third parties	1.9	Our valuation report is only for the use of our Client and for the purposes for which are stated herein, and no liability is accepted to any third party for the whole or any part of its contents.
Disclosure & publication	1.10	Except for the purposes which are stated herein, neither the whole nor any part of this valuation nor any reference thereto may be included in any published

document, circular or statement nor published in any way without our prior written approval of the form or context in which it may appear.

Limitations on liability	1.11	No claim arising out of or in connection with this valuation report may be brought against any member, employee, partner, director or consultant of Santos Knight Frank, Inc. Those individuals will not have a personal duty of care to any party and any claim for losses must be brought against Santos Knight Frank, Inc.
	1.12	Santos Knight Frank, Inc.'s total liability for any direct loss or damage caused by negligence or breach of contract in relation to this instruction and valuation report is limited to the amount of the level of our fee, specified in the Letter of Engagement, a copy of which is attached as Appendix **2**. We do not accept liability for any indirect or consequential loss (such as loss of profits).
	1.13	The above provisions shall not exclude or limit our liability in respect of fraud or for death or personal injury caused by our negligence or for any other liability to the extent that such liability may not be excluded or limited as a matter of law.
Expertise	1.14	The valuation process was performed by **Raymond F. Dechavez** and **Pablo D. Acebo** under the supervision of **Jacqueline T. Guerta** and **Jesus Constance M. Castro**, both licensed Real Estate Appraisers. The Principal Signatory on behalf of Santos Knight Frank, Inc. and who also reviewed the Valuation Report, is **Wenceslao D. Fuentes, Jr.,** also a licensed Real Estate Appraiser. We confirm that the above-named Licensed Real Estate Appraisers are registered with the Professional Regulation Commission ("the PRC"), having sufficient current knowledge of the particular market and the skills and understanding to undertake the valuation competently.
Vetting	1.15	This report has been vetted as part of Knight Frank global standards.

Scope of enquiries & investigations

Inspection	1.16	In accordance with your instructions, due to the limited timeframe to complete the Engagement, we have not conducted a current inspection. The Property has been previously inspected. Valuation rendered is a result of a revaluation of a property that has previously been inspected.
	1.17	The Client has provided us with information regarding the changes to the physical attributes and/or characteristics of the Property; current or anticipated changes in rental income from the Property; and material changes to the non-physical attributes of each property, such as other lease terms, planning consents, statutory notices and other relevant information which have occurred between the valuation date and the date of our previous valuation. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.
Investigations	1.18	The extent of enquiries/investigations made is set out in our General Terms of Business. In carrying out this instruction we have undertaken verbal / internet-

based enquiries referred to in the relevant sections of this report. We have relied upon this information as being accurate and complete.

Information provided 1.19 In this report, we have been provided with information/documents by the Client for the previous valuation done as well as for the current engagement. We have relied upon this information as being materially correct in all aspects. In particular, we detail the following:

- Tax Declarations
- Typical Floor Plan
- Site Development Plan
- Floor Area Tabulation
- Rent roll
- Financial statements
- Projections
- Historical and current occupancy

Valuation bases

1.20 In accordance with your instructions, we have provided an opinion of value on the following bases:

Market Value (MV) 1.21 Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property.

It is further assumed that title to the Property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable.

The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.

Valuation date 1.22 The valuation date is **30 June 2021.**

2 The Property

Location

Address

2.1 The Property, identified as Cybergate Naga, is located within Robinsons Place Naga, Barangay Triangulo, Naga City, Camarines Sur, Philippines.

The site is approximately 110 meters southeast from the entrance along Roxas Avenue (Diversion Road), some 200 meters southwest from Almeda Highway, about 1.20 kilometers southwest from Panganiban Avenue and approximately 2.0 kilometers southwest from Naga City Hall.

.

Below is a satellite image courtesy of Google Maps showing the Property and its relation to the immediate vicinity.

Note: Image courtesy of Google Maps.

2.2 The street plan below shows the location of the Property.

Neighborhood 2.3 The property is situated within in an area where land utilization is for an intermix of residential and commercial purposes.

Some of the significant developments in the area include –Bangko Sentral ng Pilipinas – Naga City Branch, NICC Doctor's Hospital, Naga City Subdivision, ALDP Plaza Mall, and M. Plaza, amongst others.

Accessibility 2.4 The Property is easily accessible from the rest of Cebu City thru Roxas Avenue (Diversion Road). Public Transportation such as jeepneys and tricycle are readily available along the aforesaid road.

Other community centers like post office, churches, hospitals, and public and private schools are likewise accessible from the Property.

Land Details

Certificates of Title 2.5 Based on documents furnished us, the land where Cybergate Naga is erected consists of two (2) adjoining lots having a total area of **14,089 sq.m.**, more or less, technically identified as under:

Lot No.	TCT No.	Area (Sq. m.)
Lot 1126-C-4-A, PSD-269369	086-2014002588	4,000
Lot 1126-D, PSD-68254	T-146-2013005314	10,089
	TOTAL	**14,089**

2.6 The above Transfer Certificates of Title were issued in favor of **the Client** on September 10, 2014 by the Registry of Deeds for Naga City.

Lot Area Allocation 2.7 The land is shared by another building identified as Robinsons Place Naga, which is not covered by this valuation. Based on information provided to us by the Client, land area allocated for Cybergate Naga is about **3,014.80 sq. m.**

Draft Contract of Lease 2.8 We were provided by the Client a copy of a Draft Contract of Lease with ROBINSONS LAND CORPORATION, as the Lessor, and RL COMMERCIAL REIT, INC. (formerly Robinsons Realty and Management Corporation) [1], as the Lessee.

Based on the same document, the lease contract stated that it will cover the land being occupied by Robinsons Cybergate Naga with an area of 3,014.80 sq.m. Lease term would be for a period of 99 years. It likewise specified that the monthly lease payments would be 7% of the monthly rental income gained from the office floors of Robinsons Cybergate Naga which is owned by the Lessee (plus VAT, as appliable).

2.9 The management of RLC disclosed that actual lease commencement shall be the date of the Certificate of Approval of the Increase in Authorized Capital Stock of RCR issued by the SEC. However, for valuation purposes, lease commencement shall be assumed on October 1, 2021.

In the absence of a signed contract, we used the foregoing details to establish the leasehold value of the land.

Tenure 2.10 For purposes of this engagement, ownership rights to the land is treated as **leasehold.**

Terrain 2.11 The terrain of the land is flat. Its finished elevation is slightly higher than the existing grade of the fronting roads.

Description of Improvements and Machinery & Equipment

Improvements and Machinery & Equipment 2.12 The land is presently improved with an office building identified as Cybergate Naga, a PEZA registered, Grade B office building, construction of which was completed sometime in January 2018. Following instructions from the Client, this report covers only a portion of the ground and 3rd floor, and 4th and 5th floors. Also included in this valuation are the appurtenant Machinery & Equipment. These are all described in detail in the Schedule of Assets (Appendix **11**).

Tenure 2.13 We were advised that the Client owns the improvements described above. As stated, the land would be covered by a long-term Lease Agreement. We have, however, treated the improvements as freehold.

Accommodation

Measurement 2.14 Based on the documents furnished us, Cybergate Naga has a total gross floor area of about 6,228.58 sq.m.

---

[1] As of the date of this Valuation Report, application for the change in name from “Robinsons Realty and Management Corporation” to “RL Commercial REIT, Inc.” is pending the approval of the Philippine SEC.

2.15 The floor area of Cybergate Naga, are tabulated as follows:

Cybergate Naga	Area (sq.m.)
Ground Floor	124.06
Third Floor	428.70
Fourth Floor	3,008.96
Fifth Floor	2,666.86

Total	**6,228.58**

Condition

Scope of Inspection

2.16 As stated earlier, we have previously inspected the Property.

2.17 As stated in the General Terms of Business, during our previous inspection, we have not undertaken a building or site survey of the Property, as it is beyond the normal scope of appraisal.

2.18 We have carried out visual inspection only without any structural investigation or building survey. During our limited inspection, we did not inspect any inaccessible area/s. We are unable to confirm whether the Property is free from urgent or significant defects or items of disrepair.

2.19 Unless otherwise stated, we have not been able to carry detailed on-site measurement to verify the site and gross floor areas of the Property and we have no reason to doubt the truthfulness of the areas shown on the documents provided us.

2.20 Moreover, due to the nature of the machinery, we have not carried out mechanical inspection, and our assessment was based on the premise that the machinery is in a condition commensurate with age and normal usage.

2.21 In the Schedule of Assets or Asset Inventory, machinery and/or equipment were listed as complete units i.e., machinery and/or equipment are meant to include all parts and accessories normally comprising the unit.

Comments

2.22 Apart from the matters specifically referred to below, we have assumed that the Property is in sound order and free from structural faults, rot, infestation or other defects, and that the services are in a satisfactory condition.

2.23 The buildings and structures, including the machinery & equipment, were assumed to be in a generally good condition commensurate with their age and use. It was also assumed that there are no urgent or significant defects or items of disrepair which would be likely to give rise to substantial expenditure in the foreseeable future or which fall outside the scope of the normal annual maintenance programme.

Ground conditions

2.24 We have not been provided with a copy of a ground condition report for the site. We have assumed that there is no adverse ground or soil conditions and that the load bearing qualities of the site are sufficient to support the building.

2.25 We have further assumed for the valuation that the ground condition will not have significant adverse impact to the development cost as well as the development period which may result in difference in site value.

Services

2.26 It would appear from our previous inspection that main supplies of electricity and water are provided to the Property. Telephone communication facilities are likewise available. Sewer and drainage are believed to be discharged to the building's sewerage system.

Tenancies

Tenancy Information

2.27 We have been provided with copy of some of the rent roll including some of the lease contracts by the Client and have relied on that information as being correct. No additional verification has been undertaken.

2.28 A summary of the Property tenancies is presented below.

TENANT	LEASED AREA (GROSS, in sq.m.)	Lease Contract	
		Start	End
Tenant 1	395.41	23-Oct-17	22-Sep-23
	3,006.55	23-Oct-17	22-Sep-23
	2,667.55	16-Jan-18	22-Sep-23

2.29 Based on the rent roll provided, total leasable area is **6,069.51** sq.m. available for lease. It is currently being occupied by a single tenant involved in the BPO industry.

2.30 As of 30 June 2021, the Property is 100% occupied with a Weighted Average Lease Expiry (WALE) of 2.23 years. All leases are expected to expire by 2023.

2.31 Below are some of the provisions as stated in the Lease Contract.

a. **Care of the Leased Premises**

The LESSEE shall at its expense, maintain the Leased Premises in a clean and sanitary condition, free from noxious odors, disturbing noises or other nuisances and, upon the expiration of the lease, shall return the premises and fixtures in as good condition as that in which they were actually found at the beginning of the lease, ordinary wear and tear excepted. The LESSEE shall not drive nails, screws, hooks or other abutments on or into the walls frames or other portions of the premises or in any manner deface or damage any part thereof. Any damage caused by the LESSEE may be repaired by the LESSOR for the account of the LESSEE. The LESSOR shall have the right to require the LESSEE to remove any display or promotional matter, or any displayed merchandise which LESSOR reasonably and in good faith considers to be improper or inappropriate for the general appearance or presentation of the premises.

The LESSOR shall be responsible for major repairs which are limited to those which affect the structure of the Leased Premises or the building. The LESSEE shall allow access to the LESSOR on the Leased Premises for purposes of repair or remodelling or such other works as may be necessary for the preservation, conservation, improvement or decoration of the building or any part thereof. No compensation or claims shall be allowed against the LESSOR by reason of any inconvenience or annoyance to the LESSEE that may arise by reason thereof.

The LESSEE shall promptly repair, at its own expense, any damage to the Leased Premises or any other improvements within the building caused by bringing into the Leased Premises of any property for the LESSEE's use, or by the installation or removal of such property, regardless of who is at fault or who caused such damage. unless such was clearly caused by the LESSOR, or its agents or employees. In default of such repairs by the LESSEE, the LESSOR may effect the repairs and the LESSEE agrees to promptly pay the LESSOR the cost of such repairs. The LESSEE shall be responsible for the maintenance and repair of the Leased Premises including plumbing and electrical fixtures within the premises or those serving the same.

The LESSEE must notify the LESSOR immediately of any damage to the Leased Premises, their appurtenances as well as any occupation, usurpation or untoward act being committed, or threatened to be committed, within the Leased Premises.

No machinery, furniture, effect, equipment and other properties found within the Leased Premises, whether or not owned by the LESSEE, may be brought into or out of the building without the prior written approval of the LESSOR. Furthermore, in case the LESSEE has any outstanding/unsettled rent, dues or other charges, the LESSOR reserves the right to withhold approval of any request for bringing in or out of any machinery, furniture, effects or other properties found within Leased Premises, whether or not owned by the LESSEE, until such outstanding amounts have been duly settled by the LESSEE. This is without prejudice to such other rights and remedies available to the LESSOR under prevailing laws or the Contract. including these General Terms and Conditions.

The immediately preceding paragraph shall also apply in the event of transfer of machinery, furniture, effects or other properties found within the Leased Premises from one unit to another unit in the building being leased by the LESSEE whether or not the latter unit is owned by the LESSOR. In the event that the unit where the properties to be transferred is not owned by the LESSOR, the written consent of the unit owner shall also be required.

The LESSEE shall further maintain the Leased Premises in a clean condition by utilizing plastic bags for the disposal of both dry and wet garbage. Unless garbage is contained in plastic bags, it will not be allowed to be deposited in the authorized depository for collections.

b. **Sublease, Transfer of Rights**

The LESSEE shall not assign or transfer its rights in the Contract nor sublease or sublet all or any part of the Leased Premises, without the prior written consent of the LESSOR and no rights, title or interest thereto or therein shall be conferred on or vested to anyone other than the LESSEE without such prior written consent. Otherwise, subleasing the leased Premises without the prior written consent of the LESSOR shall be deemed a breach of the contract by the LESSEE and shall be subject to the rights and remedies available to the LESSOR under prevailing laws and Contract, including these General Terms and Conditions. In the event of sublease with or without the prior written consent of the LESSOR, the LESSEE shall remain principally liable. However, the LESSOR shall have the right to exercise such remedies embodied in the Contract, the General Terms and Conditions and under prevailing laws, as against the sublessee in order to protect its right and interests.

Only the LESSEE has the right to use the Leased Premises as its official address to be registered with any government entities for the issuance of necessary permits and licenses for its business operations.

Should the LESSOR give the LESSEE its consent to sublease the Leased Premises, the LESSEE cannot sublease the Leased Premises for the period longer that the Contract of Lease between the LESSOR and the LESSEE.

It is expressly understood that the LESSEE has no goodwill or patronage rights over the Leased Premises; that such rights belong exclusively to the LESSOR, being the owner of the Leased Premises which forms part of the building; and that the LESSEE may not sell or dispose of said goodwill or patronage rights to any person.

c. **Assignment of Rights/Mortgage/Encumbrance**

The LESSOR reserves the right to assign and convey or mortgage or otherwise encumber its rights to this lease in favor of any affiliate or subsidiary or to any party. In the event of any assignment, conveyance, mortgage, or encumbrance of the Leased Premises, the LESSOR binds itself to require the assignee or mortgage or beneficiary of the encumbrance to respect and abide by all the terms and conditions of the Contract, as well as these General Terms and Conditions.

Roadways and Access

Roadways

2.32 Roxas Avenue is about 20 meters wide, concrete/asphalt-paved and provided with concrete curbs and gutters, and underground drainage system.

2.33 Our informal enquiries with the City Planning Office confirmed that the Property enjoys frontage along the bounding roads.

Access

2.34 In reporting our opinion of value, we have assumed that there are no third-party interests between the boundary of the Property and the adopted highways and that accordingly the Property has unfettered vehicular and pedestrian access.

Environmental Considerations

Flooding

2.35 From our enquiries with the City Planning Office, and also due to its terrain, we have ascertained that the Property is not within an indicative floodplain and that there is therefore a minimal risk of flooding.

Contamination

2.36 As stated in the General Terms of Business, investigations into environmental matters would usually be commissioned from suitably qualified environmental specialists. Santos Knight Frank, Inc. is not qualified to undertake scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination.

2.37 Subject to the above, while carrying out our valuation inspection, we have not been made aware of any uses conducted at the Property that would give cause for concern as to possible environmental contamination. Our valuation is provided on the assumption that the Property is unaffected.

Highest and Best Use

2.38 "*Highest and Best Use*" is defined as the most profitable likely use to which a property can be put. The opinion of such use may be based on the highest and most profitable continuous use to which the Property is adapted and needed, or that use of land which may reasonably be expected to produce the greatest net return to land over a given period of time. Alternatively, it is that use, from among reasonably probable and legal alternative uses, found to be physically possible, appropriately supported, financially feasible, and which results in highest land value.

2.39 Considering the Property's size, shape, topography, current zoning classification and the prevailing land uses and development in the area, we are of the opinion that the **existing commercial development** would represent the highest and best use of the Property.

3 Market Analysis

Philippine Market Commentary

3.1 Shown below is SKF's latest **Metro Manila Office Market Update**.

Source of Information

3.2 Our market analysis has been undertaken using market knowledge within Santos Knight Frank, Inc., enquiries of other agents, searches of Property databases, as appropriate and any information provided to us.

OFFICE RENT ROLLBACKS CUSHION INCREASING VACANCIES

General Overview

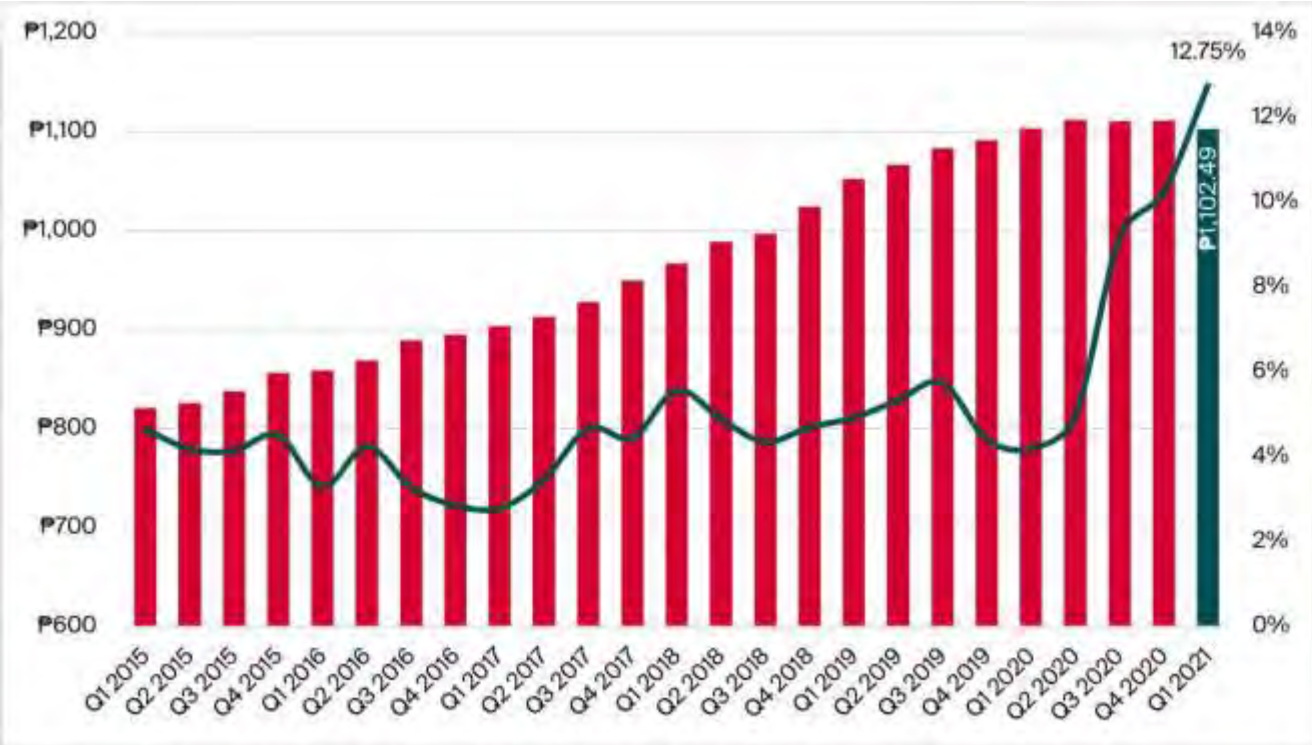
The Metro Manila office market displayed modest market movement at the start of 2021 owing to the sluggish demand driven by the market uncertainties caused by changing lockdown scenarios in Metro Manila. Landlords were challenged to remain relevant as potential occupiers continued to take a cautious approach caused by the growing COVID-19 cases and slow vaccine roll-outs.

Still, new office spaces were introduced during the quarter as developers capitalized on the relaxed quarantine measures to resume their halted construction activities. The local office market supply grew by 163,136 sqm of Grade A office space that mostly catered to IT-BPO companies. Several buildings were completed in Fort Bonifacio, Bay Area, and Quezon City, resulting in an overall office supply in Metro Manila of about 6.9 million sqm.

Consequently, supply growth resulted in an increase in vacancies throughout the metropolis. Office vacancy rates in Metro Manila further spiked to 12.75%, the highest since 2009. Current and potential occupiers remained vigilant towards the health situation of the country. Numerous companies continued to implement Work-From-Home and skeletal workforce arrangements. Office take-up contracted by 28,696 sqm as locators reassessed their need for spaces amid their bid to reduce operational costs.

Monthly average lease rates in Metro Manila further dipped to PHP 1,102.49 per sqm, declining by 0.78% quarter-on-quarter (q-o-q) and 0.07% year-on-year (y-o-y). The downward trend of rents was caused by the landlords' bid to provide more competitive packages to appeal to prospective tenants.

Figure 1. Metro Manila Historical Lease & Vacancy Rates



Source: Santos Knight Frank Research

Makati

The adverse effects of the pandemic and the prolonged lockdowns remained evident in the most prominent business district in the country. Vacancy rates spiked to 11.17%, considered to be the highest in the past ten years. Moreover, the expensive rents in Makati CBD were detrimental to the retention of office occupiers. Locators looking to minimize their expenses opted to discontinue their lease, resulting in about 25,557 sqm of office space vacated during the quarter.

Sluggish leasing activity persisted in the area as existing and upcoming locators in Makati were less willing to take up spaces due to the financial distress brought about by the global pandemic. The average monthly rents recorded in Makati went down to PHP 1,348.19 per sqm, contracting by 0.93% q-o-q and 6.05% y-o-y. Despite this, rates in Makati remained the highest in the metropolis.

Several property players are still looking forward to the materialization of their projects in the pipeline. More than 447,552 sqm of Prime and Grade A office supply are anticipated to come online in the next three years, with approximately 164,000 sqm being operational by the end of 2021. The massive influx of upcoming office developments in Makati comes from the backlogs and spillovers from 2019 up to the latter part of 2020.

Taguig

Slow demand in Taguig was also evident as vacancy levels continuously increased to 8.37% from 7.74% in Q4 2020. Despite having the largest supply share in Metro Manila of more than 2 million sqm, the downsized space requirements were seen as the factor in the rising vacancies as locators looked to lessen their operational cost. Moreover, average monthly rental rates in Fort Bonifacio also went down to PHP 1,289.75, translating to a contraction of 0.89% q-o-q.

The ease in quarantine measures allowed private and public projects to resume construction. Office supply in Fort Bonifacio further grew by 28,000 sqm through the completion of BGC Corporate Center 2. Despite the growing vacancy levels, potential developers still have bright prospects in Taguig as it was seen as the youngest but fastest growing business district in Metro Manila. In line with this, upcoming office supply is seen to be augmented by about 864,100 sqm of office space within the next five years. About 344,000 sqm of this will be coming from Arca South which is poised to become a new business district in the south.

Bay Area

The POGO industry exodus has significantly contributed to the spiking vacancy levels in the Bay Area during Q1 2021, recorded at 12.82%. Slower demand from the sector is seen in the coming periods as more firms have started to postpone their lease contracts. This occurrence implied challenges in the recently fast-moving office market of the Bay Area.

The upsurge in vacancy was also attributed to the completion of Four E-com during the quarter with an additional 89,132 sqm of Grade A office space. Priced above its competitors, this building has helped in pushing the average rents in the area to PHP 1,083.41 per sqm, increasing by 1.66% q-o-q.

The Bay Area is still foreseeing a huge amount of upcoming office supply in the coming years. Developers still recognize the opportunity to invest in the area due to its accessibility and availability of developable land. Approximately, 578,800 sqm of office developments are anticipated to be introduced in the market for the next five years, while 258,000 sqm are expected to become operational by the end of 2021.

Ortigas Center

Vacancy levels in Ortigas Center gradually eased to 12.75% in contrast to 12.88% of the preceding quarter. Despite this, pre-terminated contracts and non-renewals were still observed, as most of the companies are still on a wait-and-see approach towards the office market. Meanwhile, the slow-moving leasing transaction was also felt in the district as the rental rates went down to PHP 806.29 per sqm, contracting by 1.15% q-o-q and still considered the lowest as compared to other major CBDs in the metropolis.

Moreover, the upcoming office supply in Ortigas Center remained high as more than 671,000 sqm of Prime and Grade A office spaces are slated to introduce in the next five years. In addition, the massive influx of 373,000 sqm of space is scheduled to commence their operations within the year such as Cyber Omega, SM Mega Tower, and Jollibee Tower. This includes the spillover from 2019 up to the remaining quarters of 2020 that has been halted due to subsequent lockdowns.

Quezon City

Vacancy rates in Quezon City spiked up to 20.64% as opposed to 16.21% of the preceding quarter, indicating the highest level across all of Metro Manila. Approximately 13,690 sqm of office spaces were freed up in the city during the quarter. Occupiers in the area were more sensitive to the health crisis as compared to locators in other districts The lack of recognized established business districts and limited connectivity of certain townships contributed to the slow demand in the area. Furthermore, the upsurge in vacancy levels was also driven by the opening of SM North Towers 1 and 2 that added more than 45,200 sqm in the massive office supply in Quezon City, and are yet to lease out the majority of their spaces.

Office landlords are trying to alleviate this downtrend and are still vying to mitigate lease terminations. To this end, average headline rates contracted to PHP 925.55 per sqm, translating to a 1.81% decline from the preceding quarter.

Albeit the fast-growing vacancy levels, Quezon City is still expecting a large office supply boost in the coming years. Approximately, 333,700 sqm is anticipated to be introduced in the market in the next five years, in which more than 149,000 sqm will be coming from SM Prime Holdings.

Alabang

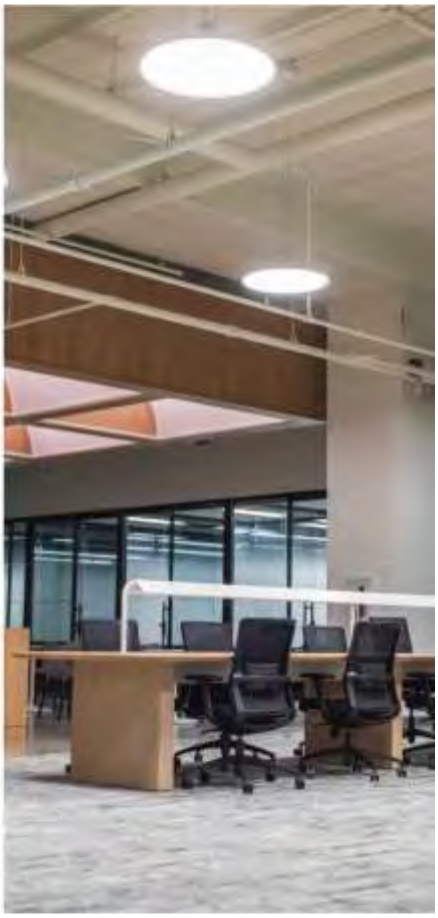
Similarly, Alabang CBD experienced rising vacancy levels in Q1 2021 at 16.07% from 14.53% in the preceding quarter. As a result, increased pressures on office landlords in the district were felt as they remain responsive to the slow movement in the office market. This caused rental rates to gradually contract to PHP 846.76 per sqm.

Alabang still holds on to the possibility of becoming one of the major investment hubs in the metropolis due to its vast developable land. Approximately 209,900 sqm of upcoming Grade A office space is anticipated to be operational in the next five years, while 13,800 sqm is slated to become operational by 2021.

Figure 2. Metro Manila Lease & Vacancy Rates per CBD

Source: Santos Knight Frank Research

Office Outlook



The easing quarantine measures that started in the second half of 2020 allowed the developers to restart their impeded construction activities. Developers remain bullish in expanding their office footprint in Metro Manila with more than 3 million sqm of office space are slated to operate in the next five years. The nation's economic center is also set to have an additional supply of 1.1 million sqm of Prime and Grade A office space by the end of 2021. This massive influx still stems from the construction backlogs from the developers in 2020.

The robust expansion of office supply in Metro Manila is seen to further propel the vacancy rates in the local office market in the coming quarters. Along with the stagnant office demand, downward pressure on office rents still expected. Office landlords will be forced to implement more flexible payment terms to existing and potential tenants to market their spaces and continue cash flow from their buildings.

The recovery of the office market is also dependent on the pace of vaccine roll-outs in the country. The slow pace in inoculations is seen to weigh down on the recovery of the market. Attaining herd immunity as soon as possible can reinvigorate the interest in the office market.

In the medium- to long-term Green Buildings are seen to gain a competitive edge compared to ordinary office buildings. Buildings accredited by the US Green Building Council (LEED) and the Philippine Green Building Council (BERDE) will be more sought-after for potential office locators. The efficient design that provides better air circulation, ventilation and filtration, and increased open space, will be more appealing to the market as it puts a premium on the health and well-being of its tenants.

4 Valuation Methodology

Valuation Rationale

4.1 The purpose of this appraisal is to estimate the Market Value of the Property. In any given valuation exercise, fair value can be arrived at using either one or a combination of the three (3) approaches to value, namely: Market (or Direct Sales Comparison) Approach, Income Approach, and the Cost Approach. The determination of the appropriate approach for a given property is based on the quality and quantity of data available, particularly its relevance to the Property under appraisement. If more than one valuation approach is utilized, the resulting values are reconciled to produce a final value conclusion.

4.2 Due to the nature of the Property and the purpose of this appraisal, both the Cost Approach and Income Approach to value are deemed the most appropriate to use and the Market (or Direct Sales Comparison) Approach was not used.

Cost Approach

4.3 The Cost Approach generally involves the following steps:

A. The value of the subject land is normally estimated by the Market or Sales Comparison Approach. In instances where the land is covered by a Lease Agreement, the value of the leased fee or leasehold rights on the subject land, whichever is applicable, is instead estimated.

B. The depreciated cost of the subject improvement is estimated by calculating the direct cost of reproducing or replacing the improvement, deducting accrued depreciation from all sources, and adding the indirect costs attributed to the improvement.

Combining the estimates shown above results in the indicated value of the Property by the Cost Approach.

4.4 **On Land (Leasehold)**

As mentioned, the land subject of this appraisal is covered by a Lease Contract. In estimating the value of the Property covered by a lease, two interests are involved: the interest of the lessee which is the leasehold; and the interest of the lessor which is the leased fee or the lessor's interest. The Client being the lessee, the purpose of this appraisal is to establish the leasehold value of the subject land.

Leasehold Value is the present (discounted) worth of the rent savings (or rental gains) when the contract rent at the time of the appraisal is less than the current market rent. It is estimated by computing the present worth of the rental gains over the remaining term of the lease agreement using an appropriate discount rate.

The valuation process, briefly stated, consists of the following:

- Estimation of the current market rent of the leased property;

- Estimation of the rental gains over the remaining term of the lease agreement, if any. Rental gains projection is pegged at 10 years while the 11th year rental gain is used to estimate the terminal value of the Leasehold Rights on the Land;
- Estimation of an appropriate discount rate and terminal capitalization rate; and
- Discounting process based on an appropriate discount rate to arrive at an indicated leasehold value.

Market Rent of the Land

4.5 As mentioned earlier, another purpose of this report is to express an opinion of the Market Rent of the Property if it were to be leased out in accordance with its highest and best use. The amount of annual or monthly rental, which the subject property should command might be estimated by any, or a combination of the following:

1. By Market (Comparison) Approach, in which rentals of similar properties are used a benchmarks; and
2. By Income Approach, in which the value of the Property is first established, and the proper capitalization rate is applied to obtain its rental value.

On the other hand, Market Rent is defined under IVS 2019 as “the estimated amount for which an interest in real property should be leased on the valuation date between a willing lessor and a willing lessee on appropriate lease terms in an arm’s length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion.”

It is the rental income that the Property would most likely command in an open market. It is also defined as being the amount at which a willing lessee would pay and a willing Lessor would receive for the use of certain property, neither being under compulsion to transact, and both having reasonable knowledge of all relevant facts.

Market Approach

4.6 We have made a survey of existing ground leases of similar lands in the vicinity of the Property and found scarcity of rental data that may be used for direct comparison purposes.

Income Approach

4.7 In the absence of any comparable rental data, we have estimated the **Market Rent** of the Property by a variation of the Income Approach on the basis of what prudent real estate investors or landowners would be warranted in leasing it in order to realize a fair return on their investment or property, for that matter. Under this approach, the market value of the Property is first established, and the proper capitalization rate is applied to obtain its rental value.

Market Value of the Land

4.8 In valuing the land, we made use of the Market Approach which is the most common technique for valuing land, and is the most preferred method when comparable sales are available. With this method, sales of similar property or parcels of land are analyzed, compared, and adjusted to provide a value

indication for the Property being appraised. The comparison process is based on an analysis of the similarity or dissimilarity of the comparables.

4.9 The appraiser gathers data on actual sales as well as listings and identifies the similarities and differences in the data; ranks the data according to their relevance; adjusts the prices of the comparables to account for the dissimilarities with the land being appraised; and forms a conclusion as to the most reasonable and probable market value of the subject property.

4.10 The elements of comparison include property rights, financing terms, conditions of sale (motivation), market conditions (sale date), location, physical characteristics, available utilities, and zoning. The most variable elements of comparison are the site's physical characteristics, which include its size and shape, frontage, topography, location, and view. The units of comparison applied may be hectares or sq.m., or any other unit used in the market.

Evidence of comparable properties

4.11 **Analysis of Comparable Properties Offered for Sale**

In the course of our investigation, we looked at current market listings of comparable properties in the area. The comparable properties selected share the same or similar characteristics as the subject. Whatever information or data we came up with was then analyzed, and comparison made for such factors as size, characteristics of the lot, location, quality, and prospective use. In the Philippines however, property transactions are not officially disclosed, and quite often, actual transaction price is masked by other undisclosed arrangements and different from the figure shown on the sale and purchase agreement. We have therefore made reference to the following data, made our market judgment, and adjusted for the above-mentioned factors:

1. A commercial lot having a total area of 800 sq.m. located along Jacob Street, within Barangay Penafrancia, Naga City, is currently offered for sale at an asking price of PhP14,900,000 or about PhP18,625 per sq.m.
   Source: Ms. Gianne Orillosa (Cel. No. 0917-684-0138)
2. A commercial lot having a total area of 500 sq.m. located along Almeda Highway, within Barangay Dalipay, Naga City, is currently offered for sale at an asking price of PhP8,600,000 or about PhP17,200 per sq.m.
   Source: Mr. Ed (Cel. No. 0930-017-1315)
3. A commercial lot having a total area of 30,421 sq.m., located along Barangay Road, within Barangay Bagumbayan Sur, Naga City, adjacent to future site of SM City 2, is currently offered for sale at an asking price of PhP365,052,000 or about PhP12,000 per sq.m.
   Source: Mr. Facundo Roco (Cel. No. 0917-827-0601)

Summary of Adjustments

The Data Comparison Grid shown on Appendix **10** shows a summary of the aforementioned adjustments, which provides an indication as to the degree of adjustment made to the different elements in comparison. A numeric indicator indicates the level of adjustments, in terms of percentage when compared with the subject property. The use of (-) indicates a negative adjustment and a + indicates a positive adjustment. A downward adjustment (-) used is made to reflect superior characteristics of the comparable sale/listing, while an upward adjustment + reflects inferior characteristics of the comparable sale/listing. Finally, a 0 is used to confirm similarity between the comparable sales/listings and the subject or is used when market information is unavailable or does not support an adjustment for any particular element of comparison.

Value of the Land 4.12 As reflected in the said Comparison Grid, the value of the land is estimated at **PhP18,100 per sq.m.**, or a total of **PhP54,600,000** for a land area of **3,014.80 sq.m.**

Rate of Return 4.13 The value of the land having been established, its rental value may now be estimated considering the prevailing rate of return prudent investors or landowners would expect in ground leases, normally in the range of 4% to 7%. We based this range of rate of return from interviews with land owners and brokers, as well as our analysis of the relationship between prevailing capital values and rental rates and it is believed to be the current yield in the commercial land lease market.

Considering the most recent pandemic and the effect it had on the economy and the leasing market, we have not adopted the average rate of return, and have instead adopted a conservative interest rate (return on investment) of 4%.

In light of the foregoing, our estimate of the Market Rent of the Property is as follows:

Land Value	PhP	54,600,000	
Interest on Land Value			
PhP54,600,000 @ 4%	PhP	2,184,000	

Total	**PhP**	**2,184,000**	**per year**
		=========	
Or	**PhP**	**182,000**	**per month**
		=======	

Market Rent of the Land 4.14 On the basis of the foregoing, the Market Rent of the land is estimated at **PhP60.37 per sq. m. per month**, or a total of **PhP182,000 per month**, or say, **PhP2,184,000 per annum** for the subject land area of **3,014.80 sq. m.**

Rental Gain 4.15 Rental Gain is reckoned as the difference between the Market Rent and the Contract Rent.

Discount Rate 4.16 The discount rate was computed using the build-up method. The discount rate is calculated by adding together different variables. The variables that were used to generate it consist of a risk-free rate and a reasonable risk premium. Based on the foregoing, discount rate is estimated at 7.1665%, or say, 7.20% (10-year T-bond rate at about 3.9165% (from Philippine Dealing & Exchange Corporation (PDEx) as of 30 June 2021) plus 3% equity risk premium from OECD and

additional 0.25% risk premium for unidentifiable risk factors which include the uncertainty brought about by the Covid-19 global pandemic.)

For purposes of this valuation, we have adopted, as risk-free rate, the 10-year T-bond rate from PDEx. The Philippine Dealing & Exchange (PDEx) system appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEx. The PHP BVAL Reference Rate dated 30 June 2021 was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

4.17 We have adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3%. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits
Valid as of: **25 June 2021**

			Classification		
nb	Country Code ISO Alpha 3	Country Name [1]	Previous	Current Prevailing	Notes
138	PLW	Palau	-	-	(5)
139	PAN	Panama	4	4	(8)
140	PNG	Papua New Guinea	6	6	
141	PRY	Paraguay	5	5	
142	PER	Peru	3	3	
143	PHL	Philippines	3	3	
144	POL	Poland	-	-	(6)
145	PRT	Portugal	-	-	(6) (7)

Capitalization Rate 4.18 Capitalization rate adopted to arrive at the terminal value is 4.7% (Discount Rate less Projected Long-term Growth Rate (2.5%). The long-term growth rate is based on a growth forecast of the prevailing commercial market over the forecast

period. This is based on what the Property is perceived to achieve in the long-term considering the present situation of the market.

Remaining Life of the Lease 4.19 Remaining life of the lease as of the date of valuation is 99 years.

Summary of Leasehold Assumptions 4.20 In summary, below are the assumptions/statistics used in determining the leasehold value of the subject land.

CYBERGATE NAGA			
Lease Details			
Lot Area	:	3,014.80	sq.m.
Term of Lease	:	99	years
Assumed Commencement Date	:	01-Oct-21	
Lease Rate	:	7%	of net leasing revenue
Market Rent (in PhP)			
Monthly Rent	:	60.37	/sq.m./ month
Annual Rent	:	2,184,000	
Annual Escalation	:	3%	starting Y2
Discount Rate			
Risk Free Rate		3.92	as of June 30, 2021 (BVAL PDEX)
Risk Premium		3.00	as of June 25, 2021 (OECD)
Additional Risk		0.25	risk premium for unidentifiable risk factors
		7.17	
Resulting Discount Rate, say		7.20%	
Terminal Capitalization Rate		4.70%	

Leasehold Value 4.21 On the basis of the foregoing, the subject land was estimated to have no leasehold value.

We attach a copy of our valuation calculations at Appendix **7**.

4.22 **On Leasehold Improvements and Machinery & Equipment**

The estimate of the leasehold improvements can be either replacement or reproduction cost, new. Replacement Cost, New is defined as "The cost of construction, at current prices, of a building having utility equivalent to the building being appraised but built with modern materials and according to current standards, design, and layout." On the other hand, Reproduction Cost, New is defined as "The cost of construction, at current prices, of an exact duplicate, or replica, using the same materials, construction standards, design, layout, and quality of workmanship, and embodying all the deficiencies, super-adequacies, and obsolescence of the subject building."

In estimating the Replacement Cost of the buildings and improvements, we have made reference to the building cost index or other building cost as available in the market or published by a reputable quantity surveyor firm. We have likewise referred to our own database of building construction costs. We do not hold ourselves to be construction cost advisers and a formal estimate can only be given by a specialist construction cost consultant. It is recommended that a professional quantity surveyor or a firm of professional quantity surveyors should be consulted in order to assess an accurate building/improvement replacement cost.

In arriving at our assessment using the Cost Approach for the Equipment, we first developed the Replacement Cost, New ("RCN") of the asset. In developing our RCN, we have obtained current cost information from equipment dealers in the region. We relied on data furnished by equipment manufacturers, dealers and importers, as well as information contained in price catalogues, other published materials including the Internet and inquiries from local suppliers

RCN is the estimated amount of money needed to acquire a similar new item having the nearest equivalent utility as the Property being valued taking into consideration current prices of materials and manufactured equipment, shipping and handling, labour, contractor's overhead, design and supervision, profit and fees, and other attendant costs associated with its acquisition and installation, but without provision for overtime or bonuses for labour and premium for materials.

Having developed the RCN, we then deducted for the various elements of depreciation to arrive at the Depreciated Replacement Cost ("DRC"). DRC includes depreciation allowance or loss of value arising from condition, utility, age, wear and tear, and obsolescence present (physical, functional or economic), taking into consideration past and present maintenance policy and rebuilding history.

General
Where elements are of foreign origin, the assessment process give full consideration to all expenditures normally incurred in importation such as packing and crating charges, inland and ocean freight, insurance, duties and taxes, bank charges and commissions, wharfage, brokerage and handling

In estimating the depreciation of the assets, we have utilized the age-life method tempered with our observed condition of the assets. The remaining lease period was likewise considered in arriving at the value of the leasehold improvements.

Appendix **11** contains the Schedule of Assets describing in detail these assets.

Income Approach

Definition 4.23 The Income Approach is applicable to the valuation of income producing properties, business enterprise as well as the valuation of intangible assets. This approach measures the current value of an asset by calculating the present value of its future economic benefits by discounting expected cash

flows at a rate of return that compensates the risks associated with the particular investment.

For this particular engagement, we have applied both the Discounted Cash Flow Analysis and the Direct Capitalization Method.

Discounted Cash Flow Analysis

4.24 The discounted cash flows, or DCF valuation is the most popular fundamental approach in valuing the future economic benefits of a projected income stream. DCF measures actual yield rather than paper income for the asset/business owner and the analysis of DCF is widespread and mandatory in the various fields of business making DCF-based valuation ideal.

4.25 The valuation process, briefly stated, consists of the following:

- Estimation of the revenues generated;
- Estimation of the costs and expenses related to the operations of the development;
- Estimation of an appropriate discount rate;
- Discounting process using an appropriate discount rate to arrive at an indicative market value; and
- Estimation of the Terminal Value of the Property.

Discount Rate

4.26 The discount rate was computed using the build-up method - calculated by adding together the different variables. The basic formula for the traditional build-up model is:

Discount Rate = Rf + P + MR + LR

Where	Variable	Proxy Statistic
Rf	Risk Free Rate	PDEX Risk Free Rate
P	Equity Risk Premium	Country Risk
MR	Management Risk	
LR	Liquidity Risk	

The variables that were used to generate the Discount Rate are exhibited in the table below, along with the sources and/or dates as at or nearest the 30 June 2021 valuation date.

risk Free Rate (10Y)	3.92%	As of 30 June 2021, BVAL PDEX
Equity Risk Premium	3.25%	As of 25 June 2021, OECD
Management Risk	0.80%	
Liquidity Risk	0.90%	

4.27 The following assumptions were used to arrive at the Discount Rate using the Build-Up Method.

Risk Free Rate

4.28 For the purposes of this valuation, we adopted the 10-year bond rate sourced from Philippine Dealing & Exchange Corporation (PDEX) as of 30 June 2021 -

the valuation date (image shown below). The Philippine Dealing Exchange (PDEx) system has recently appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEX. The PHP BVAL Reference Rate was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

Equity Risk Premium

4.29 We used an equity risk premium of 3.25%. We adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3% plus an additional 0.25% risk premium for unidentifiable risk factors. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors. Shown below is an excerpt of said table.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits
Valid as of: **25 June 2021**

nb	Country Code ISO Alpha 3	Country Name [10]	Classification Previous	Classification Current Prevailing	Notes
138	PLW	Palau	-	-	(5)
139	PAN	Panama	4	4	(8)
140	PNG	Papua New Guinea	6	6	
141	PRY	Paraguay	5	5	
142	PER	Peru	3	3	
143	PHL	Philippines	3	3	
144	POL	Poland	-	-	(6)
145	PRT	Portugal	-	-	(6) (7)

Management & Liquidity Risk

The Management Risk refers to the estimated premium to compensate for the burden of management, while the Liquidity Risk refers to the ease (or the difficulty) with which an investment can be sold or made. A review was done and we have arrived at the following: Management Risk was classified into four categories, with the corresponding rates: Poor – 1.2; Average – 1.0; Above Average - 0.90 and Excellent - 0.80 while Liquidity Risk has three (3) categories:

Poor –1.2; Average – 1.0; and Good – 0.90. After the said review, we deemed it appropriate to use 0.80% for Management Risk and 0.90% for Liquidity Risk.

Resulting Discount Rate

4.30 Resulting Discount Rate used for this valuation is 8.87%, or say, 9.0%.

Capitalization Rate

4.31 A discount rate is used to calculate the present value of future projections of a benefit stream when growth varies from year to year. However, if growth is estimated to remain level throughout the life of the investment, a capitalization rate is often used. In its most basic form, the relationship between discount rate and a capitalization rate can be summarized as follows:

Capitalization Rate = Discount Rate – Growth

For purposes of this valuation, a long-term growth rate of 4% has been assumed. This is based on what the Property is perceived to achieve in the long-term considering the present situation of the market. Using this assumption, resulting Capitalization Rate would be 5%.

Key Financial Assumptions

4.32 We relied on the historical and projected assumptions brought about by our research and as provided by the Client. These financials were analyzed to ensure reasonableness by comparing projected revenue growth rates and other operating expenses based on historical performance. Based on interviews with the representatives of the company, projections were prepared to reflect the current and expected future market conditions.

a. **Revenues**

i. Cashflow projection starts in 01 July 2021 and will run for a period of 10 years.

ii. The revenues come from the rental of office units. In estimating the annual rents of the subject units/slots, we have adopted the contract rents as appearing in the copy of the rent roll provided to us by the Client for the occupied units/leased parking slots. After the expiration of lease, lease rates then are aligned with market rates and are assumed to have an average of 4-year lease contracts. Aside from the monthly rentals from leasable areas, revenues likewise include Management and Aircon Dues which are likewise charged to the tenants monthly on a per sq.m. basis. Management dues are for common and/ or shared utilities, facilities and services. These are inclusive of air-conditioning equipment rental during office hours (but exclusive of power consumption).

iii. It would be important to note that as the building administrators, they collect the said dues as a cost recovery mechanism for all expenses related to the day to day operations of the building and its common areas.

iv. Occupancy assumptions were based on the actual performance of the Property as well as the prevailing trend in the subject area taking into consideration the forecasted effect of the global pandemic in the office market. Occupancy of the Property as of valuation date is at 100% while the historical average performance of the Property for the last two years is at 100%. For this valuation exercise, we did not assume any vacancy assumption for this Property.

v. We used actual escalation rates indicated in the rent roll for all existing leases up until their lease expires. After which, an average escalation of 5% was then be applied year on year until the end of the cash flow.

b. **Cost & Expenses**

i. Operating Expenses which would include administrative and utility expenses are normally charged against the Common Use Service Area (CUSA) Fees or Association Dues being collected monthly to the individual tenants. However, there are instances when CUSA funds are insufficient to pay off all common charges. If and when this happens, the owners/administrators would have to pay off these expenses and this has been taken into consideration in the projections.

ii. Operating Costs and Expenses are assumed to be an average of approximately 24% of the Total Net Revenues. Operating costs and expenses included are basically divided in to two – real estate expense and general administrative expenses. Real Estate expenses are as follows: contracted services, repairs & maintenance, management fee and loss from CUSA and miscellaneous expenses. While under General Administrative Expense are – salaries & wages, taxes and licenses, advertising & promotions, commission, insurance, communication, rent expense, supplies, travel & transportation, and representation & entertainment expenses.

These expenses are projected either as a percentage of the rental revenues or the total net revenues. These percentage allocations were from the historical and projected performance of the Property.

iii. Annual Capital Expenditures (CAPEX) for the entire cashflow period, on the other hand, was assumed to be 1.5% of the Net Leasing Revenues. This assumption is based on benchmarking and analysis of current market practice in allocating CAPEX reserve.

This allocation would help ensure that the Property would operate efficiently and maintain its good and sound condition.

Resulting Market Value

a. Earnings Before Income Tax, Depreciation and Amortization (EBITDA) for the whole duration of the cashflow shall be discounted at the derived Discount Rate of 9.00%.

b. The sum of discounted cashflows including the Terminal Value of the Property represents the Market Value of the Property.

The Terminal Value of the Property is the value of the property beyond the explicit forecast period. It is assumed that the property or business will continue to generate cashflows in perpetuity. As mentioned earlier, Terminal Capitalization Rate used is 5%.

The Discounted Cashflow showing the estimated Market Value of the subject property is attached as Appendix **8.**

Direct Capitalization Method

4.33 The Direct Capitalization Method is a real estate valuation method that helps convert a single year's income into value by dividing the Net Operating Income with an appropriate Capitalization Rate. This method assumes that the Property has a stabilized net operating income. All parameters of a typical investor return expectations are represented either explicitly or implicitly in either income forecast or the capitalization rate. The direct capitalization rate, as the ratio of income to value, serves as a proxy for investor return assumptions.

Resulting Market Value

4.34 We made use of the single year's cashflow projection (2022) to derive the Market Value using the Direct Capitalization Method. Capitalization rate adopted to arrive at the Property Market Value is 5%.

Valuation basis

Market Value

4.35 Market Value is defined in the 2019 **International Valuation Standards** as: "The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

Valuation date

Valuation date

4.36 The valuation date is **30 June 2021**.

General Assumptions

Assumptions

4.37 Our valuation is necessarily based on a number of assumptions which have been drawn to your attention in our General Terms of Business, Letter of Engagement and within this report.

Key Assumptions

4.38 Whilst we have not provided a summary of all these assumptions here, we would in particular draw your attention to a key assumption that we relied on a very considerable extent on the information provided by the Client and have accepted advice given to us on such matters as legal titles, "as-built" plans, building uses and other relevant matters. We were advised by the Client that no material facts have been omitted from the information provided.

4.39 We have assumed that the title of the Property is clean and free of any liens and encumbrances.

Special Assumption

4.40 We were instructed to re-value the Property without a re-inspection. We have, thus, considered changes to the physical attributes and/or characteristics of the Property which have occurred between the valuation date and the date of our previous valuation as confirmed by the Client. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.

4.41 We have excluded the units' fit-outs as these are reportedly introduced by the tenants.

4.42 We have adopted the floor area details provided to us by the Client and have assumed these to be accurate.

4.43 The value of the improvement using cost approach is just an allocation as the subject ground (portion), 3rd (portion), 4th and 5th floors cannot technically be separated from the rest of the building.

4.44 Our valuation of Machinery & Equipment has also undertaken the following special assumptions:

We have not carried out a full mechanical survey, or structural test, nor have inspected the machinery and equipment, which are covered, unexposed or inaccessible. Our assessment is based on the premised that the items are in a condition commensurate with age and usage.

Machinery & Equipment associated with the supply of services to the building such as Elevators, Air Conditioning Systems are valued on the assumption that they are permanently installed or attached to the building.

4.45 In applying Income Approach to value, we have considerably relied on the information provided to us by the Client which includes the following: lease contracts, revenue and expense projections, historical and projected occupancies. Upon expiration of contracts, we estimated the lease rates based on the acceptable escalations in the market.

4.46 Given the 99-year leasehold, we assumed that the Property is comparable to a freehold property given the duration of the leasehold interest on the land. Thus, a terminal value of the Property was computed at the end of the cashflow.

Valuation Results

Using Cost Approach

4.47 Using the **Cost Approach,** the Market Value of the Property, may be summarized as under

Land (Leasehold Value)	N/A
Designated Building Floors (Ground (portion), 3rd (portion), 4th and 5th)	180,756,000
Building Machinery & Equipment	51,853,000

TOTAL	**232,429,000**
	===========
ROUNDED TO	**232,000,000**
	===========

4.48 The Market Value of the Property is estimated at **PhP232,000,000 (TWO HUNDRED THIRTY-TWO MILLION PHILIPPINE PESOS).**

Using Income Approach

4.49 Using the **Income Approach** on the other hand, the Market Value of the Property is estimated as follows:

DCF Analysis	**PhP687,000,000**
Direct Capitalization Method	**PhP720,000,000**

Calculation

4.50 We attach a copy of our valuation calculations for the Income Approach at Appendix **8 & 9**.

Comments

4.51 The values arrived at using the Income Approach are noted to be higher than the value arrived at using the Cost Approach. This is because, unlike the Income Approach, the Cost Approach does not capture the income potential of the Property.

4.52 For purposes of this valuation, we deemed it appropriate to adopt the results arrived at by the Income Approach – DCF Analysis, since this method is usually used to determine the value of an income-generating property, as it also captures the Property's future economic benefits, giving a better representation of the Property's Market Value at an acceptable rate of return that would compensate for the risks associated with the particular investment. It likewise takes into consideration market cycles that Direct Capitalization Method cannot capture.

Conclusion of Value

4.53 In conclusion, we are of the opinion that the Market Value of the Property, reckoned as of **30 June 2021**, is:

PhP687,000,000 (SIX HUNDRED EIGHTY-SEVEN MILLION PHILIPPINE PESOS).

***Note**: The outbreak of the Novel Coronavirus (COVID-19), declared by the World Health Organization as a "Global Pandemic" on 11th March 2020, has impacted global financial markets. Travel restrictions have been implemented by many countries. In the Philippines, market activity is being impacted in all sectors. As at the valuation date, we consider that we can attach less weight to previous market evidence for comparison purposes, to inform opinions of value. Indeed, the current response to COVID-19 means that we are faced with an unprecedented set of circumstances on which to base a judgement. Our valuation is therefore reported on the basis of "material valuation uncertainty" per IVS 103 of the International Valuation Standards. Consequently, less certainty – and a higher degree of caution – should be attached to our valuation than would normally be the case. Given the unknown future impact that COVID-19 might have on the real estate market, we recommend that you keep the valuation of this property under frequent review.*

Appendix 1 - Assumptions, Limiting Conditions and Disclaimers

Basis of Value	Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion." In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property. It is further assumed that title to the property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable. The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.
Property Rights appraised	The rights appraised in this report are the property rights in fee simple, free and clear. "Fee simple" is defined as absolute ownership, without limitations to any particular class of heirs or restrictions, but subject to the limitations of eminent domain, escheat, police power and taxation. We assume that the fee simple interest is marketable and in compliance with the applicable laws of the Philippines.
Fractional Interests:	When the study contains a valuation relating to an estate in land that is less than the whole fee simple estate, the value reported for such estate relates to a fractional interest only in the real estate involved, and the value of this fractional interest plus the value of all other fractional interests may or may not equal the value of the entire fee simple estate which is considered the whole. When the valuation report contains an allocation of the total valuation between land and building improvements, such allocation applies only under the existing program of utilization. The separate valuations for land and building cannot be used in conjunction with any other valuation/appraisal and will be invalid if so used.
Assumptions:	The valuation is based on the condition of the economy and the purchasing power of the Philippine Peso as of the effective date of valuation. We have assumed that the floor areas provided us have been calculated in accordance with engineering standards, and assumed herein to be true and correct. Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.
Information Supplied By Others	Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser. Information provided by informed local sources, such as government agencies, financial institutions, Realtors, buyers, seller and others, was weighed in the light in which it was supplied and checked by secondary means; however, no responsibility is assumed for possible misinformation.
Legal Issues:	This valuation assumes no responsibility for the validity of legal matters affecting the property. The ownership history reported in this valuation is based on the appraiser's research of public records, which are assumed to be accurate and complete. It is not the intent of the valuation to offer a legal opinion of title. It is further assumed that the property has good title, responsible ownership and competent management. Any liens or encumbrances which may now exist have been disregarded. The appraiser is not required to give testimony or attendance in court by reason of this valuation, with reference to the property in question, unless arrangements have been previously made.
Liability:	The liability of Santos Knight Frank, Inc. and its directors and employees is limited to the addressee of this report only. No accountability, obligation or liability to any third party is accepted. In the event we are subject to any liability in connection with this engagement, regardless of legal theory advanced, such liability will be limited to the amount of fees we received for this engagement.
Environmental Conditions:	It is assumed that there is full compliance with all applicable Philippine environmental regulations and laws unless non-compliance is stated, defined, and considered in this appraisal report.
Town Planning:	It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.
Condition of Improvements:	We have inspected the improvements and structures. However we have not carried out a structural survey nor tested any of the services or facilities, nor have we inspected unexposed or inaccessible portions of the building, and are therefore unable to state that these are free from defect, rot, infestation, asbestos or other hazardous material. We have therefore, viewed the general state of repair of the property and advise that we did not notice any obvious signs of structural defect or dilapidations. Furthermore, the property appears to be in reasonable condition having regard to its age and use and unless otherwise stated. We also assume that the building complies with all relevant statutory requirements in respect of matters such as sanitary, building and fire safety regulations and standards.
Valuation Methodology:	Santos Knight Frank uses any one or a combination of the Market Data Approach, the Cost Approach, and the Income Capitalization Approach. Each methodology begins with a set of assumptions. The result is the best estimate of value Santos Knight Frank can produce, but it is an estimate and not a prediction or guarantee and it is fully dependent upon the accuracy of the assumptions as to income, expense and market conditions. These primary methodologies use market derived assumptions, including rents, yields and discount rates, obtained from analyzed transactions. We do not represent ourselves as experts for data, such as economic, demographic or construction costs, which has been obtained from external sources.
Others:	This report and valuation shall be used only in its entirety and no part shall be used without the whole report. It may not be used for any purpose other than the intended purpose mentioned herein. Possession of this report or any copy thereof does not carry with it the right of copying or publication. All copies will originate from Santos Knight Frank, Inc. and will be signed and dated as such. Neither the whole nor any part of the report or any reference to our name, our valuation and our report may be included in any document, circular or statement nor published without our prior written consent to the form and context in which it may appear. The delivery and acceptance of this report completes this assignment.

Attention: **MR. FREDERICK D. GO**
President and Chief Executive Officer

Subject: **Terms of Engagement for Valuation Services**

Dear Mr. Go:

Thank you for your interest in our Valuation Services. We refer to your invitation of 03 August 2020 requesting Santos Knight Frank, Inc. ("SKF") to submit a proposal for valuation (the "Valuation") in respect of the properties detailed below (the "Properties").

This proposal, together with our General Terms of Business for Valuation Services ("General Terms"), sets out our terms of engagement for carrying out this instruction. Once agreed and signed, this proposal shall constitute our Letter of Engagement ("Letter"). This Letter and the General Terms (together, the "Agreement") exclude any other terms which are not specifically agreed to us in writing. To the extent that there is any inconsistency between the Letter and the General Terms, this Letter shall take precedence.

1. **Client**
   Our Client for this Valuation is Robinsons Land Corporation (the "Client", "you" or "your").

2. **Purpose of Valuation**
   The Valuation is provided solely the purpose of transferring some of the Client's assets to the REIT Company and its application for a Tax-Free Exchange Ruling with the Bureau of Internal Revenue and listing of the REIT Company in the Philippine Stock Exchange (the "Transaction"). Specifically, the Valuation will be used for the Client's Financial Statements to be attached to the Offering Circular as required by the Securities and Exchange Commission (SEC) and will be attached as an appendix to the Client's REIT Plan. In accordance with clause 4.1 of our General Terms, the Valuation may not be used for any other purpose without our express written consent. The Valuation will be made accessible in the public domain as part of the regulatory requirements of the Transaction.

3. **Term & Termination**
   This appointment will commence upon signing of this Agreement and shall continue to be in effect for a period of two (2) years. Any extension of the Term of this Agreement shall be mutually agreed upon by the parties in writing.

23. **Electronic Communication**

During the engagement, both parties may wish to communicate electronically with each other. However, electronic transmission of information cannot be guaranteed to be secure or virus-or error-free and information could be intercepted, corrupted, lost or destroyed, arrive late or incomplete, or otherwise be adversely affected or unsafe to use. Both parties agree to accept these risks and so each party will be responsible for protecting its own systems and interests in relation to electronic communications. Neither party will have any liability to the other party on any basis for any loss or damage arising from or in connection with the electronic communication of information between both parties or their reliance on such information.

24. **Acceptance**

Please sign and return a copy of this Letter signifying your acceptance of the terms of the Agreement. We reserve the right to withhold any Valuation and / or refrain from discussing it with you until this Letter has been countersigned and returned.

Your attention is drawn to the "Important Notice" in the General Terms. If you have any questions regarding this Letter and / or the terms of the Agreement, please let us know before signing this Letter.

Thank you for choosing Santos Knight Frank, Inc. and we look forward to working with you on this important engagement.

Sincerely,	Approved and Agreed to by:

Attention: **MR. FREDERICK D. GO**
President and Chief Executive Officer

Subject: **Amendment to Terms of Engagement and General Terms of Business for Valuation Services Dated 03 August 2020 ("Amendment")**

Dear Mr. Go:

We refer to subject Letter of Engagement and General Terms of Business for Valuation Services (together, the "Agreement") between Robinsons Land Corporation (the "Client", "you" or "your") and Santos Knight Frank, Inc. ("SKF") for the valuation of fourteen (14) office buildings (the "Covered Properties").

For this purpose, the Agreement is amended as follows:

The first, second, and third and fourth paragraphs shall now read:

For the Valuation

I. Valuation for Asset Transfer to REIT Company and its application for a Tax-Free Exchange Ruling:

For Valuation Update

II. Valuation of Properties for REIT listing to PSE:
   Our Valuation of 14 Properties will be as follows:
   1. Valuation for 4 Properties
   2. Periodic Update of 14 Properties
      Under REIT Company (Quarterly basis – optional)
   3. Valuation Update of 14 Properties under REIT Company

Except as amended hereby, all the provisions of the Agreement which are not inconsistent herewith are incorporated herein by way of reference and from date hereof, the Agreement and this Amendment shall be read as one integrated document.

Kindly affix your signature on the conforme portion below and return one (1) original signed copy to us.

Sincerely,
SANTOS KNIGHT FRANK, INC.

Appendix 3 - General Terms of Business

General Terms of Business for Valuation Services

These General Terms of Business (the "**General Terms**") and our Letter of Engagement (the "**Letter**"), together form the agreement between you and us (the "**Agreement**"). References to "**you**", "**your**" etc. are to persons or entities who are our client and, without prejudice to clauses 3 and 4 below, to any persons purporting to rely on our Valuation.

Unless **the** context otherwise requires, all other terms and expressions used but not defined herein shall have the meaning ascribed to them in the Letter.

When used herein or in the Letter, the term "**Valuation**" shall mean any valuation report, advance report, supplementary report or subsequent/update report, produced pursuant to our engagement and any other replies or information we produce in respect of any such report and/or any relevant property. Any words following the terms "**including**", "**in particular**" or any similar expression shall be construed as illustrative and shall not limit the sense of the words preceding those terms.

All of the terms set out in these General Terms shall survive termination of the Agreement.

1. Santos Knight Frank, Inc.

1.1. Santos Knight Frank, Inc. ("**Santos Knight Frank**", "**our**", "**us**", "**we**") is a long-term franchise partnership, with Securities and Exchange Commission (SEC) Registration Number A199818549.

1.2. Our registered office is at 10/F Ayala Tower & Exchange Plaza, Ayala Avenue, Makati City where a list of members may be inspected.

1.3. Any representative of Santos Knight Frank, Inc. described as *Director* is either a member or an employee of Santos Knight Frank, Inc. and is not a member of the Board of Directors. The term *Director* has been retained because it is an accepted way of referring to senior professionals. The term "**Santos Knight Frank Person**" shall, when used herein, mean any member, employee, or consultant of Santos Knight Frank, Inc.

1.4. Our Tax Identification Number (TIN) is 201-626-570-000.

1.5. The details of our Professional Indemnity Insurance may be provided upon receipt of request..

1.6. Santos Knight Frank, Inc., being a corporate entity, is regulated by the Securities and Exchange Commission (SEC), and in accordance with our reportorial requirements with them, it may be necessary to disclose valuation files to them. By instructing us, you give us your permission to do so. Where possible we will give you prior notice before making any such disclosure, although, this may not always be possible. We will use reasonable endeavours to limit the scope of any such disclosure and to ensure any disclosed documents are kept confidential.

1.7. Valuations will be carried out in accordance with the 2019 edition of the International Valuation Standards (IVS) by valuers who conform to its requirements and with regard to relevant statutes or regulations. Our senior valuers are Real Estate Appraisers licensed and regulated by the Philippine Professional Regulation Commission (PRC).

2. Governing law and jurisdiction

2.1. The Agreement and any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with it or its subject matter or formation or any Valuation shall be governed by and construed in accordance with law.

2.2. Philippine courts shall have exclusive jurisdiction to settle any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with this Agreement or its subject matter or formation or any Valuation. This will apply wherever the relevant property or the client, or any relevant third party, is located or the service is provided.

3. Limitations on liability

3.1. Subject to clause 3.7, our maximum total liability in connection with or arising out of this Agreement and/or its subject matter and/or the Valuation is limited to the level of our fee as set out in the Letter.

3.2. Subject to clause 3.7, we will not be liable for any loss of profits or for indirect or consequential loss.

3.3. Subject to clause 3.7, any limitation on our liability will apply however such liability is or would otherwise have been incurred, whether in contract, tort (including negligence), for breach of statutory duty, or otherwise.

3.4. Except as set out in clauses 3.5 and 4.7 and 4.8 below no third party shall have any right to enforce any of the terms of this Agreement.

3.5. No claim arising out of or in connection with this Agreement may be brought against any Santos Knight Frank Person. Those individuals will not have a personal duty of care to you or any other person and any such claim for losses must be brought against Santos Knight Frank, Inc. Any Santos Knight Frank Person may enforce this clause but the terms of this Agreement may be varied by agreement between the client and Santos Knight Frank, Inc. at any time without the need for any Santos Knight Frank Person to consent.

3.6. No claim, action or proceedings arising out of or in connection with the Agreement and/or any Valuation shall be commenced against us after the expiry of the earlier of (a) two years from the Valuation Date (as set-out in the relevant Valuation) or (b) any limitation period prescribed by law.

3.7. Whether or not specifically qualified by reference to this clause, nothing in the Agreement shall exclude or limit our liability in respect of fraud, or for death or personal injury caused by our negligence or negligence of those for whom we are responsible, or for any other liability to the extent that such liability may not be so excluded or limited as a matter of applicable law.

4. Purpose, reliance and disclosure

4.1. The Valuation is prepared and provided solely for the stated purposes. Unless expressly agreed by us in writing, it cannot be relied upon, and must not be used, for any other purpose and, subject to clause 3.7, we will not be liable for any such use.

4.2. Without prejudice to clause 4.1 above, the Valuation may only be relied on by our Client. Unless expressly agreed by us in writing the Valuation may not be relied on by any third party and we will not be liable for any such purported reliance.

4.3. Subject to clause 4.4 below and for the stated purposes, the Valuation is confidential to our Client and must not be disclosed, in whole or in part, to any third party without our express written consent (to be granted or withheld in our absolute discretion). No liability is accepted to any third party for the whole or any part of any Valuation disclosed in breach of this clause.

4.4. The appraiser is not required to give testimony or attendance in court by reason of this valuation, with reference to the property in question, unless arrangements have been previously made.

4.5. Except for the stated purposes, neither the whole nor any part of the Valuation and/or any reference thereto may be included in any published document, circular or statement nor published in any way whatsoever whether in hard copy or electronically (including on any website) without our prior written consent and approval of the form and context in which it may appear.

4.6. Where permission is given for the publication of a Valuation neither the whole nor any part thereof, nor any reference thereto, may be used in any publication or transaction that may have the effect of exposing us to liability for actual or alleged violations of SEC Memorandum Circular No. 2, series of 2014.

4.7. You agree that we, and/or any Santos Knight Frank Person, may be irreparably harmed by any breach of the terms of this clause 4 and that damages may not be an adequate remedy. Accordingly, you agree that we and/or any Santos Knight Frank Person may be entitled to the remedies of injunction or specific performance, or any other equitable relief, for any anticipated or actual breach of this clause.

4.8. You agree to indemnify and keep fully indemnified us, and each relevant Santos Knight Frank Person, from and against all liabilities, claims, costs (including legal and professional costs), expenses, damages and losses arising from or in connection with any breach of this clause 4 and/or from the actions or omissions of any person to whom you have disclosed (or otherwise caused to be made available) our Valuation otherwise than in accordance with this clause 4.

5. Knight Frank network

5.1. Santos Knight Frank, Inc. is a member of an international network of independent firms which may use the "Knight Frank" name and/or logos as part of their business name and operate in jurisdictions outside the United Kingdom and the Philippines (each such firm, an "**Associated Knight Frank Entity**").

5.2. Unless specifically agreed otherwise, in writing, between you and us: (i) no Associated Knight Frank Entity is our agent or has authority to enter into any legal relations and/or binding contracts on our behalf; and (ii) we will not supervise, monitor or be liable for any Associated Knight Frank Entity or for the work or actions or omissions of any Associated Knight Frank Entity, irrespective of whether we introduced the Associated Knight Frank Entity to you.

5.3. You are responsible for entering into your own agreement with any relevant Associated Knight Frank Entity.

5.4. This document has been originally prepared in the English language. If this document has been translated and to the extent there is any ambiguity between the English language version of this document and any translation thereof, the English language version as prepared by us shall take precedence.

6. Severance

If any provision of the Agreement is invalid, illegal or unenforceable, the parties shall negotiate in good faith to amend such provision so that, as amended, it is legal, valid and enforceable and, to the greatest extent possible, achieves the intended commercial result of the original provision. If express agreement regarding the modification or meaning or any provision affected by this clause is not reached, the provision shall be deemed modified to the minimum extent necessary to make it valid, legal and enforceable. If such modification is not possible, the relevant provision shall be deemed deleted. Any modification to or deletion of a provision under this clause shall not affect the validity and enforceability of the rest of this Agreement.

7. Entire agreement

7.1. The Agreement, together with any Valuation produced pursuant to it (the Agreement and such documents together, the "**Contractual Documents**") constitute the entire agreement between you and us and supersedes and extinguishes all previous agreements, promises, assurances, warranties, representations and understandings between you and us, whether written or oral, relating to its subject matter.

7.2. Subject to clause 3.7 above, you agree that in entering into the Agreement you do not rely on, and shall have no remedies in respect of, any statement, representation, assurance or warranty (whether made innocently or negligently) that is not expressly set out in the Contractual Documents. You further agree that you shall have no claim for innocent or negligent misrepresentation based on any statement set out in the Contractual Documents.

7.3. The Letter and these General Terms shall apply to and be incorporated in the contract between us and will prevail over any inconsistent terms or conditions contained or referred to in your communications or publications or which would otherwise be implied. Your standard terms and conditions (if any) shall not govern or be incorporated into the contract between us.

7.4. Subject to clause 3.7 and clause 6, no addition to, variation of, exclusion or attempted exclusion of any of the terms of the Contractual Documents will be valid or binding unless recorded in writing and signed by duly authorised representatives on behalf of the parties.

8. Assignment

8.1. You shall not assign, transfer, mortgage, charge, subcontract, declare a trust over or deal in any other manner with any of the rights and obligations under the Agreement without our prior written consent (such consent to be granted or withheld in our absolute discretion).

9. Force majeure

9.1. Neither party shall be in breach of this Agreement nor liable for delay in performing, or failure to perform, any of its obligations under this Agreement if such delay or failure results from events, circumstances or causes beyond its reasonable control.

10. Our fees

10.1. Without prejudice to clause 10.3 below, you become liable to pay our fees upon issuance of the Valuation. For the avoidance of doubt, unless expressly agreed otherwise in writing, the payment of our fees is not conditional on any other events or conditions precedent.

10.2. If any invoice remains unpaid after 30 days of the date on which it is presented, we reserve the right to charge interest, calculated daily, from the date when payment was due until payment is made at 4%, subject to modification by our Accounting Department.

10.3. If we should find it necessary to use legal representatives or collection agents to recover monies due, you will be required to pay all costs and disbursements so incurred.

10.4. If an appraisal analysis is ordered and the assignment is cancelled before completion, we reserve the right to receive compensation, by way of damages, in an amount equal to 70% of the total fee for the assignment.

10.5. If you delay the instruction by more than 30 days or materially alter the instruction so that additional work is required at any stage or if we are instructed to carry out additional work that we consider (in our reasonable opinion) to be either beyond the scope of providing the Valuation or to have been requested after we have finalised our Valuation (including, but not limited to, commenting on reports on title), we will charge additional fees for this work. Such additional fees will be calculated on the basis of a proportion of the total fee by reference to reasonable time and expenses incurred.

10.6. Where we agree to accept payment of our fees from a third party, such fees remain due from you until payment is received by us.

11. Anti-bribery and corruption and Anti-Money Laundering

We agree that throughout the term of our appointment we shall:

(a) comply with all applicable laws, statutes, regulations, and codes relating to anti-bribery and corruption and Anti-Money Laundering laws (the "**Relevant Requirements**");

(b) not engage in any activity, practice or conduct which would constitute an offense;

(c) maintain anti-bribery, anti-corruption, and anti-money laundering policies to comply with the Relevant Requirements and any best practice relating thereto; and

(d) promptly report to you any request or demand for any undue financial or other advantage of any kind in connection with the performance of our services to you.

12. Portfolios

Properties comprising a portfolio, unless specifically agreed with you otherwise, will be valued separately and upon the assumption that the properties have been marketed individually and in an orderly manner.

13. Land Register inspection and searches

We are not required to undertake searches, validations or inspections of any kind for title or price paid information in any publicly available land registry.

14. Title and burdens

We will assume, unless specifically informed and stated otherwise, that each property has good and marketable title and that all documentation is satisfactorily drawn and that there are no unusual outgoings, planning proposals, onerous restrictions or local authority intentions which affect the property, nor any material litigation pending.

15. Disposal costs and liabilities

No allowance is made in our Valuation for expenses of realisation or for taxation which may arise in the event of a disposal and our Valuation is expressed as exclusive of any VAT that may become chargeable. Properties are valued disregarding any mortgages or other charges, including commissions.

16. Sources of information

We rely upon the information provided to us by you, as to details of tenure and tenancies, planning consents and other relevant matters, as summarised in our Valuations. Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser.

17. Identity of property to be valued

We will exercise reasonable care and skill (but will not have an absolute obligation to you) to ensure that the property, identified by the property address in your instructions, is the property inspected by us and contained within our valuation report. If there is ambiguity as to the property address, or the extent of the property to be valued, this should be drawn to our attention in your instructions or immediately upon receipt of our report.

18. Boundaries

Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.

19. Planning, highway and other statutory regulations

19.1. Enquiries of the relevant planning and highways authorities in respect to matters affecting properties, where considered appropriate, are normally only obtained from the corresponding government agency. We can only state whatever current conditions may be. We recommend that formal written enquiries should be undertaken by your lawyers who should also confirm the position with regard to any legal matters referred to in our Valuations.

19.2. It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.

19.3. We assume that the premises comply with all relevant statutory requirements including building, fire and sanitary regulations.

20. Property insurance
Our Valuation assumes that each property would, in all respects, be insurable against all identifiable risks.

21. Building areas and age
Where so instructed, areas provided from a quoted source will be relied upon. Any dimensions and areas measured on location or from plan/s are calculated and are quoted to a reasonable approximation, with reference to their source. Where the age of the building is estimated, this is for guidance only.

22. Structural condition
Building, structural and ground condition surveys are detailed investigations of the building, the structure, technical services and ground and soil conditions undertaken by specialist building surveyors or engineers and fall outside the normal scope of a valuation. Since we will not have carried out any of these investigations, we are unable to report that any property is free of any structural fault, rot, infestation or defects of any other nature, including inherent weaknesses due to the use in construction of deleterious materials. We do reflect the contents of any building survey report provided to us in advance, or any defects or items of disrepair of which we are advised or which we note during the course of our ocular inspections but otherwise assume properties to be free from defect.

23. Ground conditions
Unless informed otherwise in writing, we assume there to be no adverse ground or soil conditions and that the load bearing qualities of the sites of each property are sufficient to support the building constructed or to be constructed thereon.

24. Environmental issues
24.1. Investigations into environmental matters by suitably qualified environmental specialists would usually be commissioned by most responsible purchasers or chargees of higher value properties or where there was any reason to suspect contamination or a potential future liability. Furthermore, such investigation would be pursued to the point at which any inherent risk was identified and quantified before a purchase proceeded. Where we are provided with the conclusive results of such investigations, on which we are instructed to rely, these will be reflected in our Valuations with reference to the source and nature of the enquiries. We would endeavour to point out any obvious indications or occurrences known to us of harmful contamination encountered during the course of our valuation enquiries.

24.2. However, we are not environmental specialists and therefore we do not carry out any scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination or any other environmental searches. If we are not provided with the results of appropriate investigations as outlined above and where there is no obvious indication of harmful contamination, our Valuation will be provided on the assumption that the relevant property is unaffected. Where we are informed that contamination is suspected or confirmed, but adequate investigation has not been carried out and made available to us, then the Valuation will be qualified only by reference to it.

25. Minerals, timber, airspace etc.
Unless specifically agreed otherwise in writing and so stated within the main body of the relevant Valuation, we do not value or attempt to value or take into account any potential income stream or other beneficial or detrimental effect or other factor relating to undiscovered or unquantified mineral deposits, timber, airspace, sub-ground space or any other matter which would not be openly known in the market and considered to have value.

26. Legal advice
26.1. We are appointed to provide valuation opinion(s) in accordance with our professional duties as Appraisers. The scope of our service is limited accordingly. The valuation assumes no responsibility for the validity of legal matters affecting the property. It is not the intent of the valuation to offer a legal opinion of title. Any liens or encumbrances which may now exist have been disregarded. We are not qualified legal practitioners and we do not provide legal advice and any statements made by us, or advice given, in a legal context should be construed accordingly.

26.2. Where appropriate we will liaise with your legal advisors. However, we accept no responsibility for any work carried out by them and we will not be liable for anything contained in legal documentation prepared by them.

26.3. Where we consider it is necessary for the provision of the Valuation and/or specifically agree to do so, and any additional fees we require for this work are agreed, we will read legal documents (including leases, licences etc.), however, (save for any comment concerning the impact of our interpretation of such documents on value) our interpretation of such documents cannot be relied upon to be legally correct. Where we do interpret legal documents, we will, for the purposes of providing our Valuation, assume our interpretation to be correct.

27. Loan security
Where instructed to comment on the suitability of property as a loan security we are only able to comment on any inherent property risk. Determination of the degree and adequacy of capital and income cover for loans is the responsibility of the lender having regard to the terms of the loan.

28. Build cost information
In the provision of valuation services we do not hold ourselves out to have expertise in assessing build costs. Where our instruction requires us to have regard to build cost information, for example in the valuation of properties with development potential, we strongly recommend that you supply us with build cost and other relevant information prepared by a suitably qualified construction cost professional, such as a quantity surveyor. The Valuation will be stated to have been arrived at in reliance upon the build cost information supplied to us by you. In the absence of any build cost information supplied to us, we may have regard to published build cost information. Build costs produced using this approach must be assumed to be unreliable or inaccurate; any reliance which can be placed upon our Valuation in these circumstances is severely restricted. Specialist professional advice on the build costs should be sought by you. If you subsequently obtain specialist build cost advice, we recommend that we are instructed to review our Valuation.

29. Reinstatement assessments
A reinstatement assessment for insurance purposes is a specialist service and we recommend that separate instructions are issued for this specific purpose. If an indication is required as a check against the adequacy of existing cover this should be requested and will be so stated in the body of the relevant Valuation. Any indication given is provided for

guidance only and must not be relied upon as the basis for insurance cover. In any event, our reinstatement assessment should be compared with the owner's and if there is a material difference, then a full reinstatement valuation should be reconsidered.

30. Comparable evidence
Where comparable evidence information is included in our Valuation, this information is often based upon our oral enquiries and its accuracy cannot always be assured, or may be subject to undertakings as to confidentiality. However, such information would only be referred to where we had reason to believe it or where it was in accordance with our expectation. In addition, we have not inspected comparable properties.

31. Valuation bases
Valuations are carried out on a basis appropriate to the purpose for which they are intended and in accordance with the relevant definitions, commentary and assumptions. The basis of valuation will be agreed with you and specified in the Letter and in the relevant Valuation.

Important Notice

If you have any queries relating to this Agreement please let us know as soon as possible, and in any event before signing the Letter and/or giving us instructions to proceed.

Your instructions to proceed, preferably signing on the space provided for under the Letter, will constitute your acceptance to use our services on the terms of the Agreement.

Accordingly, our commencement of work pursuant to your instructions shall constitute acceptance of your offer and as such establish the contract between us on the terms of the Agreement.

Appendix 11 - Schedule of Assets

BUILDING	
Description	**Market Value (PhP)**
Cybergate Naga - As seen during our inspection for the previous valuation done, Cybergate Naga is a five (5) storey, reinforced concrete-framed building with a roof deck. The ground floor is being utilized as lobby. The second is part of the mall, while third to fifth floors are used as offices. Construction was reportedly completed sometime in January 2018. . Construction features include plastered cement finish precast concrete exterior walls; concrete slab roofing with waterproofing membrane; mainly ceramic tiles on concrete flooring at lobbies and hallways, and epoxy paint finish concrete flooring on machine rooms; plastered concrete hollow block partitions; mainly gypsum board ceiling in common areas; and frameless glass main entrance doors. The office units during handover to the tenants reportedly have plain cement finish concrete flooring and electrical lighting facilities. All interior works done on the leased areas were reportedly shouldered by the tenants and were, therefore, excluded in this report. The whole building is presently occupied by Quantrics. It is also provided with building machinery and equipment such as elevators and air conditioning system, among others, described and valued in the succeeding sections of this report. Following instructions from the client, this valuation covers only a portion of the ground and 3rd floor, and 4th and 5th floors. Based on information provided to us by the client, total gross floor area of the subject floors is approximately 6,228.58 sq. m.	180,576,000 ==========
Note: The value indicated is just an allocation as the subject ground (portion), 3rd (portion), 4th and 5th floors cannot technically be separated from the rest of the building.

Instructions	1.1	We refer to our Letter of Engagement dated 21 September 2020 and Amendment dated 01 June 2021, to provide a Valuation Report on the opinion of **Market Value** using Income Approach of that certain Property consisting of <u>leasehold rights on the land, building and machinery & equipment</u> of a site identified as Robinsons Cybergate Tower 2 located along **Pioneer Street, within Robinsons Cybergate Complex, Mandaluyong City, Metro Manila, Philippines**, ("the Property"). A copy of that document is attached herein as Appendix **2**.
	1.2	This valuation has been carried out by Santos Knight Frank, Inc. ("Santos Knight Frank" or "SKF"), in accordance with our General Terms of Business for Valuations ("General Terms of Business"), as attached as Appendix **3**.
Client	1.3	Our client for this instruction is **Robinsons Land Corporation** ("the Client").
Valuation standards	1.4	This valuation has been undertaken in accordance with the International Valuation Standards, as well as other local standards.
Purpose of valuation	1.5	You have confirmed that this valuation is for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
Conflict of interest	1.6	We confirm that we do have a material connection or involvement giving rise to a potential conflict of interest, as set out below: We have conducted the valuation of the same Property for you as of 30 September 2020 for purposes of: i) the tax-free exchange of assets to a REIT Company, and (ii) for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
	1.7	You have confirmed this Engagement notwithstanding this matter, you are content for us to proceed with this instruction. We are providing an objective and unbiased valuation.
	1.8	We are acting as external and independent valuers in this engagement.
Responsibility to third parties	1.9	Our valuation report is only for the use of our Client and for the purpose for which it is stated herein and no liability is accepted to any third party for the whole or any part of its contents.
Disclosure & publication	1.10	Except for the purpose which it is stated herein, neither the whole nor any part of this valuation nor any reference thereto may be included in any published

document, circular or statement nor published in any way without our prior written approval of the form or context in which it may appear.

Limitations on liability	1.11	No claim arising out of or in connection with this valuation report may be brought against any member, employee, partner, director or consultant of Santos Knight Frank, Inc. Those individuals will not have a personal duty of care to any party and any claim for losses must be brought against Santos Knight Frank, Inc.
	1.12	Santos Knight Frank, Inc.'s total liability for any direct loss or damage caused by negligence or breach of contract in relation to this instruction and valuation report is limited to the amount of the level of our fee, specified in the Letter of Engagement, a copy of which is attached as Appendix **2**. We do not accept liability for any indirect or consequential loss (such as loss of profits).
	1.13	The above provisions shall not exclude or limit our liability in respect of fraud or for death or personal injury caused by our negligence or for any other liability to the extent that such liability may not be excluded or limited as a matter of law.
Expertise	1.14	The valuation process was performed by **Raymond F. Dechavez** and **Martin John L. Encomienda**, under the supervision of **Jacqueline T. Guerta** and **Jesus Constance M. Castro**, both licensed Real Estate Appraisers. The Principal Signatory on behalf of Santos Knight Frank, Inc. and who also reviewed the Valuation Report, is **Wenceslao D. Fuentes, Jr.,** also a licensed Real Estate Appraiser. We confirm that the above-named Licensed Real Estate Appraisers are registered with the Professional Regulation Commission ("the PRC"), having sufficient current knowledge of the particular market and the skills and understanding to undertake the valuation competently.
Vetting	1.15	This report has been vetted as part of Knight Frank global standards.

Scope of enquiries & investigations

Inspection	1.16	In accordance with your instructions, due to the limited timeframe to complete the Engagement, we have not conducted a current inspection. The Property has been previously inspected. Valuation rendered is a result of a revaluation of a property that has previously been inspected.
	1.17	The Client has provided us with information regarding the changes to the physical attributes and/or characteristics of the Property; current or anticipated changes in rental income from the Property; and material changes to the non-physical attributes of each property, such as other lease terms, planning consents, statutory notices and other relevant information which have occurred between the valuation date and the date of our previous valuation. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.
Investigations	1.18	The extent of enquiries/investigations made is set out in our General Terms of Business. In carrying out this instruction, we have undertaken verbal / internet-

based enquiries referred to in the relevant sections of this report. We have relied upon this information as being accurate and complete.

Information provided

1.19 In this report, we have been provided with information/documents by the Client for the previous valuation done as well as for the current engagement. We have relied upon this information as being materially correct in all aspects. In particular, we detail the following:

- floor plans
- gross floor area tabulation
- site development plan
- lot area allocation
- rent roll
- financial statements
- projections
- historical and current occupancy

1.20 In cases where we were not provided with documents or information, we did our own enquiries as outlined and stated in the report. Any assumptions in lieu of the lack of information is also set out in the relevant sections of this report.

Valuation basis

1.21 In accordance with your instructions, we have provided an opinion of value on the basis of **Market Value**.

Market Value (MV)

1.22 Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as “the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm’s-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion.”

In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property.

It is further assumed that title to the Property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable.

The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.

Valuation date

1.23 The valuation date is **30 June 2021.**

2 The Property

Location

Address 2.1 The Property, identified as the site of **Robinsons Cybergate Tower 2**, is an office building located on the southwest side of Pioneer Street, between Forum Robinsons Mall and One Gateway Place, within Robinsons Cybergate Complex, Barangay Barangka Ilaya, Mandaluyong City, Metro Manila.

The site is situated about 200 meters southeast from MRT Boni Station and approximately 1.1 kilometers south from Greenfield District Pavilion Mall. In addition, it is about 1.7 kilometers southwest from SM Megamall and approximately 4.0 kilometers northeast from Makati's Central Business District.

Below is a satellite image courtesy of Google Maps showing the Property and its relation to the immediate vicinity.

Note: Image courtesy of Google Maps.

2.2 The street plan below shows the location of the Property.

Neighborhood 2.3 The site forms part of Robinsons Cybergate Complex (RCC), a mixed-use development situated at the corner of EDSA and Pioneer Street. It boasts three (3) office towers, residential condominiums, a hotel and a retail mall. Meanwhile, other nearby developments include: Pioneer Woodlands Condominium, Pioneer Highlands, Globe Telecom Plaza and Light Residences by SMDC.

Accessibility 2.4 The Property is accessible thru the fronting Pioneer Street which in turn connects to the nearby EDSA, a major thoroughfare which provides access to various section of metropolis.

Public transportation such as buses and taxicabs are mainly available throughout the day along the nearby EDSA. MRT Line also runs along EDSA, a mass transport system linking the area to/from the business districts of Makati, Ortigas and Araneta Center.

Land Details

Lot Area Allocation 2.5 Based on information provided to us by the Client, the land area allocated for Robinsons Cybergate Tower 2 is approximately **2,570 square meters**.

Improvements and Machinery & Equipment

Improvements and Machinery & Equipment 2.6 The land is presently improved with an office building identified as Robinsons Cybergate Tower 2, a twenty-seven (27)-storey, PEZA-registered, Grade A office building, construction of which was completed sometime in June 2007. Also covered by the valuation are the appurtenant Machinery & Equipment.

Draft Contract of Lease

2.7 We were provided by the Client a copy of a Draft Contract of Lease with ROBINSONS LAND CORPORATION, as the Lessor, and RL COMMERCIAL REIT, INC. (formerly Robinsons Realty and Management Corporation) [1], as the Lessee.

Based on the same document, the lease contract stated that it will cover Robinsons Cybergate Tower 2 with a gross floor area of 45,105.25 sq.m., reprotedly excluding parking area. Lease term would be for a period of 98 years. It likewise specified that the monthly lease payments would be 7% of the monthly rental income gained from Robinsons Cybergate Tower 2 (plus VAT, as appliable).

2.8 The management of RLC disclosed that actual lease commencement shall be the date of the Certificate of Approval of the Increase in Authorized Capital Stock of RCR issued by the SEC. However, for valuation purposes, lease commencement shall be assumed on October 1, 2021.

In the absence of a signed contract, we used the foregoing details to establish the leasehold value of the Property.

Tenure

2.9 For purposes of this engagement, ownership rights to the Property is treated as **leasehold.**

Accommodation

Measurement

2.10 Based on the gross floor area tabulation provided to us by the Client, the building has a total gross floor area of approximately **56,116.35 sq. m.**

2.11 The Gross Floor Area (GFA) is tabulated as follows:

Floor	GFA (sq. m.)
GF	1,604.04
UGF	1,300.87
2F	2,456.53
3F	2,570.29
4F	2,570.29

Condition

Scope of Inspection

2.12 As stated earlier, we have previously inspected the Property.

2.13 As stated in the General Terms of Business, during our previous inspection, we have not undertaken a building or site survey of the Property, as it is beyond the normal scope of appraisal.

2.14 Unless otherwise stated, we have not been able to carry detailed on-site measurement to verify the site and gross floor areas of the Property and we have no reason to doubt the truthfulness of the areas shown on the documents provided to us.

2.15 Moreover, due to the nature of the machinery, we have not carried out mechanical inspection, and our assessment was based on the premise that the machinery is in a condition commensurate with age and normal usage.

2.16 Building Machinery & Equipment as covered by the valuation are as complete units i.e., machinery and/or equipment are meant to include all parts and accessories normally comprising the unit.

Comments

2.17 Apart from the matters specifically referred to below, we have assumed that the Property is in sound order and free from structural faults, rot, infestation or other defects, and that the services are in a satisfactory condition.

2.18 The buildings and structures, including the machinery & equipment, were assumed to be in a generally good condition commensurate with their age and use. It was also assumed that there are no urgent or significant defects or items of disrepair which would be likely to give rise to substantial expenditure in the foreseeable future or which fall outside the scope of the normal annual maintenance programme.

Ground conditions

2.19 We have not been provided with a copy of a ground condition report for the site. We have assumed that there is no adverse ground or soil conditions and that the load bearing qualities of the site are sufficient to support the building.

Services

2.20 It would appear from our previous inspection that main supplies of electricity and water are provided to the Property. Telephone communication facilities are likewise available. Sewer and drainage are believed to be discharged to the building's sewerage system.

Tenancies

Tenancy Information

2.21 We have been provided with copy of some of the rent roll including some of the lease contracts by the Client and have relied on that information as being correct. No additional verification has been undertaken.

2.22 A summary of the Property tenancies is presented below.

TENANT	LEASED AREA (GROSS, in sq.m.)	Lease Contract	
		Start	End
Tenant 1	88.46	21-Apr-12	20-Apr-22

	2,009.54	03-Mar-07	31-May-25
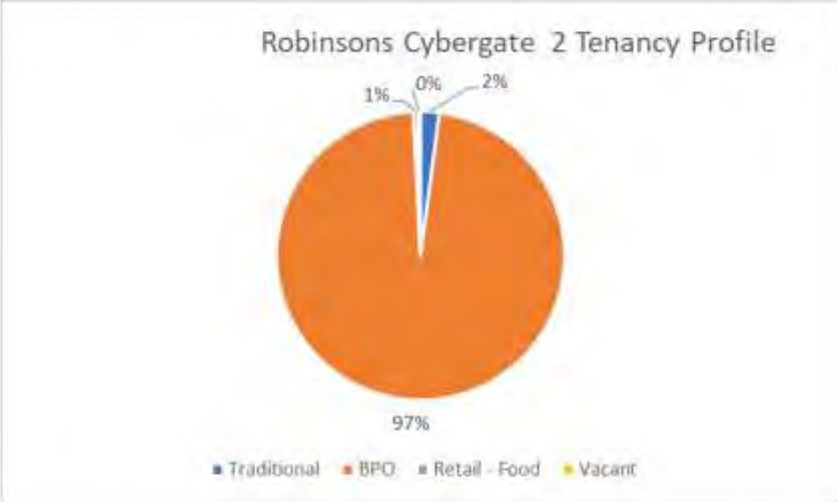
Tenant 4	919.54	01-Apr-21	31-Mar-26

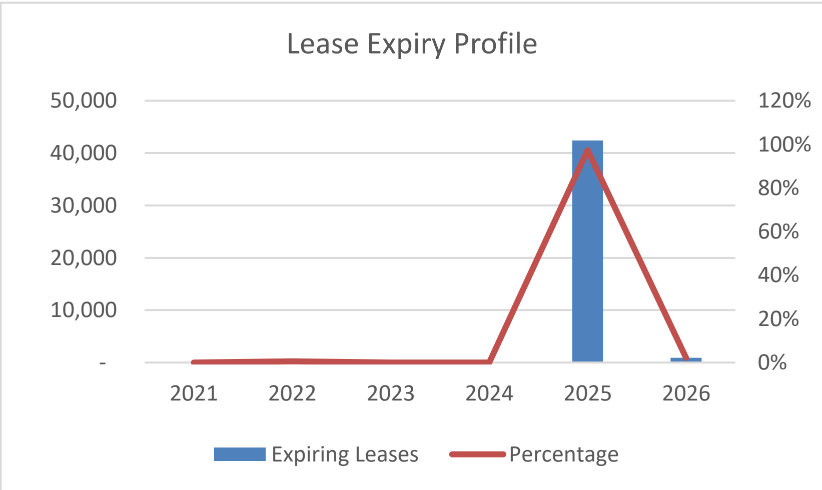
2.23 Based on the rent roll provided, total leasable area is **43,671.70** sq.m. with **245** parking slots available for lease.

2.24 The Property currently has a mix of traditional office, Business Process Outsourcing (BPO), and some retail tenants. Based on the figure below which summarizes the tenancy profile of the Property, BPOs currently take up 97% of the Property's leasable area followed by traditional office at 2%.



Source: RLC/ SKF

2.25 As of 30 June 2021, the Property is 99.8% occupied with a Weighted Average Lease Expiry (WALE) of 3.92 years. Earliest period with an expiring lease is 2022 with 1% of total leased area, followed by 2025 with 97% of the total leased area with expiring leases. In 2026, 2% of the leased area will be expiring.



Source: RLC/ SKF

2.26 Below are some of the provisions as stated in the Lease Contract.

a. **Care of the Leased Premises**

The LESSEE shall at its expense, maintain the Leased Premises in a clean and sanitary condition, free from noxious odors, disturbing noises or other nuisances and, upon the expiration of the lease, shall return the premises and fixtures in as good condition as that in which they were actually found at the beginning of the lease, ordinary wear and tear excepted. The LESSEE shall not drive nails, screws, hooks or other abutments on or into the wall's frames or other portions of the premises or in any manner deface or damage any part thereof. Any damage caused by the LESSEE may be repaired by the LESSOR for the account of the LESSEE. The LESSOR shall have the right to require the LESSEE to remove any display or promotional matter, or any displayed merchandise which LESSOR reasonably and in good faith considers to be improper or inappropriate for the general appearance or presentation of the premises.

The LESSOR shall be responsible for major repairs which are limited to those which affect the structure of the Leased Premises or the building. The LESSEE shall allow access to the LESSOR on the Leased Premises for purposes of repair or remodelling or such other works as may be necessary for the preservation, conservation, improvement or decoration of the building or any part thereof. No compensation or claims shall be allowed against the LESSOR by reason of any inconvenience or annoyance to the LESSEE that may arise by reason thereof.

The LESSEE shall promptly repair, at its own expense, any damage to the Leased Premises or any other improvements within the building caused by bringing into the Leased Premises of any property for the LESSEE's use, or by the installation or removal of such property, regardless of who is at fault or who caused such damage. unless such was clearly caused by the LESSOR, or its agents or employees. In default of such repairs by the LESSEE, the LESSOR may affect the repairs and the LESSEE agrees to promptly pay the LESSOR the cost of such repairs. The LESSEE shall be responsible for the maintenance and repair of the Leased Premises including plumbing and electrical fixtures within the premises or those serving the same.

The LESSEE must notify the LESSOR immediately of any damage to the Leased Premises, their appurtenances as well as any occupation, usurpation or untoward act being committed, or threatened to be committed, within the Leased Premises.

No machinery, furniture, effect, equipment and other properties found within the Leased Premises, whether or not owned by the LESSEE, may be brought into or out of the building without the prior written approval of the LESSOR. Furthermore, in case the LESSEE has any outstanding/unsettled rent, dues or other charges, the LESSOR reserves the right to withhold approval of any request for bringing in or out of any machinery, furniture, effects or other properties found within Leased Premises, whether or not owned by the LESSEE, until such outstanding amounts have been duly settled by the LESSEE. This is without prejudice to such other rights and remedies available to the LESSOR under

prevailing laws or the Contract. including these General Terms and Conditions.

The immediately preceding paragraph shall also apply in the event of transfer of machinery, furniture, effects or other properties found within the Leased Premises from one unit to another unit in the building being leased by the LESSEE whether or not the latter unit is owned by the LESSOR. In the event that the unit where the properties to be transferred is not owned by the LESSOR, the written consent of the unit owner shall also be required.

The LESSEE shall further maintain the Leased Premises in a clean condition by utilizing plastic bags for the disposal of both dry and wet garbage. Unless garbage is contained in plastic bags, it will not be allowed to be deposited in the authorized depository for collections.

b. **Sublease, Transfer of Rights**

The LESSEE shall not assign or transfer its rights in the Contract nor sublease or sublet all or any part of the Leased Premises, without the prior written consent of the LESSOR and no rights, title or interest thereto or therein shall be conferred on or vested to anyone other than the LESSEE without such prior written consent. Otherwise, subleasing the leased Premises without the prior written consent of the LESSOR shall be deemed a breach of the contract by the LESSEE and shall be subject to the rights and remedies available to the LESSOR under prevailing laws and Contract, including these General Terms and Conditions. In the event of sublease with or without the prior written consent of the LESSOR, the LESSEE shall remain principally liable. However, the LESSOR shall have the right to exercise such remedies embodied in the Contract, the General Terms and Conditions and under prevailing laws, as against the sublessee in order to protect its right and interests.

Only the LESSEE has the right to use the Leased Premises as its official address to be registered with any government entities for the issuance of necessary permits and licenses for its business operations.

Should the LESSOR give the LESSEE its consent to sublease the Leased Premises, the LESSEE cannot sublease the Leased Premises for the period longer that the Contract of Lease between the LESSOR and the LESSEE.

It is expressly understood that the LESSEE has no goodwill or patronage rights over the Leased Premises; that such rights belong exclusively to the LESSOR, being the owner of the Leased Premises, which forms part of the building; and that the LESSEE may not sell or dispose of said goodwill or patronage rights to any person.

c. **Assignment of Rights/Mortgage/Encumbrance**

The LESSOR reserves the right to assign and convey or mortgage or otherwise encumber its rights to this lease in favor of any affiliate or subsidiary or to any party. In the event of any assignment, conveyance, mortgage, or encumbrance of the Leased Premises, the LESSOR binds itself to require the assignee or mortgage or beneficiary of the encumbrance to respect and abide by all the terms and conditions of the Contract, as well as these General Terms and Conditions.

Roadways and Access

Roadways

2.27 Pioneer Street is mainly 15 meters wide, concrete paved and provided curbs and gutter, cemented sidewalks and underground drainage system.

2.28 Our informal enquiries with the City Assessor's Office - Tax Mapping Division confirmed that the Property enjoys frontage along Pioneer Street.

Access

2.29 In reporting our opinion of value, we have assumed that there are no third-party interests between the boundary of the Property and the abutting roads and that accordingly the Property has unfettered vehicular and pedestrian access.

Environmental Considerations

Flooding

2.30 From our enquiries with the City Planning Office, we have ascertained that the Property is not within an indicative floodplain and that there is therefore a minimal risk of flooding.

Contamination

2.31 As stated in the General Terms of Business, investigations into environmental matters would usually be commissioned from suitably qualified environmental specialists. Santos Knight Frank, Inc. is not qualified to undertake scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination.

2.32 Subject to the above, while carrying out our valuation inspection, we have not been made aware of any uses conducted at the Property that would give cause for concern as to possible environmental contamination. Our valuation is provided on the assumption that the Property is unaffected.

Highest and Best Use

2.33 "*Highest and Best Use*" is defined as the most profitable likely use to which a property can be put. The opinion of such use may be based on the highest and most profitable continuous use to which the Property is adapted and needed, or that use of land which may reasonably be expected to produce the greatest net return to land over a given period of time. Alternatively, it is that use, from among reasonably probable and legal alternative uses, found to be physically possible,

appropriately supported, financially feasible, and which results in highest land value.

2.34 Considering the Property's size, shape, topography, current zoning classification and the prevailing land uses and development in the area, we are of the opinion that the **existing commercial development** would represent the highest and best use of the Property.

3 Market Analysis

Philippine Market Commentary

3.1 Shown below is SKF's latest **Metro Manila Office Market Update**.

Source of Information

3.2 Our market analysis has been undertaken using market knowledge within Santos Knight Frank, Inc., enquiries of other agents, searches of Property databases, as appropriate and any information provided to us.

OFFICE RENT ROLLBACKS CUSHION INCREASING VACANCIES

General Overview

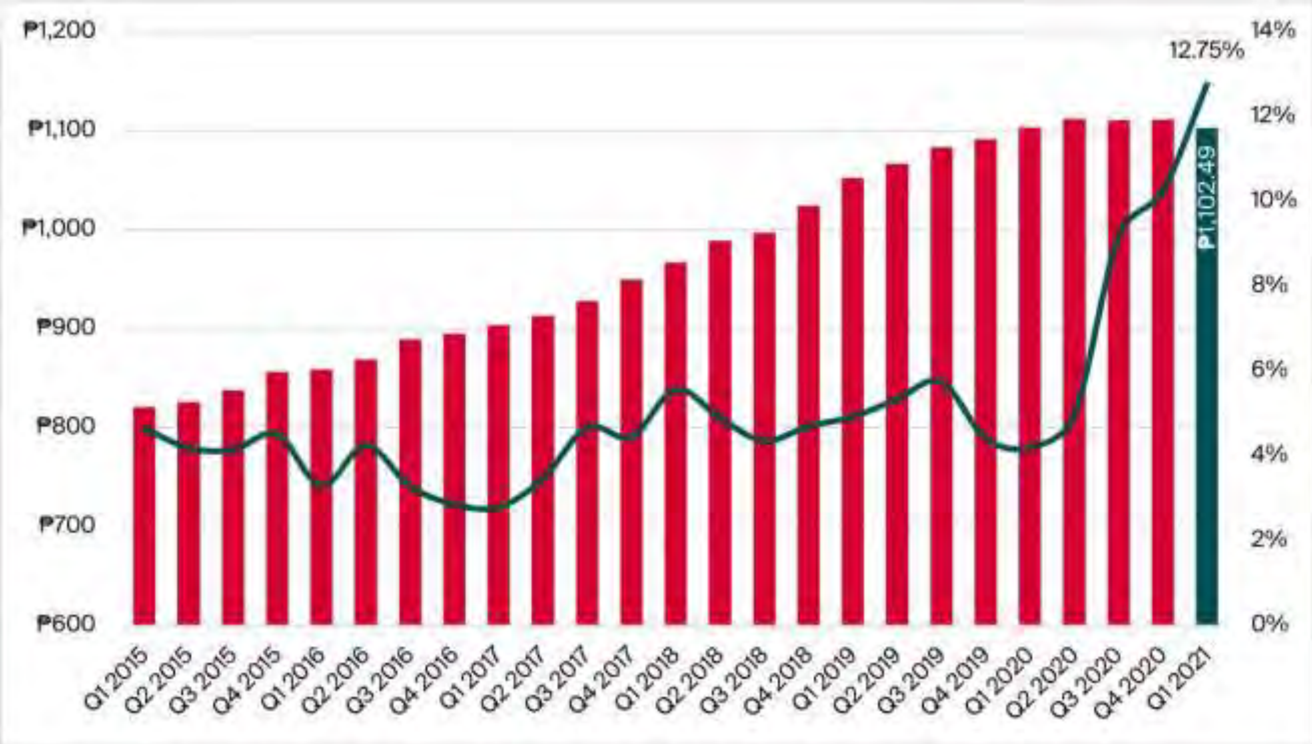
The Metro Manila office market displayed modest market movement at the start of 2021 owing to the sluggish demand driven by the market uncertainties caused by changing lockdown scenarios in Metro Manila. Landlords were challenged to remain relevant as potential occupiers continued to take a cautious approach caused by the growing COVID-19 cases and slow vaccine roll-outs.

Still, new office spaces were introduced during the quarter as developers capitalized on the relaxed quarantine measures to resume their halted construction activities. The local office market supply grew by 163,136 sqm of Grade A office space that mostly catered to IT-BPO companies. Several buildings were completed in Fort Bonifacio, Bay Area, and Quezon City, resulting in an overall office supply in Metro Manila of about 6.9 million sqm.

Consequently, supply growth resulted in an increase in vacancies throughout the metropolis. Office vacancy rates in Metro Manila further spiked to 12.75%, the highest since 2009. Current and potential occupiers remained vigilant towards the health situation of the country. Numerous companies continued to implement Work-From-Home and skeletal workforce arrangements. Office take-up contracted by 28,696 sqm as locators reassessed their need for spaces amid their bid to reduce operational costs.

Monthly average lease rates in Metro Manila further dipped to PHP 1,102.49 per sqm, declining by 0.78% quarter-on-quarter (q-o-q) and 0.07% year-on-year (y-o-y). The downward trend of rents was caused by the landlords' bid to provide more competitive packages to appeal to prospective tenants.

Figure 1. Metro Manila Historical Lease & Vacancy Rates



Source: Santos Knight Frank Research

Makati

The adverse effects of the pandemic and the prolonged lockdowns remained evident in the most prominent business district in the country. Vacancy rates spiked to 11.17%, considered to be the highest in the past ten years. Moreover, the expensive rents in Makati CBD were detrimental to the retention of office occupiers. Locators looking to minimize their expenses opted to discontinue their lease, resulting in about 25,557 sqm of office space vacated during the quarter.

Sluggish leasing activity persisted in the area as existing and upcoming locators in Makati were less willing to take up spaces due to the financial distress brought about by the global pandemic. The average monthly rents recorded in Makati went down to PHP 1,348.19 per sqm, contracting by 0.93% q-o-q and 6.05% y-o-y. Despite this, rates in Makati remained the highest in the metropolis.

Several property players are still looking forward to the materialization of their projects in the pipeline. More than 447,552 sqm of Prime and Grade A office supply are anticipated to come online in the next three years, with approximately 164,000 sqm being operational by the end of 2021. The massive influx of upcoming office developments in Makati comes from the backlogs and spillovers from 2019 up to the latter part of 2020.

Taguig

Slow demand in Taguig was also evident as vacancy levels continuously increased to 8.37% from 7.74% in Q4 2020. Despite having the largest supply share in Metro Manila of more than 2 million sqm, the downsized space requirements were seen as the factor in the rising vacancies as locators looked to lessen their operational cost. Moreover, average monthly rental rates in Fort Bonifacio also went down to PHP 1,289.75, translating to a contraction of 0.89% q-o-q.

The ease in quarantine measures allowed private and public projects to resume construction. Office supply in Fort Bonifacio further grew by 28,000 sqm through the completion of BGC Corporate Center 2. Despite the growing vacancy levels, potential developers still have bright prospects in Taguig as it was seen as the youngest but fastest growing business district in Metro Manila. In line with this, upcoming office supply is seen to be augmented by about 864,100 sqm of office space within the next five years. About 344,000 sqm of this will be coming from Arca South which is poised to become a new business district in the south.

Bay Area

The POGO industry exodus has significantly contributed to the spiking vacancy levels in the Bay Area during Q1 2021, recorded at 12.82%. Slower demand from the sector is seen in the coming periods as more firms have started to postpone their lease contracts. This occurrence implied challenges in the recently fast-moving office market of the Bay Area.

The upsurge in vacancy was also attributed to the completion of Four E-com during the quarter with an additional 89,132 sqm of Grade A office space. Priced above its competitors, this building has helped in pushing the average rents in the area to PHP 1,083.41 per sqm, increasing by 1.66% q-o-q.

The Bay Area is still foreseeing a huge amount of upcoming office supply in the coming years. Developers still recognize the opportunity to invest in the area due to its accessibility and availability of developable land. Approximately, 578,800 sqm of office developments are anticipated to be introduced in the market for the next five years, while 258,000 sqm are expected to become operational by the end of 2021.

Ortigas Center

Vacancy levels in Ortigas Center gradually eased to 12.75% in contrast to 12.88% of the preceding quarter. Despite this, pre-terminated contracts and non-renewals were still observed, as most of the companies are still on a wait-and-see approach towards the office market. Meanwhile, the slow-moving leasing transaction was also felt in the district as the rental rates went down to PHP 806.29 per sqm, contracting by 1.15% q-o-q and still considered the lowest as compared to other major CBDs in the metropolis.

Moreover, the upcoming office supply in Ortigas Center remained high as more than 671,000 sqm of Prime and Grade A office spaces are slated to introduce in the next five years. In addition, the massive influx of 373,000 sqm of space is scheduled to commence their operations within the year such as Cyber Omega, SM Mega Tower, and Jollibee Tower. This includes the spillover from 2019 up to the remaining quarters of 2020 that has been halted due to subsequent lockdowns.

Quezon City

Vacancy rates in Quezon City spiked up to 20.64% as opposed to 16.21% of the preceding quarter, indicating the highest level across all of Metro Manila. Approximately 13,690 sqm of office spaces were freed up in the city during the quarter. Occupiers in the area were more sensitive to the health crisis as compared to locators in other districts The lack of recognized established business districts and limited connectivity of certain townships contributed to the slow demand in the area. Furthermore, the upsurge in vacancy levels was also driven by the opening of SM North Towers 1 and 2 that added more than 45,200 sqm in the massive office supply in Quezon City, and are yet to lease out the majority of their spaces.

Office landlords are trying to alleviate this downtrend and are still vying to mitigate lease terminations. To this end, average headline rates contracted to PHP 925.55 per sqm, translating to a 1.81% decline from the preceding quarter.

Albeit the fast-growing vacancy levels, Quezon City is still expecting a large office supply boost in the coming years. Approximately, 333,700 sqm is anticipated to be introduced in the market in the next five years, in which more than 149,000 sqm will be coming from SM Prime Holdings.

Alabang

Similarly, Alabang CBD experienced rising vacancy levels in Q1 2021 at 16.07% from 14.53% in the preceding quarter. As a result, increased pressures on office landlords in the district were felt as they remain responsive to the slow movement in the office market. This caused rental rates to gradually contract to PHP 846.76 per sqm.

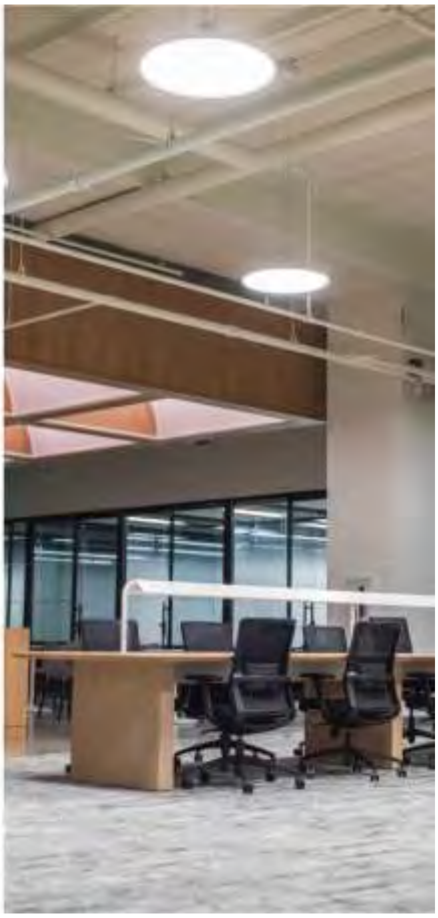
Alabang still holds on to the possibility of becoming one of the major investment hubs in the metropolis due to its vast developable land. Approximately 209,900 sqm of upcoming Grade A office space is anticipated to be operational in the next five years, while 13,800 sqm is slated to become operational by 2021.

Figure 2. Metro Manila Lease & Vacancy Rates per CBD

Source: Santos Knight Frank Research

Office Outlook

The easing quarantine measures that started in the second half of 2020 allowed the developers to restart their impeded construction activities. Developers remain bullish in expanding their office footprint in Metro Manila with more than 3 million sqm of office space are slated to operate in the next five years. The nation's economic center is also set to have an additional supply of 1.1 million sqm of Prime and Grade A office space by the end of 2021. This massive influx still stems from the construction backlogs from the developers in 2020.



The robust expansion of office supply in Metro Manila is seen to further propel the vacancy rates in the local office market in the coming quarters. Along with the stagnant office demand, downward pressure on office rents still expected. Office landlords will be forced to implement more flexible payment terms to existing and potential tenants to market their spaces and continue cash flow from their buildings.

The recovery of the office market is also dependent on the pace of vaccine roll-outs in the country. The slow pace in inoculations is seen to weigh down on the recovery of the market. Attaining herd immunity as soon as possible can reinvigorate the interest in the office market.

In the medium- to long-term Green Buildings are seen to gain a competitive edge compared to ordinary office buildings. Buildings accredited by the US Green Building Council (LEED) and the Philippine Green Building Council (BERDE) will be more sought-after for potential office locators. The efficient design that provides better air circulation, ventilation and filtration, and increased open space, will be more appealing to the market as it puts a premium on the health and well-being of its tenants.

4 Valuation

Methodology

Valuation Rationale

4.1 The purpose of this appraisal is to estimate the Market Value of the Property. In any given valuation exercise, market value can be arrived at using either one or a combination of the three (3) approaches to value, namely: Market (or Direct Sales Comparison) Approach, Income Approach, and the Cost Approach. The determination of the appropriate approach for a given property is based on the quality and quantity of data available, particularly its relevance to the Property under appraisement. If more than one valuation approach is utilized, the resulting values are reconciled to produce a final value conclusion.

4.2 For purposes of this appraisal, since coverage is leasehold rights only, the Income Approach to value is deemed the most appropriate to use.

4.3 Based on the foregoing, we are to render our opinion on the following:

a) Leasehold Value of the Property
b) Market Value of the Property Using Income Approach

4.4 **Leasehold Value of the Property**

As mentioned, the Property subject of this appraisal is covered by a Lease Contract. In estimating the value of the Property covered by a lease, two interests are involved: the interest of the lessee which is the leasehold; and the interest of the lessor which is the leased fee or the lessor's interest. The client being the lessee, the purpose of this appraisal is to establish the leasehold value of the subject Property.

Leasehold Value is the present (discounted) worth of the rent savings (or rental gains) when the contract rent at the time of the appraisal is less than the current market rent. It is estimated by computing the present worth of the rental gains over the remaining term of the lease agreement using an appropriate discount rate.

The valuation process, briefly stated, consists of the following:

- Estimation of the current market rent of the leased Property;
- Estimation of the rental gains over the remaining term of the lease agreement, if any. Rental gains projection is pegged at 10 years while the 11^{th} year rental gain is used to estimate the terminal value of the Leasehold Rights on the Property;
- Estimation of an appropriate discount rate and terminal capitalization rate; and
- Discounting process based on an appropriate discount rate to arrive at an indicated leasehold value.

Market Rent of the Property

4.5 As mentioned earlier, this report renders an estimate of the Market Rent of the Property if it were to be leased out in accordance with its highest and best use.

The amount of annual or monthly rental, which the Property should command might be estimated by any, or a combination of the following:

1. By Market (Comparison) Approach, in which rentals of similar properties are used a benchmark; and
2. By Income Approach, in which the value of the Property is first established, and the proper capitalization rate is applied to obtain its rental value.

On the other hand, Market Rent is defined under IVS 2019 as "the estimated amount for which an interest in real Property should be leased on the valuation date between a willing lessor and a willing lessee on appropriate lease terms in an arm's length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

It is the rental income that the Property would most likely command in an open market. It is also defined as being the amount at which a willing lessee would pay and a willing Lessor would receive for the use of certain Property, neither being under compulsion to transact, and both having reasonable knowledge of all relevant facts.

Market Approach

4.6 We have made a survey of existing leases of similar properties in the vicinity of the Property and found scarcity of rental data that may be used for direct comparison purposes.

Income Approach

4.7 In the absence of any comparable rental data, we have estimated the **Market Rent** of the Property by a variation of the Income Approach on the basis of what prudent real estate investors or Property owners would be warranted in leasing it in order to realize a fair return on their investment or property, for that matter. Under this approach, the market value of the Property is first established, and the proper capitalization rate is applied to obtain its rental value.

Market Value of the Land

4.8 In valuing the land, we made use of the Market Approach which is the most common technique for valuing land, and is the most preferred method when comparable sales are available. With this method, sales of similar Property or parcels of land are analysed, compared, and adjusted to provide a value indication for the Property being appraised. The comparison process is based on an analysis of the similarity or dissimilarity of the comparables.

4.9 The appraiser gathers data on actual sales as well as listings and identifies the similarities and differences in the data; ranks the data according to their relevance; adjusts the prices of the comparables to account for the dissimilarities with the land being appraised; and forms a conclusion as to the most reasonable and probable market value of the subject Property.

4.10 The elements of comparison include Property rights, financing terms, conditions of sale (motivation), market conditions (sale date), location, physical characteristics, available utilities, and zoning. The most variable elements of comparison are the site's physical characteristics, which include its size and shape, frontage, topography, location, and view. The units of comparison applied may be hectares or sq.m., or any other unit used in the market.

Evidence of comparable properties

4.11 **Analysis of Comparable Properties Offered for Sale**

In the course of our investigation, we looked at current market listings of comparable properties in the area. The comparable properties selected share the same or similar characteristics as the subject. Whatever information or data we came up with was then analysed, and comparison made for such factors as size, characteristics of the lot, location, quality, and prospective use. In the Philippines however, Property transactions are not officially disclosed, and quite often, actual transaction price is masked by other undisclosed arrangements and different from the figure shown on the sale and purchase agreement. We have therefore made reference to the following data, made our market judgment, and adjusted for the above-mentioned factors:

1. A commercial lot with an area of 864 sq.m. located along EDSA extending to Sierra Madre Street, beside Richville Hotel, within Barangay Highway Hills, Mandaluyong City, is currently offered for sale at an asking price of PhP275,000,000 or about PhP318,287 per sq.m.
   Source: Avelina Panes-Acuna – 0917.249.5588

2. A commercial lot with an area of 2,306 sq.m. located along Shaw Boulevard, within Barangay Bagong Silang, Mandaluyong City, is currently offered for sale at an asking price of PhP853,220,000 or about PhP370,000 per sq.m.
   Source: Kenneth Endaya – 0936.110.9325

3. A commercial lot with an area of 300 sq.m. located along Shaw Boulevard, within Barangay Kapitolyo, Pasig City, is currently offered for sale at an asking price of PhP75,000,000 or about PhP250,000 per sq.m.
   Source: Joanna Aggusi – 0936.951.0219

Summary of Adjustments

The Data Comparison Grid shown on Appendix **8** shows a summary of the aforementioned adjustments, which provides an indication as to the degree of adjustment made to the different elements in comparison. A numeric indicator indicates the level of adjustments, in terms of percentage when compared with the subject Property. The use of (-) indicates a negative adjustment and a + indicates a positive adjustment. A downward adjustment (-) used is made to reflect superior characteristics of the comparable sale/listing, while an upward adjustment + reflects inferior characteristics of the comparable sale/listing. Finally, a 0 is used to confirm similarity between the comparable sales/listings and the subject or is used when market information is unavailable or does not support an adjustment for any particular element of comparison.

Value of the Land

4.12 As reflected in the said Comparison Grid, the value of the land is estimated at **PhP218,000 per sq.m.**, or a total of, say, **PhP560,000,000** for a land area of **2,570 sq.m.**

Market Value of the Improvements

4.13 The estimate of the improvements can be either replacement or reproduction cost, new. Replacement Cost, New is defined as "The cost of construction, at current prices, of a building having utility equivalent to the building being appraised but built with modern materials and according to current standards, design, and layout." On the other hand, Reproduction Cost, New is defined as "The cost of construction, at current prices, of an exact duplicate, or replica, using the same materials, construction standards, design, layout, and quality of workmanship, and embodying all the deficiencies, super-adequacies, and obsolescence of the subject building."

In estimating the Replacement Cost of the buildings and improvements, we have made reference to the building cost index or other building cost as available in the market or published by a reputable quantity surveyor firm. We have likewise referred to our own database of building construction costs. We do not hold ourselves to be construction cost advisers and a formal estimate can only be given by a specialist construction cost consultant. It is recommended that a professional quantity surveyor or a firm of professional quantity surveyors should be consulted in order to assess an accurate building/improvement replacement cost.

In arriving at our assessment using the Cost Approach for the Equipment, we first developed the Replacement Cost, New (“RCN”) of the asset. In developing our RCN, we have obtained current cost information from equipment dealers in the region. We relied on data furnished by equipment manufacturers, dealers and importers, as well as information contained in price catalogues, other published materials including the Internet and inquiries from local suppliers.

RCN is the estimated amount of money needed to acquire a similar new item having the nearest equivalent utility as the Property being valued taking into consideration current prices of materials and manufactured equipment, shipping and handling, labour, contractor's overhead, design and supervision, profit and fees, and other attendant costs associated with its acquisition and installation, but without provision for overtime or bonuses for labour and premium for materials.

Having developed the RCN, we then deducted for the various elements of depreciation to arrive at the Depreciated Replacement Cost (“DRC”). DRC includes depreciation allowance or loss of value arising from condition, utility, age, wear and tear, and obsolescence present (physical, functional or economic), taking into consideration past and present maintenance policy and rebuilding history.

General

Where elements are of foreign origin, the assessment process give full consideration to all expenditures normally incurred in importation such as packing and crating charges, inland and ocean freight, insurance, duties and taxes, bank charges and commissions, wharfage, brokerage and handling.

In estimating the depreciation of the assets, we have utilized the age-life method tempered with our observed condition of the assets.

Value of the Improvements and Equipment

4.14 Based on the foregoing, the value of the improvements and equipment may be summarized as under:

		Market Value
Cybergate Tower 2 Building		PhP1,049,500,000
Building Machinery & Equipment		240,831,000

	Total	**PhP1,290,331,000**

Rate of Return

4.15 The value of the Property having been established, its rental value may now be estimated considering the prevailing rate of return prudent investors or Property owners would expect in leases, normally in the range of 4% to 7%. We based this range of rate of return from interviews with property owners and brokers, as well as our analysis of the relationship between prevailing capital values and rental rates and it is believed to be the current yield in the commercial lease market.

Considering the most recent pandemic and the effect it had on the economy and the leasing market, we have not adopted the average rate of return, and have instead adopted a conservative interest rate (return on investment) of 4% on both the land and the improvements. We then added a recapture rate (return of investment) for the improvements. The Recapture Rate takes into consideration the remaining economic life of the improvements or the estimated number of years the investor (or owner) needs to recoup the cost of its investment before the improvements outlive its usefulness.

In light of the foregoing, our estimate of the Market Rent of the Property is as follows:

	Area	Market Value	Annual Rate of Return	MARKET RENT	
				Annually	**Monthly**
Land	2,570.00	560,000,000	4.00%	**22,400,000**	**1,866,667**
Improvements and Equipment	56,116.35	1,290,331,000	7.77%	**100,305,000**	**8,358,750**
				-------------------	-------------------
				122,705,000	**10,225,417**
				==========	=========

Market Rent of the Property

4.16 On the basis of the foregoing, the Market Rent of the Property is estimated at **PhP10,225,417 per month**, or say, **PhP122,705,000 per annum.**

Rental Gain

4.17 Rental Gain is reckoned as the difference between the Market Rent and the Contract Rent.

Discount Rate

4.18 The discount rate was computed using the build-up method. The discount rate is calculated by adding together different variables. The variables that were used to generate it consist of a risk-free rate and a reasonable risk premium. Based on the foregoing, discount rate is estimated at 8.8665%, or say, 9.0% (10-year T-bond rate at about 3.9165% (from Philippine Dealing & Exchange Corporation (PDEx) as of 30 June 2021) plus 3% equity risk premium from OECD and additional 0.25% risk premium for unidentifiable risk factors which include the uncertainty brought about by the Covid-19 global pandemic, plus 0.80% management risk and 0.90% liquidity risk).

Risk Free Rate

For purposes of this valuation, we have adopted, as risk-free rate, the 10-year T-bond rate from PDEx. The Philippine Dealing & Exchange (PDEx) system appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEx. The PHP BVAL Reference Rate dated 30 June 2021 was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5008	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

Equity Risk Premium

4.19 We have adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3% plus an additional 0.25% risk premium for unidentifiable risk factors. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits
Valid as of: **25 June 2021**

			Classification		
nb	Country Code ISO Alpha 3	Country Name [1]	Previous	Current Prevailing	Notes
138	PLW	Palau	-	-	(5)
139	PAN	Panama	4	4	(8)
140	PNG	Papua New Guinea	6	6	
141	PRY	Paraguay	5	5	
142	PER	Peru	3	3	
143	PHL	Philippines	3	3	
144	POL	Poland	-	-	(6)
145	PRT	Portugal	-	-	(6) (7)

Management & Liquidity Risk

4.20 The Management Risk refers to the estimated premium to compensate for the burden of management, while the Liquidity Risk refers to the ease (or the difficulty) with which an investment can be sold or made. A review was done and we have arrived at the following: Management Risk was classified into four categories, with the corresponding rates: Poor – 1.2; Average – 1.0; Above Average - 0.90 and Excellent - 0.80 while Liquidity Risk has three (3) categories: Poor –1.2; Average – 1.0; and Good – 0.90. After the said review, we deemed it appropriate to use 0.80% for Management Risk and 0.90% for Liquidity Risk.

Capitalization Rate

4.21 Capitalization rate adopted to arrive at the terminal value is 4.5% (Discount Rate less Projected Long-term Growth Rate (4.5%). The long-term growth rate is based on a growth forecast of the prevailing commercial market over the forecast period. This is based on what the Property is perceived to achieve in the long-term considering the present situation of the market.

Remaining Life of the Lease

4.22 Remaining life of the lease as of the date of valuation is 98 years.

Summary of Leasehold Assumptions

4.23 In summary, below are the assumptions/statistics used in determining the leasehold value of the subject land.

CYBERGATE TOWER 2			
Lease Details			
Lot Area	:	2,570.00	sq.m.
Term of Lease	:	98	years
Assumed Commencement Date	:	01-Oct-21	
Lease Rate	:	7%	of net leasing revenue
Market Rent (in PhP)			
Monthly Rent	:	10,225,417	/sq.m./ month
Annual Rent	:	122,705,000	
Annual Escalation	:	3%	starting Y2
Discount Rate			
Risk Free Rate		3.92	as of June 30, 2021 (BVAL PDEX)
Risk Premium		3.00	as of June 25, 2021 (OECD)
Management Risk		0.80	
Liquidity Risk		0.90	
Additional Risk		0.25	risk premium for unidentifiable risk factors
		8.87	
Resulting Discount Rate, say		9.00%	
Terminal Capitalization Rate		4.50%	

Leasehold Value

4.24 On the basis of the foregoing, the leasehold value of the Property may reasonably be estimated at **PhP1,981,000,000**.

We attach a copy of our valuation calculations at Appendix **5**.

Income Approach

Definition 4.25 The Income Approach is applicable to the valuation of income producing properties, business enterprise as well as the valuation of intangible assets. This approach measures the current value of an asset by calculating the present value of its future economic benefits by discounting expected cash flows at a rate of return that compensates the risks associated with the particular investment.

For this particular engagement, we have applied both the Discounted Cash Flow Analysis and the Direct Capitalization Method.

Discounted Cash Flow Analysis 4.26 The discounted cash flows, or DCF valuation is the most popular fundamental approach in valuing the future economic benefits of a projected income stream. DCF measures actual yield rather than paper income for the asset/business owner and the analysis of DCF is widespread and mandatory in the various fields of business making DCF-based valuation ideal.

4.27 The valuation process, briefly stated, consists of the following:

- Estimation of the revenues generated;
- Estimation of the costs and expenses related to the operations of the development;
- Estimation of an appropriate discount rate;
- Discounting process using an appropriate discount rate to arrive at an indicative market value; and
- Estimation of the Terminal Value of the Property.

Discount Rate 4.28 The discount rate was computed using the build-up method - calculated by adding together the different variables. The basic formula for the traditional build-up model is:

Discount Rate = Rf + P + MR + LR

Where	**Variable**	**Proxy Statistic**
Rf	Risk Free Rate	PDEX Risk Free Rate
P	Equity Risk Premium	Country Risk
MR	Management Risk	
LR	Liquidity Risk	

The variables that were used to generate the Discount Rate are exhibited in the table below, along with the sources and/or dates as at or nearest the 30 June 2021 valuation date.

Risk Free Rate (10Y)	3.92%	As of 30 June 2021, BVAL PDEX
Equity Risk Premium	3.25%	As of 25 June 2021, OECD
Management Risk	0.80%	
Liquidity Risk	0.90%	

4.29 The following assumptions were used to arrive at the Discount Rate using the Build-Up Method.

Risk Free Rate

4.30 For the purposes of this valuation, we adopted the 10-year bond rate sourced from Philippine Dealing & Exchange Corporation (PDEX) as of 30 June 2021 - the valuation date (image shown below). The Philippine Dealing Exchange (PDEx) system has recently appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEX. The PHP BVAL Reference Rate was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

Equity Risk Premium

4.31 We used an equity risk premium of 3.25%. We adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3% plus an additional 0.25% risk premium for unidentifiable risk factors. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors. Shown below is an excerpt of said table.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits

Management & Liquidity Risk

The Management Risk refers to the estimated premium to compensate for the burden of management, while the Liquidity Risk refers to the ease (or the difficulty) with which an investment can be sold or made. A review was done and we have arrived at the following: Management Risk was classified into four categories, with the corresponding rates: Poor – 1.2; Average – 1.0; Above Average - 0.90 and Excellent - 0.80 while Liquidity Risk has three (3) categories: Poor –1.2; Average – 1.0; and Good – 0.90. After the said review, we deemed it appropriate to use 0.80% for Management Risk and 0.90% for Liquidity Risk.

Resulting Discount Rate

4.32 Resulting Discount Rate used for this valuation is 8.87%, or say, 9.0%.

Capitalization Rate

4.33 A discount rate is used to calculate the present value of future projections of a benefit stream when growth varies from year to year. However, if growth is estimated to remain level throughout the life of the investment, a capitalization rate is often used. In its most basic form, the relationship between discount rate and a capitalization rate can be summarized as follows:

Capitalization Rate = Discount Rate – Growth

For purposes of this valuation, a long-term growth rate of 4.5% has been assumed. This is based on what the Property is perceived to achieve in the long-term considering the present situation of the market. Using this assumption, resulting Capitalization Rate would be 4.5%.

Key Financial Assumptions

4.34 We relied on the historical and projected assumptions brought about by our research and as provided by the client. These financials were analysed to ensure reasonableness by comparing projected revenue growth rates and other operating expenses based on historical performance. Based on interviews with the representatives of the company, projections were prepared to reflect the current and expected future market conditions.

a. **Revenues**

i. Cashflow projection starts in 01 July 2021 and runs for a period of 10 years.

ii. The revenues come from the rental of retail units, office units and parking slots. In estimating the annual rents of the subject units/slots, we have adopted the contract rents as appearing in the copy of the rent roll provided to us by the client for the occupied units/leased parking slots. After the expiration of lease, lease rates then are aligned with market rates and are assumed to have an average of 4-year lease contracts. Aside from the monthly rentals from leasable areas, revenues likewise include Management and Aircon Dues which are likewise charged to the tenants monthly on a per sq.m. basis. Management dues are for common and/ or shared utilities, facilities and

services. These are inclusive of air-conditioning equipment rental during office hours (but exclusive of power consumption).

iii. It would be important to note that as the building administrators, they collect the said dues as a cost recovery mechanism for all expenses related to the day-to-day operations of the building and its common areas.

iv. Occupancy assumptions were based on the actual performance of the Property as well as the prevailing trend in the subject area taking into consideration the forecasted effect of the global pandemic in the office market. Occupancy of the Property as of valuation date is at 99.8% while the historical average performance of the Property for the last two years is at 100%. Occupancy rates include committed leases. For this valuation exercise, we are assuming an average overall vacancy allowance of 2.5%. This assumed vacancy allowance for the whole cashflow period is used to account for unanticipated vacancies brought about by early terminations and non-renewals, and rental concession requests from tenants.

v. We used actual escalation rates indicated in the rent roll for all existing leases up until their lease expires. After which, an average escalation of 5% was then be applied year on year until the end of the cash flow.

b. **Cost & Expenses**

i. Operating Expenses which would include administrative and utility expenses are normally charged against the Common Use Service Area (CUSA) Fees or Association Dues being collected monthly to the individual tenants. However, there are instances when CUSA funds are insufficient to pay off all common charges. If and when this happens, the owners/administrators would have to pay off these expenses and this has been taken into consideration in the projections.

ii. Operating Costs and Expenses are assumed to be an average of approximately 18% of the Total Net Revenues. Operating costs and expenses included are basically divided in to two – real estate expense and general administrative expenses. Real Estate expenses are as follows: contracted services, repairs & maintenance, management fee and loss from CUSA and miscellaneous expenses. While under General Administrative Expense are – salaries & wages, taxes and licenses, advertising & promotions, commission, insurance, communication, rent expense, supplies, travel & transportation, and representation & entertainment expenses.

These expenses are projected either as a percentage of the rental revenues or the total net revenues. These percentage allocations were from the historical and projected performance of the Property.

iii. Annual Capital Expenditures (CAPEX) for the entire cashflow period, on the other hand, was assumed to be 1.5% of the Net Leasing Revenues. This assumption is based on benchmarking and analysis of current market practice in allocating CAPEX reserve.

This allocation would help ensure that the Property would operate efficiently and maintain its good and sound condition.

Resulting Market Value

a. Earnings Before Income Tax, Depreciation and Amortization (EBITDA) for the whole duration of the cashflow shall be discounted at the derived Discount Rate of 9.00%.

b. The sum of discounted cashflows including the Terminal Value of the Property represents the Market Value of the Property.

The Terminal Value of the Property is the value of the property beyond the explicit forecast period. It is assumed that the property or business will continue to generate cashflows in perpetuity. As mentioned earlier, Terminal Capitalization Rate used is 4.5%.

The Discounted Cashflow showing the estimated Market Value of the subject Property is attached as Appendix **6**.

Direct Capitalization Method

4.35 The Direct Capitalization Method is a real estate valuation method that helps convert a single year's income into value by dividing the Net Operating Income with an appropriate Capitalization Rate. This method assumes that the Property has a stabilized net operating income. All parameters of a typical investor return expectations are represented either explicitly or implicitly in either income forecast or the capitalization rate. The direct capitalization rate, as the ratio of income to value, serves as a proxy for investor return assumptions.

Resulting Market Value

4.36 We made use of the single year's cashflow projection (2022) to derive the Market Value using the Direct Capitalization Method. Capitalization rate adopted to arrive at the Property Market Value is 4.5%.

Valuation basis

Market Value

4.37 Market Value is defined in the 2019 **International Valuation Standards** as:

"The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

Valuation date

Valuation date

4.38 The valuation date is **30 June 2021**.

General Assumptions

Assumptions

4.39 Our valuation is necessarily based on a number of assumptions which have been drawn to your attention in our General Terms of Business, Letter of Engagement and within this report.

Key Assumptions 4.40 Whilst we have not provided a summary of all these assumptions here, we would in particular draw your attention to a key assumption that we relied on a very considerable extent on the information provided by the Client and have assumed that documents provided to us such as gross floor area tabulation, floor plans, lot area allocation, building tenancies and other relevant matters are factual. We were also advised by the Client that no material facts have been omitted from the information provided.

Special Assumption 4.41 We were instructed to re-value the Property without a re-inspection. We have, thus, considered changes to the physical attributes and/or characteristics of the Property which have occurred between the valuation date and the date of our previous valuation as confirmed by the Client. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.

4.42 We have adopted the floor area details provided to us by the client and have assumed these to be accurate.

4.43 We were not provided with a Lot Plan where Robinsons Cybergate Tower 2 is erected. For purposes of this valuation, the land is assumed to be rectangular in shape.

4.44 For the Machinery & Equipment servicing the building, we have made the following assumptions -

We have not carried out a full mechanical survey, or structural test, nor have inspected the machinery and equipment, which are covered, unexposed or inaccessible. Our assessment is based on the premised that the items are in a condition commensurate with age and usage.

Machinery & Equipment associated with the supply of services to the building such as Elevators, Air Conditioning Systems are valued on the assumption that they are permanently installed or attached to the building.

4.45 In applying Income Approach to value, we have considerably relied on the information provided to us by the Client which includes the following: lease contracts, revenue and expense projections, historical and projected occupancies. Upon expiration of contracts, we estimated the lease rates based on the acceptable escalations in the market.

4.46 Given the 98-year leasehold, we assumed that the Property is comparable to a freehold property given the duration of the leasehold interest on the Property. Thus, a terminal value of the Property was computed at the end of the cashflow.

Valuation Results

Leasehold Value 4.47 The Leasehold Value of the Property is estimated at: **PhP1,981,000,000**.

Market Value Using Income Approach 4.48 Using the **Income Approach** on the other hand, the Market Value of the Property is estimated as follows:

DCF Analysis	**PhP6,808,000,000**
Direct Capitalization Method	**PhP7,967,000,000**

Calculation 4.49 We attach a copy of our valuation calculations for the Income Approach at Appendix **6** and **7**.

Comments 4.50 The values arrived at using the Income Approach are noted to be higher than the value arrived at using the Cost Approach. This is because, unlike the Income Approach, the Cost Approach does not capture the income potential of the Property.

4.51 For purposes of this valuation, we deemed it appropriate to adopt the results arrived at by the Income Approach – DCF Analysis, since this method is usually used to determine the value of an income-generating property, as it also captures the Property's future economic benefits, giving a better representation of the Property's Market Value at an acceptable rate of return that would compensate for the risks associated with the particular investment. It likewise takes into consideration market cycles that Direct Capitalization Method cannot capture.

Conclusion of Value 4.52 In conclusion, we are of the opinion that the Market Value of the Property, reckoned as of **30 June 2021**, is:

PhP6,808,000,000 (SIX BILLION, EIGHT HUNDRED EIGHT MILLION PHILIPPINE PESOS).

Note: *The outbreak of the Novel Coronavirus (COVID-19), declared by the World Health Organization as a "Global Pandemic" on 11th March 2020, has impacted global financial markets. Travel restrictions have been implemented by many countries. In the Philippines, market activity is being impacted in all sectors. As at the valuation date, we consider that we can attach less weight to previous market evidence for comparison purposes, to inform opinions of value. Indeed, the current response to COVID-19 means that we are faced with an unprecedented set of circumstances on which to base a judgement. Our valuation is therefore reported on the basis of "material valuation uncertainty" per IVS 103 of the International Valuation Standards. Consequently, less certainty – and a higher degree of caution – should be attached to our valuation than would normally be the case. Given the unknown future impact that COVID-19 might have on the real estate market, we recommend that you keep the valuation of this Property under frequent review.*

Value forwarded ………………………………..PhP6,808,000,000

Appendix 1 - Assumptions, Limiting Conditions and Disclaimers

Basis of Value	Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion." In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property. It is further assumed that title to the Property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable. The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.
Property Rights appraised	The rights appraised in this report are the Property rights in fee simple, free and clear. "Fee simple" is defined as absolute ownership, without limitations to any particular class of heirs or restrictions, but subject to the limitations of eminent domain, escheat, police power and taxation. We assume that the fee simple interest is marketable and in compliance with the applicable laws of the Philippines.
Fractional Interests:	When the study contains a valuation relating to an estate in land that is less than the whole fee simple estate, the value reported for such estate relates to a fractional interest only in the real estate involved, and the value of this fractional interest plus the value of all other fractional interests may or may not equal the value of the entire fee simple estate which is considered the whole. When the valuation report contains an allocation of the total valuation between land and building improvements, such allocation applies only under the existing program of utilization. The separate valuations for land and building cannot be used in conjunction with any other valuation/appraisal and will be invalid if so used.
Assumptions:	The valuation is based on the condition of the economy and the purchasing power of the Philippine Peso as of the effective date of valuation. We have assumed that the floor areas provided us have been calculated in accordance with engineering standards, and assumed herein to be true and correct. Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the Property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.
Information Supplied By Others	Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser. Information provided by informed local sources, such as government agencies, financial institutions, Realtors, buyers, seller and others, was weighed in the light in which it was supplied and checked by secondary means; however, no responsibility is assumed for possible misinformation.
Legal Issues:	This valuation assumes no responsibility for the validity of legal matters affecting the Property. The ownership history reported in this valuation is based on the appraiser's research of public records, which are assumed to be accurate and complete. It is not the intent of the valuation to offer a legal opinion of title. It is further assumed that the Property has good title, responsible ownership and competent management. Any liens or encumbrances which may now exist have been disregarded. The appraiser is not required to give testimony or attendance in court by reason of this valuation, with reference to the Property in question, unless arrangements have been previously made.
Liability:	The liability of Santos Knight Frank, Inc. and its directors and employees is limited to the addressee of this report only. No accountability, obligation or liability to any third party is accepted. In the event we are subject to any liability in connection with this engagement, regardless of legal theory advanced, such liability will be limited to the amount of fees we received for this engagement.
Environmental Conditions:	It is assumed that there is full compliance with all applicable Philippine environmental regulations and laws unless non-compliance is stated, defined, and considered in this appraisal report.
Town Planning:	It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.
Condition of Improvements:	We have inspected the improvements and structures. However we have not carried out a structural survey nor tested any of the services or facilities, nor have we inspected unexposed or inaccessible portions of the building, and are therefore unable to state that these are free from defect, rot, infestation, asbestos or other hazardous material. We have therefore, viewed the general state of repair of the Property and advise that we did not notice any obvious signs of structural defect or dilapidations. Furthermore, the Property appears to be in reasonable condition having regard to its age and use and unless otherwise stated. We also assume that the building complies with all relevant statutory requirements in respect of matters such as sanitary, building and fire safety regulations and standards.
Valuation Methodology:	In estimating Fair Value for financial reporting purposes, we still adopted the same Valuation techniques by using any one or the combination of the three (3) Approaches to Value, namely: Market Data (or Direct Sales Comparison) Approach, Cost Approach, and the Income Approach. Briefly described, the Market Data (or Sales Comparison) Approach considers prices recently paid and/or offered for similar items of Property with adjustments made to the indicated market prices to reflect the condition and utility of the appraised Property relative to market comparatives. The Cost Approach considers the cost to reproduce or replace the Property appraised with new assets of like kind, and from this amount an allowance is deducted for depreciation arising from physical deterioration or obsolescence, whether from functional or external causes. In the Income Approach, an estimate is made of the prospective economic benefits of ownership into the future and these benefits are discounted to its present worth or capitalized into an indication of value.
Others:	This report and valuation shall be used only in its entirety and no part shall be used without the whole report. It may not be used for any purpose other than the intended purpose mentioned herein. Possession of this report or any copy thereof does not carry with it the right of copying or publication. All copies will originate from Santos Knight Frank, Inc. and will be signed and dated as such. Neither the whole nor any part of the report or any reference to our name, our valuation and our report may be included in any document, circular or statement nor published without our prior written consent to the form and context in which it may appear. The delivery and acceptance of this report completes this assignment.

Attention: **MR. FREDERICK D. GO**
President and Chief Executive Officer

Subject: **Terms of Engagement for Valuation Services**

Dear Mr. Go:

Thank you for your interest in our Valuation Services. We refer to your invitation of 03 August 2020 requesting Santos Knight Frank, Inc. ("SKF") to submit a proposal for valuation (the "Valuation") in respect of the properties detailed below (the "Properties").

This proposal, together with our General Terms of Business for Valuation Services ("General Terms"), sets out our terms of engagement for carrying out this instruction. Once agreed and signed, this proposal shall constitute our Letter of Engagement ("Letter"). This Letter and the General Terms (together, the "Agreement") exclude any other terms which are not specifically agreed to us in writing. To the extent that there is any inconsistency between the Letter and the General Terms, this Letter shall take precedence.

1. **Client**
Our Client for this Valuation is Robinsons Land Corporation (the "Client", "you" or "your").

2. **Purpose of Valuation**
The Valuation is provided solely the purpose of transferring some of the Client's assets to the REIT Company and its application for a Tax-Free Exchange Ruling with the Bureau of Internal Revenue and listing of the REIT Company in the Philippine Stock Exchange (the "Transaction"). Specifically, the Valuation will be used for the Client's Financial Statements to be attached to the Offering Circular as required by the Securities and Exchange Commission (SEC) and will be attached as an appendix to the Client's REIT Plan. In accordance with clause 4.1 of our General Terms, the Valuation may not be used for any other purpose without our express written consent. The Valuation will be made accessible in the public domain as part of the regulatory requirements of the Transaction.

3. **Term & Termination**
This appointment will commence upon signing of this Agreement and shall continue to be in effect for a period of two (2) years. Any extension of the Term of this Agreement shall be mutually agreed upon by the parties in writing.

23. Electronic Communication

During the engagement, both parties may wish to communicate electronically with each other. However, electronic transmission of information cannot be guaranteed to be secure or virus-or error-free and information could be intercepted, corrupted, lost or destroyed, arrive late or incomplete, or otherwise be adversely affected or unsafe to use. Both parties agree to accept these risks and so each party will be responsible for protecting its own systems and interests in relation to electronic communications. Neither party will have any liability to the other party on any basis for any loss or damage arising from or in connection with the electronic communication of information between both parties or their reliance on such information.

24. Acceptance

Please sign and return a copy of this Letter signifying your acceptance of the terms of the Agreement. We reserve the right to withhold any Valuation and / or refrain from discussing it with you until this Letter has been countersigned and returned.

Your attention is drawn to the "Important Notice" in the General Terms. If you have any questions regarding this Letter and / or the terms of the Agreement, please let us know before signing this Letter.

Thank you for choosing Santos Knight Frank, Inc. and we look forward to working with you on this important engagement.

Sincerely,
SANTOS KNIGHT FRANK, INC.

Attention: **MR. FREDERICK D. GO**
President and Chief Executive Officer

Subject: **Amendment to Terms of Engagement and General Terms of Business for Valuation Services Dated 03 August 2020 ("Amendment")**

Dear Mr. Go:

We refer to subject Letter of Engagement and General Terms of Business for Valuation Services (together, the "Agreement") between Robinsons Land Corporation (the "Client", "you" or "your") and Santos Knight Frank, Inc. ("SKF") for the valuation of fourteen (14) office buildings (the "Covered Properties").

For this purpose, the Agreement is amended as follows:

The first, second, and third and fourth paragraphs shall now read:

For the Valuation

I. Valuation for Asset Transfer to REIT Company and its application for a Tax-Free Exchange Ruling:

For Valuation Update

II. Valuation of Properties for REIT listing to PSE:

Our Valuation of 14 Properties will be as follows:

1. Valuation for 4 Properties
2. Periodic Update of 14 Properties
   Under REIT Company (Quarterly basis – optional)
3. Valuation Update of 14 Properties under REIT Company

Except as amended hereby, all the provisions of the Agreement which are not inconsistent herewith are incorporated herein by way of reference and from date hereof, the Agreement and this Amendment shall be read as one integrated document.

Kindly affix your signature on the conforme portion below and return one (1) original signed copy to us.

Sincerely,
SANTOS KNIGHT FRANK, INC.

Appendix 3 - General Terms of Business

General Terms of Business for Valuation Services

These General Terms of Business (the "**General Terms**") and our Letter of Engagement (the "**Letter**"), together form the agreement between you and us (the "**Agreement**"). References to "**you**", "**your**" etc. are to persons or entities who are our client and, without prejudice to clauses 3 and 4 below, to any persons purporting to rely on our Valuation.

Unless **the** context otherwise requires, all other terms and expressions used but not defined herein shall have the meaning ascribed to them in the Letter.

When used herein or in the Letter, the term "**Valuation**" shall mean any valuation report, advance report, supplementary report or subsequent/update report, produced pursuant to our engagement and any other replies or information we produce in respect of any such report and/or any relevant Property. Any words following the terms "**including**", "**in particular**" or any similar expression shall be construed as illustrative and shall not limit the sense of the words preceding those terms.

All of the terms set out in these General Terms shall survive termination of the Agreement.

1. Santos Knight Frank, Inc.

1.1. Santos Knight Frank, Inc. ("**Santos Knight Frank**", "**our**", "**us**", "**we**") is a Philippine corporation with Securities and Exchange Commission (SEC) Registration Number A199818549.

1.2. Our registered office is at 10/F Ayala Tower & Exchange Plaza, Ayala Avenue, Makati City where a list of members may be inspected.

1.3. Any representative of Santos Knight Frank, Inc. described as *Director* is either a member or an employee of Santos Knight Frank, Inc. and is not a member of the Board of Directors. The term *Director* has been retained because it is an accepted way of referring to senior professionals. The term "**Santos Knight Frank Person**" shall, when used herein, mean any member, employee, or consultant of Santos Knight Frank, Inc.

1.4. Our Tax Identification Number (TIN) is 201-626-570-000.

1.5. The details of our professional indemnity insurance will be provided to you on request.

1.6. Santos Knight Frank, Inc., being a corporation, is regulated by the Philippine Securities and Exchange Commission (SEC). It is also an SEC-accredited asset valuer. In accordance with reportorial filings with the SEC, it may be necessary to disclose valuation files to them. By instructing us, you give us your permission to do so. Where possible we will give you prior notice before making any such disclosure, although, this may not always be possible. We will use reasonable endeavours to limit the scope of any such disclosure and to ensure any disclosed documents are kept confidential.

1.7. Valuations will be carried out in accordance with the 2019 edition of the International Valuation Standards (IVS) by valuers who conform to its requirements and with regard to relevant statutes or regulations. Our senior valuers are Real Estate Appraisers licensed and regulated by the Philippine Professional Regulation Commission (PRC).

2. Governing law and jurisdiction

2.1. The Agreement and any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with it or its subject matter or formation or any Valuation shall be governed by and construed in accordance with Philippine laws.

2.2. Philippine courts shall have exclusive jurisdiction to settle any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with this Agreement or its subject matter or formation or any Valuation. This will apply wherever the relevant Property or the client, or any relevant third party, is located or the service is provided.

3. Limitations on liability

3.1. Subject to clause 3.7, our maximum total liability in connection with or arising out of this Agreement and/or its subject matter and/or the Valuation is limited to our total service fees as set out in the Letter.

3.2. Subject to clause 3.7, we will not be liable for any loss of profits or for indirect or consequential loss or damages.

3.3. Subject to clause 3.7, any limitation on our liability will apply however such liability is or would otherwise have been incurred, whether in contract, tort (including negligence), for breach of statutory duty, or otherwise.

3.4. Except as set out in clauses 3.5 and 4.7 and 4.8 below, no third party shall have any right to enforce any of the terms of this Agreement.

3.5. No claim arising out of or in connection with this Agreement may be brought against any Santos Knight Frank Person. Those individuals will not have a personal duty of care to you or any other person and any such claim for losses must be brought against Santos Knight Frank, Inc. Any Santos Knight Frank Person may enforce this clause but the terms of this Agreement may be varied by agreement between the client and Santos Knight Frank, Inc. at any time without the need for any Santos Knight Frank Person to consent.

3.6. No claim, action or proceedings arising out of or in connection with the Agreement and/or any Valuation shall be commenced against us after the expiry of the earlier of (a) two years from the Valuation Date (as set out in the relevant Valuation) or (b) any limitation period prescribed by law.

3.7. Whether or not specifically qualified by reference to this clause, nothing in the Agreement shall exclude or limit our liability in respect of fraud, or for death or personal injury caused by our negligence or negligence of those for whom we are responsible, or for any other liability to the extent that such liability may not be so excluded or limited as a matter of applicable law.

4. Purpose, reliance and disclosure

4.1. The Valuation is prepared and provided solely for the stated purpose. Unless expressly agreed by us in writing, it cannot be relied upon, and must not be used, for any other purpose and, subject to clause 3.7, we will not be liable for any such use.

4.2. Without prejudice to clause 4.1 above, the Valuation may only be relied on by our Client. Unless expressly agreed by us in writing the Valuation may not be relied on by any third party and we will not be liable for any such purported reliance.

4.3. Subject to clause 4.4 below and for the stated purpose, the Valuation is confidential to our Client and must not be disclosed, in whole or in part, to any third party without our express written consent (to be granted or withheld in our absolute discretion). No liability is accepted to any third party for the whole or any part of any Valuation disclosed in breach of this clause.

4.4. Our appraisers are not required to give testimony or attendance in court by reason of this Valuation with reference to the Property in question, unless arrangements have been previously made.

4.5. Except for the stated purpose, neither the whole nor any part of the Valuation and/or any reference thereto may be included in any published document, circular or statement nor published in any way whatsoever whether in hard copy or electronically (including on any website) without our prior written consent and approval of the form and context in which it may appear.

4.6. Where permission is given for the publication of a Valuation, neither the whole nor any part thereof, nor any reference thereto, may be used in any publication or transaction that may have the effect of exposing us to liability for actual or alleged violations of SEC Memorandum Circular No. 2, series of 2014 (Guidelines on Asset Valuations) or Republic Act No. 8799 (Securities Regulation Code), as amended and its Implementing Rules and Regulations.

4.7. You agree that we, and/or any Santos Knight Frank Person, may be irreparably harmed by any breach of the terms of this clause 4 and that damages may not be an adequate remedy. Accordingly, you agree that we and/or any Santos Knight Frank Person may be entitled to the remedies of injunction or specific performance, or any other equitable relief, for any anticipated or actual breach of this clause 4.

4.8. You agree to indemnify and keep fully indemnified us, and each relevant Santos Knight Frank Person, from and against all liabilities, claims, costs (including legal and professional costs), expenses, damages and losses arising from or in connection with any breach of this clause 4 and/or from the actions or omissions of any person to whom you have disclosed (or otherwise caused to be made available) our Valuation otherwise than in accordance with this clause 4.

5. Knight Frank network

5.1. Santos Knight Frank, Inc. is a member of an international network of independent firms which may use the "Knight Frank" name and/or logos as part of their business name and operate in jurisdictions outside the Philippines (each such firm, an "**Associated Knight Frank Entity**").

5.2. Unless specifically agreed otherwise, in writing, between you and us: (i) no Associated Knight Frank Entity is our agent or has authority to enter into any legal relations and/or binding contracts on our behalf; and (ii) we will not supervise, monitor or be liable for any Associated Knight Frank Entity or for the work or actions or omissions of any Associated Knight Frank Entity, irrespective of whether we introduced the Associated Knight Frank Entity to you.

5.3. You are responsible for entering into your own agreement with any relevant Associated Knight Frank Entity.

5.4. This document has been originally prepared in the English language. If this document has been translated and to the extent there is any ambiguity between the English language version of this document and any translation thereof, the English language version as prepared by us shall take precedence.

6. Severance

If any provision of the Agreement is invalid, illegal or unenforceable, the parties shall negotiate in good faith to amend such provision so that, as amended, it is legal, valid and enforceable and, to the greatest extent possible, achieves the intended commercial result of the original provision. If express agreement regarding the modification or meaning or any provision affected by this clause is not reached, the provision shall be deemed modified to the minimum extent necessary to make it valid, legal and enforceable. If such modification is not possible, the relevant provision shall be deemed deleted. Any modification to or deletion of a provision under this clause shall not affect the validity and enforceability of the rest of this Agreement.

7. Entire agreement

7.1. The Agreement, together with any Valuation produced pursuant to it (the Agreement and such documents together, the "**Contractual Documents**") constitute the entire agreement between you and us and supersedes and extinguishes all previous agreements, promises, assurances, warranties, representations and understandings between you and us, whether written or oral, relating to its subject matter.

7.2. Subject to clause 3.7 above, you agree that in entering into the Agreement you do not rely on, and shall have no remedies in respect of, any statement, representation, assurance or warranty (whether made innocently or negligently) that is not expressly set out in the Contractual Documents. You further agree that you shall have no claim for innocent or negligent misrepresentation based on any statement set out in the Contractual Documents.

7.3. The Letter and these General Terms shall apply to and be incorporated in the contract between us and will prevail over any inconsistent terms or conditions contained or referred to in your communications or publications or which would otherwise be implied. Your standard terms and conditions (if any) shall not govern or be incorporated into the contract between us.

7.4. Subject to clause 3.7 and clause 6, no addition to, variation of, exclusion or attempted exclusion of any of the terms of the Contractual Documents will be valid or binding unless recorded in writing and signed by duly authorised representatives on behalf of the parties.

8. Assignment

8.1. You shall not assign, transfer, mortgage, charge, subcontract, declare a trust over or deal in any other manner with any of the rights and obligations under the Agreement without our prior written consent (such consent to be granted or withheld in our absolute discretion).

9. Force majeure

9.1. Neither party shall be in breach of this Agreement nor liable for delay in performing, or failure to perform, any of its obligations under this Agreement if such delay or failure results from events, circumstances or causeswhich could not be foreseen, or which, though foreseen, were inevitable.

10. Our fees

10.1. Without prejudice to clause 10.3 below, you become liable to pay our fees upon issuance of the Valuation. For the avoidance of doubt, unless expressly agreed otherwise in writing, the payment of our fees is not conditional on any other events or conditions precedent.

10.2. If any invoice remains unpaid after 30 days of the date on which it is presented, we reserve the right to charge interest, calculated daily, from the date when payment was due until payment is made at 3%

10.3. If we should find it necessary to use legal representatives or collection agents to recover monies due, you will be required to pay all costs and disbursements so incurred.

10.4. If an appraisal analysis is ordered and the assignment is cancelled before completion, we reserve the right to receive compensation, by way of damages, in an amount equal to 70% of the total fee for the assignment.

10.5. If you delay the instruction by more than 30 days or materially alter the instruction so that additional work is required at any stage or if

we are instructed to carry out additional work that we consider (in our reasonable opinion) to be either beyond the scope of providing the Valuation or to have been requested after we have finalised our Valuation (including, but not limited to, commenting on reports on title), we will charge additional fees for this work. Such additional fees will be calculated on the basis of a proportion of the total fee by reference to reasonable time and expenses incurred.

10.6. Where we agree to accept payment of our fees from a third party, such fees remain due from you until payment is received by us.

11. Anti-bribery and corruption and Anti-Money Laundering
We agree that throughout the term of our appointment we shall:

(a) comply with all applicable laws, statutes, regulations, and codes relating to anti-bribery and corruption and Anti-Money Laundering laws (the "**Relevant Requirements**");

(b) not engage in any activity, practice or conduct which would constitute an offense;

(c) maintain anti-bribery, anti-corruption, and anti-money laundering policies to comply with the Relevant Requirements and any best practice relating thereto; and

(d) promptly report to you any request or demand for any undue financial or other advantage of any kind in connection with the performance of our services to you.

12. Portfolios
Properties comprising a portfolio, unless specifically agreed with you otherwise, will be valued separately and upon the assumption that the properties have been marketed individually and in an orderly manner.

13. Land Register inspection and searches
We are not required to undertake searches, validations or inspections of any kind for title or price paid information in any publicly available land registry.

14. Title and burdens
We will assume, unless specifically informed and stated otherwise, that each property has good and marketable title and that all documentation is satisfactorily drawn and that there are no unusual outgoings, planning proposals, onerous restrictions or local authority intentions which affect the property, nor any material litigation pending.

15. Disposal costs and liabilities
No allowance is made in our Valuation for expenses of realisation or for taxation which may arise in the event of a disposal and our Valuation is expressed as exclusive of any VAT that may become chargeable. Properties are valued disregarding any mortgages or other charges, including commissions.

16. Sources of information
We rely upon the information provided to us by you, as to details of tenure and tenancies, planning consents and other relevant matters, as summarised in our Valuations. Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser.

17. Identity of property to be valued
We will exercise reasonable care and skill (but will not have an absolute obligation to you) to ensure that the property, identified by the property address in your instructions, is the property inspected by us and contained within our valuation report. If there is ambiguity as to the property address, or the extent of the property to be valued, this should be drawn to our attention in your instructions or immediately upon receipt of our report.

18. Boundaries
Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.

19. Planning, highway and other statutory regulations

19.1. Enquiries of the relevant planning and highways authorities in respect to matters affecting properties, where considered appropriate, are normally only obtained from the corresponding government agency. We can only state whatever current conditions may be. We recommend that formal written enquiries should be undertaken by your lawyers who should also confirm the position with regard to any legal matters referred to in our Valuations.

19.2. It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative, regulatory, or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.

19.3. We assume that the premises comply with all relevant statutory requirements including environmental, building, fire, and sanitation regulations.

20. Property insurance
Our Valuation assumes that each property would, in all respects, be insurable against all identifiable risks.

21. Building areas and age
Where so instructed, areas provided from a quoted source will be relied upon. Any dimensions and areas measured on location or from plan/s are calculated and are quoted to a reasonable approximation, with reference to their source. Where the age of the building is estimated, this is for guidance only.

22. Structural condition
Building, structural and ground condition surveys are detailed investigations of the building, the structure, technical services and ground and soil conditions undertaken by specialist building surveyors or engineers and fall outside the normal scope of a valuation. Since we will not have carried out any of these investigations, we are unable to report that any property is free of any structural fault, rot, infestation or defects of any other nature, including inherent weaknesses due to the use in construction of deleterious materials. We do reflect the contents of any building survey report provided to us in advance, or any defects or items of disrepair of which we are advised or which we note during the course of our ocular inspections but otherwise assume properties to be free from defect.

23. Ground conditions
Unless informed otherwise in writing, we assume there to be no adverse ground or soil conditions and that the load bearing qualities of the sites of each property are sufficient to support the building constructed or to be constructed thereon.

24. Environmental issues

24.1. Investigations into environmental matters by suitably qualified environmental specialists would usually be commissioned by most responsible purchasers or chargees of higher value properties or where there was any reason to suspect contamination or a potential future liability. Furthermore, such investigation would be pursued to the point at which any inherent risk was identified and quantified before a purchase proceeded. Where we are provided with the conclusive results of such investigations, on which we are instructed to rely, these will be reflected in our Valuations with reference to the source and nature of the enquiries. We would endeavour to point out any obvious indications or occurrences known to us of harmful contamination encountered during the course of our valuation enquiries.

24.2. However, we are not environmental specialists and therefore we do not carry out any scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination or any other environmental searches. If we are not provided with the results of appropriate investigations as outlined above and where there is no obvious indication of harmful contamination, our Valuation will be provided on the assumption that the relevant property is unaffected. Where we are informed that contamination is suspected or confirmed, but adequate investigation has not been carried out and made available to us, then the Valuation will be qualified only by reference to it.

25. Minerals, timber, airspace etc.

Unless specifically agreed otherwise in writing and so stated within the main body of the relevant Valuation, we do not value or attempt to value or take into account any potential income stream or other beneficial or detrimental effect or other factor relating to undiscovered or unquantified mineral deposits, timber, airspace, sub-ground space or any other matter which would not be openly known in the market and considered to have value.

26. Legal advice

26.1. We are appointed to provide valuation opinion(s) in accordance with our professional duties as Appraisers. The scope of our service is limited accordingly. The valuation assumes no responsibility for the validity of legal matters affecting the property. It is not the intent of the valuation to offer a legal opinion of title. Any liens or encumbrances which may now exist have been disregarded. We are not qualified legal practitioners and we do not provide legal advice and any statements made by us, or advice given, in a legal context should be construed accordingly.

26.2. Where appropriate we will liaise with your legal advisors. However, we accept no responsibility for any work carried out by them and we will not be liable for anything contained in legal documentation prepared by them.

26.3. Where we consider it is necessary for the provision of the Valuation and/or specifically agree to do so, and any additional fees we require for this work are agreed, we will read legal documents (including leases, licences etc.), however, (save for any comment concerning the impact of our interpretation of such documents on value) our interpretation of such documents cannot be relied upon to be legally correct. Where we do interpret legal documents, we will, for the purposes of providing our Valuation, assume our interpretation to be correct.

27. Loan security

Where instructed to comment on the suitability of property as a loan security we are only able to comment on any inherent property risk. Determination of the degree and adequacy of capital and income cover for loans is the responsibility of the lender having regard to the terms of the loan.

28. Build cost information

In the provision of valuation services we do not hold ourselves out to have expertise in assessing build costs. Where our instruction requires us to have regard to build cost information, for example in the valuation of properties with development potential, we strongly recommend that you supply us with build cost and other relevant information prepared by a suitably qualified construction cost professional, such as a quantity surveyor. The Valuation will be stated to have been arrived at in reliance upon the build cost information supplied to us by you. In the absence of any build cost information supplied to us, we may have regard to published build cost information. Build costs produced using this approach must be assumed to be unreliable or inaccurate; any reliance which can be placed upon our Valuation in these circumstances is severely restricted. Specialist professional advice on the build costs should be sought by you. If you subsequently obtain specialist build cost advice, we recommend that we are instructed to review our Valuation.

29. Reinstatement assessments

A reinstatement assessment for insurance purposes is a specialist service and we recommend that separate instructions are issued for this specific purpose. If an indication is required as a check against the adequacy of existing cover this should be requested and will be so stated in the body of the relevant Valuation. Any indication given is provided for guidance only and must not be relied upon as the basis for insurance cover. In any event, our reinstatement assessment should be compared with the owner's and if there is a material difference, then a full reinstatement valuation should be reconsidered.

30. Comparable evidence

Where comparable evidence information is included in our Valuation, this information is often based upon our oral enquiries and its accuracy cannot always be assured, or may be subject to undertakings as to confidentiality. However, such information would only be referred to where we had reason to believe it or where it was in accordance with our expectation. In addition, we have not inspected comparable properties.

31. Valuation bases

Valuations are carried out on a basis appropriate to the purpose for which they are intended and in accordance with the relevant definitions, commentary and assumptions. The basis of valuation will be agreed with you and specified in the Letter and in the relevant Valuation.

Important Notice

If you have any queries relating to this Agreement please let us know as soon as possible, and in any event before signing the Letter and/or giving us instructions to proceed.

Your instructions to proceed, preferably signing on the space provided for under the Letter, will constitute your acceptance to use our services on the terms of the Agreement.

Accordingly, our commencement of work pursuant to your instructions shall constitute acceptance of your offer and as such establish the contract between us on the terms of the Agreement.

Appendices

1 Instructions

Engagement of Santos Knight Frank

Instructions	1.1	We refer to our Letter of Engagement dated 21 September 2020 and Amendment dated 01 June 2021, to provide a Valuation Report on the opinion of **Market Value** using Income Approach of that certain Property consisting of leasehold rights on the land, building and machinery & equipment of a site identified as Robinsons Cybergate Tower 3 located along **Pioneer Street, within Robinsons Cybergate Complex, Mandaluyong City, Metro Manila, Philippines**, ("the Property"). A copy of that document is attached herein as Appendix **2**.
	1.2	This valuation has been carried out by Santos Knight Frank, Inc. ("Santos Knight Frank"), in accordance with our General Terms of Business for Valuations ("General Terms of Business"), as attached as Appendix **3**.
Client	1.3	Our client for this instruction is **Robinsons Land Corporation** ("the Client").
Valuation standards	1.4	This valuation has been undertaken in accordance with the International Valuation Standards, as well as other local standards.
Purpose of valuation	1.5	You have confirmed that this valuation is for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
Conflict of interest	1.6	We confirm that we do have a material connection or involvement giving rise to a potential conflict of interest, as set out below: We have conducted the valuation of the same Property for you as of 30 September 2020 for purposes of: i) the tax-free exchange of assets to a REIT Company, and (ii) for the registration statement and the listing application to be submitted to the Securities and Exchange Commission (SEC) and Philippine Stock Exchange (PSE) in connection with the initial public offering of the REIT Company and will form part of the REIT Plan of the REIT Company that will be made publicly available.
	1.7	You have confirmed this Engagement notwithstanding this matter, you are content for us to proceed with this instruction. We are providing an objective and unbiased valuation.
	1.8	We are acting as external and independent valuers in this engagement.
Responsibility to third parties	1.9	Our valuation report is only for the use of our Client and for the purpose for which it is stated herein and no liability is accepted to any third party for the whole or any part of its contents.
Disclosure & publication	1.10	Except for the purpose which it is stated herein, neither the whole nor any part of this valuation nor any reference thereto may be included in any published

document, circular or statement nor published in any way without our prior written approval of the form or context in which it may appear.

Limitations on liability

1.11 No claim arising out of or in connection with this valuation report may be brought against any member, employee, partner, director or consultant of Santos Knight Frank, Inc. Those individuals will not have a personal duty of care to any party and any claim for losses must be brought against Santos Knight Frank, Inc.

1.12 Santos Knight Frank, Inc.'s total liability for any direct loss or damage caused by negligence or breach of contract in relation to this instruction and valuation report is limited to the amount of the level of our fee, specified in the Letter of Engagement, a copy of which is attached as Appendix **2**. We do not accept liability for any indirect or consequential loss (such as loss of profits).

1.13 The above provisions shall not exclude or limit our liability in respect of fraud or for death or personal injury caused by our negligence or for any other liability to the extent that such liability may not be excluded or limited as a matter of law.

Expertise

1.14 The valuation process was performed by **Raymond F. Dechavez** and **Martin John L. Encomienda**, under the supervision of **Jacqueline T. Guerta** and **Jesus Constance M. Castro**, both licensed Real Estate Appraisers. The Principal Signatory on behalf of Santos Knight Frank, Inc. and who also reviewed the Valuation Report, is **Wenceslao D. Fuentes, Jr.,** also a licensed Real Estate Appraiser. We confirm that the above-named Licensed Real Estate Appraisers are registered with the Professional Regulation Commission ("the PRC"), having sufficient current knowledge of the particular market and the skills and understanding to undertake the valuation competently.

Vetting

1.15 This report has been vetted as part of Knight Frank global standards.

Scope of enquiries & investigations

Inspection

1.16 In accordance with your instructions, due to the limited timeframe to complete the Engagement, we have not conducted a current inspection. The Property has been previously inspected. Valuation rendered is a result of a revaluation of a property that has previously been inspected.

1.17 The Client has provided us with information regarding the changes to the physical attributes and/or characteristics of the Property; current or anticipated changes in rental income from the Property; and material changes to the non-physical attributes of each property, such as other lease terms, planning consents, statutory notices and other relevant information which have occurred between the valuation date and the date of our previous valuation. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.

Investigations

1.18 The extent of enquiries/investigations made is set out in our General Terms of Business. In carrying out this instruction, we have undertaken verbal / internet-

based enquiries referred to in the relevant sections of this report. We have relied upon this information as being accurate and complete.

Information provided

1.19 In this report, we have been provided with information/documents by the Client for the previous valuation done as well as for the current engagement. We have relied upon this information as being materially correct in all aspects. In particular, we detail the following:

- floor plans
- gross floor area tabulation
- site development plan
- lot area allocation
- rent roll
- financial statements
- projections
- historical and current occupancy

1.20 In cases where we were not provided with documents or information, we did our own enquiries as outlined and stated in the report. Any assumptions in lieu of the lack of information is also set out in the relevant sections of this report.

Valuation basis

1.21 In accordance with your instructions, we have provided an opinion of value on the basis of **Market Value**.

Market Value (MV)

1.22 Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as “the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm’s-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion.”

In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property.

It is further assumed that title to the Property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable.

The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.

Valuation date

1.23 The valuation date is **30 June 2021.**

2 The Property

Location

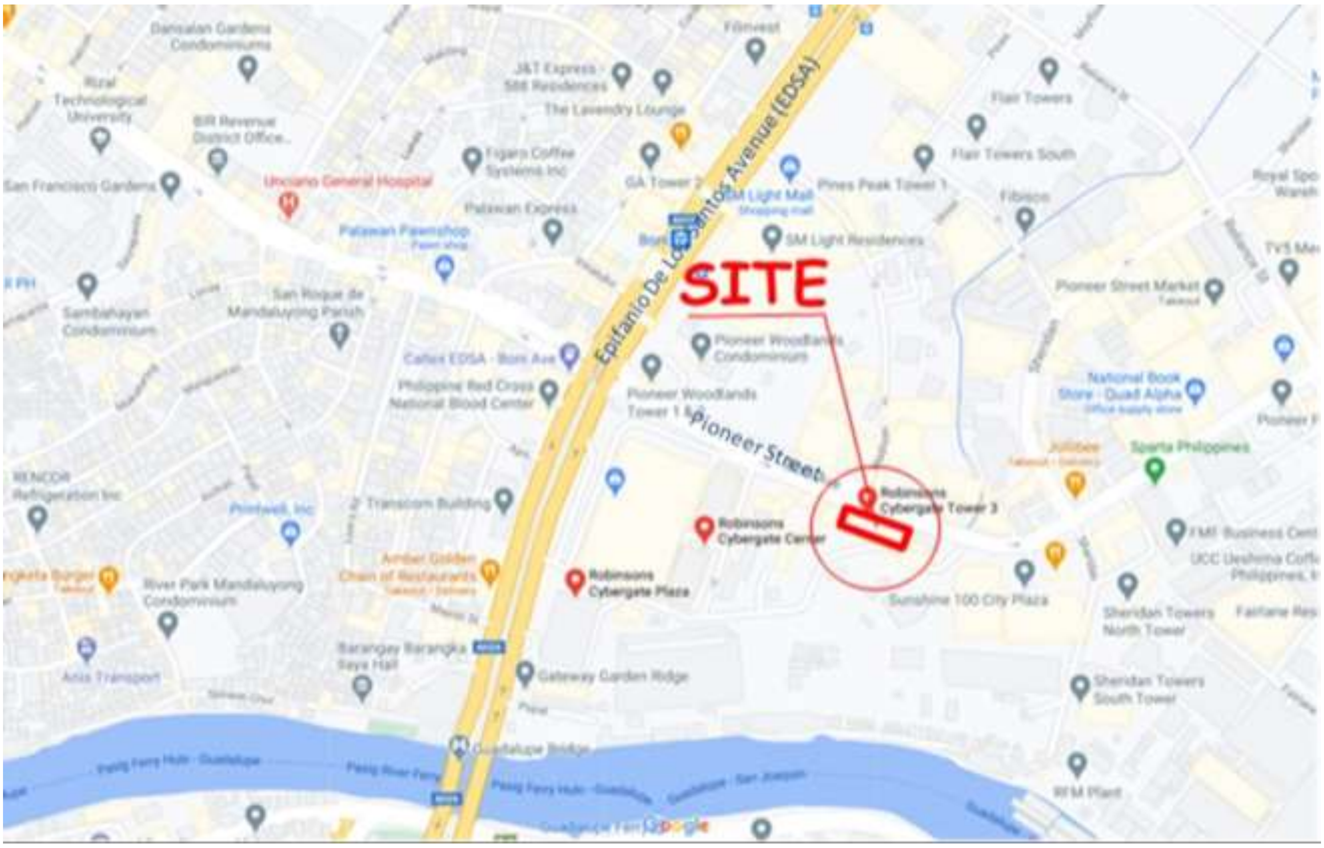
Address 2.1 The Property, identified as the site of **Robinsons Cybergate Tower 3**, is an office building located on the southwest side of Pioneer Street, beside or southeast of One Gateway Place, within Robinsons Cybergate Complex, Barangay Barangka Ilaya, Mandaluyong City, Metro Manila.

The site is situated about 350 meters southeast from MRT Boni Station and approximately 1.25 kilometers south from Greenfield District Pavilion Mall. In addition, it is about 1.85 kilometers southwest from SM Megamall and approximately 4.2 kilometers northeast from Makati's Central Business District.

Below is a satellite image courtesy of Google Map showing the Property and its relation to the immediate vicinity.

Note: Image courtesy of Google Maps.

2.2 The street plan below shows the location of the Property.



Neighborhood 2.3 The site forms part of Robinsons Cybergate Complex (RCC), a mixed-use development situated at the corner of EDSA and Pioneer Street. It boasts three (3) office towers, residential condominiums, a hotel and a retail mall. Meanwhile, other nearby developments include: Pioneer Woodlands Condominium, Pioneer Highlands, Globe Telecom Plaza and Light Residences by SMDC.

Accessibility 2.4 The Property is accessible thru the fronting Pioneer Street which in turn connects to the nearby EDSA, a major thoroughfare which provides access to various section of metropolis.

Public transportation such as buses and taxicabs are mainly available throughout the day along the nearby EDSA. MRT Line also runs along EDSA, a mass transport system linking the area to/from the business districts of Makati, Ortigas and Araneta Center.

Land Details

Lot Area Allocation 2.5 Based on information provided to us by the Client, the land area allocated for Robinsons Cybergate Tower 3 is approximately **2,582 square meters**.

Improvements and Machinery & Equipment

Improvements and Machinery & Equipment 2.6 The land is presently improved with an office building identified as "Robinsons Cybergate Tower 3", a twenty-seven (27)-storey, PEZA-registered, Grade A office building, construction of which was completed sometime in April 2008. Also covered by the valuation are the appurtenant Machinery & Equipment.

Draft Contract of Lease 2.7 We were provided by the Client a copy of a Draft Contract of Lease with ROBINSONS LAND CORPORATION, as the Lessor, and RL COMMERCIAL REIT, INC. (formerly Robinsons Realty and Management Corporation) [1], as the Lessee.

Based on the same document, the lease contract stated that it will cover Robinsons Cybergate Tower 3 with a gross floor area of 45,304.24 sq.m., reportedly excluding parking area. Lease term would be for a period of 99 years. It likewise specified that the monthly lease payments would be 7% of the monthly rental income gained from Robinsons Cybergate Tower 3 (plus VAT, as appliable).

2.8 The management of RLC disclosed that actual lease commencement shall be the date of the Certificate of Approval of the Increase in Authorized Capital Stock of RCR issued by the SEC. However, for valuation purposes, lease commencement shall be assumed on October 1, 2021.

In the absence of a signed contract, we used the foregoing details to establish the leasehold value of the Property.

Tenure 2.9 For purposes of this engagement, ownership rights to the Property is treated as **leasehold.**

Accommodation

Measurement 2.10 Based on the gross floor area tabulation provided to us by the client, the building has a total gross floor area of approximately **55,873.08 sq. m.**

2.11 The Gross Floor Area (GFA) is tabulated as follows:

Floor	GFA (sq. m.)
LG	2,101.24
GF	1,565.23
2F	2,116.90
3F	2,116.90
4F	2,116.90
5F	2,116.90
6F	2,082.81
7F	2,082.81
8F	2,082.81
9F	2,082.81
10F	2,082.81
11F	2,082.81
12F	2,082.81

[1] As of the date of this Valuation Report, application for the change in name from "Robinsons Realty and Management Corporation" to "RL Commercial REIT, Inc." is pending the approval of the Philippine SEC.

Condition

Scope of Inspection

2.12 As stated earlier, we have previously inspected the Property.

2.13 As stated in the General Terms of Business, during our previous inspection, we have not undertaken a building or site survey of the Property, as it is beyond the normal scope of appraisal.

2.14 Unless otherwise stated, we have not been able to carry detailed on-site measurement to verify the site and gross floor areas of the Property and we have no reason to doubt the truthfulness of the areas shown on the documents provided to us.

2.15 Moreover, due to the nature of the machinery, we have not carried out mechanical inspection, and our assessment was based on the premise that the machinery is in a condition commensurate with age and normal usage.

2.16 Building Machinery & Equipment as covered by the valuation are as complete units i.e., machinery and/or equipment are meant to include all parts and accessories normally comprising the unit.

Comments

2.17 Apart from the matters specifically referred to below, we have assumed that the Property is in sound order and free from structural faults, rot, infestation or other defects, and that the services are in a satisfactory condition.

2.18 The buildings and structures, including the machinery & equipment, were assumed to be in a generally good condition commensurate with their age and use. It was also assumed that there are no urgent or significant defects or items of disrepair which would be likely to give rise to substantial expenditure in the foreseeable future or which fall outside the scope of the normal annual maintenance programme.

Ground conditions 2.19 We have not been provided with a copy of a ground condition report for the site. We have assumed that there is no adverse ground or soil conditions and that the load bearing qualities of the site are sufficient to support the building.

Services

2.20 It would appear from our previous inspection that main supplies of electricity and water are provided to the Property. Telephone communication facilities are likewise available. Sewer and drainage are believed to be discharged to the building's sewerage system.

Tenancies

Tenancy Information 2.21 We have been provided with copy of some of the rent roll including some of the lease contracts by the Client and have relied on that information as being correct. No additional verification has been undertaken.

2.22 A summary of the Property tenancies is presented below.

TENANT	LEASED AREA (GROSS, in sq.m.)	Lease Contract Start	Lease Contract End
Tenant 1	84.73	09-May-13	08-May-23

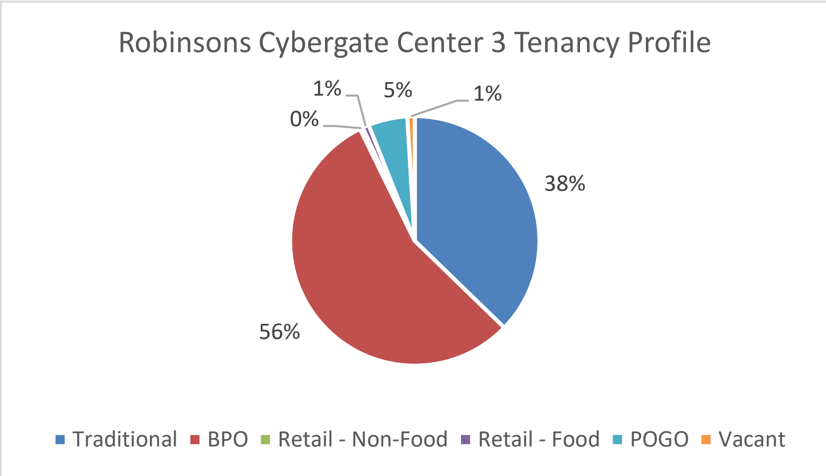
2.23 Based on the rent roll provided, total leasable area is **44,614.34** sq.m. with **178** parking slots available for lease.

2.24 The Property currently has a mix of traditional offices, Business Process Outsourcing (BPO) companies, Philippine Offshore Gaming Operators (POGOs) and some retail tenants. Based on the figure below which summarizes the tenancy profile of the Property, BPOs currently take up 56% of the Property's leasable area followed by traditional offices at 38% and the POGOs takes up around 5% of leased area.



Source: SKF/ RLC

2.25 As of 30 June 2021, the Property is 99% occupied with a Weighted Average Lease Expiry (WALE) of 2.66 years. Earliest period with an expiring lease is 2021 with 25% of total leased area, followed by 2022 with 5% of the leased area with expiring leases. Next period a sizeable leased area would be expiring would be in 2023 and 2025 with 15% and 49% of leased area respectively.

Source: SKF/ RLC

2.26 Below are some of the provisions as stated in the Lease Contract.

a. **Care of the Leased Premises**

The LESSEE shall at its expense, maintain the Leased Premises in a clean and sanitary condition, free from noxious odors, disturbing noises or other nuisances and, upon the expiration of the lease, shall return the premises and fixtures in as good condition as that in which they were actually found at the beginning of the lease, ordinary wear and tear excepted. The LESSEE shall not drive nails, screws, hooks or other abutments on or into the wall's frames or other portions of the premises or in any manner deface or damage any part thereof. Any damage caused by the LESSEE may be repaired by the LESSOR for the account of the LESSEE. The LESSOR shall have the right to require the LESSEE to remove any display or promotional matter, or any displayed merchandise which LESSOR reasonably and in good faith considers to be improper or inappropriate for the general appearance or presentation of the premises.

The LESSOR shall be responsible for major repairs which are limited to those which affect the structure of the Leased Premises or the building. The LESSEE shall allow access to the LESSOR on the Leased Premises for purposes of repair or remodelling or such other works as may be necessary for the preservation, conservation, improvement or decoration of the building or any part thereof. No compensation or claims shall be allowed against the LESSOR by reason of any inconvenience or annoyance to the LESSEE that may arise by reason thereof.

The LESSEE shall promptly repair, at its own expense, any damage to the Leased Premises or any other improvements within the building caused by bringing into the Leased Premises of any property for the LESSEE's use, or by the installation or removal of such property, regardless of who is at fault or who caused such damage. unless such was clearly caused by the LESSOR, or its agents or employees. In default of such repairs by the LESSEE, the LESSOR may affect the repairs and the LESSEE agrees to promptly pay the LESSOR the cost of such repairs. The LESSEE shall be responsible for the maintenance and repair of the Leased Premises including plumbing and electrical fixtures within the premises or those serving the same.

The LESSEE must notify the LESSOR immediately of any damage to the Leased Premises, their appurtenances as well as any occupation, usurpation or untoward act being committed, or threatened to be committed, within the Leased Premises.

No machinery, furniture, effect, equipment and other properties found within the Leased Premises, whether or not owned by the LESSEE, may be brought into or out of the building without the prior written approval of the LESSOR. Furthermore, in case the LESSEE has any outstanding/unsettled rent, dues or other charges, the LESSOR reserves the right to withhold approval of any request for bringing in or out of any machinery, furniture, effects or other properties found within Leased Premises, whether or not owned by the LESSEE, until such outstanding amounts have been duly settled by the LESSEE. This is without prejudice to such other rights and remedies available to the LESSOR under prevailing laws or the Contract. including these General Terms and Conditions.

The immediately preceding paragraph shall also apply in the event of transfer of machinery, furniture, effects or other properties found within the Leased Premises from one unit to another unit in the building being leased by the LESSEE whether or not the latter unit is owned by the LESSOR. In the event that the unit where the properties to be transferred is not owned by the LESSOR, the written consent of the unit owner shall also be required.

The LESSEE shall further maintain the Leased Premises in a clean condition by utilizing plastic bags for the disposal of both dry and wet garbage. Unless garbage is contained in plastic bags, it will not be allowed to be deposited in the authorized depository for collections.

b. **Sublease, Transfer of Rights**

The LESSEE shall not assign or transfer its rights in the Contract nor sublease or sublet all or any part of the Leased Premises, without the prior written consent of the LESSOR and no rights, title or interest thereto or therein shall be conferred on or vested to anyone other than the LESSEE without such prior written consent. Otherwise, subleasing the leased Premises without the prior written consent of the LESSOR shall be deemed a breach of the contract by the LESSEE and shall be subject to the rights and remedies available to the LESSOR under prevailing laws and Contract, including these General Terms and Conditions. In the event of sublease with or without the prior written consent of the LESSOR, the LESSEE shall remain principally liable. However, the LESSOR shall have the right to exercise such remedies embodied in the Contract, the General Terms and Conditions and under prevailing laws, as against the sublessee in order to protect its right and interests.

Only the LESSEE has the right to use the Leased Premises as its official address to be registered with any government entities for the issuance of necessary permits and licenses for its business operations.

Should the LESSOR give the LESSEE its consent to sublease the Leased Premises, the LESSEE cannot sublease the Leased Premises for the period longer that the Contract of Lease between the LESSOR and the LESSEE.

It is expressly understood that the LESSEE has no goodwill or patronage rights over the Leased Premises; that such rights belong exclusively to the LESSOR, being the owner of the Leased Premises, which forms part of the building; and that the LESSEE may not sell or dispose of said goodwill or patronage rights to any person.

c. **Assignment of Rights/Mortgage/Encumbrance**

The LESSOR reserves the right to assign and convey or mortgage or otherwise encumber its rights to this lease in favor of any affiliate or subsidiary or to any party. In the event of any assignment, conveyance, mortgage, or encumbrance of the Leased Premises, the LESSOR binds itself to require the assignee or mortgage or beneficiary of the encumbrance to respect and abide by all the terms and conditions of the Contract, as well as these General Terms and Conditions.

Roadways and Access

Roadways

2.27 Pioneer Street is mainly 15 meters wide, concrete paved and provided curbs and gutter, cemented sidewalks and underground drainage system.

2.28 Our informal enquiries with the City Assessor's Office - Tax Mapping Division confirmed that the Property enjoys frontage along Pioneer Street.

Access

2.29 In reporting our opinion of value, we have assumed that there are no third-party interests between the boundary of the Property and the abutting roads and that accordingly the Property has unfettered vehicular and pedestrian access.

Environmental Considerations

Flooding

2.30 From our enquiries with the City Planning Office, we have ascertained that the Property is not within an indicative floodplain and that there is therefore a minimal risk of flooding.

Contamination

2.31 As stated in the General Terms of Business, investigations into environmental matters would usually be commissioned from suitably qualified environmental specialists. Santos Knight Frank, Inc. is not qualified to undertake scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination.

2.32 Subject to the above, while carrying out our valuation inspection, we have not been made aware of any uses conducted at the Property that would give cause for concern as to possible environmental contamination. Our valuation is provided on the assumption that the Property is unaffected.

Highest and Best Use

2.33 "*Highest and Best Use*" is defined as the most profitable likely use to which a property can be put. The opinion of such use may be based on the highest and most profitable continuous use to which the Property is adapted and needed, or that use of land which may reasonably be expected to produce the greatest net return to land over a given period of time. Alternatively, it is that use, from among reasonably probable and legal alternative uses, found to be physically possible, appropriately supported, financially feasible, and which results in highest land value.

2.34 Considering the Property's size, shape, topography, current zoning classification and the prevailing land uses and development in the area, we are of the opinion that the **existing commercial development** would represent the highest and best use of the Property.

3 Market Analysis

Philippine Market Commentary

3.1 Shown below is SKF's latest **Metro Manila Office Market Update**.

Source of Information

3.2 Our market analysis has been undertaken using market knowledge within Santos Knight Frank, Inc., enquiries of other agents, searches of property databases, as appropriate and any information provided to us.

OFFICE RENT ROLLBACKS CUSHION INCREASING VACANCIES

General Overview

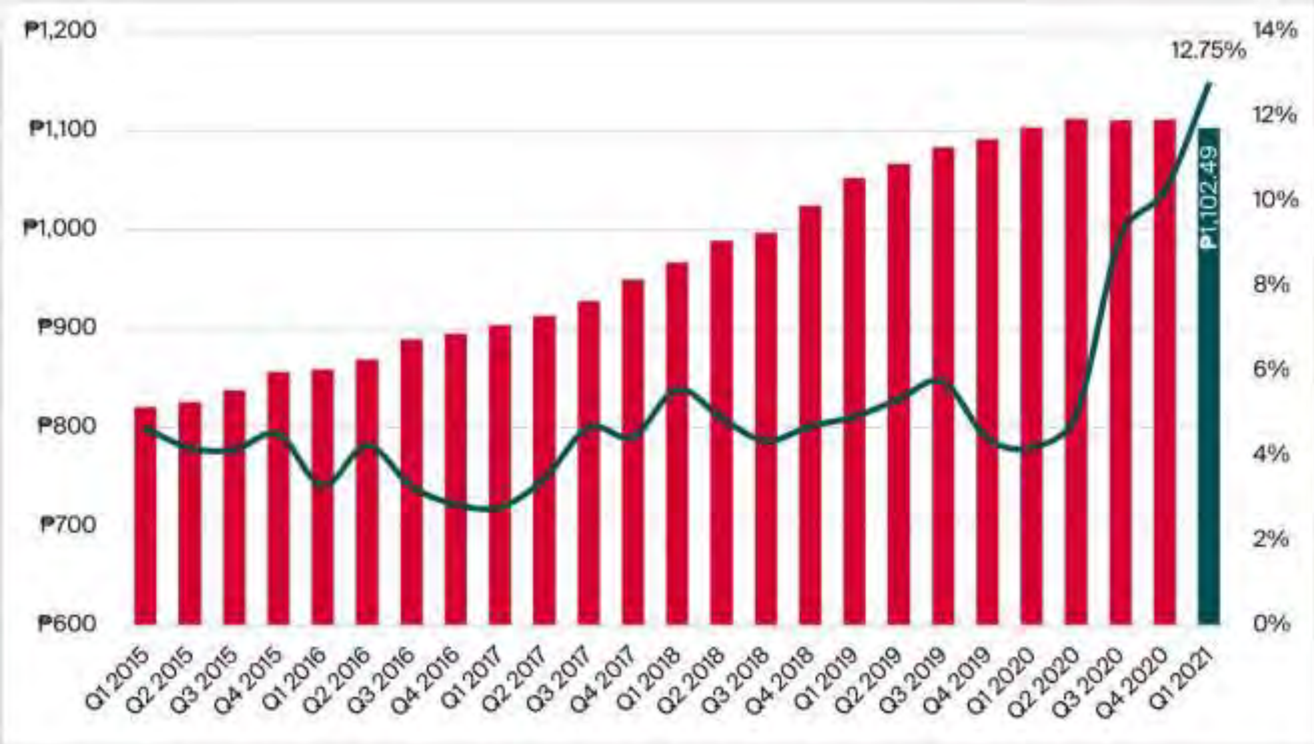
The Metro Manila office market displayed modest market movement at the start of 2021 owing to the sluggish demand driven by the market uncertainties caused by changing lockdown scenarios in Metro Manila. Landlords were challenged to remain relevant as potential occupiers continued to take a cautious approach caused by the growing COVID-19 cases and slow vaccine roll-outs.

Still, new office spaces were introduced during the quarter as developers capitalized on the relaxed quarantine measures to resume their halted construction activities. The local office market supply grew by 163,136 sqm of Grade A office space that mostly catered to IT-BPO companies. Several buildings were completed in Fort Bonifacio, Bay Area, and Quezon City, resulting in an overall office supply in Metro Manila of about 6.9 million sqm.

Consequently, supply growth resulted in an increase in vacancies throughout the metropolis. Office vacancy rates in Metro Manila further spiked to 12.75%, the highest since 2009. Current and potential occupiers remained vigilant towards the health situation of the country. Numerous companies continued to implement Work-From-Home and skeletal workforce arrangements. Office take-up contracted by 28,696 sqm as locators reassessed their need for spaces amid their bid to reduce operational costs.

Monthly average lease rates in Metro Manila further dipped to PHP 1,102.49 per sqm, declining by 0.78% quarter-on-quarter (q-o-q) and 0.07% year-on-year (y-o-y). The downward trend of rents was caused by the landlords' bid to provide more competitive packages to appeal to prospective tenants.

Figure 1. Metro Manila Historical Lease & Vacancy Rates



Source: Santos Knight Frank Research

Makati

The adverse effects of the pandemic and the prolonged lockdowns remained evident in the most prominent business district in the country. Vacancy rates spiked to 11.17%, considered to be the highest in the past ten years. Moreover, the expensive rents in Makati CBD were detrimental to the retention of office occupiers. Locators looking to minimize their expenses opted to discontinue their lease, resulting in about 25,557 sqm of office space vacated during the quarter.

Sluggish leasing activity persisted in the area as existing and upcoming locators in Makati were less willing to take up spaces due to the financial distress brought about by the global pandemic. The average monthly rents recorded in Makati went down to PHP 1,348.19 per sqm, contracting by 0.93% q-o-q and 6.05% y-o-y. Despite this, rates in Makati remained the highest in the metropolis.

Several property players are still looking forward to the materialization of their projects in the pipeline. More than 447,552 sqm of Prime and Grade A office supply are anticipated to come online in the next three years, with approximately 164,000 sqm being operational by the end of 2021. The massive influx of upcoming office developments in Makati comes from the backlogs and spillovers from 2019 up to the latter part of 2020.

Taguig

Slow demand in Taguig was also evident as vacancy levels continuously increased to 8.37% from 7.74% in Q4 2020. Despite having the largest supply share in Metro Manila of more than 2 million sqm, the downsized space requirements were seen as the factor in the rising vacancies as locators looked to lessen their operational cost. Moreover, average monthly rental rates in Fort Bonifacio also went down to PHP 1,289.75, translating to a contraction of 0.89% q-o-q.

The ease in quarantine measures allowed private and public projects to resume construction. Office supply in Fort Bonifacio further grew by 28,000 sqm through the completion of BGC Corporate Center 2. Despite the growing vacancy levels, potential developers still have bright prospects in Taguig as it was seen as the youngest but fastest growing business district in Metro Manila. In line with this, upcoming office supply is seen to be augmented by about 864,100 sqm of office space within the next five years. About 344,000 sqm of this will be coming from Arca South which is poised to become a new business district in the south.

Bay Area

The POGO industry exodus has significantly contributed to the spiking vacancy levels in the Bay Area during Q1 2021, recorded at 12.82%. Slower demand from the sector is seen in the coming periods as more firms have started to postpone their lease contracts. This occurrence implied challenges in the recently fast-moving office market of the Bay Area.

The upsurge in vacancy was also attributed to the completion of Four E-com during the quarter with an additional 89,132 sqm of Grade A office space. Priced above its competitors, this building has helped in pushing the average rents in the area to PHP 1,083.41 per sqm, increasing by 1.66% q-o-q.

The Bay Area is still foreseeing a huge amount of upcoming office supply in the coming years. Developers still recognize the opportunity to invest in the area due to its accessibility and availability of developable land. Approximately, 578,800 sqm of office developments are anticipated to be introduced in the market for the next five years, while 258,000 sqm are expected to become operational by the end of 2021.

Ortigas Center

Vacancy levels in Ortigas Center gradually eased to 12.75% in contrast to 12.88% of the preceding quarter. Despite this, pre-terminated contracts and non-renewals were still observed, as most of the companies are still on a wait-and-see approach towards the office market. Meanwhile, the slow-moving leasing transaction was also felt in the district as the rental rates went down to PHP 806.29 per sqm, contracting by 1.15% q-o-q and still considered the lowest as compared to other major CBDs in the metropolis.

Moreover, the upcoming office supply in Ortigas Center remained high as more than 671,000 sqm of Prime and Grade A office spaces are slated to introduce in the next five years. In addition, the massive influx of 373,000 sqm of space is scheduled to commence their operations within the year such as Cyber Omega, SM Mega Tower, and Jollibee Tower. This includes the spillover from 2019 up to the remaining quarters of 2020 that has been halted due to subsequent lockdowns.

Quezon City

Vacancy rates in Quezon City spiked up to 20.64% as opposed to 16.21% of the preceding quarter, indicating the highest level across all of Metro Manila. Approximately 13,690 sqm of office spaces were freed up in the city during the quarter. Occupiers in the area were more sensitive to the health crisis as compared to locators in other districts The lack of recognized established business districts and limited connectivity of certain townships contributed to the slow demand in the area. Furthermore, the upsurge in vacancy levels was also driven by the opening of SM North Towers 1 and 2 that added more than 45,200 sqm in the massive office supply in Quezon City, and are yet to lease out the majority of their spaces.

Office landlords are trying to alleviate this downtrend and are still vying to mitigate lease terminations. To this end, average headline rates contracted to PHP 925.55 per sqm, translating to a 1.81% decline from the preceding quarter.

Albeit the fast-growing vacancy levels, Quezon City is still expecting a large office supply boost in the coming years. Approximately, 333,700 sqm is anticipated to be introduced in the market in the next five years, in which more than 149,000 sqm will be coming from SM Prime Holdings.

Alabang

Similarly, Alabang CBD experienced rising vacancy levels in Q1 2021 at 16.07% from 14.53% in the preceding quarter. As a result, increased pressures on office landlords in the district were felt as they remain responsive to the slow movement in the office market. This caused rental rates to gradually contract to PHP 846.76 per sqm.

Alabang still holds on to the possibility of becoming one of the major investment hubs in the metropolis due to its vast developable land. Approximately 209,900 sqm of upcoming Grade A office space is anticipated to be operational in the next five years, while 13,800 sqm is slated to become operational by 2021.

Figure 2. Metro Manila Lease & Vacancy Rates per CBD

Source: Santos Knight Frank Research

Office Outlook

The easing quarantine measures that started in the second half of 2020 allowed the developers to restart their impeded construction activities. Developers remain bullish in expanding their office footprint in Metro Manila with more than 3 million sqm of office space are slated to operate in the next five years. The nation's economic center is also set to have an additional supply of 1.1 million sqm of Prime and Grade A office space by the end of 2021. This massive influx still stems from the construction backlogs from the developers in 2020.

The robust expansion of office supply in Metro Manila is seen to further propel the vacancy rates in the local office market in the coming quarters. Along with the stagnant office demand, downward pressure on office rents still expected. Office landlords will be forced to implement more flexible payment terms to existing and potential tenants to market their spaces and continue cash flow from their buildings.

The recovery of the office market is also dependent on the pace of vaccine roll-outs in the country. The slow pace in inoculations is seen to weigh down on the recovery of the market. Attaining herd immunity as soon as possible can reinvigorate the interest in the office market.

In the medium- to long-term Green Buildings are seen to gain a competitive edge compared to ordinary office buildings. Buildings accredited by the US Green Building Council (LEED) and the Philippine Green Building Council (BERDE) will be more sought-after for potential office locators. The efficient design that provides better air circulation, ventilation and filtration, and increased open space, will be more appealing to the market as it puts a premium on the health and well-being of its tenants.

4 Valuation Methodology

Valuation Rationale

4.1 The purpose of this appraisal is to estimate the Market Value of the Property. In any given valuation exercise, market value can be arrived at using either one or a combination of the three (3) approaches to value, namely: Market (or Direct Sales Comparison) Approach, Income Approach, and the Cost Approach. The determination of the appropriate approach for a given property is based on the quality and quantity of data available, particularly its relevance to the Property under appraisement. If more than one valuation approach is utilized, the resulting values are reconciled to produce a final value conclusion.

4.2 For purposes of this appraisal, since coverage is leasehold rights only, the Income Approach to value is deemed the most appropriate to use.

4.3 Based on the foregoing, we are to render our opinion on the following:

a) Leasehold Value of the Property
b) Market Value of the Property Using Income Approach

4.4 **Leasehold Value of the Property**

As mentioned, the Property subject of this appraisal is covered by a Lease Contract. In estimating the value of the Property covered by a lease, two interests are involved: the interest of the lessee which is the leasehold; and the interest of the lessor which is the leased fee or the lessor's interest. The client being the lessee, the purpose of this appraisal is to establish the leasehold value of the subject Property.

Leasehold Value is the present (discounted) worth of the rent savings (or rental gains) when the contract rent at the time of the appraisal is less than the current market rent. It is estimated by computing the present worth of the rental gains over the remaining term of the lease agreement using an appropriate discount rate.

The valuation process, briefly stated, consists of the following:

- Estimation of the current market rent of the leased Property;
- Estimation of the rental gains over the remaining term of the lease agreement, if any. Rental gains projection is pegged at 10 years while the 11^{th} year rental gain is used to estimate the terminal value of the Leasehold Rights on the Property;
- Estimation of an appropriate discount rate and terminal capitalization rate; and
- Discounting process based on an appropriate discount rate to arrive at an indicated leasehold value.

Market Rent of the Land

4.5 As mentioned earlier, this report renders an estimate of the Market Rent of the Property if it were to be leased out in accordance with its highest and best use.

The amount of annual or monthly rental, which the Property should command might be estimated by any, or a combination of the following:

1. By Market (Comparison) Approach, in which rentals of similar properties are used a benchmark; and
2. By Income Approach, in which the value of the Property is first established, and the proper capitalization rate is applied to obtain its rental value.

On the other hand, Market Rent is defined under IVS 2019 as "the estimated amount for which an interest in real property should be leased on the valuation date between a willing lessor and a willing lessee on appropriate lease terms in an arm's length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

It is the rental income that the Property would most likely command in an open market. It is also defined as being the amount at which a willing lessee would pay and a willing Lessor would receive for the use of certain property, neither being under compulsion to transact, and both having reasonable knowledge of all relevant facts.

Market Approach

4.6 We have made a survey of existing ground leases of similar lands in the vicinity of the Property and found scarcity of rental data that may be used for direct comparison purposes.

Income Approach

4.7 In the absence of any comparable rental data, we have estimated the **Market Rent** of the Property by a variation of the Income Approach on the basis of what prudent real estate investors or property owners would be warranted in leasing it in order to realize a fair return on their investment or property, for that matter. Under this approach, the market value of the Property is first established, and the proper capitalization rate is applied to obtain its rental value.

Market Value of the Land

4.8 In valuing the land, we made use of the Market Approach which is the most common technique for valuing land, and is the most preferred method when comparable sales are available. With this method, sales of similar property or parcels of land are analysed, compared, and adjusted to provide a value indication for the Property being appraised. The comparison process is based on an analysis of the similarity or dissimilarity of the comparables.

4.9 The appraiser gathers data on actual sales as well as listings and identifies the similarities and differences in the data; ranks the data according to their relevance; adjusts the prices of the comparables to account for the dissimilarities with the land being appraised; and forms a conclusion as to the most reasonable and probable market value of the subject Property.

4.10 The elements of comparison include property rights, financing terms, conditions of sale (motivation), market conditions (sale date), location, physical characteristics, available utilities, and zoning. The most variable elements of comparison are the site's physical characteristics, which include its size and shape, frontage, topography, location, and view. The units of comparison applied may be hectares or sq.m., or any other unit used in the market.

Evidence of comparable properties

4.11 **Analysis of Comparable Properties Offered for Sale**

In the course of our investigation, we looked at current market listings of comparable properties in the area. The comparable properties selected share the same or similar characteristics as the subject. Whatever information or data we came up with was then analysed, and comparison made for such factors as size, characteristics of the lot, location, quality, and prospective use. In the Philippines however, property transactions are not officially disclosed, and quite often, actual transaction price is masked by other undisclosed arrangements and different from the figure shown on the sale and purchase agreement. We have therefore made reference to the following data, made our market judgment, and adjusted for the above-mentioned factors:

1. A commercial lot with an area of 864 sq.m. located along EDSA extending to Sierra Madre Street, beside Richville Hotel, within Barangay Highway Hills, Mandaluyong City, is currently offered for sale at an asking price of PhP275,000,000 or about PhP318,287 per sq.m.
   Source: Avelina Panes-Acuna – 0917.249.5588

2. A commercial lot with an area of 2,306 sq.m. located along Shaw Boulevard, within Barangay Bagong Silang, Mandaluyong City, is currently offered for sale at an asking price of PhP853,220,000 or about PhP370,000 per sq.m.
   Source: Kenneth Endaya – 0936.110.9325

3. A commercial lot with an area of 300 sq.m. located along Shaw Boulevard, within Barangay Kapitolyo, Pasig City, is currently offered for sale at an asking price of PhP75,000,000 or about PhP250,000 per sq.m.
   Source: Joanna Aggusi – 0936.951.0219

Summary of Adjustments

The Data Comparison Grid shown on Appendix **8** shows a summary of the aforementioned adjustments, which provides an indication as to the degree of adjustment made to the different elements in comparison. A numeric indicator indicates the level of adjustments, in terms of percentage when compared with the subject property. The use of (-) indicates a negative adjustment and a + indicates a positive adjustment. A downward adjustment (-) used is made to reflect superior characteristics of the comparable sale/listing, while an upward adjustment + reflects inferior characteristics of the comparable sale/listing. Finally, a 0 is used to confirm similarity between the comparable sales/listings and the subject or is used when market information is unavailable or does not support an adjustment for any particular element of comparison.

Value of the Land

4.12 As reflected in the said Comparison Grid, the value of the land is estimated at **PhP218,000 per sq.m.**, or a total of, say, **PhP563,000,000** for a land area of **2,582 sq.m.**

Market Value of the Improvements

4.13 The estimate of the improvements can be either replacement or reproduction cost, new. Replacement Cost, New is defined as "The cost of construction, at current prices, of a building having utility equivalent to the building being appraised but built with modern materials and according to current standards, design, and layout." On the other hand, Reproduction Cost, New is defined as "The cost of construction, at current prices, of an exact duplicate, or replica, using the same materials, construction standards, design, layout, and quality of workmanship, and embodying all the deficiencies, super-adequacies, and obsolescence of the subject building."

In estimating the Replacement Cost of the buildings and improvements, we have made reference to the building cost index or other building cost as available in the market or published by a reputable quantity surveyor firm. We have likewise referred to our own database of building construction costs. We do not hold ourselves to be construction cost advisers and a formal estimate can only be given by a specialist construction cost consultant. It is recommended that a professional quantity surveyor or a firm of professional quantity surveyors should be consulted in order to assess an accurate building/improvement replacement cost.

In arriving at our assessment using the Cost Approach for the Equipment, we first developed the Replacement Cost, New ("RCN") of the asset. In developing our RCN, we have obtained current cost information from equipment dealers in the region. We relied on data furnished by equipment manufacturers, dealers and importers, as well as information contained in price catalogues, other published materials including the Internet and inquiries from local suppliers.

RCN is the estimated amount of money needed to acquire a similar new item having the nearest equivalent utility as the Property being valued taking into consideration current prices of materials and manufactured equipment, shipping and handling, labour, contractor's overhead, design and supervision, profit and fees, and other attendant costs associated with its acquisition and installation, but without provision for overtime or bonuses for labour and premium for materials.

Having developed the RCN, we then deducted for the various elements of depreciation to arrive at the Depreciated Replacement Cost ("DRC"). DRC includes depreciation allowance or loss of value arising from condition, utility, age, wear and tear, and obsolescence present (physical, functional or economic), taking into consideration past and present maintenance policy and rebuilding history.

General
Where elements are of foreign origin, the assessment process give full consideration to all expenditures normally incurred in importation such as packing and crating charges, inland and ocean freight, insurance, duties and taxes, bank charges and commissions, wharfage, brokerage and handling.

In estimating the depreciation of the assets, we have utilized the age-life method tempered with our observed condition of the assets.

Value of the Improvements and Equipment

4.14 Based on the foregoing, the value of the improvements and equipment may be summarized as under:

	Market Value
Cybergate Tower 3 Building	PhP1,125,400,000
Building Machinery & Equipment	264,215,000

Total	**PhP1,389,615,000**

Rate of Return

4.15 The value of the Property having been established, its rental value may now be estimated considering the prevailing rate of return prudent investors or Property owners would expect in leases, normally in the range of 4% to 7%. We based this range of rate of return from interviews with property owners and brokers, as well as our analysis of the relationship between prevailing capital values and rental rates and it is believed to be the current yield in the commercial lease market.

Considering the most recent pandemic and the effect it had on the economy and the leasing market, we have not adopted the average rate of return, and have instead adopted a conservative interest rate (return on investment) of 4% on both the land and the improvements. We then added a recapture rate (return of investment) for the improvements. The Recapture Rate takes into consideration the remaining economic life of the improvements or the estimated number of years the investor (or owner) needs to recoup the cost of its investment before the improvements outlive its usefulness.

In light of the foregoing, our estimate of the Market Rent of the Property is as follows:

	Area	Market Value	Annual Rate of Return		MARKET RENT	
					Annually	**Monthly**
Land	2,582.00	563,000,000	4.00%		**22,520,000**	**1,876,667**
Improvements and Equipment	55,873.08	1,389,615,000	7.51%		**104,343,000**	**8,695,250**
					-------------------	------------------
					126,863,000	**10,571,917**
					==========	=========

Market Rent of the Property

4.16 On the basis of the foregoing, the Market Rent of the Property is estimated at **PhP10,571,917 per month**, or say, **PhP126,863,000 per annum.**

Rental Gain

4.17 Rental Gain is reckoned as the difference between the Market Rent and the Contract Rent.

Discount Rate

4.18 The discount rate was computed using the build-up method. The discount rate is calculated by adding together different variables. The variables that were used to generate it consist of a risk-free rate and a reasonable risk premium. Based on the foregoing, discount rate is estimated at 8.8665%, or say, 9.0% (10-year T-bond rate at about 3.9165% (from Philippine Dealing & Exchange Corporation (PDEx) as of 30 June 2021) plus 3% equity risk premium from OECD and additional 0.25% risk premium for unidentifiable risk factors which include the uncertainty brought about by the Covid-19 global pandemic, plus 0.80% management risk and 0.90% liquidity risk).

Risk Free Rate

For purposes of this valuation, we have adopted, as risk-free rate, the 10-year T-bond rate from PDEx. The Philippine Dealing & Exchange (PDEx) system appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEx. The PHP BVAL Reference Rate dated 30 June 2021 was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

Equity Risk Premium

4.19 We have adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3% plus an additional 0.25% risk premium for unidentifiable risk factors. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits
Valid as of: 25 June 2021

			Classification		
nb	Country Code ISO Alpha 3	Country Name (1)	Previous	Current Prevailing	Notes
138	PLW	Palau	-	-	(5)
139	PAN	Panama	4	4	(8)
140	PNG	Papua New Guinea	6	6	
141	PRY	Paraguay	5	5	
142	PER	Peru	3	3	
143	PHL	Philippines	3	3	
144	POL	Poland	-	-	(6)
145	PRT	Portugal	-	-	(6) (7)

Management & Liquidity Risk

4.20 The Management Risk refers to the estimated premium to compensate for the burden of management, while the Liquidity Risk refers to the ease (or the difficulty) with which an investment can be sold or made. A review was done and we have arrived at the following: Management Risk was classified into four categories, with the corresponding rates: Poor – 1.2; Average – 1.0; Above Average - 0.90 and Excellent - 0.80 while Liquidity Risk has three (3) categories: Poor –1.2; Average – 1.0; and Good – 0.90. After the said review, we deemed it appropriate to use 0.80% for Management Risk and 0.90% for Liquidity Risk.

Capitalization Rate

4.21 Capitalization rate adopted to arrive at the terminal value is 4.5% (Discount Rate less Projected Long-term Growth Rate (4.5%). The long-term growth rate is based on a growth forecast of the prevailing commercial market over the forecast period. This is based on what the Property is perceived to achieve in the long-term considering the present situation of the market.

Remaining Life of the Lease

4.22 Remaining life of the lease as of the date of valuation is 99 years.

Summary of Leasehold Assumptions

4.23 In summary, below are the assumptions/statistics used in determining the leasehold value of the subject land.

CYBERGATE TOWER 3			
Lease Details			
Lot Area	:	2,582.00	sq.m.
Term of Lease	:	99	years
Assumed Commencement Date	:	01-Oct-21	
Lease Rate	:	7%	of net leasing revenue
Market Rent (in PhP)			
Monthly Rent	:	10,571,917	/sq.m./ month
Annual Rent	:	126,863,000	
Annual Escalation	:	3%	starting Y2
Discount Rate			
Risk Free Rate		3.92	as of June 30, 2021 (BVAL PDEX)
Risk Premium		3.00	as of June 25, 2021 (OECD)
Management Risk		0.80	
Liquidity Risk		0.90	
Additional Risk		0.25	risk premium for unidentifiable risk factors
		8.87	
Resulting Discount Rate, say		9.00%	
Terminal Capitalization Rate		4.50%	

Leasehold Value

4.24 On the basis of the foregoing, the leasehold value of the Property may reasonably be estimated at **PhP1,995,000,000**.

We attach a copy of our valuation calculations at Appendix **5**.

Income Approach

Definition 4.25 The Income Approach is applicable to the valuation of income producing properties, business enterprise as well as the valuation of intangible assets. This approach measures the current value of an asset by calculating the present value of its future economic benefits by discounting expected cash flows at a rate of return that compensates the risks associated with the particular investment.

For this particular engagement, we have applied both the Discounted Cash Flow Analysis and the Direct Capitalization Method.

Discounted Cash Flow Analysis 4.26 The discounted cash flows, or DCF valuation is the most popular fundamental approach in valuing the future economic benefits of a projected income stream. DCF measures actual yield rather than paper income for the asset/business owner and the analysis of DCF is widespread and mandatory in the various fields of business making DCF-based valuation ideal.

4.27 The valuation process, briefly stated, consists of the following:

- Estimation of the revenues generated;
- Estimation of the costs and expenses related to the operations of the development;
- Estimation of an appropriate discount rate;
- Discounting process using an appropriate discount rate to arrive at an indicative market value; and
- Estimation of the Terminal Value of the Property.

Discount Rate 4.28 The discount rate was computed using the build-up method - calculated by adding together the different variables. The basic formula for the traditional build-up model is:

Discount Rate = Rf + P + MR + LR

Where	Variable	Proxy Statistic
Rf	Risk Free Rate	PDEX Risk Free Rate
P	Equity Risk Premium	Country Risk
MR	Management Risk	
LR	Liquidity Risk	

The variables that were used to generate the Discount Rate are exhibited in the table below, along with the sources and/or dates as at or nearest the 30 June 2021 valuation date.

Risk Free Rate (10Y)	3.92%	As of 30 June 2021, BVAL PDEX
Equity Risk Premium	3.25%	As of 25 June 2021, OECD
Management Risk	0.80%	
Liquidity Risk	0.90%	

4.29 The following assumptions were used to arrive at the Discount Rate using the Build-Up Method.

Risk Free Rate

4.30 For the purposes of this valuation, we adopted the 10-year bond rate sourced from Philippine Dealing & Exchange Corporation (PDEX) as of 30 June 2021 - the valuation date (image shown below). The Philippine Dealing Exchange (PDEx) system has recently appointed Bloomberg as technology partner for the electronic trading and surveillance system for the government and corporate bonds traded in its market. PHP BVAL Reference Rates replaced the PDST Reference Rates which were then calculated and published daily by PDEX. The PHP BVAL Reference Rate was used for this valuation exercise.

Tenor	BVAL Rate Today	BVAL Rate Previous Day
1M	0.8981	0.9165
3M	1.1717	1.1754
6M	1.4023	1.4000
1Y	1.6028	1.6037
2Y	1.9521	1.9525
3Y	2.3365	2.3422
4Y	2.6901	2.6944
5Y	3.0167	3.0180
7Y	3.5098	3.5138
10Y	3.9165	3.9205
20Y	4.9661	4.9643
25Y	4.9640	4.9633

Equity Risk Premium

4.31 We used an equity risk premium of 3.25%. We adopted the country risk premium estimated by the Organisation for Economic Co-operation and Development (OECD) at 3% plus an additional 0.25% risk premium for unidentifiable risk factors. The Country Risk Classification Method measure the country credit risk and is based on two components: the Country Risk Assessment Model which produces a qualitative assessment of the country credit risk based on the payment experience of the participants, their economic and financial situation; and the qualitative assessment of the Model which considers the political risk and other risk factors. Shown below is an excerpt of said table.

Country Risk Classifications
of the Participants to the Arrangement on Officially Supported Export Credits

Management & Liquidity Risk

The Management Risk refers to the estimated premium to compensate for the burden of management, while the Liquidity Risk refers to the ease (or the difficulty) with which an investment can be sold or made. A review was done and we have arrived at the following: Management Risk was classified into four categories, with the corresponding rates: Poor – 1.2; Average – 1.0; Above Average - 0.90 and Excellent - 0.80 while Liquidity Risk has three (3) categories: Poor –1.2; Average – 1.0; and Good – 0.90. After the said review, we deemed it appropriate to use 0.80% for Management Risk and 0.90% for Liquidity Risk.

Resulting Discount Rate

4.32 Resulting Discount Rate used for this valuation is 8.87%, or say, 9.0%.

Capitalization Rate

4.33 A discount rate is used to calculate the present value of future projections of a benefit stream when growth varies from year to year. However, if growth is estimated to remain level throughout the life of the investment, a capitalization rate is often used. In its most basic form, the relationship between discount rate and a capitalization rate can be summarized as follows:

Capitalization Rate = Discount Rate – Growth

For purposes of this valuation, a long-term growth rate of 4.5% has been assumed. This is based on what the Property is perceived to achieve in the long-term considering the present situation of the market. Using this assumption, resulting Capitalization Rate would be 4.5%.

Key Financial Assumptions

4.34 We relied on the historical and projected assumptions brought about by our research and as provided by the client. These financials were analysed to ensure reasonableness by comparing projected revenue growth rates and other operating expenses based on historical performance. Based on interviews with the representatives of the company, projections were prepared to reflect the current and expected future market conditions.

a. **Revenues**

i. Cashflow projection starts in 01 July 2021 and runs for a period of 10 years.

ii. The revenues come from the rental of retail units, office units and parking slots. In estimating the annual rents of the subject units/slots, we have adopted the contract rents as appearing in the copy of the rent roll provided to us by the client for the occupied units/leased parking slots. After the expiration of lease, lease rates then are aligned with market rates and are assumed to have an average of 4-year lease contracts. Aside from the monthly rentals from leasable areas, revenues likewise include Management and Aircon Dues which are likewise charged to the tenants monthly on a per sq.m. basis. Management dues are for common and/ or shared utilities, facilities and

services. These are inclusive of air-conditioning equipment rental during office hours (but exclusive of power consumption).

iii. It would be important to note that as the building administrators, they collect the said dues as a cost recovery mechanism for all expenses related to the day-to-day operations of the building and its common areas.

iv. Occupancy assumptions were based on the actual performance of the Property as well as the prevailing trend in the subject area taking into consideration the forecasted effect of the global pandemic in the office market. Occupancy of the Property as of valuation date is at 99% while the historical average performance of the Property for the last two years is at 99%. Occupancy rates include committed leases. For this valuation exercise, we are assuming an average overall vacancy allowance of 3%. This assumed vacancy allowance for the whole cashflow period is used to account for unanticipated vacancies brought about by early terminations and non-renewals, and rental concession requests from tenants.

v. We used actual escalation rates indicated in the rent roll for all existing leases up until their lease expires. After which, an average escalation of 5% was then be applied year on year until the end of the cash flow.

b. **Cost & Expenses**

i. Operating Expenses which would include administrative and utility expenses are normally charged against the Common Use Service Area (CUSA) Fees or Association Dues being collected monthly to the individual tenants. However, there are instances when CUSA funds are insufficient to pay off all common charges. If and when this happens, the owners/administrators would have to pay off these expenses and this has been taken into consideration in the projections.

ii. Operating Costs and Expenses are assumed to be an average of approximately 16% of the Total Net Revenues. Operating costs and expenses included are basically divided in to two – real estate expense and general administrative expenses. Real Estate expenses are as follows: contracted services, repairs & maintenance, management fee and loss from CUSA and miscellaneous expenses. While under General Administrative Expense are – salaries & wages, taxes and licenses, advertising & promotions, commission, insurance, communication, rent expense, supplies, travel & transportation, and representation & entertainment expenses.

These expenses are projected either as a percentage of the rental revenues or the total net revenues. These percentage allocations were from the historical and projected performance of the Property.

iii. Annual Capital Expenditures (CAPEX) for the entire cashflow period, on the other hand, was assumed to be 1.5% of the Net Leasing Revenues. This assumption is based on benchmarking and analysis of current market practice in allocating CAPEX reserve.

This allocation would help ensure that the Property would operate efficiently and maintain its good and sound condition.

Resulting Market Value

a. Earnings Before Income Tax, Depreciation and Amortization (EBITDA) for the whole duration of the cashflow shall be discounted at the derived Discount Rate of 9.00%.

b. The sum of discounted cashflows including the Terminal Value of the Property represents the Market Value of the Property.

The Terminal Value of the Property is the value of the property beyond the explicit forecast period. It is assumed that the property or business will continue to generate cashflows in perpetuity. As mentioned earlier, Terminal Capitalization Rate used is 4.5%.

The Discounted Cashflow showing the estimated Market Value of the subject Property is attached as Appendix **6**.

Direct Capitalization Method

4.35 The Direct Capitalization Method is a real estate valuation method that helps convert a single year's income into value by dividing the Net Operating Income with an appropriate Capitalization Rate. This method assumes that the Property has a stabilized net operating income. All parameters of a typical investor return expectations are represented either explicitly or implicitly in either income forecast or the capitalization rate. The direct capitalization rate, as the ratio of income to value, serves as a proxy for investor return assumptions.

Resulting Market Value

4.36 We made use of the single year's cashflow projection (2022) to derive the Market Value using the Direct Capitalization Method. Capitalization rate adopted to arrive at the Property Market Value is 4.5%.

Valuation basis

Market Value

4.37 Market Value is defined in the 2019 **International Valuation Standards** as:

"The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

Valuation date

Valuation date

4.38 The valuation date is **30 June 2021**.

General Assumptions

Assumptions

4.39 Our valuation is necessarily based on a number of assumptions which have been drawn to your attention in our General Terms of Business, Letter of Engagement and within this report.

Key Assumptions

4.40 Whilst we have not provided a summary of all these assumptions here, we would in particular draw your attention to a key assumption that we relied on a very considerable extent on the information provided by the Client and have assumed that documents provided to us such as gross floor area tabulation, floor plans, lot area allocation, building tenancies and other relevant matters are factual. We were also advised by the Client that no material facts have been omitted from the information provided.

Special Assumption

4.41 We were instructed to re-value the Property without a re-inspection. We have, thus, considered changes to the physical attributes and/or characteristics of the Property which have occurred between the valuation date and the date of our previous valuation as confirmed by the Client. We have no reason to doubt the truth and accuracy of the information. We were also advised that no material facts have been omitted from the information provided.

4.42 We have adopted the floor area details provided to us by the client and have assumed these to be accurate.

4.43 We were not provided with a Lot Plan where Robinsons Cybergate Tower 3 is erected. For purposes of this valuation, the land is assumed to be rectangular in shape.

4.44 For the Machinery & Equipment servicing the building, we have made the following assumptions -

We have not carried out a full mechanical survey, or structural test, nor have inspected the machinery and equipment, which are covered, unexposed or inaccessible. Our assessment is based on the premised that the items are in a condition commensurate with age and usage.

Machinery & Equipment associated with the supply of services to the building such as Elevators, Air Conditioning Systems are valued on the assumption that they are permanently installed or attached to the building.

4.45 In applying Income Approach to value, we have considerably relied on the information provided to us by the Client which includes the following: lease contracts, revenue and expense projections, historical and projected occupancies. Upon expiration of contracts, we estimated the lease rates based on the acceptable escalations in the market.

4.46 Given the 99-year leasehold, we assumed that the Property is comparable to a freehold property given the duration of the leasehold interest on the Property. Thus, a terminal value of the Property was computed at the end of the cashflow.

Valuation Results

Leasehold Value 4.47 The Leasehold Value of the Property is estimated at: **PhP1,995,000,000**.

Market Value Using Income Approach 4.48 Using the **Income Approach** on the other hand, the Market Value of the Property is estimated as follows:

DCF Analysis	**PhP7,873,000,000**
Direct Capitalization Method	**PhP9,364,000,000**

Calculation 4.49 We attach a copy of our valuation calculations for the Income Approach at Appendix **6** and **7**.

Comments 4.50 The values arrived at using the Income Approach are noted to be higher than the value arrived at using the Cost Approach. This is because, unlike the Income Approach, the Cost Approach does not capture the income potential of the Property.

4.51 For purposes of this valuation, we deemed it appropriate to adopt the results arrived at by the Income Approach – DCF Analysis, since this method is usually used to determine the value of an income-generating property, as it also captures the Property's future economic benefits, giving a better representation of the Property's Market Value at an acceptable rate of return that would compensate for the risks associated with the particular investment. It likewise takes into consideration market cycles that Direct Capitalization Method cannot capture.

Conclusion of Value 4.52 In conclusion, we are of the opinion that the Market Value of the Property, reckoned as of **30 June 2021**, is:

PhP7,873,000,000 (SEVEN BILLION, EIGHT HUNDRED SEVENTY-THREE MILLION PHILIPPINE PESOS).

***Note**: The outbreak of the Novel Coronavirus (COVID-19), declared by the World Health Organization as a "Global Pandemic" on 11th March 2020, has impacted global financial markets. Travel restrictions have been implemented by many countries. In the Philippines, market activity is being impacted in all sectors. As at the valuation date, we consider that we can attach less weight to previous market evidence for comparison purposes, to inform opinions of value. Indeed, the current response to COVID-19 means that we are faced with an unprecedented set of circumstances on which to base a judgement. Our valuation is therefore reported on the basis of "material valuation uncertainty" per IVS 103 of the International Valuation Standards. Consequently, less certainty – and a higher degree of caution – should be attached to our valuation than would normally be the case. Given the unknown future impact that COVID-19 might have on the real estate market, we recommend that you keep the valuation of this property under frequent review.*

Value forwarded ……………………………….PhP7,873,000,000

Appendix 1 - Assumptions, Limiting Conditions and Disclaimers

Basis of Value	Our valuation is made on the basis of **Market Value** which is defined under IVS 2019 as "the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion." In this definition, it is assumed that any transaction shall be based on cash or its equivalent consideration. Our valuation has been made on the assumption that the owner sells the Property on the open market without the benefit of a deferred terms contract, leaseback, joint venture, management agreement or any similar arrangement which would affect the value of the Property. It is further assumed that title to the property is good, marketable and free from liens and encumbrances, and that fee simple ownership is transferable. The values shall be free and clear of all mortgages, without regard to VAT payments, gains taxes, transfer taxes, recording fees, etc. and expressed in the local currency (PhP). No allowances are to be made for any disposal costs or liabilities, or for taxation upon sale.
Property Rights appraised	The rights appraised in this report are the property rights in fee simple, free and clear. "Fee simple" is defined as absolute ownership, without limitations to any particular class of heirs or restrictions, but subject to the limitations of eminent domain, escheat, police power and taxation. We assume that the fee simple interest is marketable and in compliance with the applicable laws of the Philippines.
Fractional Interests:	When the study contains a valuation relating to an estate in land that is less than the whole fee simple estate, the value reported for such estate relates to a fractional interest only in the real estate involved, and the value of this fractional interest plus the value of all other fractional interests may or may not equal the value of the entire fee simple estate which is considered the whole. When the valuation report contains an allocation of the total valuation between land and building improvements, such allocation applies only under the existing program of utilization. The separate valuations for land and building cannot be used in conjunction with any other valuation/appraisal and will be invalid if so used.
Assumptions:	The valuation is based on the condition of the economy and the purchasing power of the Philippine Peso as of the effective date of valuation. We have assumed that the floor areas provided us have been calculated in accordance with engineering standards, and assumed herein to be true and correct. Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.
Information Supplied By Others	Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser. Information provided by informed local sources, such as government agencies, financial institutions, Realtors, buyers, seller and others, was weighed in the light in which it was supplied and checked by secondary means; however, no responsibility is assumed for possible misinformation.
Legal Issues:	This valuation assumes no responsibility for the validity of legal matters affecting the property. The ownership history reported in this valuation is based on the appraiser's research of public records, which are assumed to be accurate and complete. It is not the intent of the valuation to offer a legal opinion of title. It is further assumed that the property has good title, responsible ownership and competent management. Any liens or encumbrances which may now exist have been disregarded. The appraiser is not required to give testimony or attendance in court by reason of this valuation, with reference to the property in question, unless arrangements have been previously made.
Liability:	The liability of Santos Knight Frank, Inc. and its directors and employees is limited to the addressee of this report only. No accountability, obligation or liability to any third party is accepted. In the event we are subject to any liability in connection with this engagement, regardless of legal theory advanced, such liability will be limited to the amount of fees we received for this engagement.
Environmental Conditions:	It is assumed that there is full compliance with all applicable Philippine environmental regulations and laws unless non-compliance is stated, defined, and considered in this appraisal report.
Town Planning:	It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.
Condition of Improvements:	We have inspected the improvements and structures. However we have not carried out a structural survey nor tested any of the services or facilities, nor have we inspected unexposed or inaccessible portions of the building, and are therefore unable to state that these are free from defect, rot, infestation, asbestos or other hazardous material. We have therefore, viewed the general state of repair of the property and advise that we did not notice any obvious signs of structural defect or dilapidations. Furthermore, the property appears to be in reasonable condition having regard to its age and use and unless otherwise stated. We also assume that the building complies with all relevant statutory requirements in respect of matters such as sanitary, building and fire safety regulations and standards.
Valuation Methodology:	In estimating Fair Value for financial reporting purposes, we still adopted the same Valuation techniques by using any one or the combination of the three (3) Approaches to Value, namely: Market Data (or Direct Sales Comparison) Approach, Cost Approach, and the Income Approach. Briefly described, the Market Data (or Sales Comparison) Approach considers prices recently paid and/or offered for similar items of property with adjustments made to the indicated market prices to reflect the condition and utility of the appraised property relative to market comparatives. The Cost Approach considers the cost to reproduce or replace the property appraised with new assets of like kind, and from this amount an allowance is deducted for depreciation arising from physical deterioration or obsolescence, whether from functional or external causes. In the Income Approach, an estimate is made of the prospective economic benefits of ownership into the future and these benefits are discounted to its present worth or capitalized into an indication of value.
Others:	This report and valuation shall be used only in its entirety and no part shall be used without the whole report. It may not be used for any purpose other than the intended purpose mentioned herein. Possession of this report or any copy thereof does not carry with it the right of copying or publication. All copies will originate from Santos Knight Frank, Inc. and will be signed and dated as such. Neither the whole nor any part of the report or any reference to our name, our valuation and our report may be included in any document, circular or statement nor published without our prior written consent to the form and context in which it may appear. The delivery and acceptance of this report completes this assignment.

ROBINSONS LAND CORPORATION
43rd Floor, Robinsons Equitable Tower
ADB Avenue corner Poveda Street
Ortigas Center, Pasig City

Attention: **MR. FREDERICK D. GO**
President and Chief Executive Officer

Subject: **Terms of Engagement for Valuation Services**

Dear Mr. Go:

Thank you for your interest in our Valuation Services. We refer to your invitation of 03 August 2020 requesting Santos Knight Frank, Inc. ("SKF") to submit a proposal for valuation (the "Valuation") in respect of the properties detailed below (the "Properties").

This proposal, together with our General Terms of Business for Valuation Services ("General Terms"), sets out our terms of engagement for carrying out this instruction. Once agreed and signed, this proposal shall constitute our Letter of Engagement ("Letter"). This Letter and the General Terms (together, the "Agreement") exclude any other terms which are not specifically agreed to us in writing. To the extent that there is any inconsistency between the Letter and the General Terms, this Letter shall take precedence.

1. **Client**

   Our Client for this Valuation is Robinsons Land Corporation (the "Client", "you" or "your").

2. **Purpose of Valuation**

   The Valuation is provided solely the purpose of transferring some of the Client's assets to the REIT Company and its application for a Tax-Free Exchange Ruling with the Bureau of Internal Revenue and listing of the REIT Company in the Philippine Stock Exchange (the "Transaction"). Specifically, the Valuation will be used for the Client's Financial Statements to be attached to the Offering Circular as required by the Securities and Exchange Commission (SEC) and will be attached as an appendix to the Client's REIT Plan. In accordance with clause 4.1 of our General Terms, the Valuation may not be used for any other purpose without our express written consent. The Valuation will be made accessible in the public domain as part of the regulatory requirements of the Transaction.

3. **Term & Termination**

   This appointment will commence upon signing of this Agreement and shall continue to be in effect for a period of two (2) years. Any extension of the Term of this Agreement shall be mutually agreed upon by the parties in writing.

23. **Electronic Communication**

During the engagement, both parties may wish to communicate electronically with each other. However, electronic transmission of information cannot be guaranteed to be secure or virus-or error-free and information could be intercepted, corrupted, lost or destroyed, arrive late or incomplete, or otherwise be adversely affected or unsafe to use. Both parties agree to accept these risks and so each party will be responsible for protecting its own systems and interests in relation to electronic communications. Neither party will have any liability to the other party on any basis for any loss or damage arising from or in connection with the electronic communication of information between both parties or their reliance on such information.

24. **Acceptance**

Please sign and return a copy of this Letter signifying your acceptance of the terms of the Agreement. We reserve the right to withhold any Valuation and / or refrain from discussing it with you until this Letter has been countersigned and returned.

Your attention is drawn to the "Important Notice" in the General Terms. If you have any questions regarding this Letter and / or the terms of the Agreement, please let us know before signing this Letter.

Thank you for choosing Santos Knight Frank, Inc. and we look forward to working with you on this important engagement.

Sincerely,
SANTOS KNIGHT FRANK, INC.

Attention: **MR. FREDERICK D. GO**
President and Chief Executive Officer

Subject: **Amendment to Terms of Engagement and General Terms of Business for Valuation Services Dated 03 August 2020 ("Amendment")**

Dear Mr. Go:

We refer to subject Letter of Engagement and General Terms of Business for Valuation Services (together, the "Agreement") between Robinsons Land Corporation (the "Client", "you" or "your") and Santos Knight Frank, Inc. ("SKF") for the valuation of fourteen (14) office buildings (the "Covered Properties").

For this purpose, the Agreement is amended as follows:

The first, second, and third and fourth paragraphs shall now read:

For the Valuation

I. Valuation for Asset Transfer to REIT Company and its application for a Tax-Free Exchange Ruling:

For Valuation Update

II. Valuation of Properties for REIT listing to PSE:
Our Valuation of 14 Properties will be as follows:
1. Valuation for 4 Properties
2. Periodic Update of 14 Properties
Under REIT Company (Quarterly basis – optional)
3. Valuation Update of 14 Properties under REIT Company

Except as amended hereby, all the provisions of the Agreement which are not inconsistent herewith are incorporated herein by way of reference and from date hereof, the Agreement and this Amendment shall be read as one integrated document.

Kindly affix your signature on the conforme portion below and return one (1) original signed copy to us.

Sincerely,	Approved and agreed to by:

Proposal for Valuation Service: **ROBINSONS LAND CORPORATION**

Appendix 3 - General Terms of Business

General Terms of Business for Valuation Services

These General Terms of Business (the "**General Terms**") and our Letter of Engagement (the "**Letter**"), together form the agreement between you and us (the "**Agreement**"). References to "**you**", "**your**" etc. are to persons or entities who are our client and, without prejudice to clauses 3 and 4 below, to any persons purporting to rely on our Valuation.

Unless **the** context otherwise requires, all other terms and expressions used but not defined herein shall have the meaning ascribed to them in the Letter.

When used herein or in the Letter, the term "**Valuation**" shall mean any valuation report, advance report, supplementary report or subsequent/update report, produced pursuant to our engagement and any other replies or information we produce in respect of any such report and/or any relevant property. Any words following the terms "**including**", "**in particular**" or any similar expression shall be construed as illustrative and shall not limit the sense of the words preceding those terms.

All of the terms set out in these General Terms shall survive termination of the Agreement.

1. Santos Knight Frank, Inc.

1.1. Santos Knight Frank, Inc. ("**Santos Knight Frank**", "**our**", "**us**", "**we**") is a Philippine corporation with Securities and Exchange Commission (SEC) Registration Number A199818549.

1.2. Our registered office is at 10/F Ayala Tower & Exchange Plaza, Ayala Avenue, Makati City where a list of members may be inspected.

1.3. Any representative of Santos Knight Frank, Inc. described as *Director* is either a member or an employee of Santos Knight Frank, Inc. and is not a member of the Board of Directors. The term *Director* has been retained because it is an accepted way of referring to senior professionals. The term "**Santos Knight Frank Person**" shall, when used herein, mean any member, employee, or consultant of Santos Knight Frank, Inc.

1.4. Our Tax Identification Number (TIN) is 201-626-570-000.

1.5. The details of our professional indemnity insurance will be provided to you on request.

1.6. Santos Knight Frank, Inc., being a corporation, is regulated by the Philippine Securities and Exchange Commission (SEC). It is also an SEC-accredited asset valuer. In accordance with reportorial filings with the SEC, it may be necessary to disclose valuation files to them. By instructing us, you give us your permission to do so. Where possible we will give you prior notice before making any such disclosure, although, this may not always be possible. We will use reasonable endeavours to limit the scope of any such disclosure and to ensure any disclosed documents are kept confidential.

1.7. Valuations will be carried out in accordance with the 2019 edition of the International Valuation Standards (IVS) by valuers who conform to its requirements and with regard to relevant statutes or regulations. Our senior valuers are Real Estate Appraisers licensed and regulated by the Philippine Professional Regulation Commission (PRC).

2. Governing law and jurisdiction

2.1. The Agreement and any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with it or its subject matter or formation or any Valuation shall be governed by and construed in accordance with Philippine laws.

2.2. Philippine courts shall have exclusive jurisdiction to settle any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with this Agreement or its subject matter or formation or any Valuation. This will apply wherever the relevant property or the client, or any relevant third party, is located or the service is provided.

3. Limitations on liability

3.1. Subject to clause 3.7, our maximum total liability in connection with or arising out of this Agreement and/or its subject matter and/or the Valuation is limited to our total service fees as set out in the Letter.

3.2. Subject to clause 3.7, we will not be liable for any loss of profits or for indirect or consequential loss or damages.

3.3. Subject to clause 3.7, any limitation on our liability will apply however such liability is or would otherwise have been incurred, whether in contract, tort (including negligence), for breach of statutory duty, or otherwise.

3.4. Except as set out in clauses 3.5 and 4.7 and 4.8 below, no third party shall have any right to enforce any of the terms of this Agreement.

3.5. No claim arising out of or in connection with this Agreement may be brought against any Santos Knight Frank Person. Those individuals will not have a personal duty of care to you or any other person and any such claim for losses must be brought against Santos Knight Frank, Inc. Any Santos Knight Frank Person may enforce this clause but the terms of this Agreement may be varied by agreement between the client and Santos Knight Frank, Inc. at any time without the need for any Santos Knight Frank Person to consent.

3.6. No claim, action or proceedings arising out of or in connection with the Agreement and/or any Valuation shall be commenced against us after the expiry of the earlier of (a) two years from the Valuation Date (as set out in the relevant Valuation) or (b) any limitation period prescribed by law.

3.7. Whether or not specifically qualified by reference to this clause, nothing in the Agreement shall exclude or limit our liability in respect of fraud, or for death or personal injury caused by our negligence or negligence of those for whom we are responsible, or for any other liability to the extent that such liability may not be so excluded or limited as a matter of applicable law.

4. Purpose, reliance and disclosure

4.1. The Valuation is prepared and provided solely for the stated purpose. Unless expressly agreed by us in writing, it cannot be relied upon, and must not be used, for any other purpose and, subject to clause 3.7, we will not be liable for any such use.

4.2. Without prejudice to clause 4.1 above, the Valuation may only be relied on by our Client. Unless expressly agreed by us in writing the Valuation may not be relied on by any third party and we will not be liable for any such purported reliance.

4.3. Subject to clause 4.4 below and for the stated purpose, the Valuation is confidential to our Client and must not be disclosed, in whole or in part, to any third party without our express written consent (to be granted or withheld in our absolute discretion). No liability is accepted to any third party for the whole or any part of any Valuation disclosed in breach of this clause.

4.4. Our appraisers are not required to give testimony or attendance in court by reason of this Valuation with reference to the property in question, unless arrangements have been previously made.

4.5. Except for the stated purpose, neither the whole nor any part of the Valuation and/or any reference thereto may be included in any published document, circular or statement nor published in any way whatsoever whether in hard copy or electronically (including on any website) without our prior written consent and approval of the form and context in which it may appear.

4.6. Where permission is given for the publication of a Valuation, neither the whole nor any part thereof, nor any reference thereto, may be used in any publication or transaction that may have the effect of exposing us to liability for actual or alleged violations of SEC Memorandum Circular No. 2, series of 2014 (Guidelines on Asset Valuations) or Republic Act No. 8799 (Securities Regulation Code), as amended and its Implementing Rules and Regulations.

4.7. You agree that we, and/or any Santos Knight Frank Person, may be irreparably harmed by any breach of the terms of this clause 4 and that damages may not be an adequate remedy. Accordingly, you agree that we and/or any Santos Knight Frank Person may be entitled to the remedies of injunction or specific performance, or any other equitable relief, for any anticipated or actual breach of this clause 4.

4.8. You agree to indemnify and keep fully indemnified us, and each relevant Santos Knight Frank Person, from and against all liabilities, claims, costs (including legal and professional costs), expenses, damages and losses arising from or in connection with any breach of this clause 4 and/or from the actions or omissions of any person to whom you have disclosed (or otherwise caused to be made available) our Valuation otherwise than in accordance with this clause 4.

5. Knight Frank network

5.1. Santos Knight Frank, Inc. is a member of an international network of independent firms which may use the "Knight Frank" name and/or logos as part of their business name and operate in jurisdictions outside the Philippines (each such firm, an "**Associated Knight Frank Entity**").

5.2. Unless specifically agreed otherwise, in writing, between you and us: (i) no Associated Knight Frank Entity is our agent or has authority to enter into any legal relations and/or binding contracts on our behalf; and (ii) we will not supervise, monitor or be liable for any Associated Knight Frank Entity or for the work or actions or omissions of any Associated Knight Frank Entity, irrespective of whether we introduced the Associated Knight Frank Entity to you.

5.3. You are responsible for entering into your own agreement with any relevant Associated Knight Frank Entity.

5.4. This document has been originally prepared in the English language. If this document has been translated and to the extent there is any ambiguity between the English language version of this document and any translation thereof, the English language version as prepared by us shall take precedence.

6. Severance

If any provision of the Agreement is invalid, illegal or unenforceable, the parties shall negotiate in good faith to amend such provision so that, as amended, it is legal, valid and enforceable and, to the greatest extent possible, achieves the intended commercial result of the original provision. If express agreement regarding the modification or meaning or any provision affected by this clause is not reached, the provision shall be deemed modified to the minimum extent necessary to make it valid, legal and enforceable. If such modification is not possible, the relevant provision shall be deemed deleted. Any modification to or deletion of a provision under this clause shall not affect the validity and enforceability of the rest of this Agreement.

7. Entire agreement

7.1. The Agreement, together with any Valuation produced pursuant to it (the Agreement and such documents together, the "**Contractual Documents**") constitute the entire agreement between you and us and supersedes and extinguishes all previous agreements, promises, assurances, warranties, representations and understandings between you and us, whether written or oral, relating to its subject matter.

7.2. Subject to clause 3.7 above, you agree that in entering into the Agreement you do not rely on, and shall have no remedies in respect of, any statement, representation, assurance or warranty (whether made innocently or negligently) that is not expressly set out in the Contractual Documents. You further agree that you shall have no claim for innocent or negligent misrepresentation based on any statement set out in the Contractual Documents.

7.3. The Letter and these General Terms shall apply to and be incorporated in the contract between us and will prevail over any inconsistent terms or conditions contained or referred to in your communications or publications or which would otherwise be implied. Your standard terms and conditions (if any) shall not govern or be incorporated into the contract between us.

7.4. Subject to clause 3.7 and clause 6, no addition to, variation of, exclusion or attempted exclusion of any of the terms of the Contractual Documents will be valid or binding unless recorded in writing and signed by duly authorised representatives on behalf of the parties.

8. Assignment

8.1. You shall not assign, transfer, mortgage, charge, subcontract, declare a trust over or deal in any other manner with any of the rights and obligations under the Agreement without our prior written consent (such consent to be granted or withheld in our absolute discretion).

9. Force majeure

9.1. Neither party shall be in breach of this Agreement nor liable for delay in performing, or failure to perform, any of its obligations under this Agreement if such delay or failure results from events, circumstances or causeswhich could not be foreseen, or which, though foreseen, were inevitable.

10. Our fees

10.1. Without prejudice to clause 10.3 below, you become liable to pay our fees upon issuance of the Valuation. For the avoidance of doubt, unless expressly agreed otherwise in writing, the payment of our fees is not conditional on any other events or conditions precedent.

10.2. If any invoice remains unpaid after 30 days of the date on which it is presented, we reserve the right to charge interest, calculated daily, from the date when payment was due until payment is made at 3%

10.3. If we should find it necessary to use legal representatives or collection agents to recover monies due, you will be required to pay all costs and disbursements so incurred.

10.4. If an appraisal analysis is ordered and the assignment is cancelled before completion, we reserve the right to receive compensation, by way of damages, in an amount equal to 70% of the total fee for the assignment.

10.5. If you delay the instruction by more than 30 days or materially alter the instruction so that additional work is required at any stage or if

we are instructed to carry out additional work that we consider (in our reasonable opinion) to be either beyond the scope of providing the Valuation or to have been requested after we have finalised our Valuation (including, but not limited to, commenting on reports on title), we will charge additional fees for this work. Such additional fees will be calculated on the basis of a proportion of the total fee by reference to reasonable time and expenses incurred.

10.6. Where we agree to accept payment of our fees from a third party, such fees remain due from you until payment is received by us.

11. Anti-bribery and corruption and Anti-Money Laundering
We agree that throughout the term of our appointment we shall:

(a) comply with all applicable laws, statutes, regulations, and codes relating to anti-bribery and corruption and Anti-Money Laundering laws (the "**Relevant Requirements**");

(b) not engage in any activity, practice or conduct which would constitute an offense;

(c) maintain anti-bribery, anti-corruption, and anti-money laundering policies to comply with the Relevant Requirements and any best practice relating thereto; and

(d) promptly report to you any request or demand for any undue financial or other advantage of any kind in connection with the performance of our services to you.

12. Portfolios
Properties comprising a portfolio, unless specifically agreed with you otherwise, will be valued separately and upon the assumption that the properties have been marketed individually and in an orderly manner.

13. Land Register inspection and searches
We are not required to undertake searches, validations or inspections of any kind for title or price paid information in any publicly available land registry.

14. Title and burdens
We will assume, unless specifically informed and stated otherwise, that each property has good and marketable title and that all documentation is satisfactorily drawn and that there are no unusual outgoings, planning proposals, onerous restrictions or local authority intentions which affect the property, nor any material litigation pending.

15. Disposal costs and liabilities
No allowance is made in our Valuation for expenses of realisation or for taxation which may arise in the event of a disposal and our Valuation is expressed as exclusive of any VAT that may become chargeable. Properties are valued disregarding any mortgages or other charges, including commissions.

16. Sources of information
We rely upon the information provided to us by you, as to details of tenure and tenancies, planning consents and other relevant matters, as summarised in our Valuations. Legal descriptions, including leases, information, maps, signed or unsigned surveys, estimates and opinions furnished or made available to the appraiser and contained in this study were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy and legality of such items furnished can be assumed by the appraiser.

17. Identity of property to be valued
We will exercise reasonable care and skill (but will not have an absolute obligation to you) to ensure that the property, identified by the property address in your instructions, is the property inspected by us and contained within our valuation report. If there is ambiguity as to the property address, or the extent of the property to be valued, this should be drawn to our attention in your instructions or immediately upon receipt of our report.

18. Boundaries
Any maps or plot plans reproduced and included in the report are intended only for the purpose of showing spatial relationship. They are not necessarily measured surveys or measured maps, and we will not be responsible for topographic or surveying errors. The appraiser has made no survey of the property. No liability will be assumed for soil conditions, bearing capacity of the subsoil or for engineering matters related to proposed or existing structures.

19. Planning, highway and other statutory regulations
19.1. Enquiries of the relevant planning and highways authorities in respect to matters affecting properties, where considered appropriate, are normally only obtained from the corresponding government agency. We can only state whatever current conditions may be. We recommend that formal written enquiries should be undertaken by your lawyers who should also confirm the position with regard to any legal matters referred to in our Valuations.

19.2. It is assumed that all applicable zoning and use regulations have been complied with, unless a nonconformity is stated, defined and considered in the study. It is also assumed that all required licenses, certificates of occupancy, consents, or other legislative, regulatory, or administrative authority from the Philippine government or private entity or organization have been or can be obtained or renewed for any use on which the value estimate contained in this study is based.

19.3. We assume that the premises comply with all relevant statutory requirements including environmental, building, fire, and sanitation regulations.

20. Property insurance
Our Valuation assumes that each property would, in all respects, be insurable against all identifiable risks.

21. Building areas and age
Where so instructed, areas provided from a quoted source will be relied upon. Any dimensions and areas measured on location or from plan/s are calculated and are quoted to a reasonable approximation, with reference to their source. Where the age of the building is estimated, this is for guidance only.

22. Structural condition
Building, structural and ground condition surveys are detailed investigations of the building, the structure, technical services and ground and soil conditions undertaken by specialist building surveyors or engineers and fall outside the normal scope of a valuation. Since we will not have carried out any of these investigations, we are unable to report that any property is free of any structural fault, rot, infestation or defects of any other nature, including inherent weaknesses due to the use in construction of deleterious materials. We do reflect the contents of any building survey report provided to us in advance, or any defects or items of disrepair of which we are advised or which we note during the course of our ocular inspections but otherwise assume properties to be free from defect.

23. Ground conditions
Unless informed otherwise in writing, we assume there to be no adverse ground or soil conditions and that the load bearing qualities of the sites of each property are sufficient to support the building constructed or to be constructed thereon.

24. Environmental issues

24.1. Investigations into environmental matters by suitably qualified environmental specialists would usually be commissioned by most responsible purchasers or chargees of higher value properties or where there was any reason to suspect contamination or a potential future liability. Furthermore, such investigation would be pursued to the point at which any inherent risk was identified and quantified before a purchase proceeded. Where we are provided with the conclusive results of such investigations, on which we are instructed to rely, these will be reflected in our Valuations with reference to the source and nature of the enquiries. We would endeavour to point out any obvious indications or occurrences known to us of harmful contamination encountered during the course of our valuation enquiries.

24.2. However, we are not environmental specialists and therefore we do not carry out any scientific investigations of sites or buildings to establish the existence or otherwise of any environmental contamination, nor do we undertake searches of public archives to seek evidence of past activities which might identify potential for contamination or any other environmental searches. If we are not provided with the results of appropriate investigations as outlined above and where there is no obvious indication of harmful contamination, our Valuation will be provided on the assumption that the relevant property is unaffected. Where we are informed that contamination is suspected or confirmed, but adequate investigation has not been carried out and made available to us, then the Valuation will be qualified only by reference to it.

25. Minerals, timber, airspace etc.

Unless specifically agreed otherwise in writing and so stated within the main body of the relevant Valuation, we do not value or attempt to value or take into account any potential income stream or other beneficial or detrimental effect or other factor relating to undiscovered or unquantified mineral deposits, timber, airspace, sub-ground space or any other matter which would not be openly known in the market and considered to have value.

26. Legal advice

26.1. We are appointed to provide valuation opinion(s) in accordance with our professional duties as Appraisers. The scope of our service is limited accordingly. The valuation assumes no responsibility for the validity of legal matters affecting the property. It is not the intent of the valuation to offer a legal opinion of title. Any liens or encumbrances which may now exist have been disregarded. We are not qualified legal practitioners and we do not provide legal advice and any statements made by us, or advice given, in a legal context should be construed accordingly.

26.2. Where appropriate we will liaise with your legal advisors. However, we accept no responsibility for any work carried out by them and we will not be liable for anything contained in legal documentation prepared by them.

26.3. Where we consider it is necessary for the provision of the Valuation and/or specifically agree to do so, and any additional fees we require for this work are agreed, we will read legal documents (including leases, licences etc.), however, (save for any comment concerning the impact of our interpretation of such documents on value) our interpretation of such documents cannot be relied upon to be legally correct. Where we do interpret legal documents, we will, for the purposes of providing our Valuation, assume our interpretation to be correct.

27. Loan security

Where instructed to comment on the suitability of property as a loan security we are only able to comment on any inherent property risk. Determination of the degree and adequacy of capital and income cover for loans is the responsibility of the lender having regard to the terms of the loan.

28. Build cost information

In the provision of valuation services we do not hold ourselves out to have expertise in assessing build costs. Where our instruction requires us to have regard to build cost information, for example in the valuation of properties with development potential, we strongly recommend that you supply us with build cost and other relevant information prepared by a suitably qualified construction cost professional, such as a quantity surveyor. The Valuation will be stated to have been arrived at in reliance upon the build cost information supplied to us by you. In the absence of any build cost information supplied to us, we may have regard to published build cost information. Build costs produced using this approach must be assumed to be unreliable or inaccurate; any reliance which can be placed upon our Valuation in these circumstances is severely restricted. Specialist professional advice on the build costs should be sought by you. If you subsequently obtain specialist build cost advice, we recommend that we are instructed to review our Valuation.

29. Reinstatement assessments

A reinstatement assessment for insurance purposes is a specialist service and we recommend that separate instructions are issued for this specific purpose. If an indication is required as a check against the adequacy of existing cover this should be requested and will be so stated in the body of the relevant Valuation. Any indication given is provided for guidance only and must not be relied upon as the basis for insurance cover. In any event, our reinstatement assessment should be compared with the owner's and if there is a material difference, then a full reinstatement valuation should be reconsidered.

30. Comparable evidence

Where comparable evidence information is included in our Valuation, this information is often based upon our oral enquiries and its accuracy cannot always be assured, or may be subject to undertakings as to confidentiality. However, such information would only be referred to where we had reason to believe it or where it was in accordance with our expectation. In addition, we have not inspected comparable properties.

31. Valuation bases

Valuations are carried out on a basis appropriate to the purpose for which they are intended and in accordance with the relevant definitions, commentary and assumptions. The basis of valuation will be agreed with you and specified in the Letter and in the relevant Valuation.

Important Notice

If you have any queries relating to this Agreement please let us know as soon as possible, and in any event before signing the Letter and/or giving us instructions to proceed.

Your instructions to proceed, preferably signing on the space provided for under the Letter, will constitute your acceptance to use our services on the terms of the Agreement.

Accordingly, our commencement of work pursuant to your instructions shall constitute acceptance of your offer and as such establish the contract between us on the terms of the Agreement.

INDEPENDENT AUDITOR'S REPORT ON EXAMINATION OF THE PROFIT FORECAST AND PROFIT PROJECTION

August 20, 2021

The Stockholders and the Board of Directors
RL Commercial REIT, Inc.
Level 2, Galleria Corporate Center, EDSA Cor. Ortigas Avenue
Quezon City, Metro Manila

Dear Sirs,

Independent Auditor's Report on the Profit Forecast for the four months financial period from September 1, 2021 to December 31, 2021 and the Profit Projection for the financial year ending December 31, 2022

This report has been prepared for inclusion in the real estate investment trust plan dated August 20, 2021 (the "REIT Plan") to be issued in connection with the primary offering of up to 3,342,864,000 common shares of RL Commercial REIT, Inc. (the "Company) at the offer price of ₱6.45 per share, with an over-allotment option of up to 305,103,000 common shares (the "**Offering**").

The Company is responsible for the preparation and presentation of the forecast and projected statements of comprehensive income and distribution of the Company for the four months financial period September 1, 2021 to December 31, 2021 (the "Profit Forecast") and for the financial year ending December 31, 2022 (the "Profit Projection"), as set out on page 92 of the REIT Plan, which have been prepared on the basis of the assumptions as set out on pages 93 to 99 of the REIT Plan.

We have examined the Profit Forecast and Profit Projection, excluding certain non-GAAP measures, their reconciliation, calculation and amounts such as Adjusted Funds from Operations, Offer Price, Net Operating Income and Capital Expenditure as set out on pages 92, 93, 98 and 99 of the REIT Plan which have been prepared on the basis of the assumptions as set out on pages 93 to 99 of the REIT Plan, in accordance with Philippine Standard on Assurance Engagements (PSAE) 3400, *The Examination of Prospective Financial Information*. The Company is solely responsible for the Profit Forecast and Profit Projection, including the assumptions set out on pages 93 to 99 of the REIT Plan on which they are based.

Profit Forecast

Based on our examination of the evidence supporting the assumptions, nothing has come to our attention which causes us to believe that these assumptions do not provide a reasonable basis for the Profit Forecast as described in the third paragraph of this report. Further, in our opinion, the Profit Forecast is properly prepared on the basis of the assumptions set out on pages 93 to 99 of the REIT Plan, is consistent with the accounting policies adopted by RLC REIT Properties as set out on pages F-82 to F-111 of the REIT Plan, except for investment properties which are accounted for under fair value method of accounting, and is presented in accordance with Philippine Financial Reporting Standards ("PFRSs").

Profit Projection

The Profit Projection is intended to show a possible outcome based on the stated assumptions. As the length of the period covered by the Profit Projection extends beyond the period covered by the Profit Forecast, the assumptions used in the Profit Projection (which included hypothetical assumptions about future events which may not necessarily occur) are more subjective than would be appropriate for the Profit Forecast. The Profit Projection does not therefore constitute a profit forecast.

Based on our examination of the evidence supporting the assumptions, nothing has come to our attention which causes us to believe that these assumptions do not provide a reasonable basis for the Profit Projection as described in the third paragraph of this report. Further, in our opinion, the Profit Projection, is properly prepared on the basis of the assumptions as set out in pages 93 to 99 of the REIT Plan, is consistent with the accounting policies adopted by RLC REIT Properties as set out on pages F-82 to F-111 of the REIT Plan, except for investment properties which are accounted for under fair value method of accounting, and is presented in accordance with PFRSs.

Events and circumstances frequently do not occur as expected. Even if the events anticipated under the hypothetical assumptions described in the REIT Plan occur, actual results are still likely to be different from the Profit Forecast and Profit Projection since other anticipated events frequently do not occur as expected and the variation may be material. The actual results may therefore differ materially from those forecasted and projected. For these reasons, we do not express any opinion as to the possibility of achievement of the Profit Forecast and the Profit Projection.

Attention is drawn to the risk factors set out on pages 28 to 54 of the REIT Plan which describe the principal risks associated with the Offering to which the Profit Forecast and the Profit Projection relate and the sensitivity analysis of the Profit Forecast and the Profit Projection as set out on pages 99 to 100 of the REIT Plan.
